

- Notes
- This survey has been computed and drawn using Ordnance Survey national grid Co-ordinates.
  - All levels are in metres and relate to Ordnance Datum. With levels fixed via GPS link to Leica Smartnet Network, Station 01 has an accuracy value of 214.75m.
  - This survey was surveyed for a scale of 1:200, any subsequent enlargements should be verified on site.
  - Whilst every care has been taken, no responsibility can be accepted for errors or omissions caused by detail obscured or not accessible at the time of this survey.
  - Tree Canopy lines and species identification are indicative. Trees under 100mm trunk do not surveyed.
  - Boundary treatments shown on this survey represent physical boundaries found on site and do not necessarily represent the legal boundary position.
  - Surrounding buildings are indicated using data collected and as viewed from the site. This may not represent the actual footprint at ground level and must be checked using an OS overlay if critical to the scheme.
  - All dimensions to be checked on site prior to any work taking place.
  - Many sloped areas heavily overgrown. No Survey access possible.

Legend

|      |                                 |
