1. Project Background

[REDACTED]

2. Service Requirements

SAS requires assistance to ‘take stock’ of its achievements and challenges to date, its role and to develop a vision and strategy for the future, covering the next 2 years to 5 years. This should include:

- a concise summary of SAS’s key achievements against the stated aims, incl. any additional achievements that go above and beyond the original stated intent. The summary should also state challenges
- Development of the future vision including a high level view of the future state of SAS, incl. a description of how this will interact and fit in with the Portfolios and other DDAT functions.
- High level plans to implement the future vision.

3. Scope of Service

The scope of services outlines the activities the Supplier will undertake under this SoW and the role the Supplier will play. The Supplier will undertake the delivery of these outcomes, in whole, or in part, in a multi-disciplinary / multi-vendor environment with multiple parties (other delivery teams) taking responsibility (through identification of dependencies). The Buyer will take accountability for end-to-end delivery using the outcomes delivered via this service.

The Supplier will deliver the outcomes agreed with the Buyer, to a schedule set out by the Buyer, with changes to scope/plan being managed in an Agile manner, all within the boundaries of the SOW value and pricing mechanisms.

The Buyer requests assistance with the provision of SAS Future State document that reviews the progress made to date and the future vision for SAS over the next 2 to 5 years, covering the three focus areas:

1. High level review of the **current (As-Is) operating practice**, strategy and plans for the SAS function with the aim of setting out the facts associated with what it has achieved and how it works **“myth buster”** / an objective review – as part of this the Supplier should also identify opportunities for the future improvements and optimisations.

- 2. Develop the high-level **‘vision’ for the future** – engaging with the DDaT Director group – with the aim of aligning around a common set of goals and objectives.
- 3. Define the **Future Model** for SAS and outline the plan to implement it in the wider context including factor such as CS talent development and recruitment

4. **Supplier Delivery Response**

Our approach is as follows:

- 1. Current state assessment: Desktop review and assessment of the SAS function/unit, to understanding operating practice and understand key achievements to date:

 - [Redacted]
- 2. Future state assessment: Support to develop a 2-5 year strategy for the SAS function:
