2. MVP Delivery - Work Products

As part of the Project, the following work products (“**Work Products**”) will be created and delivered by the Supplier to the Buyer (for the avoidance of doubt, these are not Deliverables subject to acceptance criteria and the provision to the Supplier of the Buyer approval):

Phase	Work Product	Description	Format

3. MVP Delivery – Deliverables & Acceptance Criteria

As part of the Project, the following deliverables ("**Deliverables**") will be created and delivered by the Supplier to the Buyer:

3.1. Document Deliverables – Buyer Acceptance

The acceptance criteria for a Document Deliverable shall be it:

- Is clearly written, in language that appropriately skilled readers, who will need to refer to the document, ought reasonably to be able to understand;
- Is complete, with an appropriate level of detail and any relevant cross-references; and
- Has no obvious errors of spelling, grammar, numbering or order, or duplications.

Acceptance procedure

The following describes the acceptance procedure for a Document Deliverable:

The Supplier shall deliver a document Deliverable to the Buyer and notify the Buyer that the document is ready for review (email is acceptable).

The Buyer shall review a document Deliverable within five (5) days of submission against the applicable acceptance criteria, and where it conforms with the acceptance criteria notify the Supplier in writing within five (5) business days from the date the document Deliverable is delivered.

If the Buyer notifies the Supplier that a document Deliverable does not conform to the applicable acceptance criteria, the Supplier will have five (5) business days to determine in good faith whether a non-conformity exists, and, if so, to correct the non-conformity and redeliver the document Deliverable to the Buyer for further acceptance testing. The maximum number of reviews and correction cycles is two (2).

The Buyer shall be deemed to have accepted a Document Deliverable if:

The Buyer makes any use of the applicable Document Deliverable in live operational use (except for the purposes of UAT and non-production training of its own staff); or

The Buyer does not notify the Supplier of any non-conformity in relation to the applicable Document Deliverable by the end of the five (5) business days.

3.2. Code Deliverables - Buyer Acceptance

Acceptance criteria

- All Severity 1 [Critical] and Severity 2 [High] Defects are closed within the agreed UAT Period; and
- There is a work-around or mitigation plan for any remaining open Severity 3 [Medium] severity Defects.
- Defects Severity Classification and Definitions

The Defects Severity classifications and definitions are as follows:

Defect Classification	Severity	Functional Defect Definition	Visual Defect Definition	Infrastructure Defect Definition	Defect
		(referred to as a "Defect")			
Severity 1 [Critical]		The Deliverable cannot function at all, e.g. the defect causes system crashes or data corruption and the defect is a severe malfunction against functionality for which there is no workaround.	The Deliverable's presentation layer, i.e. the user interface, contains an immediately noticeable defect that severely affects the system's usability and breaks the fundamentals of PowerBI Report (e.g. incorrect colour or font usage on key controls and design elements, missing user interface controls which result in inability to complete a user journey, non-adherence to responsive layout definitions, pixelated iconography).	The Deliverable cannot function at all, e.g. the defect causes system unavailability or crashes or data corruption, or the defect has a severe impact for which there is no workaround, e.g. unable to navigate away from the Defect to another screen, or the Deliverable cannot be implemented until the Defect fixed or a hotfix is required to resolve the Defect.	
Severity 2 [High]		The Deliverable as a whole can function but the defect is a malfunction against functionality, which is functioning grossly away from expected behaviour, and for which there is no workaround.	The Deliverable's presentation layer, i.e. the user interface, contains a conspicuous system-wide defect that is noticeable to an untrained eye (i.e. not a visual or user interface designer) that does not impede usability, but is inconsistent with the PowerBI Report (e.g. inconsistencies in font sizes or design elements and effects such as drop shadows or key lines; inconsistent sizing or styling of buttons and drop-downs or inconsistent spacing between elements or poor cropping of images in responsive layouts).	The Deliverable as a whole can function but the defect prevents a major function from being used. There is no workaround.	
Severity 3 [Medium]		The defect does not prevent the Deliverable from operating, but it does not operate as it should. Processing can continue as data availability and quality are not affected. The defect has an agreed work around or mitigation plan.	The Deliverable's presentation layer, i.e. the user interface, contains a defect that is noticeable on close inspection to a trained eye (i.e. a visual or user interface designer) that does not affect the solution's usability or overall visual integrity, but is inconsistent with the PowerBI Report (e.g. incorrect colour for minor controls or design elements	The Deliverable as a whole can function but the Defect prevents a major function from being used. There is an agreed workaround or mitigation plan.	

		such as links, missing control states such as hover on minor elements, inconspicuous spacing or padding inconsistencies between elements or lines).	
Severity 4 [Low]	The defect has no functional impact. It does not even need a workaround. It does not impact productivity or efficiency. It is merely an inconvenience.	The Deliverable's presentation layer, i.e. the user interface, contains a superficial defect that is an inconsistency with the Power BI Report but only noticeable on close inspection to a trained eye (i.e. a visual or user interface designer) at pixel level.	The Deliverable as a whole can function and the Defect does not prevent a major function from being used. There is an agreed workaround or mitigation plan.

3.3. UAT - Buyer Acceptance

Acceptance procedure

The following describes the UAT procedure for a Deliverable:

The Supplier shall notify the Buyer when the Deliverable is ready for UAT. The Buyer shall give The Supplier reasonable advance written notice of the commencement of UAT Period per the Project plan.

The UAT period is five (5) business days (the “**UAT Period**”). The UAT Period for the Deliverable commences immediately after deployment into the UAT environment.

The Buyer acknowledges and agrees that planning of the UAT Period is based on reasonable time allocations for the running of the test cases or scripts, review of Defects by the parties, and The Supplier's resolution of Defects.

The Buyer will, per the agreed Project plan, in advance of commencing UAT, prepare UAT test cases or scripts, and agree their content with the Supplier, which is based on testing functionality defined in either the accepted functional design document or detailed business requirements, as applicable.

The Buyer shall perform UAT using the UAT test cases or scripts. The test results will be recorded the same day by the Buyer. The Buyer shall make the test results available to the Supplier within one (1) business day in Microsoft Azure DevOps (“**Azure DevOps**”) or another mutually agreed mechanism (e.g. Excel and send by email).

Upon the Buyer making the test results available, the parties shall agree the numerical Severity classification of the Defect for resolution purposes.

Where a Defect prevents the Buyer from continuing UAT for that part of the Deliverable, then by agreement the UAT Period maybe extended in order for The Supplier to correct such failure and allow UAT to resume.

The Supplier shall use its reasonable commercial efforts to remedy such failure by provision of software fixes. The Supplier shall record the actions taken by it in relation to resolution of a Defect.

The Buyer shall promptly, upon the Supplier complying with its remedial obligations, repeat the specific UAT test cases or scripts in relation to Severity 1 [Critical] and Severity 2 [High] Defects which have previously failed. Once the failures have been corrected, the Buyer shall then accept the Deliverable.

The Buyer shall accept the Deliverable by providing written acceptance that it has passed UAT.

Where the above has not been satisfied, the Buyer shall be deemed to have accepted the Deliverable if:

The Buyer makes any use of the Deliverable (except for the purposes of UAT and non-production training of its personnel); or

The Buyer or any third party makes any unauthorized modifications to the Deliverable; or

The Buyer has not notified the Supplier of any Defect in relation to UAT for the Deliverable by the end of the UAT Period.
