ISSUE: 001

Table of Contents

Annex H.....	1
1.1 Site Plan	3
1.2 Image - Roller Access Door	4
1.3 Image - View of alcove that is the intended space to position the goods lift	5
1.4 Image - View looking upwards inside of alcove space.	6
1.5 Image - General view of alcove space from entrance level position.....	7
1.6 Image - Showing upper area of alcove where it meets mezzanine floor level.....	8

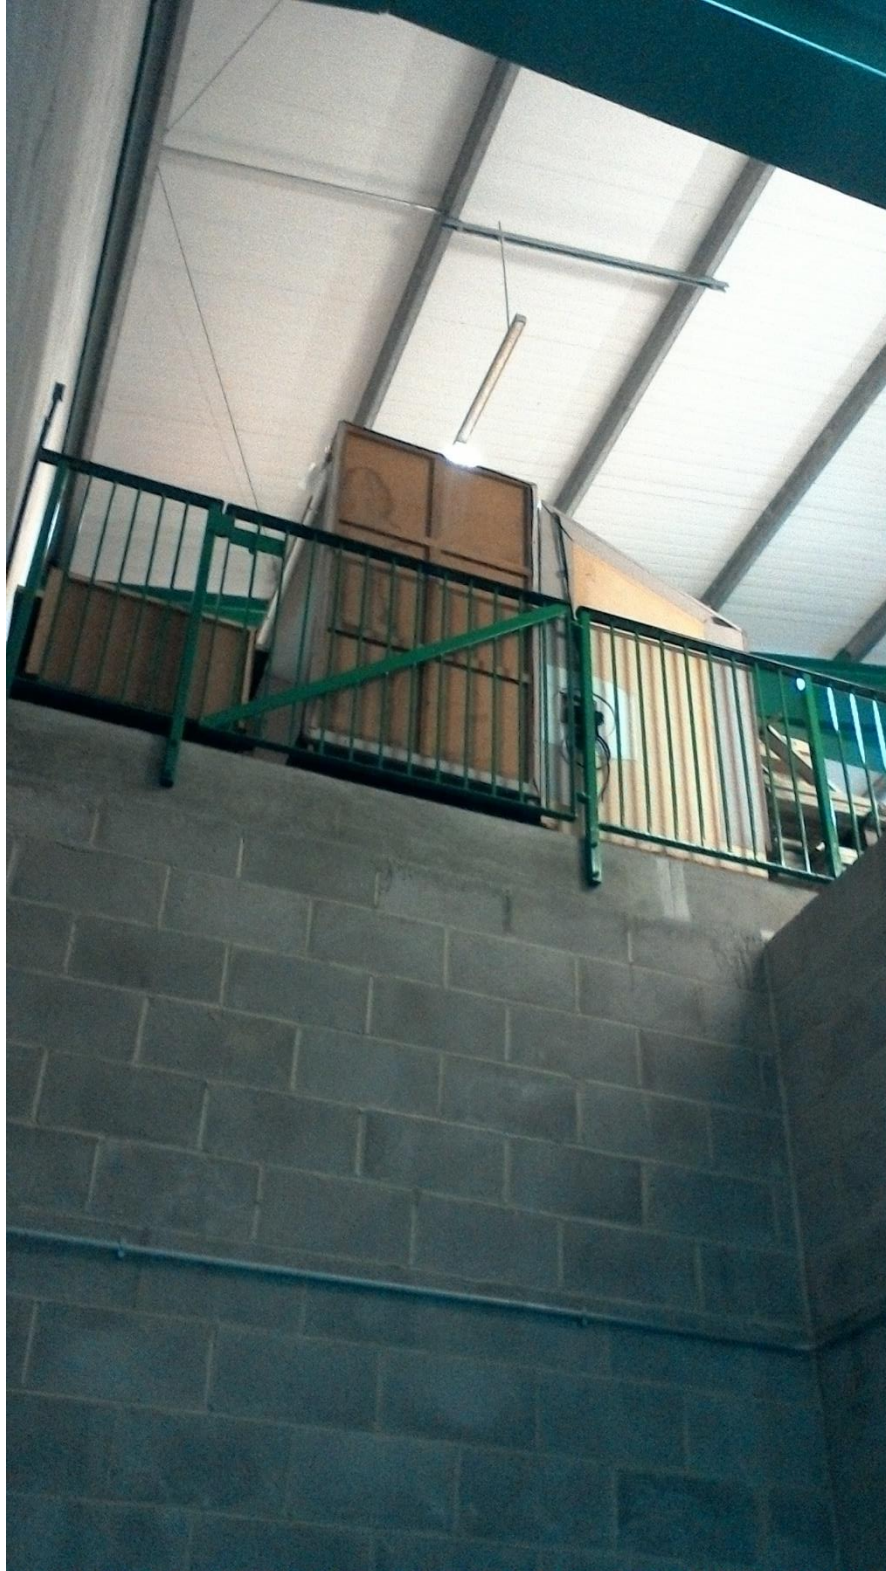

1.2 View of roller shutter access door into storage building approx. measurements 3800mm wide x 4800mm tall. Space outside of doorway is open concrete hard standing.

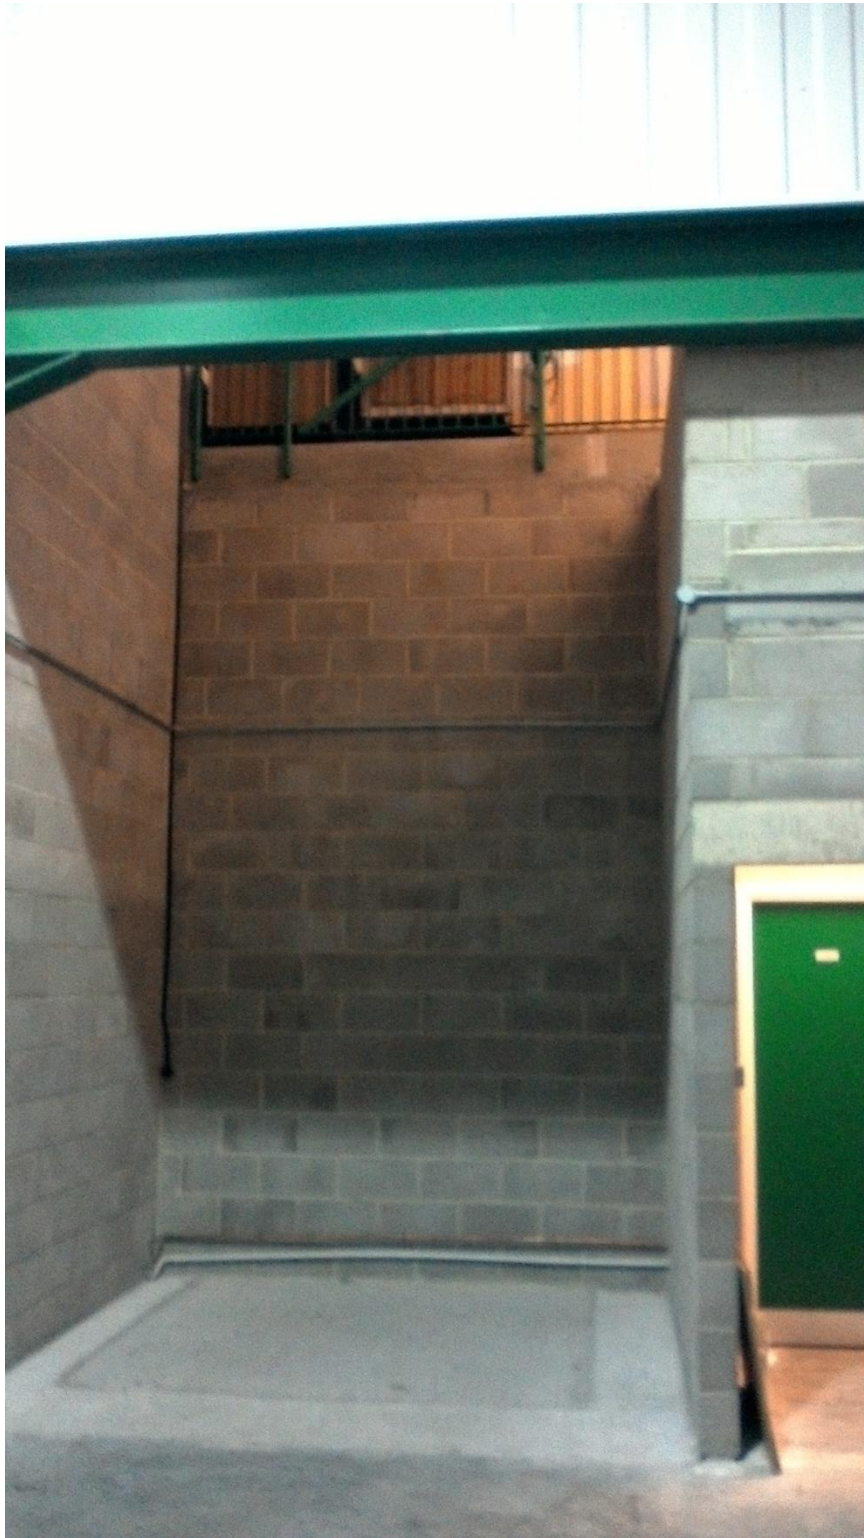

1.3 - View of alcove that is the intended space to position the goods lift. Approx. measurements shown 2800mm wide x 2700mm deep (front to back) by 4800mm high from floor to Mezzanine level. Measurements are approximate and contractor must check and satisfy themselves of their own detailed measurements as appropriate.

1.4 - View looking upwards inside of alcove space.

1.5 - General view of alcove space from entrance level position.

1.6 - Image showing upper area of alcove where it meets mezzanine floor level. Image gives an indication of headroom above the mezzanine floor level and also shows the balustrade that currently exists on the mezzanine, that will need to be altered to interface with the installation of a goods lift.
