SCHEDULE ONE**1 BACKGROUND**

14.6% of the school population in England are identified as having SEN, with 2.9% having complex or high-level needs.¹ Outcomes for these pupils are poor: there is a wide gap in the headline attainment indicators between those with and those without SEN at all key stages², and pupils with SEN are significantly more likely to be excluded from school³, to be NEET⁴, and to realise worse labour market outcomes than those without SEN⁵. However, there is currently little evidence to indicate why this is the case or how outcomes vary with different types of provision.

This lack of evidence is directly linked to a further evidence gap around the value for money of provision for pupils with SEN. The costs of provision for those with SEN can vary greatly, and yet we do not currently have robust evidence to help us assess whether or how spend is related to particular outcomes, or whether certain types of provision are better than others in supporting pupils with SEN.

SEN Futures, a multi-faceted programme of research recently launched by the Department, will aim to improve the evidence base around children and young people with SEN in England. A proposed value for money (VfM) study represents one strand of the SEN Futures programme. If commissioned, this work would seek to:

- Provide information on the cost difference between a mainstream placement and placements in other types of SEN setting for pupils with Education, Health and Care (EHC) plans⁶, for a given type of SEN.
- Determine the extent to which the outcomes of pupils with EHC plans depend on type of setting attended, once type of SEN, demographic characteristics and other relevant factors have been controlled for.
- Compare the costs and pupil outcomes associated with different types of provision in order to make an assessment of the relative value for money offered by different types of SEN setting.

There are, however, a number of uncertainties regarding the extent to which these aims can be achieved. The information that it will be possible to obtain for each of the elements above will ultimately determine the form and design of any potential value for money study, with future research on this strand of SEN Futures dependent on whether it is possible to assess

⁶ Where historical data is used, this will also include pupils with statements of SEN

value for money robustly.

The Department has therefore procured this **feasibility study** to provide information on a range of questions related to assessing the value for money offered by different types of SEN setting. The primary output for this feasibility study is a set of recommendations to inform the design of a potential future value for money study by the Department.

2 AIM

The Contractor shall use all reasonable endeavours to achieve the following aims:

- Determine whether such a value for money study is feasible given the quality, availability, and validity of data on setting type, outcomes, and cost,
- Understand what needs to be done to gather and analyse the data required for such a study, including cost data at local authority level and what method might be employed to do this,
- Provide recommendations for potential risks and challenges in conducting such a study,
- Determine the most applicable approach for conducting the Value for Money study given the available data.

3 OBJECTIVES

The Contractor shall use all reasonable endeavours to achieve the following objectives:

- Map out the method by which cost information can be collected from local authorities and settings, the level of detail at which it will be possible to collect data and the limitations of available data,
- Detail the data available for determining the causal effect of SEN setting type on pupil outcomes, how this relationship could be estimated and monetised and the pupil outcomes it will be possible to do this for,
- Outline the most applicable approach for comparing costs and pupil outcomes to determine the value for money of school-age and post-16 settings to pupils with EHC plans.

5 METHODOLOGY

- Initial project scoping:
 - Agree and confirm key project objectives, proposed project methodology, existing work in this area, key outputs and deadlines,
 - Review and amend the Contractor's proposed case-study materials and approach as per the agreed scope of the project
- Field work with LAs and settings types:
 - Undertake [REDACTED] workshops with LAs to understand how they manage and store their SEN finance and EHCP data, including pain point and opportunities for improvement,
 - During these case study workshops, identify cost information on SEN settings and individuals; create local stakeholder map of holders and creators of cost information; understand whether costs are defined consistently across LAs and settings,
 - Create a typology of different LAs which will inform the typical challenges and data quality issues that different authorities are likely to face,
 - Create, issue and process responses from an online survey issued to 152 upper-tier authorities regarding the information LAs hold on the cost of different types of SEN provision for pupils with EHC plans, its limitations, and whether the cost is defined consistently across the LAs and settings,
 - Carry out telephone interviews with LAs to understand in detail more specific issues, differences and trends highlighted by the survey regarding cost by type of SEN provision for pupils with EHCPs, how data on cost and individual plans is captured, stored and used,
 - Carry out telephone interviews with SEN provision settings to design a survey that can be issued to all settings in in case study LAs,

- Create, issue and process responses from an online survey issued to all settings in the LA that have taken part in the 8 case studies, to understand the feasibility of collecting per-pupil cost data by type of need, and whether cost is defined consistently across LA and setting types;
- Review available evidence and data sources to determine which outcome measures are best fit for undertaking the value for money assessment:
 - Running in parallel to the field work, conduct a review of academic and government literature; describe and test methods for estimating the effects of different types of setting and different provision spend on pupil outcomes controlling for confounding factors (to be identified in the research),
 - Review existing literature and methodologies on VFM analysis and test their ability to explain the relationship between SEN settings and pupil outcomes; identify data limitations; identify characteristics that allow outcomes to be monetised,
- Building on the findings of the field work phase and outcomes analyses, review methodologies for creating an appropriate Value for Money measure for settings that combines the outcomes data with relative cost, and recommend the most appropriate approach for undertaking the SEN Futures Value for Money study.

9 DATA COLLECTION

The Department seeks to minimise the burdens on Schools, Children's Services and Local

Authorities (LAs) taking part in surveys.

When assessing the relative merits of data collection methods the following issues should be considered;

- only data essential to the project shall be collected;
- data should be collected electronically where appropriate/preferred;
- questionnaires should be pre-populated wherever possible and appropriate;
- schools must be given at least four working weeks to respond to the exercise from the date they receive the request; and
- LAs should receive at least two weeks, unless they need to approach schools in which case they too should receive 4 weeks to respond;

The Contractor shall clear any data collection tools with the Department before engaging in field work.

The Contractor shall check with the Department whether any of the information that they are requesting can be provided centrally from information already held.

10. CONSENT ARRANGEMENTS

The Department and the contractor shall agree in advance of any survey activity taking place the consent arrangements that shall apply for each of the participant groups. All participants should be informed of the purpose of the research, that the Contractor is acting on behalf of the Department and that they have the option to refuse to participate (opt out). Contact details should be provided including a contact person at the Department. Children who are 16 or over will usually be able to give their own consent but even where this is so, the Contractor, in consultation with the Department, should consider whether it is also appropriate for parents, guardians or other appropriate gatekeepers (e.g. schools, Local Authorities) to be informed when a child has been invited to participate in research.

11. PROJECT COMMUNICATION PLAN

The Contractor shall work with the Project Manager and Steering Group to agree the content of the Project Communication Plan on the standard Department Communication Plan Template at the start of the Project, and to review and update at agreed key points in the Project and at the close of the Project. The Communication Plan shall set out the key audiences for the Project, all outputs intended for publication from the Project, the likely impact of each output, and dissemination plans to facilitate effective use by the key audiences.
