23 The processes that apply to this Contract are:

Contractor Representative

Name: Andrew Dollin

Email: Andy.Dollin@TonicAnalytics.com

The Contractor shall notify the Authority if their representative changes to allow any requests from the Authority to be dealt with promptly.

Key Subcontractors

The Contractor has advised that the following key sub-contractors will be used in delivery of this contract:

Name	Work Undertaken	Approximate Value
N/A	N/A	N/A

The Contractor shall notify the Authority when they intend to remove any Key Subcontractors and/or before engaging any new Key Subcontractors.

If the Contractor is using a Sub-Contractor in order to meet any deliverables and they cease working with that Sub-Contractor, for any reason, the Contractor will still be responsible for meeting those deliverables.

Payment

Payments will only be made following delivery of goods or completion of services.

In relation to previous clauses regarding payment, Supplier on-boarding for CP&F shall include completing the full MOD registration process in Exostar and an invoice shall only be valid if it has been submitted for the correct amount and tax treatment in Exostar.

The Contractor shall confirm the amount they consider to be due for payment, for any month or period, within 31 calendar days of the end of that month or period and shall submit invoices through CP&F/Exostar no later than 7 calendar days after that payment amount has been confirmed, unless otherwise agreed. All final amounts due under the contract must be confirmed by the Contractor within 31 calendar days of the end date of the contract, unless otherwise agreed.

The Contractor shall provide a full breakdown of any amounts invoiced, to show how the invoices have been calculated in accordance with the agreed prices, should the Authority request this at any time.

Impediments

The Contractor shall notify the Authority as soon as they become aware of any circumstance which will impact on their ability to deliver any of the requirements or meet any of the stated timescales.

Tender Proposal

Requirements to be delivered in accordance with this contract and, where it does not conflict with this contract, in line with proposal included in tender.

Delivery Management

A date for delivery of goods or completion of each service will be stated in the contract or agreed between the Authority and the Contractor. Where this is not met by the Contractor, goods are not delivered or services are not completed, until after any stated or agreed date (unless the Authority accepts that circumstances were outside of the control of the Contractor), the Authority reserves the right to deduct 1% of the payment due for those goods or services for each week or portion of a week that passes before goods are delivered the services are completed.

Where the Contractor is required to provide information, reports or attend meetings in order to support delivery and management of the contract but does not meet those requirements by any required dates (unless the Authority accepts that circumstances were outside of the control of the Contractor), the Authority reserves the right to deduct 5% of the next payment that becomes due for each week or portion of a week that passes before the Contractor meets those requirements.

If, at any time, any of the goods or services provided under the Contract do not meet the required delivery timescales, standards or quality, then the Authority will not be obligated to buy any more goods or services unless it is satisfied that the required timescale, standard or quality will be met. The Authority shall be entitled to remove those goods or services from the Contract. Where this occurs on multiple occasions the Authority shall be entitled to terminate the contract as Material Breach.

Where the Contractor is unable to deliver the required goods/services within agreed timescales, the Authority shall be entitled to procure those goods/services from other providers and shall be entitled to cancel any orders that have been made with the Contractor with no costs or fees incurred by the Authority in relation to those goods/services that the Contractor was unable to provide on time.

If the Authority is able to procure goods/services, which are similar to those listed in this contract, at significantly lower prices than

those listed in this Contract then the Authority shall be entitled to ask the Contractor to provide a reduced price and/or shall be entitled to procure those goods/services from other providers.

If, in order to deliver the goods/services, the Contractor sources anything through their supply chain subcontractors they shall not charge any additional mark up, on those costs they have paid, when calculating prices to be charged to the Authority.

Exit

At the end of the contract, if required, the Contractor shall support the transfer of any or all of the requirements back to the Authority or to any other Authority Contractor.

The Contractor accepts that during any period of transition of the requirements back to the Authority or to any other Authority Contractor, the number of goods or services required under this Contract may be reduced.

The Contractor shall provide an Exit Plan, if requested, to detail how they will manage and support transfer of any or all of the requirements to back to the Authority or to any other Authority Contractor.

Schedule 4 - Statement of Requirements

Background.

1. The Wildcat helicopter fleet has an embodied Health and Usage Monitoring System (HUMS) which utilises vibration sensors to record the vibration levels in the aircraft gearboxes, drive train, engines and rotor systems. The embodied HUMS processes raw vibration signals to generate Condition Indicators (CIs) which are indicative of the health of all gears, bearings and shafts within the monitored systems. Analysis and trending of the CIs provides information relating to component wear and damage.
2. A HUMS alerting mechanism is implemented on a ground support system, using a combination of fixed and on aircraft learned thresholds. High vibration events are identified by a threshold exceedance which is then investigated and monitored by aircraft maintainers. Each aircraft generates data for circa 400 CIs which makes manual analysis and aircraft monitoring highly challenging, especially on a fleetwide basis.
3. While existing automated alerts can be highly effective in detecting certain fault conditions, this approach can be less effective at alerting for other subtle, potentially rapidly progressing faults. This is where the complimentary approach of Anomaly Detection is beneficial. Through the use of an Anomaly Detection algorithm, which compares the behaviour of each individual component CI with a Model of Normality (MoN) generated from fleetwide recorded, rapidly developing fault conditions may be identified before component failure and before an exceedance alert is triggered.
4. A previous tender was let by Navy Command Commercial for the initial phase of work which took an initial Navy Command Programme Nelson generated Anomaly Detection algorithm (2019) and incorporated it into a software application that is useable by front line aircraft engineers.
5. The successful bidder was Tonic Analytics which delivered a web based system to MOD which utilises Machine Learning and Artificial Intelligence to identify components for close monitoring and investigation where they may be damaged, subject to wear or developing faults.
6. The limitation of the delivered capability is that it only provides monitoring for of the Wildcat Intermediate Gearbox (IGB) as per the proof of concept work by Programme Nelson.
7. The next stage of this project seeks to enhance the delivered capability to enable AD to be applied to all Wildcat HUMS monitored components. This will enable informed monitoring and fault management using other established methods such as Wear Debris Analysis (WDA) and Lubricating Oil Analysis.

Requirement.

8. Tonic Analytics has developed and demonstrated some updates to the existing system. This requirement is to issue a new contract tender to deploy updates to the provided software by extending the component coverage of the system to include all gears and bearings within the Main Rotor Gearbox, Tail Rotor Gearbox and

Drive Shafts. Additionally, the update is to include an enhanced AI machine learning analytic and automated alerting capability.

9. Other available updates developed and demonstrated by Tonic Analytics include extension to cover aircraft rotors and airframe CIs, Prescriptive alerts and Digital Twin situational awareness. These are not included in this requirement but may be subject to a future requirement.

Description of Work.

10. Deploy an enhanced AI machine learning analytic to address and rectify shortfalls and assumptions made by Programme Nelson during the initial proof of concept work.
11. Deploy an update to extend coverage the existing system for Wildcat beyond the existing IGB implementation to include MGB, TGB and Drive Shafts
12. Deploy an update to the existing system to introduce an automated anomaly detection alerting capability within the app for all Wildcat components covered by the system as described above.

Deliverables.

13. Updates to the previously delivered anomaly detection system software and analytics are to be deployed at 1710 to support the items described above.
14. System to fully function on Wildcat HMA Mk2 and AH2 initially with future capability for additional airframe types to be incorporated.

Contract Start Date and Duration.

15. The contract should start as soon as possible however no later than end Q1 2025 to enable completion and delivery within the current Financial Year (FY24-25)

Security Considerations.

16. Data accessible to company will be at Official level. Any Official sensitive data will be sanitised prior to providing it to the company. Company when working on MOD property will be under escorted visitor passes. Unit Security Officer aware of project.

Other Considerations.

17. All Foreground Intellectual Property rights for the solution should be retained by the MOD.

Government Furnished Equipment/Information (GFE/GFI).

18. Contracted company will have supervised access to data and SME support as required. 1710 will make available all required data feeds for the successful deployment of the updates at 1710.
