

- **Above right:** Turbo Disc on Safagrass impact absorbent surface
- **Above left:** mini-slide 2.5m long x 1m wide set on new grass mound with integral timber access platform at top. Safagrass surface at base and sleeper steps to sides, to prevent surface erosion
- **Far left, top:** single cradle seat swing on Robinia timber posts, on Safagrass surface
- **Far left, centre:** two play-houses in Siberian Larch timber, on bark chip surface
- **Far left, bottom:** Basket Swing on Safagrass surface
- **Left:** proposed balance trail set slightly uphill on approach to Slopes, alongside scrub / woodland edge, consisting of three linked items, on grass
 - **Top:** thick balancing rope with high level cable for hand-holds
 - **Centre:** tall Robinia timber stilts with high level hand-holds
 - **Bottom:** Wobbly Bridge stepping logs at entry to trail
- **Left, below:** Play tower with high level platform, ladder for access up and fireman's pole for down / out, on Safagrass surface

St. James's Park, Shaftesbury: landscape and Play Works

Younger Play Space (Site A): proposed play equipment

July 2022 Dwg.ref. 298 Photo Sheet 1

Top left

Existing ball play area to be repaved and a new timber rebound wall and goal mouth constructed to the north-east corner. New wearing course to existing worn tarmac surface.

Bottom left

Treble set of Pull-up bars installed on the grass under the trees and just off the new accessible path, on Safagrass impact absorbent surface (rubber tiles which allow the grass to grow through).

Top right

Hammock installed within group of Cherry trees on sloping ground to north of ball play area, suspended between two trees using non-intrusive fixing method developed by the Forestry Commission. Bark chip impact absorbent surface to ground below.

Bottom right

Tractor Tyre cantilever style swing on Safagrass impact absorbent surface
