SCHEDULE ONE**1 BACKGROUND**

As part of the Curriculum Fund, the Department for Education has set up the curriculum programme pilot, a £2.4m grant of which is allocated to piloting complete curriculum programmes. Complete curriculum programmes are complete packages of resources that teachers need to deliver a National Curriculum subject across a key stage. They include a long-term plan, with content and knowledge sequenced carefully, as well as all the resources and training required for teachers to deliver individual lessons. These curriculum programmes are knowledge-rich, and have teacher-led instruction and whole-class teaching approaches at their core. The pilots will take place in the 2018/19 academic year over two school terms. Funding is available to pilot curriculum programmes in science, history and/or geography at Key Stages 2 and/or 3.

The department has selected 12 lead schools to fund to test and refine their curriculum programmes. Each lead school will have to recruit at least six participant schools in which to test their curriculum programmes, as a condition of the application process. We therefore anticipate a total of 60 – 90 schools taking part in the pilot, which need to meet specific criteria set out in the grant specification to ensure a diversity of schools in terms of disadvantage catchment and Ofsted inspection grade. The majority of lead schools will be piloting 1 curriculum programme with a small number piloting 2 programmes.

An external steering group is being set up to oversee both the research and the pilot itself.

2 AIM

The Contractor shall use all reasonable endeavours to achieve the following aims:

To develop the current evidence base in order to understand:

- The benefits that complete curriculum programmes have, including how they can improve pupil outcomes and reduce teacher workload
- How they can be effectively shared and implemented between a wide range of schools.

3 OBJECTIVES

The Contractor shall use all reasonable endeavours to achieve the following objectives:

- Investigate pedagogical fidelity in how complete curriculum programmes are taught in participant schools and what factors affect this
- Investigate which implementation models for complete curriculum programmes work best, in which contexts and identify any barriers to implementation
- Investigate how useful teachers find the curriculum programme materials and the reasons for this

- Investigate how teachers perceive the current and future implications for both teacher workload, and pupil progress and engagement

4 TASKS

Work package 1: Design and preparation

Project inception: The contractor shall meet with the DfE Project Steering Group to finalise and agree the project brief, review the curriculum programme applications, and agree timescales and reporting arrangements.

Desk review: The contractor shall conduct an initial review of the successful curriculum programme bids at the outset of the project to understand the curriculum programme pilot activity, such as the curriculum programme models, partnership arrangements, process for testing and refining the programmes and collating evidence of how well they work. The contractor will also review exemplars of curriculum materials and resources used by the lead schools to familiarise themselves with these prior to interviews with the lead schools and later fieldwork. The Department will share the above materials with the contractors for their review.

Liaison and initial interviews with lead schools: The contractor shall conduct telephone interviews with the project lead at all lead schools. The purpose of the interviews will be to explore their approach to implementing their curriculum programme and to discuss with the project lead the monitoring data they are using.

The Department shall provide contact details for participating schools and teachers. The contractor's survey manager will provide additional support in collating any missing contact details for the selected sample and incorrect/out-of-date details via telephone and web searching. If needed details of the participating schools and teachers will be confirmed with the project leads from the lead schools.

Project brief: The contractor shall design a project brief to be distributed to all lead and partner schools in the early stages of the research. This will clearly set out expectations of all parties and key timescales for the research to ensure their clarity from the outset.

Research tool design: The contractor will design data collection tools and questions in close partnership with DfE. The questions/topic guides will be designed to be open and allow the flexibility to be tailored based on the needs and projects for each school. The Department will provide comments on draft data collection tools before finalisation. To ensure the burden on individuals is minimised the contractor shall tailor questions to the different stakeholders interviewed (project leads, senior leaders, teachers etc.). Should interview time be limited with some staff, the contractor will use priority questions areas only in these cases. The contractor shall write up notes after each interview and all interviews will be voice recorded for quality assurance.

The contractor shall design the online survey to contain primarily closed responses to simplify completion and minimise time spent completing the survey, and to allow analysis of findings across key variables (e.g. programme type/model, subject area, key stage).

The contractor shall draw on their previous research on teacher workload and use and perceptions of curriculum resources to ensure the aims and objectives are covered. The

contractor shall design the topic guides and surveys to address the objectives set out in section 3.

Collation and review of monitoring data: The Department of Education will provide the contractor with the latest monitoring data and KPIs (where they have been developed) from each school upon request. The information will be collated and reviewed across all lead schools to provide initial baselines on current pupil outcomes and teacher workload. If KPIs are not available, success measures and any data indicating potential for change to be evidenced will be collated.

Work package 2: Online Survey

The contractor shall conduct an online survey using a two-stage process to collate evidence of change in perception and in pupil outcomes and teacher workload. Due to the staggered start of lead schools within the pilot, each survey will be split across two time periods

- **A baseline survey** (March & May 2019) – will focus on early implementation of the curriculum programme, gathering the current status on workload and outcomes
- **A follow-up survey** (June & September 2019) – capturing progress in implementation, fidelity of usage, perceptions of effects on workload, pupil progress and engagement

The Department will provide the sample details at a school and individual teacher level for all those involved in the curriculum programme pilot, allowing the contractor at both stages to send the survey directly to the teachers involved in the pilot.

The contractor shall email an introductory letter to each Headteacher (at the lead and participating schools) outlining the purpose, aims and approach for the survey and including the project brief at the outset. Contractor contact details will be provided for any questions.

The contractor shall generate a URL link from SNAP Professional software, which will then be emailed to each Headteacher, and the teachers involved in the pilot. For convenience and to help to meet response targets, the contractor shall make the survey available via telephone, email and paper-based methods where these are preferred. The contractor shall design separate surveys for the lead and partner schools.

Sampling frame: The contractor will send the baseline and follow-up survey to all lead and partner schools. The contractor will aim for a 60% response rate to the surveys at both round 1 and 2. The contractor will monitor responses to ensure that they are collecting a representative number of responses across curriculum programmes, schools and teachers. The contractor will aim to achieve a response from four teachers at each participating school. Responses will be monitored as follows:

Table 1 – Curriculum, school and teacher variables

Curriculum programme level	School level	Teacher level
Key stage Subject	Phase School type (maintained, academy, free school, member of MAT/Federation) Ofsted rating Disadvantage (pupil premium, FSM)	Year group Staff level Career experience & subject Subject specialist/non-subject specialist

Piloting: The contractor shall test the survey at both stages via a soft launch where the surveys will be distributed to a small sample of school contacts (approx. 5-10%). The questionnaire design will be reviewed for length/completion time, routing and quality of responses and amendments made accordingly.

Maximising the response rate: The contractor will aim to achieve full engagement with the online surveys via a number of measures:

- Allocating sampled schools to dedicated researchers
- Keeping the surveys as short as possible
- Offering completion via multiple means – online, email, telephone, electronic options and compatibility with mobile devices
- Offering out of hours completion - at the convenience of respondents if responding online or via mobile device and we can complete out of hours telephone interviews/surveys

Work package 3 - In-depth semi-structured interviews

The contractor will conduct two stages of telephone interviews with lead schools and partners schools. Due to the staggered start of lead schools within the pilot, each round will be split across two time periods. The first round of these will be conducted in March/April 2019 and April/May 2019. The second round will be conducted in June/July 2019 and October/November 2019. The contractor will endeavour to arrange the depth interviews at the most convenient times for participants which could be during the day, evening or weekend.

Sample frame: Ten lead schools will be selected for involvement in the telephone interviews (using the sample framework below). The schools to be included will be agreed between the contractor and the Department and will include schools covering a range of different curriculum programmes.

The sample will be weighted towards round 2 of the research. This will allow a greater amount of evidence to be collected further into the implementation stage, which should yield more in-depth information on implementation, fidelity and the potential impact of the curriculum programme pilot.

Table 2 below provides the split of interviews across the two rounds of the research. The contractor shall conduct approximately 120 interviews across both rounds of the research.

Table 2 – Interview breakdown

	Round 1 (Feb/March 19 & April/May 2019)	Round 2 (June/July 19 & October/November 2019)

Lead schools (interviews with 2 staff - project lead, other teachers involved)	4	6
Partner schools (interviews with 2-3 staff e.g. class teachers, subject/department lead).	20	30
Total schools	24	36
Approximate number of interviews (based on 2 per school)	48	72

In the selection of lead schools the contractor will monitor the same school variables set out in table 1. In the sampling of the four partner schools, linked to each lead school the contractor shall also ensure coverage across these variables. At a teacher level the contractor will ensure the sample of interviewees covers the teacher variables set out in table 1.

Interview piloting: The contractor will conduct a soft launch to trial the topic guide on the first five interviews. If any issues are identified, the contractor will make recommendations for changes to the research instruments.

Design: The contractor will design the interviews to be semi-structured qualitative discussions that can be tailored to the specific context of each school setting. The contractor will produce separate topic guides for lead schools and partner schools, senior leaders and teachers/middle leaders, reflecting their different roles within the pilot. The length of the interviews will vary by type of role:

- For those leading the pilots, the interview will last 45-60 minutes
- For teachers no longer than 45 minutes to minimise burden and time out of normal working activity.

Ethical protocols: The contractor shall ensure that fully informed consent is achieved when conducting all aspects of the research by providing information about the purpose of the research in advance. Participants will be informed that they have a right to withdraw at any time. The contractor shall ensure that their activities conform to the MRS and BERA ethical guidelines.

Work package 4: Focus groups

The overall aim of the focus groups is to bring together practitioners delivering the same subject curriculum programmes across multiple schools within a partnership. The contractor will conduct five focus groups at partner schools.

Recruitment: For each of the focus groups, the contractor will invite two teachers from 3-4 local partner schools to the host school (dependent on location to each other) to participate in a focus group. If appropriate, and if geography allows, the

contractor may invite teachers from a wider number of schools and run more than one focus group in a day. This will be agreed in advance with the department. If difficulties arise in recruiting for the focus groups the contractor and the Department will agree an alternative approach such as conducting online focus groups or further interviews.

Sample: The contractor shall invite teachers who have direct experience of implementing the curriculum materials and resources within their own school, alongside those that can provide a strategic perspective on the use of the curriculum resources; and whether this has been as was intended. The contractor will use the same sample frame as has been outlined for the telephone interviews to ensure coverage across a range of teachers, experiences, schools and curriculum programmes.

Design: The focus groups will last around 60 minutes. The contractor will focus the discussion on how curriculum programmes have been implemented within teachers own department/teaching, factors that have enabled or hindered implementation, whether they have made any adaptations and why, the usefulness and impact of the curriculum materials and resources.

Work package 5: Analysis

Quantitative data analysis: The contractor shall analyse survey data using SNAP Professional software, including production of frequencies and cross tabulations exploring variation by each respondent type, school type, school phase, region and other key variables (e.g. subject, key stage, subject specialist/non-subject specialist).

Collation and review of monitoring reports/KPIs: If the lead and partner schools have developed key indicators or outcomes measures to evidence the impact of the curriculum programme pilot the contractor will collate and review these at the start (see phase 1 for further details) and end of the research.

Qualitative analysis: The contractor will use a range of approaches to analyse the interview and focus group findings, including key-word coding and overarching thematic analysis to identify themes that relate to the overall objectives of the research. Qualitative evidence will be analysed using triangulation techniques across the different types of school (lead and participating), interviewee job roles (project lead, teachers, senior leader, middle leader, early career teacher/NQTs), type of curriculum programme (subject and key stage) and where possible across the different characteristics of the teachers and schools (e.g. school type, subject, area).

The contractor will ensure that all analysis is accessible and informative. Exemplars will be used where available, for example: small vignettes of how a school has used the curriculum programme resources in a particular subject, the usefulness of the materials and the perceived implications of use of teacher workload, pupil progress and engagement

Work package 6: Reporting

Interim: The contractor will produce interim findings that include emerging findings from the baseline survey fieldwork and some of the first round telephone interviews with schools. A second interim reporting point will be used to present findings that include the schools starting the pilot at the later point in April. Outputs will include a face-to-face presentation at the Department and two interim findings reports.

Final: The contractor will produce a final report including findings from all stages of the project. Outputs will include a face-to-face presentation at the Department, a PowerPoint presentation pack and a findings report.

For both stages of reporting the contractor shall undertake changes to the text of the report suggested by the Department unless these are factually incorrect. The contractor will work with the Department to ensure that the outputs meet the needs of the intended audiences by:

- sharing emerging findings prior to report writing, and discussing how to present these
- agreeing the specification for all outputs up-front (audience, style, length and structure)
- inviting comment on draft outputs

The contractor will produce the report in accordance with the DfE style and formatting guide.
