The contract shall commence on 26th August 2019 and shall end on 31st March 2021 with an option to extend for 3 further years on an annual basis until 31st March 2024.

All options to extend are dependant on budgetary approval. If these optional extensions are utilised, then the maximum value will be £10,000.00 PA, however these are not guaranteed at this stage.

2. Background to the Requirement

The International Energy Agency (IEA) works to ensure reliable, affordable and clean energy for its 29 member countries and beyond. Founded in 1974, the IEA was initially designed to help countries co-ordinate a collective response to major disruptions in the supply of oil such as the crisis of 1973/4. While this remains a key aspect of its work, the IEA has evolved and expanded. It is at the heart of global dialogue.

Technology Collaboration Programmes (TCPs) are Independent, International groups of experts that enable governments and industries from around the world to lead programmes and projects on a wide range of energy technologies and related issues. TCPs currently cover topics related to:

- Efficient end-use (buildings, electricity, industry, transport)
- Cleaner fossil fuels (greenhouse-gas mitigation, extraction, supply, transformation)
- Renewable energy and hydrogen (technologies and policies for deployment)
- Cross-cutting issues (modelling, technology transfer, project financing)
- Fusion power (safety, physics, materials, technologies).

The 6 000+ experts in the TCPs work to advance the research, development and commercialisation of energy technologies. The scope and strategy of each TCP is in keeping with the IEA Shared Goals of energy security, environmental protection and economic growth, as well as engagement worldwide. Depending on the TCP, activities may include:

- Basic and applied research, technology development and pilot plants
- Technology assessment, feasibility studies, environmental impact studies, market analysis and policy implications
- Information exchange of research results and programmes
- Scientist exchanges
- Databases, modelling and systems analysis
- Experts' networks.

The EBC programme is an international energy research and innovation programme in the field of buildings and communities. Current activities of the EBC programme are divided into 16 Annexes:

- **Annex 5** Air Infiltration and Ventilation Centre
- **Annex 65** Long Term Performance of Super-Insulating Materials in Building

- **Annex 67** Components and Systems Energy Flexible Buildings
- **Annex 68** Design and Operational Strategies for High IAQ in Low Energy Buildings
- **Annex 69** Strategy and Practice of Adaptive Thermal Comfort in Low Energy Buildings
- **Annex 70** Building Energy Epidemiology: Analysis of Real Building Energy Use at Scale
- **Annex 71** Building Energy Performance Assessment Based on In-situ Measurements
- **Annex 72** Assessing Life Cycle Related Environmental Impacts Caused by Buildings
- **Annex 73** Towards Net Zero Energy Public Resilient Communities
- **Annex 74** Competition and Living Lab Platform
- **Annex 75** Cost-effective Building Renovation at District Level Combining Energy Efficiency & Renewables
- **Annex 76** EBC Annex 76 / SHC Task 59 Deep Renovation of Historic Buildings Towards Lowest Possible Energy Demand and CO₂ Emissions
- **Annex 77** EBC Annex 77 / SHC Task 61 Integrated Solutions for Daylight and Electric Lighting
- **Annex 78** Supplementing Ventilation with Gas-phase Air Cleaning, Implementation and Energy Implications
- **Annex 79** Occupant-Centric Building Design and Operation
- **Annex 80** Resilient Cooling

More information on the EBC programme is available here <http://www.iea-ebc.org/>

More information on the IEA and the TCPs is available here <https://www.iea.org/tcp/> .

Each TCP typically has two delegates who represent each country at the Executive Committee, a primary delegate and an alternate delegate. Each TCP is its own entity and therefore have different methods for organising the activities. These activities however are broadly consistent across the TCPs.

In its role as the primary delegate in the EBC and TCP, BEIS would like to commission an alternate delegate to represent the UK alongside the primary BEIS delegate.

A named individual will be required for the role. This person may be part of a wider organisation, but the specific role of the alternate delegate cannot be shared between staff members of an organisation and cannot be transferred to another individual without prior permission from BEIS.

3. Aims & Objectives

The primary aims of this commission are to ensure:

- The UK takes an active role in participation, management and development of the EBC and the EBC's activities are beneficial to the UK.
- The activities of EBC are fully disseminated to relevant UK stakeholders, including government, industry and academic organisations.
- Joined-up activities across related TCPs to avoid duplication and maximise added-value through joint working.

Specific objectives required to fulfil these aims include:

- Participate in ExCo meetings (minimum 1 per year). The location of any future meetings is as yet unknown, but the Alternate Delegate should be prepared and eligible to travel worldwide.
- Participate in ad-hoc workshops and meetings as necessary, pursuant to the requirements of the ExCo.
- Provide expert review and comment for relevant documents and proposals outside of ExCo meetings, including review of new proposals.
- Where appropriate, investigate opportunities to link up with other related TCPs.
- Promote and disseminate EBC TCP activities.

4. Scope

In their role, the Alternate Delegate will have three primary areas of work, which are detailed below. Some of these tasks will be shared with the BEIS primary delegate, however the division of responsibilities will be determined with the BEIS delegate and the tasks below should therefore be considered a minimum requirement.

1. Executive Committee (Total time 5-7 days per annum)

- Participate in at least one ExCo meeting per year. These may be held in any country with a participating member; therefore, the successful individual should be prepared and eligible to travel anywhere worldwide. Each meeting typically lasts 2-3 days.
- Participate in other ad hoc workshops/meetings where necessary, as part of duties as an ExCo member (1-3 days per year).
- Provide expert review and comment on relevant TCP documents and proposals outside of ExCo meetings as and when required. (1-2 days per year)
- Where appropriate, investigate opportunities to link up with other related TCPs for joint activities.

2. UK National Team (Total time 6-8 days per annum)

For each TCP a group of interested parties for that particular field are brought together to form a National Team. This group does not need to be formalised but will provide active participation in the activities of the TCP, in particular research tasks or annexes. The group can include any interested parties e.g. manufacturers, researchers, government departments, trade bodies, consultancies etc. The tasks for the alternate delegate in regard to the National Team include:
