Schedule 1 Specification

CRM Procurement Proposal, March 2017

About the Healthwatch Network

Healthwatch England is the national consumer champion in health and care. We have significant statutory powers to ensure the voice of the consumer is strengthened and heard by those who commission, deliver and regulate health and social care services. We are the national body for the local Healthwatch network of 148 sites across England.

Where very important issues arise, advice is provided to the Secretary of State for Health, the Care Quality Commission, NHS England, NHS Improvement or local authorities in England. By law they have to respond publicly to advice from Healthwatch England.

In order that we can deliver our statutory functions, we will be continuing to roll out our CiviCRM system to the local Healthwatch network and developing our understanding of how to use local insight credibly and with influence. This is how we plan to make sure that we improve the experiences of people using health and social care services.

We have 3 priorities for 2016/17:

Priority one:

To provide leadership, support and advice to local Healthwatch to enable them to deliver their statutory activities and be a powerful advocate for services that work for people

Priority two:

Bringing the public's views to the heart of national decisions about the NHS and social care

Priority three:

To build and develop an effective learning and values based Healthwatch England

Outcomes

- We identify policies and programmes where Healthwatch evidence and insight can add value
- We see more partners using our insight and evidence to drive improvements in health and care
- We see an increase in public involvement in major health and social care reforms

Business Objectives

- Host, develop and continue to roll out a CRM for local Healthwatch

- **Deliver CRM training and support to local Healthwatch**
- **Review future CRM requirements and resourcing 2017-2020**

Project Background

The Customer Relationship Management (CRM) project was initiated in 2012. Following evaluation, the CiviCRM system was the choice selected by Healthwatch England, due to its flexibility, and being a secure, open source, web based system, developed for non-profit and third sector organisations. Our aim was to provide a CRM system that supports the common requirements of 148 local Healthwatch, whilst providing sufficient local customisation to accommodate each organisation's distinctiveness in approach and process. CiviCRM uses technology to organise, automate and synchronise service provision, as well as providing the capability to report against any of the datasets that the system holds.

We initially had a pilot group of 3, (Healthwatch England, Healthwatch Staffordshire & Healthwatch Bradford), when the project commenced with development of an "out of the box" product to meet the broadest cross section of Healthwatch needs. Throughout the process, any local Healthwatch interested in the CRM were invited to request a login and explore the demonstration system, giving unstructured feedback to the project team. Following take up of the demo site, it resulted in a final pilot group of 33. Due to the way the project was originally set up, we have been effectively running two separate projects; the pilot project and the rollout project, due to the pilot group making field changes on the system (which the rollout group were unable to do as the fields were subsequently locked down). This caused issues with upgrades crashing, and difficulty in installing developments to the affected sites. We have now rolled out the Enquiry Feedback wizard (where local Healthwatch capture their consumer feedback data that is then forwarded to Healthwatch England) to most sites which will rectify this issue although we are still working with a small number of pilot sites who have not opted to take up the Enquiry Feedback Wizard due to field flexibility issues (ie they are no longer able to add new fields when using the Wizard). We are working with those users to see how we can move them over to the Enquiry Feedback Wizard whilst still being able to capture the data they require.

In September 2015 we completed the pilot phase and rolled out the system to a further 44 (as per our agreement with the Department of Health), the "rollout phase". For the last 18 months we have been working to standardise the pilot sites and the rollout sites, working with the pilot sites to change fields back to the agreed common base (**Appendix G**), undertaking further site development and mapping across field changes. We have now moved most users onto the standardised system with only a few users still using their initial fields.

Stakeholders

The Healthwatch CiviCRM is currently used by over half the local Healthwatch network and we expect to have up to 87 users on board this year (2016-17). We still have considerable interest from the network who wish to take up the system as they are aware

of the security, reporting and intelligence gathering benefits. They are aware that the more local Healthwatch that use the system, the more powerful the intelligence gathering will be. We have also rolled out the system to Healthwatch England staff recently, to enable them to capture the intelligence they require from the Healthwatch network.

Information Capturing

The network users are aware of the benefits of the system which first and foremost is a secure portal to capture data. User access is restricted and the system is tested annually for security and cyber attacks to ensure robustness. It also provides local Healthwatch with a secure operations tool for managing day-to-day workflow and capturing consumer experience, which they do as part of their role to ensure any risks to consumers of health and social care services are highlighted. This information comes through to Healthwatch England via the data push system (see detail below) which informs on trends and themes in health and social care at a local level as well as engagement work being undertaken locally. Users are able to manage and report on contacts, enquiries, signposting and case information securely, as well as managing meetings, face to face engagement and reporting on consumer experiences. The system also enables them to produce surveys and newsletters, manage and measure the impact of activities and events as well as report on meeting attendance.

Services Required

Healthwatch England require a system to enable us to continue to discharge our statutory functions gathering information from local Healthwatch about peoples experiences of health and care services. Our requirements can be summarised under the following heading:

- Training

Training

The supplier must be able to deliver up to 24 new user training sessions across the Healthwatch network in England, comprising classroom based training.
