		<u>Total ex VAT</u>

Notes:
<p>Notes:</p> <p>New construction will be from 1220mmx2440mm (or smaller) panels made up of 145mmx45mm timber with 11mm OSB sheathing and PAR insulation already incorporated. The OSB is designed to lap over the adjacent panel to no sheathing will be required.</p> <p>These panels will sit on a primary sole plate to be set out by the project manager and fixed by contractors. Panels will require anchoring to sole plate and then a lapping top plate to be installed spanning the panels.</p> <p>All window, door and other joinery structural openings will be pre-configured into the panels.</p> <p>Roof components will also be precut, as a cut roof configuration not as trusses. All roof components will be supplied, though some cutting to fit of valley rafters may be necessary.</p> <p>A small mini crane will be available for the erection of the panels and movement of components up to the first floor. Once there the crane will be off-hired. Full scaffolding (3 lifts + apex) will be erected for the duration.</p>

The carpentry contractor will for the largest and longest serving and most versatile of the contractors on-site. Under the instruction of the project manager you may be required to complete small additional tasks, please include as a separate line item the cost for 10 many days of additional labour which could be drawn from (with written agreement) through the duration of the project.

The client will be supplying all materials, fixings and consumables. Your price must include the labour cost and provision for any tools (owned or hired) that you will require for the duration of the build.

The client will supply muck away & skip services through the project manager at your instruction.

Please note there are 2 separate structures, front & rear.

Please itemise the elements where possible, if that is not practical please include a total cost.

If you wish to omit a project element from the total cost please indicate this in the element cost section.
