### Introduction

Natural England is the government's advisor on the natural environment. We provide practical advice, grounded in science, on how best to safeguard England's natural wealth for the benefit of everyone. Our remit is to ensure sustainable stewardship of the land and sea so that people and nature can thrive. It is our responsibility to see that England's rich natural environment can adapt and survive intact for future generations to enjoy.

This survey will contribute to evidence gathering of the Highly Protected Marine Areas (HPMAs) pilot project. HPMAs are areas of the sea that allow for the protection and full recovery of marine ecosystems. By designating areas of sea with high levels of protection, HPMAs will allow nature to fully recover to a more natural state, allowing the ecosystem to thrive. They prohibit extractive, destructive and depositional uses, allowing only non-damaging levels of other activities to the extent permitted by international law. HPMAs will protect all species and habitats and associated ecosystem processes within the site boundary, including the seabed and water column. This means gathering comprehensive evidence of the effectiveness of the HPMA in delivering biodiversity recovery will be critical.

The ecological monitoring of this Defra-funded programme will be led by Natural England and JNCC. Natural England's marine remit includes biodiversity extending from the intertidal zone out to 12 nautical miles. Natural England will therefore gather baseline data and continue to monitor the inshore HPMA site Allonby Bay throughout the pilot project. This survey will contribute to evidence gathering in year one of the Highly Protected Marine Areas (HPMAs) pilot project.

### Survey Area

Allonby Bay HPMA covers 27.6 km<sup>2</sup> of the southern region at the mouth of the Solway Firth (Figure 1). The boundary follows the Mean High Water line along the shore from the western most building of Bank End Farm, Maryport to Christ Church south of Allonby and then extends seaward to approximately 5.6 km off the shore at its maximum width. The site has a maximum depth of 6.6m at lowest chart datum (Figure 2). The area is located within the 12 nm territorial sea limit of the Irish Sea region. It overlaps with Allonby Bay MCZ and the Solway Firth SPA and there is a very small overlap with the Solway Firth SAC and Upper Solway Flats and Marshes SSSI along the northeastern boundary.

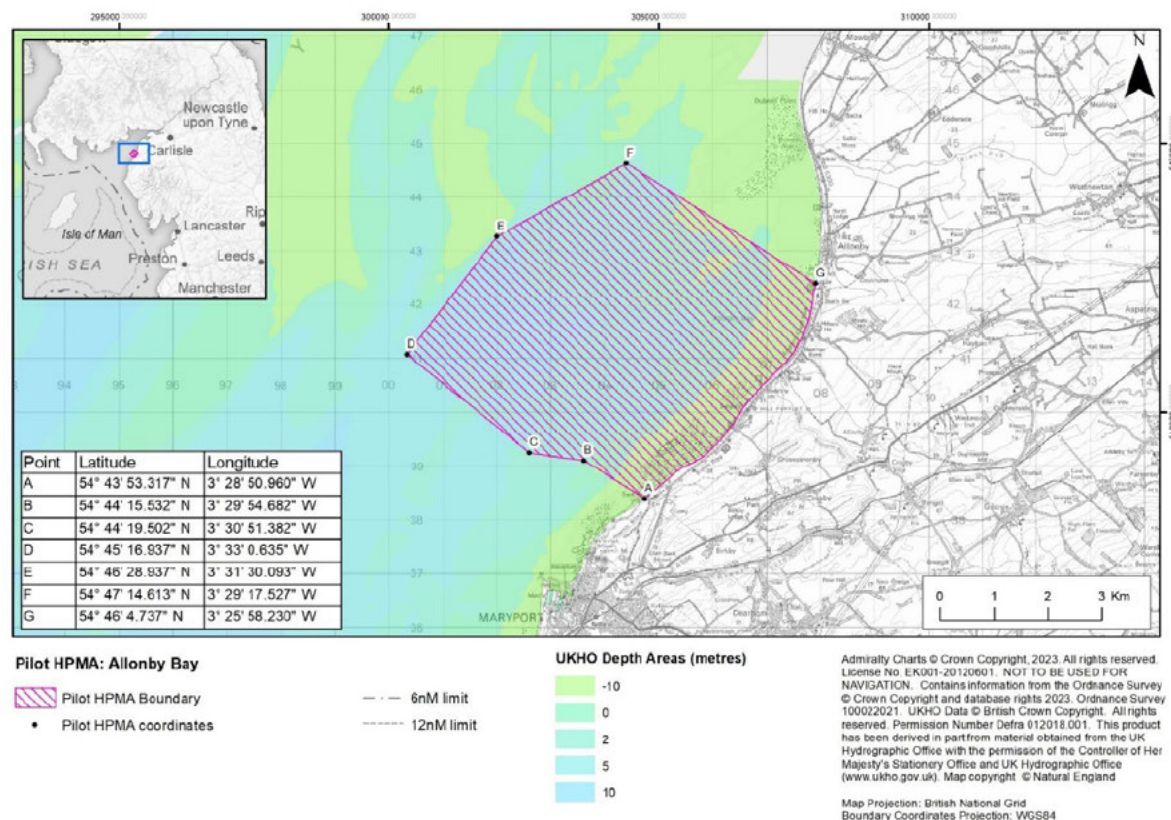

Figure 1. HPMA Allonby Bay proposed boundary and coordinates.

Allonby Bay consists of a mix of habitats, characteristic of an environment that is subject to dramatic currents and tides. The seabed consists of a range of rocky habitats and sediment dominated habitats, including mudflats, sandbanks, reefs, peat and clay exposures, and biogenic reefs (Figure 3).

The nutrient-rich sediments, dense mussel beds and intertidal rocky habitats in this area attract large densities of shore birds including species such as curlew and oystercatcher. The biodiverse subtidal habitats here provide a food source for fish species, such as flat fish and nursery areas for other species such as bass, cod and herring. In turn, these fish species attract diving, foraging seabirds including guillemots, gannets and razorbills. There is also one of the best examples of honeycomb *Sabellaria alveolata* reefs in the UK within the site, creating a complex sediment network of tubes attached to rock creating vital habitat for crustacea and molluscs.

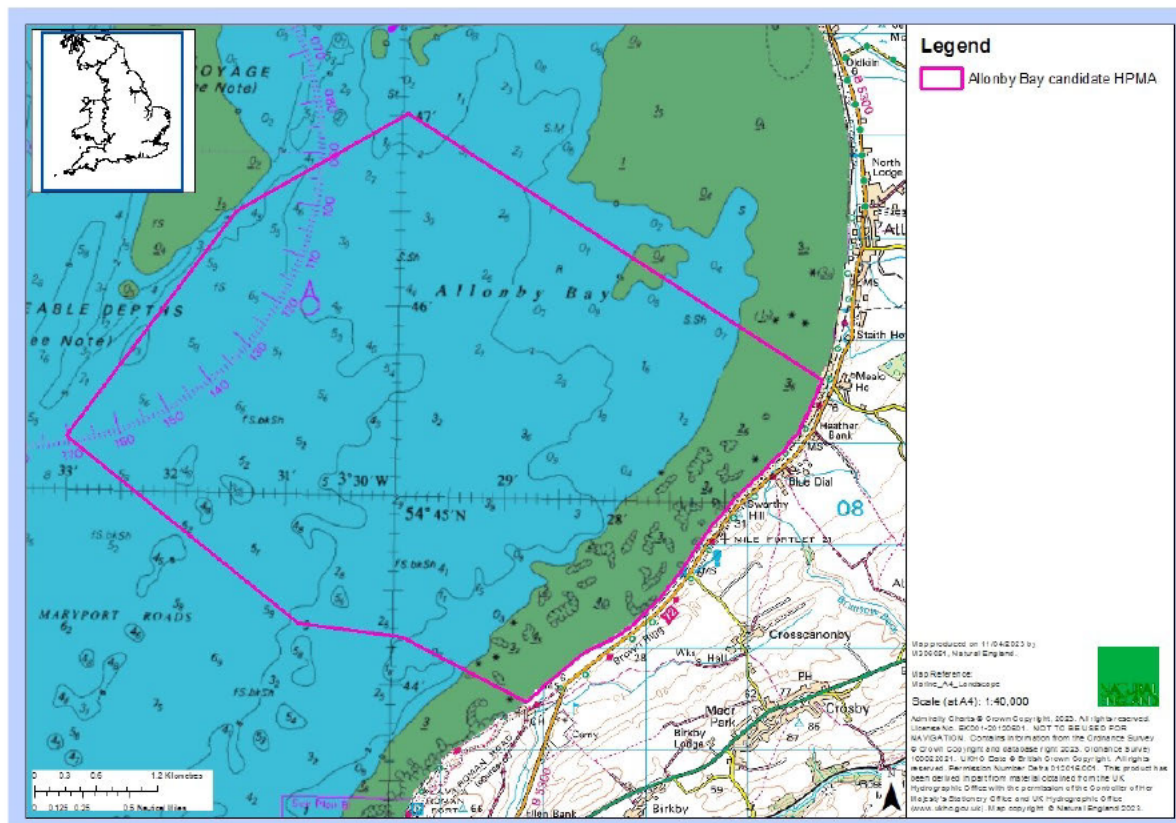

Figure 2. HPMA Allonby Bay chart datum.

Previously recorded habitats in the Allonby Bay MCZ include:

- Blue mussel (*Mytilus edulis*) beds
- Honeycomb worm (*Sabellaria alveolata*) reefs
- Moderate energy littoral rock
- Low energy littoral rock
- Features of littoral rock (rockpools/ ephemeral algae)
- Littoral sand and muddy sand
- Littoral biogenic reefs
- Features of littoral sediment (ephemeral algae)
- High energy infralittoral rock
- Moderate energy infralittoral rock
- Moderate energy circalittoral rock
- Sublittoral coarse sediment
- Sublittoral sand
- Sublittoral mud
- Sublittoral mixed sediments
- Sublittoral biogenic reefs

Previously recorded fish species of conservation importance or commercial in Allonby Bay MCZ:

- Atlantic herring (*Clupea harengus*)
- Thornback ray (*Raja clavata*)
- Bass (*Dicentrarchus labrax*)
- Sole (*Solea solea*)

- Atlantic cod (*Gadus morhua*)
- Plaice (*Pleuronectes platessa*)

For full site details please see: [Highly Protected Marine Areas \(HPMAs\) - GOV.UK \(www.gov.uk\)](https://www.gov.uk/guidance/highly-protected-marine-areas).

A designation order covering a HPMA sets out the protected features and the conservation objectives applicable within the HPMA site boundary. The protected feature is: “The marine ecosystem, habitats and species of flora and fauna, abiotic elements, and their supporting ecosystem function and processes, including the seabed, water column and sea surface, within the site boundary.” The proposed conservation objective for all pilot HPMAs, including Allonby Bay is: “To achieve full natural recovery of the structure and functions, features, qualities and composition of characteristic biological communities present within HPMAs and prevent further degradation and damage to the marine ecosystem subject to natural change.”

Natural England and JNCC advise within an HPMA:

1. The ecosystem is allowed to fully recover in the absence of damaging activities such that:
  - a. The ecosystem structure consists of a diverse range of benthic and pelagic communities, habitats and species, including biotic and abiotic components of the ecosystem. These fulfil a variety of functional roles, including supporting key life cycle stages and/or behaviours of marine species.
  - b. The physical, biological and chemical ecosystem processes and functions proceed unhindered, so that the site realises its full ecological potential to deliver goods and services, including habitats and species considered important to the long-term storage of carbon, and habitats and species important for flood and erosion protection.
  - c. The ecosystem is resilient to change and stressors.
2. Any ecosystem changes brought about by the process of removing anthropogenic pressures should be considered in the context of a naturally recovering ecosystem.
3. The HPMA supports our understanding of how marine ecosystems change and recover in the absence of impacting activities

Whilst the HPMA has been designated since 5<sup>th</sup> July 2023 management from the MMO will be introduced over Summer 2024. There was minimal fishing pressure in Allonby Bay HPMA area. The current fishing activity was predominately recreational rod and line as well as some recreational longlining (pers comms). Commercial fishing included potting for crab and lobster, netting (skate and plaice in summer, cod and skate in winter) and bass anglers. Bottom trawling is non-existent in this area and therefore Natural England aims to avoid the introduction of additional pressures for the purpose of monitoring. For this reason, survey methods must be as low impact as possible.

## Aims and Objectives

### 2.1 Aims

Natural England is commissioning eDNA analysis of water and sediment samples collected from within the Allonby Bay HPMa to understand species present in the site.

The analysis design should achieve the following aims:

- I. Acquire high quality data to establish a baseline of species present within the site, focusing on marine fish as the priority and other groups as supplementary.

### 2.2 Objectives

The contract will run to the end of the 24/25 financial year and therefore it should be assumed that up to four sets of samples will be analysed (June, September, December, February). Under this specification the successful contractor(s) must:

- Provide information on methods outlined in section 5.
- Produce an evidence based technical report detailing the work undertaken, reporting the analytical findings.
- Engage in discussions around the project findings and observations made regarding condition and draw upon “expert judgement” to clearly identify and present expert inferences separately from the core results of the survey work.
- Provide all outputs (including appropriate GIS, Marine Recorder and MEDIN outputs) in specified formats (see below section 3).

## **Methods**

### **Field Sampling**

Where a marine project will be conducting surveys and collecting data, it is important to ensure that the collected data will deliver on the evidence need identified. All samples will be collected by Environment Agency (EA) staff following the SOP for collecting eDNA from water and sediments. Samples will be taken roughly every quarter during the water quality surveys. All samples will be filtered on board the EA survey vessel at the time of collection, the June and September samples have already been collected and frozen, they will posted to the contractor for analysis. The December and February samples will be posted directly to the contractor after being collected. There are five water sampling locations and five sediment sampling locations, three replicates will be taken at each sampling location. A total of fifteen water eDNA and fifteen sediment eDNA samples will be collected during each sampling event. NE have provided a Manifold filtration system for the processing of samples using 0.45um filters. Filters have been frozen at –20°C since time of collection. Sediment samples were taken in 50ml falcon tubes and also frozen at time of collection. No preservatives has been used for the June and September samples. Full SOP can be provided to the successful contractor.

Please include in the tender return the cost of posting samples to the lab facility post collection (i.e. the supply of stamped return envelopes). Due to unreliability of weather please also provide costing per sample as total number of samples may vary from planned number of samples.

### **Sample Processing, Analysis and Taxonomic Assignment**

Please outline in the tender proposal (in sufficient detail) what methods will be used to extract DNA and amplify and sequence the DNA to identify the fish and invertebrate communities. A metabarcoding approach taken using open access fish-specific and invertebrate-specific primers, ensuring selection of primers allows for a comprehensive species list to be achieved. These primers should be outlined in the tender return. In the first instance fish specific primers should be prioritised but please include in the tender return, the cost of each subsequent additional set of primers (i.e. addition of marine mammal and elasmobranch primers etc.).

Please outline briefly the bioinformatic pipeline you intend to use to match sequences to species data. Ideally, the bioinformatics pipeline should allow for direct comparisons of eDNA sequences between samples and between studies over time. Raw eDNA sequence data must be made available to Defra/NE.

Taxonomic assignments should characterise eDNA sequences to species level where possible and the lowest taxonomic rank where species level is not possible. The resulting list of species should be used to identify the fish communities and specified marine protected species. Performance metrics for the taxonomic assignment should be included to assist end-user's decision-making based on the results presented.

All contractors must clearly state their policy for the storage of samples, to include standard storage duration, storage conditions and procedure in the event NE wishes to access samples or extend the storage period.

## Outputs

## Deliverables

Data must be interpreted, analysed and presented considering the overarching hypotheses stated above. The following deliverables should be produced:

A final report ([in Natural England style](#)) describing the objectives of the study, and the methods, results and conclusions of the work. Recommendations for future work to further develop this method can also be included.

## Report

The methods section should cover in sufficient detail:

- DNA extraction methods – including the names of kits if used. State how the DNA was quantified and discuss the quality of DNA extracted.
- PCR amplification- specify the primers, PCR cycle conditions, reagents, volumes and number of replicates per sample to be used. Proposed use of positive and negative controls. State whether samples were tested for degradation and / or inhibition, and if so, how.
- Sequencing - detail how the DNA products and controls were prepared for sequencing including reagents, primers and conditions. State the DNA library quantification and normalisation methods, and the model of the sequencing machine and reagent kit used. In addition, the methods should allow the reader to understand the confidence in the sequences obtained.
- Bioinformatic processing - State in detail how the bioinformatic processing was completed, by specifying the steps taken. State any programs and models that were used, and any thresholds set. Where sequences are being used for taxonomic assignment, please explain the methods used to assign a species and why any reads may have been discarded. State all cut-off thresholds and state whether OTUs or ASVs are used. Reference libraries - Name all reference libraries used (open access preferred), and any rules used. State all cut-off thresholds, such as for % identity for taxonomic assignment.
- QA - Explain the QA checks that have been undertaken on the results, including thresholds that may have been set.

The contractor should provide a detailed results section, explaining the results generated, which should include:

- The efficiency of DNA extraction and correct amplification of expected PCR products including controls at each stage.
- Number of sequencing reads generated, quality of sequencing reads, proportion of reads discarded and proportion which were assigned to species.
- Visualisations of community and species detections by site and further analysis of diversity and abundance data from both infauna and DNA datasets, in relation to pressure gradient.

A detailed discussion should be included explaining the results and confidence levels in the bioinformatic processing. Discussion should include:

- A discussion of any problems and how they were resolved, such as issues with PCR leading to a change of reagents or amplification conditions.
- Quality of the sequencing reads obtained (which should be assessed using [FastQC](#) or similar software e.g. MultiQC). Proportion of reads discarded and proportion which were assigned to species.
- A detailed discussion explaining the results and confidence levels of the bioinformatic processing.
- Discussion of any reference database or barcode issues which may have led to sequences being wrongly assigned or not assigned to species level.
- Detailed description of fish communities and haplotypes, and changes in assemblages at different spatial and temporal scales.
- Discussion of whether the data can give information on species abundance or not.
- Detailed results tables on fish species of interest (and invertebrates, marine mammals etc. depending on additional primers added), e.g. designated species, INNS and other species specifically mentioned by NE project lead.
- A discussion on how this data can be used in Natural Capital assessments, showing the potential uses and highlighting opportunities and drawbacks of using this methodology.
- Comparison to other data that could be used for ground truthing, e.g. MMO landings data, EA WFD fish monitoring data for transitional waters, HPMA fish surveys etc.
- The report will be published on the Natural England Access to Evidence Catalogue.
- Recommendations for future work based on the results of the current study.

## Data

Two sets of data are required:

- Completion of the “Lab and Bioinformatics metadata” and “Taxa” sections of Natural England’s DNA [metadata spreadsheet](#).
- All raw sequence data generated in the FASTQ format; two FASTQ files (with the extensions R1.fastq and R2.fastq) per sample should be provided, i.e. demultiplexed data.

## **Data standards and formats**

Contractors should pay particular consideration to the data and GIS required formats for information compatibility including MEDIN metadata standards and Marine Recorder provision:

### **General data specifications**

- All data products and electronic files must be appropriately named so they sufficiently describe the contents and are not purely a numerical value. All products should be named appropriately so that they can be clearly linked to the report/project.
- All data should be supplied with a MEDIN metadata record which meets the MEDIN metadata discovery standard. Metadata derived as part of this project must be submitted to Natural England in an XML file which Natural England will archive through Data Archive Centres (DACs). Guidance 'MEDIN Guidance for Contractors' will be provided to the winning contractor.
- Copies of the original data spreadsheets or databases are to be provided in the appropriate Microsoft Office format. However please be aware that using MEDIN marine biodiversity data guideline spreadsheets (available online under the marine biodiversity tab at MEDIN data guidelines) will ensure that biological taxon data is prepared correctly for entry into Marine Recorder Online and will facilitate the efficient entry of data into this system and the data archiving process in general. Natural England welcomes and supports the provision of raw data spreadsheets in the MEDIN format and expects that all raw datasheets will contain the mandatory fields in the MEDIN guidelines, regardless of their format.
- Any species lists submitted will be compliant with current taxonomic names and synonyms (e.g. Marine Species of the British Isles and Adjacent Seas (MSBIAS), World Register of Marine Species (WoRMS))

### **Analysed sample data**

- All sample data must be entered into Marine Recorder Online (grab sample analyses, video/still photography analyses, diver survey species, PSA analysis and biotope lists etc). The Natural England Project Officer will create the survey in MRO and grant access to the contractor to input survey data. Natural England will supply a 'Marine Recorder guidance for contractors' document to successful contractors. Contractors should inform the Project Officer when the dataset has been entered, who will QA the survey before signing off.
- The Contractor must report any records of Invasive and Non-Native Species observed on site on Marine Recorder and to the Natural England project officer as part of the survey report. Any species currently listed as 'alert' species should be flagged immediately to the GB Non-Native Species Secretariat Species alerts. More information and guidance including ID guides can be found at GB non-native species secretariat.

## **Reports**

- Draft reports should be provided in electronic MS Office Word \*.DOCX format for comment. A template and guidance exists for writing Natural England commissioned reports and will be sent to the contractor upon award of the tender. All reports should retain a clear suggested citation stating that it is a 'Report to Natural England'.

### **Intellectual property**

The intellectual property rights and copyright for all products (including photographs) will lie with Natural England. All data will be made available by Natural England under the Open Government Licence at the end of the project via [www.data.gov.uk](http://www.data.gov.uk) and the MEDIN Data Archiving Centres.

3.1 The Order Form is an offer by the Authority to purchase the Deliverables subject to and in accordance with the terms and conditions of the Contract.

3.2 The Supplier is deemed to accept the offer in the Order Form when the Authority receives a copy of the Order Form signed by the Supplier.

3.3 The Supplier warrants and represents that its Tender Submission and all statements made and documents submitted as part of the procurement of Deliverables are and remain true and accurate.

### **4. What needs to be delivered**

#### **4.1 All Deliverables**

(a) The Supplier must provide Deliverables: (i) in accordance with the Specification and Tender Submission; (ii) to a professional standard; (iii) using all reasonable skill and care; (iv) using Good Industry Practice; (v) using its own policies, processes and internal quality control measures as long as they don't conflict with the Contract; (vi) in accordance with such policies and procedures of the Authority (as amended from time to time) that may be specified in the Contract (vii) on the dates agreed; and (viii) in compliance with all applicable Law.

(b) Without prejudice to the Specification the Supplier must provide Deliverables with a warranty of at least 90 days (or longer where the Supplier offers a longer warranty period to the Authority) from Delivery against all obvious damage or defects.

## 4.2 Goods clauses

- (a) All Goods Delivered must be capable of meeting the requirements set out in the Specification and be either (i) new and of recent origin, (ii) reused or (iii) recycled.
- (b) All manufacturer warranties covering the Goods will be assigned to the Authority on request and for free.
- (c) The Supplier transfers ownership of the Goods on completion of Delivery (including off-loading and stacking) or payment for those Goods, whichever is earlier.
- (d) Risk in the Goods transfers to the Authority on Delivery but remains with the Supplier if the Authority notices any damage or defect following Delivery and lets the Supplier know within three Working Days of Delivery.
- (e) The Supplier must have full and unrestricted ownership of the Goods at the time of transfer of ownership.
- (f) The Supplier must Deliver the Goods on the date and to the specified location during the Authority's working hours.
- (g) The Supplier, its subcontractor(s) and supply chain must minimise packaging used whilst providing sufficient packaging for the Goods to reach the point of Delivery safely and undamaged. The Supplier must take back any primary packaging where it is possible to do so. Packaging must be 100% re-usable, recyclable or compostable, use recycled content where reasonably practicable and support the Government's commitment to eliminate single use plastic.
- (h) All Deliveries must have a delivery note attached that specifies the order number, type, quantity of Goods, contact and details of traceability through the supply chain.
- (i) The Supplier must provide all tools, information and instructions the Authority needs to make use of the Goods. This will include, where appropriate, any operation manuals which, unless specified otherwise, will be written in English and provided in electronic form.

Goods must be disposed of in line with the waste management hierarchy as set out in Law. The Supplier will provide evidence and transparency of the items and routes used for disposal to the Authority on request.
- (k) The Authority can cancel any order or part order of Goods which have not been Delivered. If the Authority gives less than 14 calendar days' notice then it will pay the Supplier's reasonable and proven costs already incurred on the

cancelled order as long as the Supplier takes all reasonable steps to minimise these costs.

(l) The Supplier must at its own cost repair, replace, refund or substitute (at the Authority's option and request) any Goods that the Authority rejects because they don't conform with clause 4.2. If the Supplier doesn't do this it will pay the Authority's costs including repair or re-supply by a third party.

(m) The Authority will not be liable for any actions, claims, costs and expenses incurred by the Supplier or any third party during Delivery of the Goods unless and to the extent that it is caused by negligence or other wrongful act of the Authority or its servant or agent. If the Authority suffers or incurs any damage or injury (whether fatal or otherwise) occurring in the course of Delivery or installation then the Supplier shall indemnify from all losses, damages, costs or expenses (including professional fees and fines) which arise as a result of or in connection with such damage or injury where it is attributable to any act or omission of the Supplier or, where related to the Contract, any of its subcontractors or suppliers.

(g) On completion of the Services, the Supplier is responsible for leaving the Authority's premises in a clean, safe and tidy condition and making good any damage that it has caused to the Authority's premises or property, other than fair wear and tear and any pre-existing cleanliness, safety or tidiness issue at the Authority's premises that existed before the commencement of the Term.

(h) The Supplier must ensure all Services, and anything used to deliver the Services, are of the required quality and free from damage or defects.

(i) The Authority is entitled to withhold payment for partially or undelivered Services or for Services which are not delivered in accordance with the Contract but doing so does not stop it from using its other rights under the Contract.

## 5. Pricing and payments

31.1 The Supplier must not breach any tax or social security obligations and must enter into a binding agreement to pay any late contributions due, including where applicable, any interest or any fines. The Authority cannot terminate the Contract where the Supplier has not paid a minor tax or social security contribution.

31.2 Where the Supplier or any Supplier Staff are liable to be taxed or to pay National Insurance contributions in the UK relating to payment received under this Contract, the Supplier must both:

- (a) comply with the Income Tax (Earnings and Pensions) Act 2003 and all other statutes and regulations relating to income tax, the Social Security Contributions and Benefits Act 1992 (including IR35) and National Insurance contributions;
- (b) indemnify the Authority against any Income Tax, National Insurance and social security contributions and any other liability, deduction, contribution, assessment or claim arising from or made during or after the Term in connection with the provision of the Deliverables by the Supplier or any of the Supplier Staff.

31.3 If any of the Supplier Staff are Workers who receive payment relating to the Deliverables, then the Supplier must ensure that its contract with the Worker contains the following requirements:

- (b) the Worker's contract may be terminated at the Authority's request if the Worker fails to provide the information requested by the Authority within the time specified by the Authority;
- (c) the Worker's contract may be terminated at the Authority's request if the Worker provides information which the Authority considers isn't good enough to demonstrate how it complies with clause 31.2 or confirms that the Worker is not complying with those requirements;
- (d) the Authority may supply any information they receive from the Worker to HMRC for revenue collection and management.

## 32. Publicity

32.1 The Supplier and any subcontractor shall not make any press announcements or publicise this Contract or its contents in any way; without the prior written consent of the Authority.

32.2 Each Party acknowledges to the other that nothing in this Contract either expressly or by implication constitutes an endorsement of any products or services of the other Party and each Party agrees not to conduct itself in such a way as to imply or express any such approval or endorsement.

### 33. Conflict of interest

33.1 The Supplier must take action to ensure that neither the Supplier nor the Supplier Staff are placed in the position of an actual or potential conflict between the financial or personal duties of the Supplier or the Supplier Staff and the duties owed to the Authority under the Contract, in the reasonable opinion of the Authority.

33.2 The Supplier must promptly notify and provide details to the Authority if a conflict of interest happens or is expected to happen.

33.3 The Authority can terminate its Contract immediately by giving notice in writing to the Supplier or take any steps it thinks are necessary where there is or may be an actual or potential conflict of interest.

### 34. Reporting a breach of the contract

34.1 As soon as it is aware of it the Supplier and Supplier Staff must report to the Authority any actual or suspected breach of Law or breach of its obligations under the Contract.

34.2 Where an actual or suspected breach is notified to the Authority under clause 34.1, the Supplier will take such action to remedy any breach as the Authority may reasonably require. Where the breach is material, the Authority has the right to terminate under clause 11.4.

34.3 The Supplier must not retaliate against any of the Supplier Staff who in good faith reports a breach listed in clause 34.1.

### 35. Resolving disputes

35.1 If there is a dispute between the Parties, their senior representatives who have authority to settle the dispute will, within 28 days of a written request from the other Party, meet in good faith to resolve the dispute.

35.2 If the dispute is not resolved at that meeting, the Parties can attempt to settle it by mediation using the Centre for Effective Dispute Resolution (CEDR) Model Mediation Procedure current at the time of the dispute. If the Parties cannot agree on a mediator, the mediator will be nominated by CEDR. If either Party does not wish to use, or continue to use mediation, or mediation does not resolve the dispute, the dispute must be resolved using clauses 35.3 to 35.5.

35.3 Unless the Authority refers the dispute to arbitration using clause 35.4, the Parties irrevocably agree that the courts of England and Wales have the exclusive jurisdiction to:

- (a) determine the dispute;
- (b) grant interim remedies;

(c) grant any other provisional or protective relief.

35.4 The Supplier agrees that the Authority has the exclusive right to refer any dispute to be finally resolved by arbitration under the London Court of International Arbitration Rules current at the time of the dispute. There will be only one arbitrator. The seat or legal place of the arbitration will be London and the proceedings will be in English.

35.5 The Authority has the right to refer a dispute to arbitration even if the Supplier has started or has attempted to start court proceedings under clause 35.3, unless the Authority has agreed to the court proceedings or participated in them. Even if court proceedings have started, the Parties must do everything necessary to ensure that the court proceedings are stayed in favour of any arbitration proceedings if they are started under clause 35.4.

35.6 The Supplier cannot suspend the performance of the Contract during any dispute.

35.7 The provisions of this clause 35 are without prejudice to the Authority's right to terminate or suspend the Contract under clause 11.
