### **DIPS Order Form Template**

### **ORDER FORM**

This Order Form is for the provision of the Call-Off Deliverables. It is issued under the DIPS Framework Contract with a unique reference number starting with RM6249 to be issued by **DD PS Commercial Team**.

The DIPS Framework and this Call-Off Contract are to be for the delivery of service-based outcomes only. This Framework is not for the request and delivery of resource. If specific resources are needed alternative sourcing methods must be used, such as Public Sector Resourcing.

During the Call-Off Contract Period, the Requirement Holder and the Supplier may agree and execute a Statement of Work (in the form of the template set out in Schedule 3 to this **Order Form / Statement of Requirements Template**¹). Upon execution of any Statement of Work the provisions detailed therein shall be incorporated into the Call-Off Contract to which this Order Form relates.

The Parties agree that when the Requirement Holder seeks further Deliverables within the initial scope of the original Call-off contract from the Supplier that are not provided for in this Call-Off Contract, the Requirement Holder and Supplier will agree and execute a Call-Off Variation Form.

All capitalised terms in this **Order Form** / **Statement of Requirements Template** shall have the meanings set out in DIPS Framework Joint Schedule 1 (Definitions) unless otherwise stated.

### 3. Statement of Requirements (SOR)

Background/justification for Call-Off Contract

The Defence Support (DefSp) function within Ministry of Defence (MOD) Strategic Command has embarked on a Business Modernisation for Support (BMfS) programme to mobilise the best of existing systems, in conjunction with new COTS products and redesigned processes, to substantially improve current support capabilities.

The Contracting Authority wishes to use its existing data cataloguing and reference data management services provided by Informatica to support the delivery of objectives.

The partner is required to source and load DefSp metadata content into the Informatica Cloud Native Data Catalogue service, design and configure the Informatica R360 Reference Data Management service, source and load Reference Data records into the Reference Data Management service and implement Reference Data Management procedures. A full overview of the objectives, deliverables and intent is within the Statement of Requirement.
