1. Executive Summary

1.1 About CQC

The Care Quality Commission (CQC), is the independent regulator of health and adult social care in England. We make sure health and social care services provide people with safe, effective, compassionate, high-quality care and we encourage care services to improve. We register health and adult social care services that meet the 'fundamental standards' of quality and safety. Before a care provider can carry out any of the activities that we regulate, they must register with us and satisfy us that they will be able to meet a number of legal requirements, including fundamental standards. Activities we regulate include the treatment, care and support provided by hospitals, GP practices, dental practices, ambulance services, care homes and home-care agencies.

1.2 What we do

CQC monitor and inspect services to see whether they are safe, effective, caring, responsive and well-led. Once a service has registered with us, we monitor it continuously. The information we gather, which includes the views of the public, helps us decide when, where and what to inspect. Inspections give us an opportunity to talk to staff and people who use services, as well as allowing us to observe care and to check the systems and processes that the service uses.

There are five questions we ask of all care services. They are at the heart of the way we regulate and they help us to make sure we focus on the things that matter to you. We ask the following 'key questions' of each service.

- Is it safe?
- Is it effective?
- Is it caring?
- Is it responsive?
- Is it well-led?

CQC protects the rights of people made vulnerable by their circumstances, including those whose rights are restricted under the Mental Health Act.

CQC involve people who use health and social care services in all areas of our work, including our inspections. Some of the organisations we work with include Healthwatch England, NHS Improvement, NHS England and Ofsted.

CQC publish information about the quality of individual services, including reports and ratings, to help people choose their care. After each inspection, we produce a report and publish it on our website. The reports set out what our findings on each of the five key questions mean for the people who use the service. CQC describe the good practice we find, as well as any concerns we have; where appropriate we take action if care services are failing to meet the fundamental standards. We have specific powers and guidelines as to what actions are available to us depending on what we find.

CQC publish regional and national views of the quality of health and social care, and encourage improvement by highlighting good practice. As a regulator and inspector we can provide a unique view on the quality of health and adult social care in England, helping to share learning and encourage improvement across the sectors. We carry out and publish reviews and specific inspection programmes that focus on particular aspects of health and social care, including:

- the experiences of certain groups of people;
- how different services work together to care for people; and
- the quality of particular services, or all services, in an area

1.3 *The Digital Technology and need*

This has been chosen for the fact that it is Open Source, meeting a key GDS criteria, and that it has a good active development community.
- In addition to this we have chosen to deploy this into loosely coupled micro-services that integrate using RESTful APIs.
- For our CI/CD pipeline we are using Jenkins to commit code revisions automatically
- Each micro-service is held in its own Docker container and deployed independently (4 docker containers - forms, web server [Nginx], database [maria db, Cache [varnish])
- Azure container registry - audit trail for rollbacks
- Kubernetes - Automated deployment pipeline for implementing
- The containers we are building are deployed onto Azure servers as we already have access to these as part of existing commercial arrangements
