Schedule 2 – Specification

1. Introduction

The Department for Transport (DfT) invites proposals from suppliers to provide a **Service** which allows access to flight ticketing data. This Contract will be subject to DfT's Schedule [1] (Draft) Order Form and Short Form Conditions (DfT Conditions).

The DfT will not accept other terms and conditions or proposed changes to the DfT Conditions. Bidders *may*, however, submit additional Data Supplier Mandatory Terms (DSMTs) as part of their bid submission, that they are required to adhere to as part of any existing agreements with data suppliers. DSMTs are solely binding on the Supplier with their data supplier[s] only.

Submitted DSMTs will be included as a Schedule ([Schedule 8]) within the DfT Conditions. However, the DfT is not legally bound to adhering to the DSMTs. The DfT Conditions will always take precedence, even in the event of any conflict between the DSMTs and the DfT Conditions. Bidders must accept this to be considered for contract award as per the Mandatory Requirements within Schedule 6 Bidder Response.

The DSMTs will not form part of a tenderer's offer when submitting their bid, they will however be included as a Schedule. The DfT Conditions will govern the provision of this Contract.

The anticipated value of the project is approximately £180,000. This value is given in good faith as a guide to aid bidders planning for submitting their Tender. It should not be interpreted as an undertaking to purchase any goods or services to any value and does not form part of the Contract.

The contract will be for an initial 1-year period commencing on the date highlighted in the indicative procurement timetable, with an option to extend by a further 24 months in 12-month increments reviewed on an annual basis. The contract must not include any provision for automatic renewal at the end of the contract period.

2. Background to the Requirement

COVID-19 has caused widespread disruption across the global aviation industry and subsequently affected global travel trends. The DfT requires access to a detailed dataset which allows it to query the nature of flight ticketing data for journeys between the UK and individual countries around the world. This data will help the DfT to monitor the air travel industry and track trends in volume of flight tickets being purchased, consumer behaviour in response to travel measures and also aide the DfT in operational and strategic decision making.

4. Scope

The deliverable (Service) will be full membership of a data portal or platform which the DfT will be able to access through a named user account. The deliverable should allow the DfT access to the required data (outlined below in Section 6).

The user account obtained through this subscription Service will be owned by the Aviation Statistics team at the DfT who will access the Service. Data and corresponding analysis, either generated from the Service itself or produced by the DfT from the data acquired from the Service will be distributed through appropriate dissemination mechanisms across the DfT (inclusive of the Civil Aviation Authority, which is a public corporation of the DfT) to meet specific user needs.

All data will be handled responsibly by the DfT and in accordance with [UK Government Security Standards](#), and confidentiality will be maintained. The DfT will take reasonable steps to prevent unauthorised access to or use of the data Service, including to prevent third parties from obtaining login credentials. In the unlikely event of the loss or theft of any credentials, the DfT will inform the Supplier.

Subject to the DfT's obligations under the Freedom of Information (FOI) Act (2000) and any other relevant statutory provisions, raw data accessed via the Supplier's data Service will be treated as commercially sensitive information. Processed (aggregated) data and statistical reports, summaries or graphics derived using data from the data Service will not be treated as commercially sensitive information. In this context, data is considered processed (aggregated) where the level of aggregation is such that the original (raw) data cannot be reverse engineered.

The DfT will incorporate insubstantial portions, extracts, abstracts or summaries of the data and/or data Service provided into analyses or presentations which can be made available and shared with Other Government Departments (OGDs). This is to allow the

Crown Copyright 2019

Below-threshold ITT incorporating Short Form Contract

Contract Reference: THEP3027

DfT to appropriately share insights into travel trends across the OGDs that may be involved in the management of international travel.

The DfT will also incorporate insubstantial portions, extracts, abstracts or summaries of the data and/or data Service provided into analyses, presentations and publications which could be made publicly available on the GOV.UK or other official UK Government websites should the need arise. In such circumstances, all references to the data or manipulations of the data provided will be sourced as “DfT analysis of [Supplier] data”. Any other necessary disclaimers relating to the quality or use of the data will also be included.

The DfT will act as a reasonable contracting authority, and will not attempt to reverse engineer the data Service in order to build a competitive product or Service. The DfT acknowledges that the Supplier owns all rights, trademarks and patents relating to the data Service and will not challenge the Supplier’s ownership of the data Service.

The DfT also requests that bidders provide a Price (OGD Price within Schedule 5 Pricing Schedule) which allows the DfT to share raw data extracted directly from the data Service with [Other UK Government Departments and Crown Bodies \(OGDs\)](#) throughout the Contract Term. The OGD Price will be fixed for each OGD granted access to the raw data, which, if invoked, will be applied on a pro rata basis for the remainder of the contract period. This OGD Price will enable the additional OGD to access the raw data extracted directly from the data Service. The DfT will put in place a mechanism for managing how OGDs access this data, to include informing the Supplier.

Should the initial 1-year contract period be extended by the DfT, continued sharing of the raw data with OGDs will be reviewed separately. If OGDs require continued access to raw data, this will be charged pro rata at the OGD Price provided by the Supplier in their original bid.

The DfT will inform the Supplier if/when they are required to share raw data extracted directly from the data Service with other OGDs. In this instance the Supplier should include the OGD Price when invoicing the DfT.

5. Implementation and Deliverables

The deliverable (Service) will be full membership to a data portal or platform which the DfT will be able to access through a named user account.

The deliverable should allow the DfT access to the required data (outlined below in Section 6).

The Contract will be for an initial 1-year period commencing on the date highlighted in the indicative procurement timetable with an option to extend by a further 24 months in 12-month increments reviewed on an annual basis. The Contract must not include any provision for automatic renewal at the end of the Contract period.

6. Specifying Goods and / or Services

The Service must fulfil the following criteria:

- A hosted data solution, platform or portal containing the required flight ticketing data must be made accessible for a period of 12 months for 1 user account. The hosted data solution should provide the user account the ability to download the data or any derived analysis of the data on the platform in a machine-readable format (e.g. Excel file).
- To aid with the facilitation of large-scale data analytics, the Supplier must additionally, make available an Application Programming Interface (API) which allows access to the data stored on the hosted data solution. Any restrictions in the number of 'calls' that can be made through the API service should be clearly specified in your response. The Supplier must additionally, as part of Schedule 5 Pricing Schedule, provide a breakdown of the cost of this API service.
- The flight ticketing data provided must have the following coverage:
 - ○ Arrivals and departures to and from the UK, including connections through the UK (that is, those that are continuing their air journey with a further departure after having arrived in the UK), both international and domestic.
 - Worldwide markets so that the DfT can query flight tickets between the UK and any overseas country or territory.
 - Destination locations available at the country and airport level (this for example would allow the DfT to identify flight trips at the country level such as the USA, and further identify the destination at an airport level such as New York – John F Kennedy).
 -
 -
- The flight ticketing data must be made available through two primary channels at minimum:
 - Ticketing history – which displays data according to the dates when the trips were ticketed.
 - Travel distribution – which displays data according to the date when trips happened, or when trips are planned to happen. For the forward-looking travel distribution, a period of 6 months into the future must be made available as a minimum.
- The data supplied must cover, at a minimum, a historical period from the start of the 2018 calendar year. The Supplier must make appropriate mechanisms available to allow for robust year-on-year comparisons to be made (for example, if in the comparison between two different time periods there is a

Crown Copyright 2019

Below-threshold ITT incorporating Short Form Contract

different coverage or airlines, a mechanism to choose to only retain airlines that are present in both time period could be made available).

- The data must be made available in a format which will allow DfT to interrogate it at a weekly, monthly and quarterly level with the flexibility to switch between the different levels as necessary.
 -
- Furthermore, the tool must allow flexibility in specifying how the week is defined, e.g. from Monday to Sunday or from Sunday to Saturday.
- The data must be updated as a minimum on a weekly basis. The Supplier must specify the update timetable they would typically seek to provide.
 -
- The data solution must allow the DfT to query the nature of air journeys and trips being booked by providing appropriate segmentations that include, but are not limited to:
 - - Nature of booking (initial booking, amendment or cancellation)
 - Number of people per booking
 - Lead time (length of time between booking travel and conducting the travel)
 - Length of stay at destinations
 - Total trip duration (in days)
 - Purpose of journey
 - Airline name
 -
- The data solution must allow the DfT to assess the nature of trip routings and air connectivity by providing breakdowns that allow this to be assessed that include, but are not limited to:
 - The number of stops contained within the trip
 - The names of intermediate airports/countries, or next and last airports/countries, within the trip
 - The nature of stops (e.g. transfer or stay) at intermediate airports/countries within the trip
- The data provided must have sufficient coverage of the air travel market in the UK so that meaningful analysis can be conducted into travel trends. The Supplier is requested to provide their assessment of the coverage of UK air travel market that the data supplied may have. The Supplier should briefly describe how it intends on maintaining a suitable level of market coverage for the contract period.
- Recognising that the Supplier may not be able to provide a 100% market coverage of flight tickets booked, the DfT also requests any data – which may be inclusive of additional estimates – that provide a sense of the total volume of trips. Such data may be made available at a slower frequency, and with a

Crown Copyright 2019

Below-threshold ITT incorporating Short Form Contract

Contract Reference: THEP3027

preferable monthly granularity. The Supplier should briefly outline its methodology in producing such data where applicable.

-
- Data provided must use standardised coding where applicable, for example the use of IATA (International Air Transport Association) or ICAO (International Civil Aviation Organisation) codes for airports and ISO-3166 standard for countries.
-
- The data the DfT acquires access to, must not be subject to unnecessary conditions on usage or limits; the DfT will be able to download as much or as little data as required during the contractual period. The DfT will reserve the right to use any acquired/downloaded data, including data acquired via an API, for producing analysis even after the end of the contract period without having to subscribe again or requiring any permission.
-
- An OGD Price to allow raw data extracted from the data service to be shared with OGDs during the Contract period must be provided. This OGD Price is an optional annual fixed fee per additional OGD granted access, which, if invoked, will be applied on a pro rata basis for the remainder of the contract period. For further details, see Section 4 (Scope).
-
- The DfT will not consider trial periods to assess the proposed hosted data solutions, and so suppliers are encouraged to make clear the functionality and breadth of the hosted data service through written or visual content in their proposal.
-
- To comply with financing and invoicing rules for goods and services used during financial years, the DfT requires that service is paid for through two invoices. The first invoice must be received at service commencement following DfT receipt of the user account that operates in accordance with the Deliverables outlined above, and the second six months after service commencement. Each invoice must be for half the total value of the service.

7. Skills and Apprenticeships

Not applicable.

8. Quality Assurance Requirements

The Supplier must ensure data is accessible through the entire subscription period and ensure it is of a suitable standard to produce statistical analysis.

Examples of criteria that would meet such quality requirements are outlined in the [Quality section of Code of Practice for Statistics produced by the UK Statistics Authority](#).

Recognising the challenging nature of monitoring air travel trends, the DfT would require the provider to routinely assure the quality of data in line with their protocols and inform the DfT within 5 working days of any discrepancies that may arise in the

Crown Copyright 2019

Below-threshold ITT incorporating Short Form Contract

data for flight tickets to and from the UK, including any remedial actions that may be taken to address any identified issues.

9. Service Conditions and Environmental Factors

The Supplier must:

- make available customer support services through appropriate mechanism for the entire period of the contract, and outline the service levels it aims to provide (the DfT would expect a response within 5 working days of receiving a written/electronic request);
- communicate any changes, amendments and/or errors to the data supplied when identified in a timely manner through written correspondence to the contract lead;
-
- communicate any planned platform downtime, outages or maintenance periods at least 5 working days in advance through written correspondence.

Additionally, the Supplier may make improvements and changes to the data service during the contract term without giving DfT notice, provided that it does not reduce the availability, functionality or mandatory requirements of the Service.

10. Management and Contract Administration

The DfT Contract Manager will set in place contract review meetings at a frequency appropriate to the length, value and complexity of the contract. The Contract Manager will agree with the supplier at the contract implementation meeting what will be reviewed and measured at these meetings.

Sub-contracting to Small and Medium Enterprises (SMEs)

DfT is committed to removing barriers to SME participation in its contracts, and would like to also actively encourage its larger suppliers to make their sub-contacts accessible to smaller companies and implement SME-friendly policies in their supply-chains (see our [website](#) for further information).

To help us measure the volume of business we do with SMEs, our Form of Tender document asks about the size of your own organisation and those in your supply chain.

If you tell us you are likely to sub-contract to SMEs, and are awarded this contract, we will send you a short questionnaire asking for further information. This data will help us contribute towards Government targets on the use of SMEs. We may also publish success stories and examples of good practice on our website.

11. Security

Not applicable.

12. Data Protection

The Supplier will be required to comply with all applicable requirements of the Data Protection Legislation (including the General Data Protection Regulation ((EU) 2016/679) ("GDPR"), the Law Enforcement Directive (Directive (EU) 2016/680), and all applicable Law about the processing of personal data and privacy).

The supplier will not be required to process any Personal Data on behalf of the DfT.

13. Training / Skills / Knowledge Transfer

The Supplier must offer an initial introductory training session on the use of the data service provided. Should there be a substantial change in the hosted solution provided throughout the contract period (e.g. substantial upgrade, or substantially new functionality), the Supplier must provide notification of this and offer any necessary training sessions or training materials.

14. Documentation

The Supplier should share or otherwise make available any documentation on the data provided and make available instructions on how to appropriately use the data service offered.

15. Arrangement for End of Contract

The DfT will reserve the right to use any acquired/downloaded data for producing analysis even after the end of the subscription period without having to subscribe again and without requiring any permission.

16. Evaluation Criteria

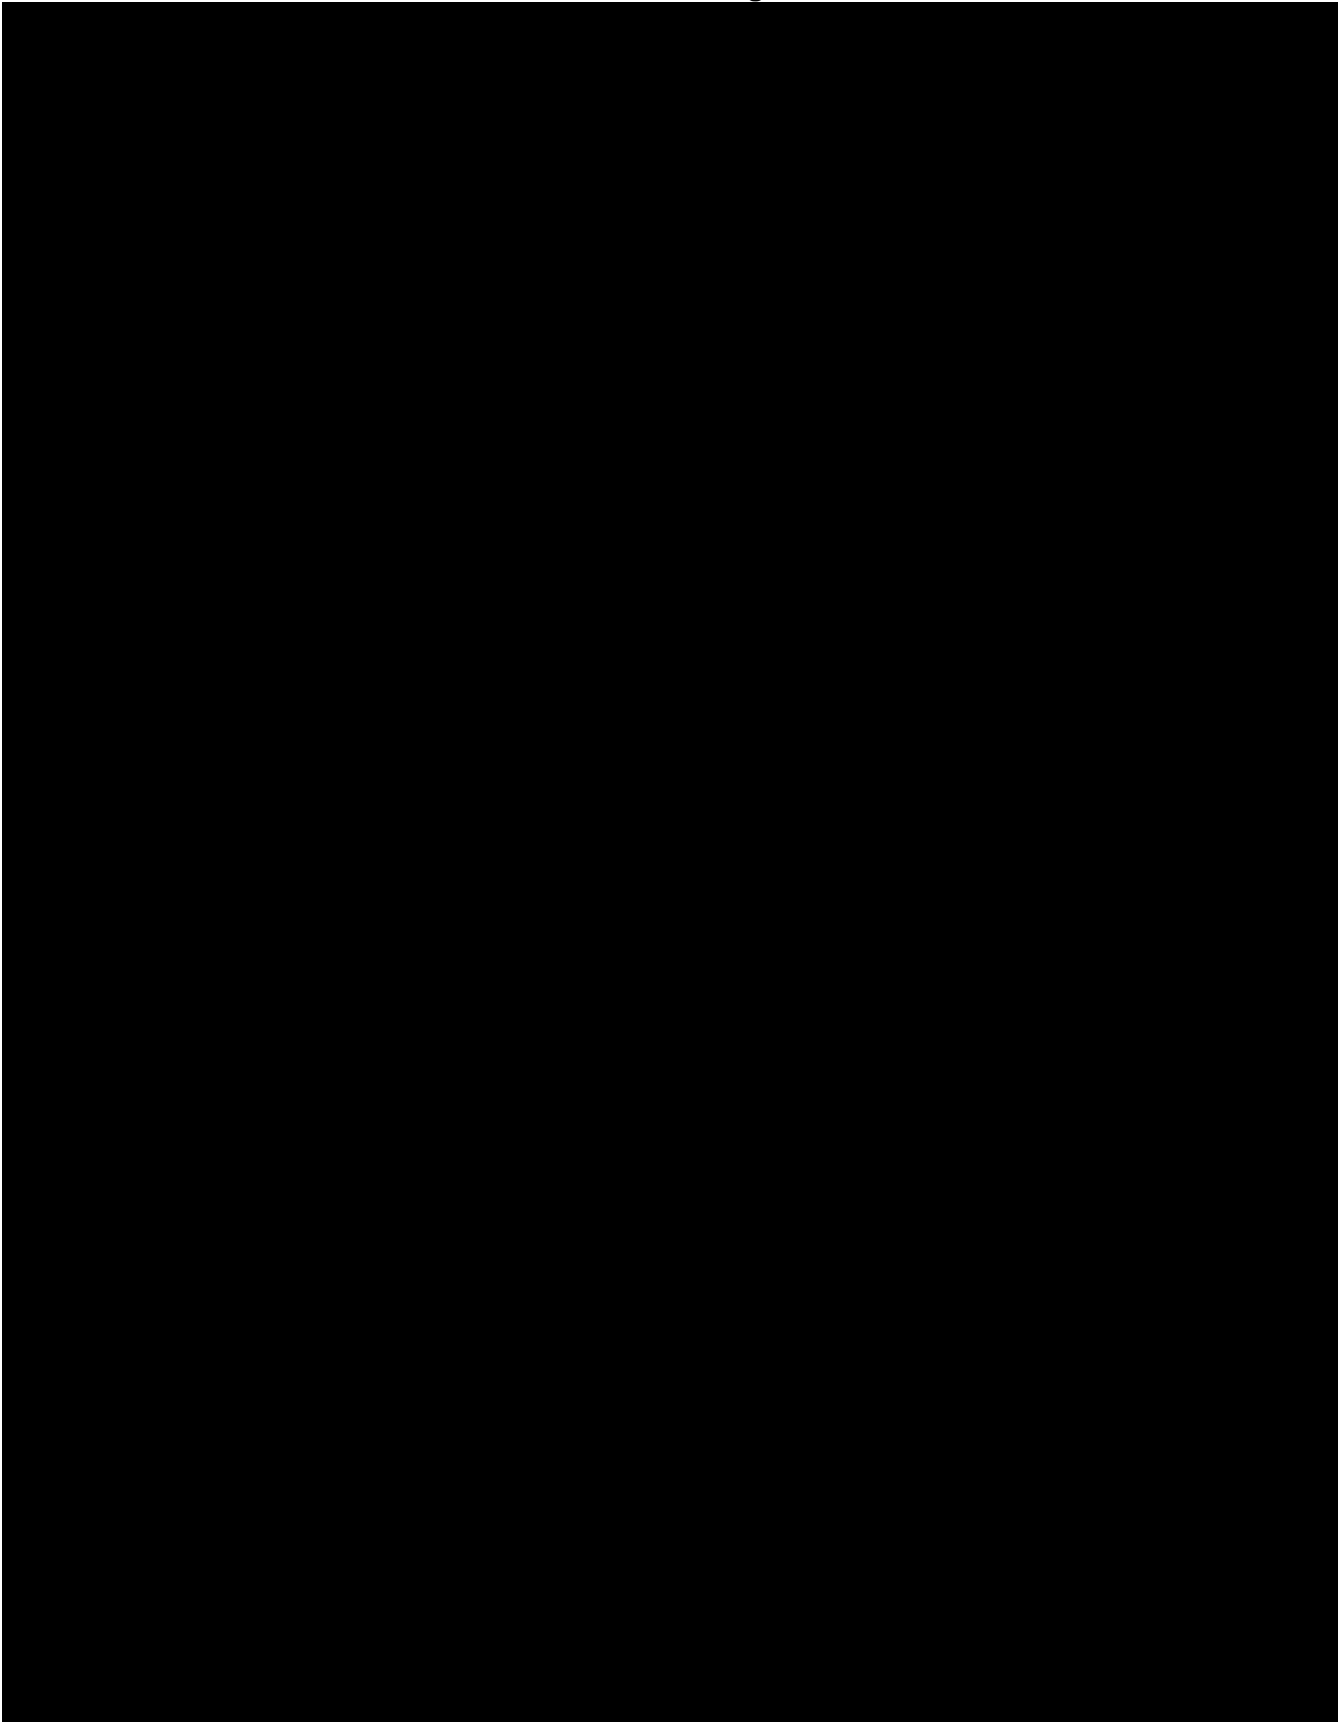

All suppliers must respond to all of the quality factor questions within Schedule 6 Bidder Response.

17. Points of Contact

Invitation to Tender documents and where to submit your tender responses can be accessed via the Jaggaer e-sourcing portal. This can be found at <https://dft.app.jaggaer.com/web/login.html> where the respective contract title and reference will be. Any queries you have should also be submitted via the e-sourcing suite.
