Additional Services Title:	Contract Ref: ECM_58388 - Pest Identification Service for UK Overseas Territories
Additional Services Ref:	20350-18228
Start Date:	1 st June 2020
End Date:	31 st March 2021

Details of work requirement:

R&D Call-Off	
Omnicom Code:	
Other Call-Off Agreements:	
Aim and Objectives of the requirement:	<p>To procure the following service from FERA:</p> <ol style="list-style-type: none"> 1. Provide an identification service for invasive invertebrate plant pests for all of the UKOTs: including invasive non-native invertebrate plant pests which impact on biodiversity and commercial interests. 2. Provide rapid advice, wherever possible, when bio-security

	<p>threats are detected, in the form of guidance on appropriate measures.</p> <p>3. Provision of remote (e.g. online) basic training to colleagues in overseas territories so that local capacity is developed where resources permit this.</p> <p>The very real threat posed by invasive non-native species continues to be one of the biggest environmental threats to biodiversity in overseas territories, having a significant economic impact on tourism, agriculture and forestry. Providing this service would help meet our commitments set out in the 25 Year Environment Plan, specifically taking action to recover threatened, iconic or economically important species of animals, plants and fungi and, where possible, to prevent human-induced extinction or loss of known threatened species in England and the Overseas Territories.</p> <p>In addition, it would also contribute to improving OTs' ability to meet international obligations to protect biodiversity, including under the Convention on Biological Diversity and UN Sustainable Delivery Goals.</p>
Policy Rationale:	<p>The UKOTs are recognised as having a rich biodiversity that is under serious threat from invasive non-native species. Preventing the establishment of invasive alien species in the UKOTs is a strategic priority set out in the <i>UK Overseas Territories Biodiversity Strategy</i>. This project also supports Objective 4 – Protection (being better protected against invasive non-native species) in <i>Defra's Strategy to 2020</i> and the <i>GB Non-Native Species Strategy</i>.</p>
Main Deliverables and Performance Indicators	<p>The Company shall perform the Additional Services in accordance with the specification of requirements below and the terms of the Call-Off Agreement. In particular, the Company shall comply with any timelines and provide any deliverables set out in the specification of requirements.</p> <ol style="list-style-type: none"> 1. Provide an identification service for invasive invertebrate plant pests for all of the UKOTs; including invasive non-native invertebrate plant pests, which impact on biodiversity and commercial interests. 2. Provide rapid advice, wherever possible, when bio-security threats are detected, in the form of guidance on appropriate measures. 3. Provision of remote (e.g. online) basic training to colleagues in overseas territories so that local capacity is developed where resources permit this.

	Should COVID19 impact upon the UKOTs ability to submit samples for identification the cost of this service should be reviewed.	
Required deliverables:	A report detailing: <ul style="list-style-type: none"> • The territories that have made use of the service • The number of samples provided. • A summary of the results • Details of advice provided.
