

Questions arrived on 26th July 2017

Q - Has the invitation to tender closed for MUGA design & Build ? (lot1)

A - Yes, the early engagement is for design and build based on the specification published in the tender.

As mentioned, there is an ongoing SUDS issue in the area; therefore, the macadam part of the project is required to be quoted; however, it might not be part of the delivery part. If, the macadam part will be removed, we are looking to spend the funding on the MUGA system.

Please note, as soon as the SUDS issue is solved by Bracknell Forest Council (hopefully by early November 2021); we wish to move on to the next phase of the tendering process.

Q - Is the floodlighting the only available invitation at present ? (lot2)

A - Currently, we are looking for quotations and technical drawings for the floodlighting solutions proposed. Based on the received quotes and designs, we wish to start the planning process and our public consultation.
