<p>G-Cloud services required:</p>	<p>The service level and availability criteria required for this Call-Off Contract are delivery of the responsibilities in the supplementary proposal 'Cabinet Office – Shared Services Proposal', here after referred to as the 'Proposal' and outlined below:</p> <p>Context</p> <ul style="list-style-type: none"> • A considerable amount of momentum has been gathered over recent months in the development of the Shared Services Strategy for Government. This work culminated in a Strategy Board meeting on 24th October at which the strategy was agreed by the board. The strategy's three main objectives are: <ul style="list-style-type: none"> • Delivering value and efficiency • Convergence around processes and data • Meeting end user needs • In order to take the shared service agenda forward through 2018, an overarching, multi workstream implementation plan based on 5 'next steps' is being created to move government towards the vision set out in the strategy and to help mitigate risks associated with it (e.g. splitting BPO and technology). • The work streams and deliverables in the Proposal primarily support the creation of the departmental plans that will feed into the overarching implementation plan (next step 3) and support the contractual and technology separation negotiations (next step 2). • This Work Order also acknowledges that as the implementation progresses, GSS may require further support and expertise. It also describes the additional capacity and skills that can be provided, subject to a call off agreement. <p>Strategic Leadership Support</p> <ul style="list-style-type: none"> • This workstream will work with the Strategy Director, providing value and shared services insight to support decision making. This workstream will also work with stakeholders across government to shape the direction of the implementation plans in line with the refreshed shared service strategy • This workstream will also input into governance boards and other papers as required and input into the deliverables across other workstreams <p>Departmental Plans</p> <ul style="list-style-type: none"> • Departmental plans will specify each department's plans to meet the three objectives of the shared service strategy. This phase of the implementation will focus on developing the plans in preparation for their execution. The plans for each department will have three components to map out the key activities and milestones for how they will: <ul style="list-style-type: none"> • Deliver value and efficiency through clear technology plans that outline how the departments will manage the separation of the technology platform from the BPO arrangement (if applicable to the department), moving to a new cloud platform and increased technology scope (e.g. further automation) • Converge their Finance and HR processes on the agreed global designs and data standards, in conjunction with the plan to move onto the new technology platform the department has selected. This will support global process convergence by allowing to departments to converge on the new global process standards in a way that meets their unique needs (e.g. technology and contractual milestones) • Meet end user needs through upgrades and enhancements, including to their technology platforms and user centred process improvements • All department plans will be consolidated into an overall shared services strategy implementation plan that outlines the major activities and key milestones needed to implement the strategy over the next 10 years, with both the departmental plans and overall plan monitored and tracked by the Strategic Leadership Support team. <p>Technology Separation and Contract Review</p> <ul style="list-style-type: none"> • The central tenant of the 'Delivering Value and Efficiency' pillar of the strategy is the separation of the BPO service and the underlying technology platform. Specifically, making the decision to pursue either a 'hard' or 'soft technology split with SSCL and other technology providers is crucial to setting up departments for the successful adoption of the new approved platforms stipulated in the strategy. The workstream will build a clear picture of the current state of SOP and other shared service
--	--

	<p>technology platforms is needed to support the 'hard' vs 'soft' technology split decision as possible</p> <p>Finance and HR Process Convergence</p> <ul style="list-style-type: none"> • Significant work has already been carried out by FSST and Civil Service HR (CSHR) to agree and create high level design principles, leading practice features, Finance and HR process taxonomies, Level 3 processes and user journeys. Implementing the work completed so far globally across government will require the functions to pursue a coordinated approach with departments to underpin objective 2 of the shared service strategy by converging Finance and HR processes and data around the new technology platforms. At the departmental level, this will be driven by the development of the implementation plans. At the functional level, Deloitte will support FSST and CSHR in converging process
<p>Additional services:</p>	<p>Additional Support</p> <ul style="list-style-type: none"> • We recognise that the plan to implement the shared services strategy will evolve over the 3 months to March and Deloitte have the necessary range of skills and capabilities to support the implementation as and when required, subject to a call off arrangement <ul style="list-style-type: none"> • Organisation Design - Support the Cabinet office Organisation Design expert with the redesign of the central function to support the delivery of the strategy. • Organisation Development - Support the associated people aspects of the redesign of the central function to ensure that it is as effective as possible e.g. change awareness, internal communications etc. • Communications and Branding – Support the GSS team in the creation of communication plans and materials in order to effectively communicate the progress of the strategy with users. • Training Development – Support in the development and creation of training materials required for end users e.g. user manuals, e-learnings, etc. • Enterprise and Application Architecture – Support the design of the interface mapping based on Deloitte tools and methodologies • Change and Transition Management – Support in the preparation and landing of change with affected employees to ensure adequate support and information is conveyed.
