### Putting the business into shared services

UK Shared Business Services Ltd (UK SBS) brings a commercial attitude to the public sector; helping Contracting Authorities improve efficiency, generate savings and modernise.

It is our vision to become the leading service provider for Contracting Authorities of shared business services in the UK public sector, continuously reducing cost and improving quality of business services for Government and the public sector.

Our broad range of expert services is shared by our Contracting Authorities. This allows our customers the freedom to focus resources on core activities; innovating and transforming their own organisations.

UK SBS is a people rather than task focused business. It's what makes us different to the traditional transactional shared services centre. What is more, being a not-for-profit organisation owned by the Department for Business, Energy & Industrial Strategy (BEIS), UK SBS' goals are aligned with the public sector and delivering best value for the UK taxpayer.

UK Shared Business Services Ltd changed its name from RCUK Shared Services Centre Ltd in March 2013.

### Our Customers

Growing from a foundation of supporting the Research Councils, 2012/13 saw Business Innovation and Skills (BIS) transition their procurement to UK SBS and Crown Commercial Services (CCS – previously Government Procurement Service) agree a Memorandum of Understanding with UK SBS to deliver two major procurement categories (construction and research) across Government.

UK SBS currently manages £700m expenditure for its Contracting Authorities.

Our Contracting Authorities who have access to our services and Contracts are detailed [here](#).

## Section 2 – About the Contracting Authority

### Natural Environment Research Council (NERC)

NERC is the UK's main agency for funding and managing research, training and knowledge exchange in the environmental sciences.

NERC's work covers the full range of atmospheric, Earth, biological, terrestrial and aquatic science, from the deep oceans to the upper atmosphere and from the poles to the equator.

The organisation coordinates some of the world's most exciting research projects, tackling major issues such as climate change, environmental influences on human health, the genetic make-up of life on Earth, and much more.

Working internationally, NERC have bases at some of the most hostile places on the planet; running a fleet of research ships and aircraft and investing in satellite technology to monitor gradual environmental change on a global scale. NERC provide forewarning of, and solutions to, the key environmental challenges facing society.

### Examples of funded research

- Showing the importance of mature tropical forests to the global climate.
- Developing a safer and cleaner way to mine gold by reducing the use of mercury.
- Studying the hole in the ozone layer - discovered by our British Antarctic Survey - and monitoring climate change.
- Playing a major role in the International Census of Marine Life that monitors our oceans.

### NERC also runs six organisations of world renown:

- British Antarctic Survey, in Cambridge.
- British Geological Survey, in Nottingham.
- National Oceanography Centre, in Southampton.

## Section 4 – Specification and about this procurement

Construction has begun on the RRS Sir David Attenborough - one of the most advanced polar research vessels in the world. From 2018 scientists researching oceans, ice and atmosphere will have access to state-of-the-art facilities on this floating laboratory.

The RRS Sir David Attenborough has a requirement for a 20ft ISO based containerised multi sensor core logging system.

The container will provide a temperature controlled environment to ensure that the data is captured correctly whilst processing cores at sea. The core logging system must be able to operate at sea in challenging environmental conditions and rough seas.

### **Background**

The Natural Environment Research Council, British Antarctic Survey has a requirement for a 20ft ISO containerised automated Multi Sensor Core Logging (MSCL) to be installed on the new polar research vessel RRS Sir David Attenborough (SDA).

The MSCL will be purchased following successful completion and award of the contract . The contract will be for a period of 4 years within which the upgrades and sensors listed in the Specification may be purchased if budgets allow.

The maximum budget for the initial purchase of the equipment is £250k and the maximum budget for the upgrades/sensors is up to £300k. Any bids received which exceed these values will be deemed non compliant and will not be evaluated.

### **General Specification**

The SDA has provision to accommodate industry standard ISO shipping containers and the automated MSCL system will be provided in a standard 20ft ISO container. The container will be housed in the Science Hangar on-board the SDA. Ambient air temperatures in the science hangar will range from -5° to +30°C.

A suitable junction box with terminal connections is to be provided in order to allow connection of the container systems to the ship. The junction box is to be rated to IP66.

The following items will be wired in:

- Smoke and heat detectors compatible with the ships fire detection. The supplied heads must be Salwico EV-PH (040030) as this is compatible with the system on-board the SDA.
- Two fire alarm call points.
- One alarm sounder.

The container will require a Local Area Network both for internal use, and to connect the container to existing ship networks via fly lead, compatible with GG45 connector (see below).

Provision must be made in the design for connection to the ship's main LAN via a flying lead (or leads) through a waterproof (IP67) gland.

The main network infrastructure should be based on Category 7 copper wire terminated in Category 7 GG45 connectors.

The MSCL system shall have capability to operate at sea in rough conditions. Anti-vibration measures will be integral to the designed solution and fixing inside the container. A shear compression system must be provided.

The system shall operate from either a 440V 60Hz supply or 240V 60Hz supply.

The automated MSCL system will comprise sensors for the following measurements:

- P-wave velocity
  - Piezo electric ceramic transducers 280-480 kHz (or better) to be spring loaded against the sample.
- Gamma Density
  - 137Cs gamma source contained within a lead shield. Lead shield must have security measures as part of the design to ensure safety and integrity of radioactive source.
- Magnetic susceptibility (on both whole core sections and split cores with an outer diameter up to 125 mm and lengths up to 150 cm)
  - Bartington loop sensor 60-150mm diameter and point sensor for split cores.

In addition to the sensors listed above, the system must offer an upgrade path to the following sensors:

- Electrical Resistivity System
- Double paired coil induction to enable non-contact resistivity measurements. Natural Gamma Ray Sensor System Spectroscopy
  - measuring reflectance in the near UV through the visible and just into the near IR range (wavelengths 360-740nm).
- Near-infrared / visible spectrophotometer
  - Measuring in the wavelengths of 350-2500nm.
- Line-Scan camera
  - Linescan imaging system to generate RGB images from cores.
  - UV light option for the line-scanner
- X-ray fluorescence
  - Handheld X-ray fluorescence spectrometer to provide elemental analyses.

As part of your contract, you will supply a fully containerised system that will enable the MSCL system to perform optimally given the polar and non-polar environments which the system will be required to operate in.

There are no guarantees that any of the sensors specified will be purchased during the contract, but up to a maximum of one of each of these may be purchased during the 4 years of the contract. All prices are to remain fixed and firm for the initial 2 years of the contract. Any changes to these prices must be agreed by both parties and any increases must be in line with RPI (Regional Price Index)

The container is to be fully marked in accordance with ISO regulations to include the owners mark "BASU – XXX XXX X" (number to be confirmed). The container is to be fitted with CSC Safety approval plate. BAS will provide details of the container numbering when required.

The container must include insulation and air handling / conditioning units to ensure that the MSCL system operates in a stable environment. The temperature in the science hangar can vary between -5 and +30 thus the container and air handling system in the container must be designed to accommodate this fluctuation in temperature.

The container must incorporate security measures to ensure that the Caesium-137 is stored in appropriate measures conforming to Environmental Permitting (England and Wales) Regulations 2010 (EPR10) and the Ionising Radiations Regulations 1999 (IRR99).

## Award Scoring criteria

### Evaluation Justification Statement

In consideration of this particular requirement the Contracting Authority has decided to evaluate Potential Providers by adopting the weightings/scoring mechanism detailed within this RFP. The Contracting Authority considers these weightings to be in line with existing best practice for a requirement of this type.

Questionnaire	Q No.	Question subject	Maximum Marks
Price	AW5.2	Price	60.00%
Quality	PROJ1.1	MSCL Future Upgrade	35.00%
Quality	PROJ1.6	Anti-Vibration Measures	5.00%

## Award Evaluation of criteria

### Non-Price elements

Each question will be judged on a score from 0 to 100, which shall be subjected to a multiplier to reflect the percentage of the evaluation criteria allocated to that question.

Where an evaluation criterion is worth 20% then the 0-100 score achieved will be multiplied by 20%.

Example if a Bidder scores 60 from the available 100 points this will equate to 12% by using the following calculation:

$$\text{Score} = \{\text{weighting percentage}\} \times \{\text{bidder's score}\} = 20\% \times 60 = 12$$

The same logic will be applied to groups of questions which equate to a single evaluation criterion.

The 0-100 score shall be based on (unless otherwise stated within the question):

0	The Question is not answered or the response is completely unacceptable.
10	Extremely poor response – they have completely missed the point of the question.
20	Very poor response and not wholly acceptable. Requires major revision to the response to make it acceptable. Only partially answers the requirement, with major deficiencies and little relevant detail proposed.
40	Poor response only partially satisfying the selection question requirements with deficiencies apparent. Some useful evidence provided but response falls well short of expectations. Low probability of being a capable supplier.
60	Response is acceptable but remains basic and could have been expanded upon. Response is sufficient but does not inspire.
80	Good response which describes their capabilities in detail which provides high levels of assurance consistent with a quality provider. The response includes a full description of techniques and measurements currently employed.
100	Response is exceptional and clearly demonstrates they are capable of meeting

	the requirement. No significant weaknesses noted. The response is compelling in its description of techniques and measurements currently employed, providing full assurance consistent with a quality provider.
--	---

All questions will be scored based on the above mechanism. Please be aware that there may be multiple evaluators. If so, their individual scores will be averaged (mean) to determine your final score as follows:

**Example**

Evaluator 1 scored your bid as 60  
 Evaluator 2 scored your bid as 40  
 Evaluator 3 scored your bid as 80  
 Evaluator 4 scored your bid as 60  
 Your final score will  $(60+40+80+60) \div 4 = 60$

**Price elements** will be judged on the following criteria.

The lowest price for a response which meets the pass criteria shall score 100.

All other bids shall be scored on a pro rata basis in relation to the lowest price. The score is then subject to a multiplier to reflect the percentage value of the price criterion.

For example - Bid 1 £100,000 scores 100.  
 Bid 2 £120,000 differential of £20,000 or 20% remove 20% from price scores 80  
 Bid 3 £150,000 differential £50,000 remove 50% from price scores 50.  
 Bid 4 £175,000 differential £75,000 remove 75% from price scores 25.  
 Bid 5 £200,000 differential £100,000 remove 100% from price scores 0.  
 Bid 6 £300,000 differential £200,000 remove 100% from price scores 0.

Where the scoring criterion is worth 50% then the 0-100 score achieved will be multiplied by 50

In the example if a supplier scores 80 from the available 100 points this will equate to 40% by using the following calculation: Score/Total Points multiplied by 50  $(80/100 \times 50 = 40)$

The lowest score possible is 0 even if the price submitted is more than 100% greater than the lowest price.

**5.5. Evaluation process**

5.5.1 The evaluation process will feature some, if not all, the following phases

Stage	Summary of activity
Receipt and Opening	<ul style="list-style-type: none"> <li>RFP logged upon opening in alignment with UK SBS's procurement procedures.</li> </ul>

For these purposes, the Contracting Authority may disclose within Government any of the Bidders documentation/information (including any that the Bidder considers to be confidential and/or commercially sensitive such as specific bid information) submitted by the Bidder to the Contracting Authority during this Procurement. The link below to the Gov.uk website provides information on the new GSC: <https://www.gov.uk/government/publications/government-security-classifications>
- 7.3.7 The Contracting Authority reserves the right to amend any security related term or condition of the draft contract accompanying this RFP to reflect any changes introduced by the GSC. applicable protective marking scheme, specific protective markings given, the aspects to which any protective marking applies or otherwise. Bidders should note, however, that, even where information is identified as commercially sensitive, the Contracting Authority may be required to disclose such information in accordance with the FoIA or the Environmental Information Regulations. In particular, the Contracting Authority is required to form an independent judgment concerning whether the information is exempt from disclosure under the FoIA or the EIR and whether the public interest favours disclosure or not. Accordingly, the Contracting Authority cannot guarantee that any information marked 'confidential' or "commercially sensitive" will not be disclosed.
- 7.4.4 Where a Bidder receives a request for information under the FoIA or the EIR during the procurement, this should be immediately passed on to the Contracting Authority and the Bidder should not attempt to answer the request without first consulting with the Contracting Authority.
- 7.4.5 Bidders are reminded that the Government's transparency agenda requires that sourcing documents, including RFP templates such as this, are published on a designated, publicly searchable web site, and, that the same applies to other sourcing documents issued by the Contracting Authority, and any contract entered into by the Contracting Authority with its preferred supplier once the procurement is complete.
