Tender ref: UoS/DH/24/25/QTR2/ Eye-Tracking Device

University of Salford – Eye-Tracking Device.

The University of Salford are currently looking to purchase an eye-tracking device. We are looking for a desktop device based on binocular tracking with a sample rate of no less than 1000Hz. Packages should include all hardware necessary to conduct eye-tracking research, and software for experiment building/data viewing. There is a requirement for hardware/software to integrate with PsychoPy software.

For any questions, please contact Sam Royle, Lead Psychology Technician/Lecturer, w.s.s.royle@salford.ac.uk.
