Item No	Description
Available Day Rate	
Consultant Grade	Day Rate
Redacted Under FOIA Section 43, Commercial Interest	

The total contract value for the initial period (18 months) is up to a maximum of £2,000,000 with an additional option to extend for a further 9 month period. PS: Spend is not guaranteed and is at DESNZ 's discretion.

As we mobilise and understand the requirement, we expect DESNZ will request additional resources in order to successfully deliver the EBDS. As such Moorhouse will manage the contract as per the resource requirement described and asked for by DESNZ.

Our SME pool will have a set number of days that can be used over the course of each month as needed. In situations where there are additional requirements that require more input i.e. during a period of intense policy development, we will mutually agree this with DESNZ and call off at an agreed day rate that reflects the rate card above. Only resource called off from the SME pool is chargeable to DESNZ.

The contract has a maximum cost based on the number of resources multiplied by the rates (as above), and as such if DESNZ request resources that takes us above the maximum cost, Moorhouse will notify DESNZ of this. We will keep DESNZ informed via fortnightly contract sessions of the current spend and project spend for year one and beyond.

We will work throughout the contract with DESNZ to manage the resource profile including additional resource requests, onboarding and offboarding of resources as required.

OVERVIEW OF THE AUTHORITY

Introduction:

On 7 February 2023, The Department for Energy Security & Net Zero (ESNZ) was created from The Department for Business, Energy & Industrial Strategy (BEIS). The new ministerial department is led by Grant Shapps as Secretary of State, with Jeremy Pocklington and Clive Maxwell at Permanent Secretary level. It will incorporate the following groups from BEIS: Energy Infrastructure, Energy Markets and Supply, Net Zero Building and Industry and Net Zero, International and Nuclear. The Department for Energy Security and Net Zero is focused on the energy portfolio from the former Department for Business, Energy and Industrial Strategy.

Mission:

The Department for Energy Security and Net Zero provides dedicated leadership focused on delivering security of energy supply, ensuring properly functioning markets, greater energy efficiency and seizing the opportunities of net zero to lead the world in new green industries. This year, the department will focus on easing the cost of living and delivering financial security by bringing down energy bills and keeping them down - better insulating consumers from external impacts. Longer term objectives include ensuring properly functioning energy markets; coordinating Net Zero objectives across government; and bringing external delivery expertise to bear on its portfolio of major projects.

Priority Outcomes

1. Ensure security of energy supply this winter, next winter and in the longer-term – bringing down energy bills and reducing inflation.
2. Ensure the UK is on track to meet its legally binding Net Zero commitments and support economic growth by significantly speeding up delivery of network infrastructure and domestic energy production.
3. Improve the energy efficiency of UK homes, businesses, and public sector buildings to meet the 15% demand reduction ambition.
4. Deliver current schemes to support energy consumers with their bills and develop options for long-term reform to improve how the electricity market works for families and businesses.
5. Seize the economic benefits of Net Zero, including the jobs and growth created through investment in new green industries.
6. Pass the Energy Bill to support the emerging CCUS and hydrogen sectors; to update the governance of the energy system; and to reduce the time taken to consent off-shore wind.

BACKGROUND

In response to escalating energy prices, the Government has decided that high value interventions in the energy market to support non-domestic customers are required.

To mitigate the impact of high energy bills across the non-domestic market, the then Department of Business Energy and Industrial Strategy (BEIS) implemented the first phase of the Energy Bill Relief Scheme (EBRS). The scheme was launched in October 2022, and is providing financial support to businesses primarily through their energy suppliers. The current version of the scheme will close in March 2023.

<https://www.gov.uk/guidance/energy-bill-relief-scheme-help-for-businesses-and-other-non-domestic-customers>

The EBRS successor scheme, the Energy Bill Discount Scheme (EBDS), was announced in January 2023, and will be launched on 1st April 2023. As with EBRS, the EBDS scheme will be available to everyone on a non-domestic contract including businesses, voluntary sector organisations, such as charities, public sector organisations such as schools, hospitals, and care homes who are on existing fixed price contracts that were agreed on or after 1st December 2021. The level of support that will be made available will be lower than that provided through the EBRS.

More details of the EBDS scheme can be found here

<https://www.gov.uk/guidance/energy-bills-discount-scheme>

There is also another element of the current EBRS programme that will continue in some form in EBDS, which involves providing financial support to those customers whose energy is provided by non-regulated suppliers, known as non-standard cases (NSC).

For further information, please visit

<https://www.gov.uk/government/publications/energy-bill-relief-scheme-non-standard-cases>

In summary, the NSC element of the programme is designed to provide support for certain non-domestic customers that do not fall within the ambit of EBRS, who are taking energy from the public electricity or gas grid, where that energy is provided by non-licensed energy suppliers, known as Qualifying Energy Providers. The scheme is equally applicable to consumers both in Great Britain and Northern Ireland.

The NSC element of the programme adds further complexity to the overall scheme that is necessarily being delivered at pace to ensure those eligible non-domestic consumers receive the support needed for their businesses.

As with many government funding schemes, there is an ever-present risk of fraud and error, and the programme, along with the other energy relief schemes continues to be ever vigilant to identifying and reduce the risk of fraudulent payments. Furthermore, given the complexity of the scheme eliminating the gaming of the system. This work sits alongside the work to mitigate the risk of miscalculation that is present in a scheme with inherent complexity.

SCOPE OF THE CONTRACT

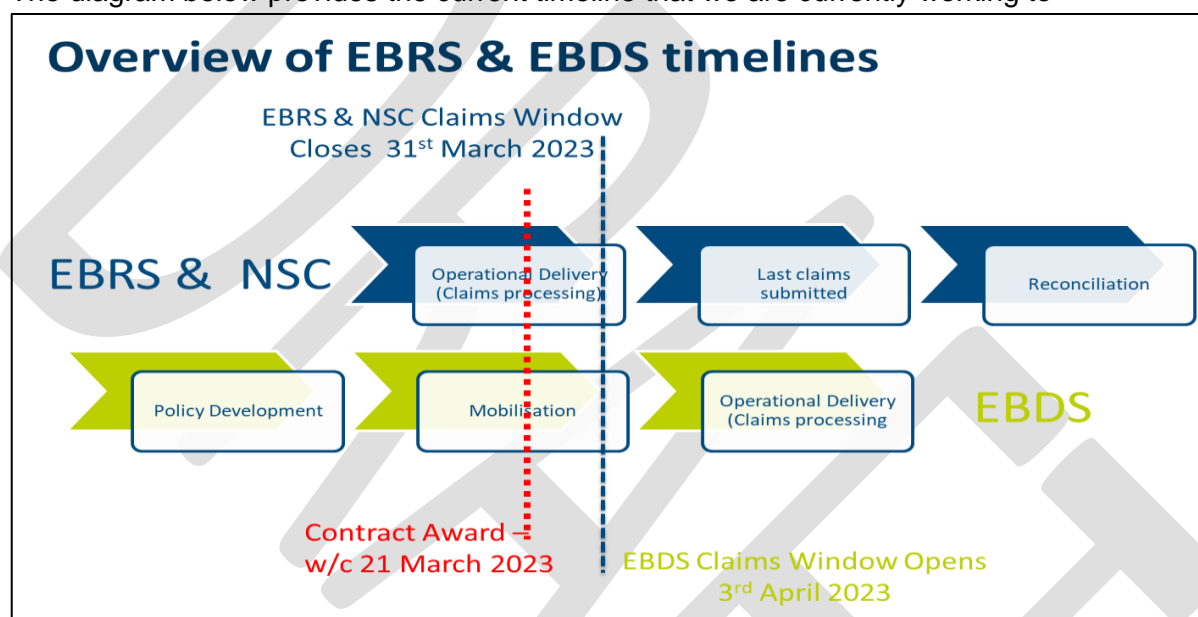

The overarching scope of this contract is to provide the Energy Security and Net Zero department with ongoing specialist support to enable the continued delivery of the non-domestic energy bill affordability schemes in order to mitigate the impact of the high energy

bills for non-domestic consumers.

The specialist professional services supplier, who will have significant experience of the non-domestic energy market, will be required to work with the EBRs/EBDS team to support the:

1. Close out of the EBRs, including the non-standard cases (NSC) element of the programme.
2. transition from the EBRs to the successful implementation of the new EBDS, including the provision of specialist energy market advice. This will include, but not be limited to, ongoing policy development, mobilisation and delivery and operation of the EBDS.
3. development and delivery of additional elements of the scheme, including provision of specialist energy market advice, as required.

The diagram below provides the current timeline that we are currently working to

At the time of contract award for these services, the EBRs will be nearing closure, with the programme working on mobilising the EBDS.

The successful supplier will be expected to be able to deploy resources at the point of contract award.

The successful supplier may also need to engage with the current specialist service supplier to ensure the successful transition of the specialist service provision.
