

Bidders Questions 29/07/17

Would you like a new pathway through the park linking the equipment?

- A. If fitting with the design and budget then yes please.

Do you need us to remove the existing kit – if so, which kit would you like us to remove?

- A. Please cost for removal and we can compare with removing it ourselves. We would be happy to keep any equipment which is in good condition and fitting with the design. Should the equipment not fit with the design we may use it elsewhere.

Would you like us to keep the mini golf and table tennis sections as they are?

- A. Yes please

Would you like us to design in some hard surfacing to allow for higher levels of inclusive play?

- A. We would like to make the play space as accessible as possible. If hard surfacing were used please ensure it blends with the natural environment as much as possible.

Do you want the new play space to sit within the same boundary as the existing park, or are we able to extend the area if needed?

- A. Ideally we would want to keep it within the same area.

Is the existing street furniture to remain on site – if so can it be relocated?

- A. Consultation has suggested that benches for parents could be better located. I am not sure of the condition of the existing benches but if they are adequate and would look better elsewhere please relocate. The same for other easily relocatable street furniture.
