

Bidder Questions 25th July

Is water play an option?

- A. Water play has been mentioned several times by the community, however the Council is concerned about the viability and long term maintenance of this feature.

If water play is viable is there a way of transporting the water from the cafe or would a pump be required?

- A. I'm afraid I don't know how it could be transported and suspect a pump would be needed.

I understand the tender suggests that the sand area is separate but i see alot of interest in this feature from the public feedback.

- A. Council members would like to leave the sand play area as it is.
