

Lighting design level has been performed according to current standards, information supplied prior to confirming design and good design practice.
Cable conditions, reflectance values, installations unknown to engineers, performance of specific components and assumptions made by engineers may cause differences between calculated and predicted values.
Dextra Group Plc will not accept any responsibility for the individual emergency level.
Any drawings in the library of the lighting systems and Dextra Group Plc will not be responsible for any differences in either design or specific details comparisons.
