Annex 2 – Specification

Below is the specification issued by the Authority within the Bidder Pack (project ref: C20549)

Background to Natural England

Natural England is the government's adviser for the natural environment in England. Our purpose is to help conserve, enhance and manage the natural environment for the benefit of present and future generations, thereby contributing to sustainable development. Further information about Natural England can be found at: [Natural England](#)

The contract is funded through the Agri-environment Evidence Programme which is led by Natural England and funded by Defra. The programme monitors and evaluates Agri-Environment (A-E) Schemes. More information can be found in the 2022 Annual Report for the Agri-environment Evidence programme ([NERR126](#))

Context

This project will provide further evidence of the contribution that AE schemes make to the aims and aspirations of the Defra 25 YEP for conserving and enhancing beauty and England's distinctive landscape character; also, the need identified by the Glover Landscapes Review for better evidence of how England's landscapes are changing and using the evidence to more pro-actively influence desired changes and to ascertain the contribution that AES are making in that broader context. The project will make a highly significant contribution to supporting the Defra 25 YEP because the AES scheme landscape monitoring uses the same spatial and reporting framework (National Character Areas) and the findings will feed directly into the Defra 25 YEP Outcome Indicator G1: 'Changes to landscape and waterscape character'.

The body of AES landscape monitoring evidence is now substantial and whilst it is necessary to keep the assessments of scheme effectiveness updated, the emphasis must now be to use the evidence to inform a more strategic approach to the landscape spatial prioritisation and targeting of AE Schemes in the wider context of England's landscapes and how they are changing. There are also lessons to be learnt to inform a way to integrate Landscape more robustly into the mix of outcomes delivered by current and future AE Schemes, in a way that also assists landscape as context for nature recovery and making landscapes more resilient to climate change.

Background information

This project builds on a series of connected AES Landscape research and monitoring projects published in the Defra Science pages (links provided under 'Supporting Documents', below):

BD5303: Cumulative impact of Environmental Stewardship on landscape character (2010-2013)

LM0429: Developing Indicators and Thresholds for Monitoring the Landscape Impacts of Environmental Stewardship at the National Character Area Scale (2012 – 2014) The 2013 Analysis of ESS

LM0434 - Monitoring the impact of ES on Landscape Character and Quality (2014-15) Rapid Field Survey

LM0456 - Monitoring the impact of Environmental Stewardship (ES) on Landscape Character and Quality (2014-16) Rapid Field Survey and analysis

LM0483 - Monitoring the impacts of AES on landscape character, quality and resilience (2018 - 20) Includes the 2018 Analysis of ESS and CSS

Two current AES landscape research projects are relevant and due to complete in 2023 (details available from Natural England):

- a) Public perceptions of the impact of Agri-Environment Schemes on the landscape (LM04139)
- b) Landscape counterfactuals (LM04131)

PROJECT OUTLINE

The project is planned to have a duration of 2 years - Phase 1 in 2023/24 and Phase 2 in 2024/25 (subject to funding being available). The aims of the project are to:

(Phase 1 2023/4)

- a) **Provide a third 4-year interval analysis (for 2022/23) aligned with the previous analyses for 2013 (LM0429 baseline) and 2018 (LM0483)** of the impact of AES on the conservation and enhancement of landscape character and quality. The task will use an established method to analyse statistical data per NCA relating to uptake of AES options across several landscape themes. It will also make rules-based judgements about the significance and direction of change.
- b) **Prepare an AES landscape strategy**, working closely with Natural England, that can inform AE Scheme policy and guide the way in which AES is spatially prioritised and targeted for positive landscape outcomes in the context of Nature Recovery; also to inform a forward-looking monitoring programme, building on previous research and help to inform the approach to a programme of field survey tasks c) and d) below
- c) **Undertake preparation for the landscape field surveys** (to be implemented in Phase 2). This task will prepare for landscape field surveys to both resurvey a proportion of the baseline Landscape Rapid Field Survey data gathered in the 2012 pilot (BD 5303) and during 2014 to 2016 (LM0456) to assess change, and to expand the baseline into under-represented landscapes of interest – e.g. those landscapes identified in b) above. The task will adhere to the established methods and includes selecting baseline sample areas for resurvey, locating the new sample survey areas, and digitising the necessary up-to-date details (provided by others) of AES agreements

falling within all the sites to be surveyed. The task will provide further ground truthing data about how AE Scheme options and actions are being implemented and their effectiveness in maintaining, conserving or enhancing the landscape character.

d) **Provide a Phase 1** report to include tasks A – C with reference to methods, analysis, findings, recommendations and lessons learnt; also, a 2-page summary of the findings of task A and B accompanied by a ppt presentation of findings, recommendations and lessons learnt

Phase 2 (2024/25, subject to available funding)

e) **Implement the extension of the landscape rapid field survey.** It is expected that this work can be carried out in the Spring/Summer of 2024 so that the survey can accurately identify the condition of landscape features, and to allow an efficient comparison with baseline data captured in the 2012 pilot and 2014-16 surveys. The task will provide further ground truthing data about how AE Scheme options and actions are being implemented and their effectiveness in maintaining, conserving or enhancing the landscape character.

f) **Undertake an analysis of the Landscape Rapid Field Survey data**, including a comparative change analysis with previous baseline sites and a baseline analysis of new sites, looking at the effectiveness of AES on the ground in conserving and enhancing landscape character and quality – with an additional broad assessment of AES effects on making landscapes more resilient in the context of climate change and associated land management changes.

g) **Provide an overall report for Phase 2 (with reference to Phase 1 report) and peer review** to be provided as a full MS Word and PDF document and 2-page summary accompanied by a ppt presentation of methods, findings, recommendations and lessons learnt.

DETAILED REQUIREMENTS

Suppliers are required to provide a tender with a breakdown of costs **for both of the following Phases 1 and 2 package of outputs:**

PHASE 1: 2023/24

A) **Provide a second (4-year) interval analysis (for 2022/23) of the AES landscape change database, following on from the 2013 (LM0429) baseline and 2018 (LM0483) update analysis of the impact of AES on the conservation and enhancement of landscape character and quality.**

To provide updated trend data on where and how AE Schemes are having a neutral, positive or strongly positive effect in the landscape.

This requirement is a repeat, comparable analysis, using an established method based on an update to the AES landscape change database, and a rules-based qualitative assessment of the effects of uptake of those AES options that conserve and enhance the stock of relevant characteristic landscape features. The analysis will follow the

methods established in previous research BD5303, LM0429 and LM0483, and provide findings that are comparable with the 2013 and 2018 analysis provided in LM0483:

- the 159 NCAs (also aggregated to the 6 Agricultural Landscape Types - ALTs) covering all-England.
- those NCAs that are included in Protected Landscapes (as provided for the 2018 analysis (LM0483), i.e.- a Protected Landscape cut of the analysis.

The previous research reports can be found on the Defra Science pages and links are provided under references in the Supporting Documents section of this document. The analysis will also need to account for the on-going transitions between Environmental Stewardship (ES) into Countryside Stewardship (CS) and also the current Environmental Land Management (ELM) Schemes over the period since 2018 to 2022/23. This will require a systematic review of how the uptake (and influence on landscape character and quality) of relevant options and actions in ELM Schemes relate to the uptake of similar options in ES and CS. (NB: LM0483 did include a similar comparative review of ES and CS options)

The output will be a second iteration of analysis of change indicators (since the baseline was established in 2013) using the 'best available' data circa 2022/23. The outputs will include:

- an underpinning analysis per NCA with results presented by landscape change theme for Agricultural Landscape Types (ALTs) and for Protected Landscapes
- presentation in the form of a report on methods, findings and recommendations, a 2-page summary (also see D), plus data that will be fed into the AE Scheme landscape change database and atlas/dashboard.

This task is expected to be undertaken during mid-October to end December 2023 and AES data will be made available at the beginning of the contract in October.

B) Prepare (working closely with Natural England) an AE Scheme landscape strategy that can inform AE Scheme policy and guide the way in which landscape is embedded in future AE Schemes (e.g. Landscape Recovery and Local Nature Recovery Schemes) and, going forwards, is spatially prioritised and targeted for positive landscape outcomes; and shape future monitoring of the effectiveness of AES in conserving and enhancing landscape character, quality and resilience.

This output will utilise the 2013, 2018, 2022/23 interval analyses and the available suite of past AE Scheme research to assess strategically how the uptake of different ES/CS options (or combinations of options) has influenced the condition of key characteristic features and overall character of landscapes at the scale of NCAs and the 6 Agricultural Landscape Types (ALTs). In addition, looking to the future of AES, to use the findings to inform:

- A broad strategy for spatial prioritisation of AES, including a rationale for targeting AES where it can both conserve and enhance valued landscapes and influence landscape enhancement in landscapes where positive change is needed to provide benefits to people (e.g. closer to where people live).

- Working with Natural England provide a wider, strategic review of England landscape change monitoring and the All-England mapping of areas of landscape value and need (Natural England to provide information on these projects to the successful supplier)
- Evidence supporting the importance of having landscape objectives in AES and assist with embedding landscape within current scheme policy and design (including Landscape Recovery and Local Nature Recovery Schemes and the latest iterations of Countryside Stewardship being carried forwards). The reasons why Landscape objectives have become marginalised in AE Schemes is difficult to identify; however, this task will need to show through narrative and illustration what opportunities are missing from the current schemes because landscape is not included. What would these opportunities look like? To demonstrate the increased benefit of including landscape much more explicitly?
- A recommended, cohesive programme of AES landscape monitoring taking forwards and integrating existing research such as:
 - o The AES landscape change database trend analysis
 - o The landscape baseline field surveys and analyses
 - o The landscape counterfactuals pilot approach and analysis including use of remote sensing techniques.
 - o The public perceptions of the impact of AES on the landscape

The output will be presented in the form of a report on methods, findings and recommendations including a 2-page summary, mapped information that can be hosted on the AE Scheme landscape change atlas/dashboard and evidence hub.

This task is expected to be started in October concurrent with task a) and to be refined during the contract period. This is so that it can also strategically inform the new landscape field survey locations as well as recommendations for future AES prioritisation, targeting and monitoring (presented in the overall report (see D).

C) Undertake all preparations for a sample resurvey and an extension of the Landscape Rapid Field Survey data gathered in the 2012 pilot (BD 5303) and during 2014 to 2016 (LM0456).

Use the findings of a) and b) to help inform a sample resurvey and extension to the Baseline Landscape Rapid Field Survey data gathered in the 2012 pilot (BD 5303) and during 2014 to 2016 (LM0456 which provides baseline empirical data about the effects of AES 'on the ground' within 596 1km sample squares).

This task will make **preparations** for the landscape field survey work to be undertaken in Phase 2 which will adhere to methods established and described in LM0456. The approach aimed to sample the Agricultural Landscape Types (ALTs) by placing clusters of 4 or 5 1km squares within NCAs representative of each of the 6 ALTs. The baseline 596 1km squares provide good coverage; however, there are landscapes that are less well represented such as those closer to towns and cities, and coastal landscapes, which are increasingly important as a future focus for landscape enhancement.

The approach focussed on gathering data about the effects of AES on landscape character and quality. This project seeks to extend the data analysis into assessing effects on 'landscape resilience' to key drivers of change such as agricultural management and climate change. Therefore, the preparation may need to review what data is captured to help address landscape resilience (NB: LM0483 included some initial analyses of how AES is contributing to making landscapes more resilient to climate change)

The task will also need to be aware of the findings of pilot surveys carried out as part of recent research into 'landscape counterfactuals' (LM04131) on land outside of AES agreements or where agreements have lapsed (the research included some of the baseline landscape survey sites). This task needs to consider how the counterfactuals research can be made more integral to the baseline landscape field survey going forwards.

'Preparations' – includes a review of all relevant research material to inform the selection of resurvey sites and the location of new survey sites; it also includes the organisation and digitising of AES agreement records provided by Natural England in PDF format (to facilitate use of recording field data on tablets and subsequent analysis/data management)

Number of field survey squares. This task is based on the assumption that preparations for the following number of 1km² field surveys need to be carried out as a basis for a meaningful analysis of indicative changes within the existing baseline, and a meaningful extension of the baseline into under-represented landscapes of interest identified in task b):

Resurvey of existing baseline squares – 150 1km² sample squares

New baseline squares - 100 1km² sample squares

Total: 250 1km² sample squares

Pricing will be based on the 250 sample squares for which necessary agreement records (provided by Natural England) will need to be digitised as part of this task. (Please also take into consideration that some of the mapped information associated with the sample resurveys will already have been digitised previously for the baseline survey; although there will be some subsequent changes to agreements that will require digitising)

The Authority also requires a price for preparations relating to an additional 50 and 100 new baseline 1km squares (resulting in 300 and 350 total squares respectively)

The records made available (by Natural England) for each sample square will include details in PDF of all agreements including the agreement document, options map and farm environment record and plan (FEP/FER).

The records will be made available by December 2023 to allow this task to be undertaken in December to March 2024.

- D) **Provide a Phase 1** report to include tasks A – C with reference to methods, analysis, findings, recommendations and lessons learnt; also a 2-page summary of the findings of task A and B

PHASE 2 2024/25 subject to available funding and dependent on confirmation of contract variation by NE. Confirmation is planned for Q4 2024.

- E) **Implement the sample resurvey and extension of the Landscape Rapid Field Survey as set out in phase 1.**

This task includes organisation of the field survey team and to carry out the landscape field survey, recording data on tablets, photographic records and data management ready for analysis. The survey approach will adhere to existing survey protocols used in the previous rapid field surveys described in LM0456.

Costs will be provided for the following numbers of resurveys and new baseline surveys:

Resurvey of existing baseline squares – **150 1km squares**

New baseline squares - **100 1km² squares**

Total: 250 1km² squares

The Authority also requires costs for field survey of an **additional 50 and 100**. new 1km squares (resulting in 300 and 350 total squares respectively).

- F) **Undertake an analysis of the Landscape Rapid Field Survey data.**

This task will include a comparative change analysis within resurveyed baseline sites and an analysis of the baseline findings in new 1km squares.

The analysis will follow the methods used in the baseline research LM0456; the findings included an assessment of how effective options and bundles of options are in 'maintaining', 'conserving' or 'enhancing' landscape character and quality; also, in what (relatively few) circumstances the effects on the ground can be having a detrimental impact on landscape. This project also aims to make a broad assessment of whether AES is helping to make landscapes more resilient to a changing climate and associated land management.

- G) **Provide an overall report for Phase 2 (with reference to Phase 1 report) and peer review** to be provided as a full MS Word and PDF document and 2-page summary accompanied by a **ppt presentation** of methods, findings, recommendations and lessons learnt (to be presented in May/June 2024)

Provide for a peer review of the final report, to be undertaken by two appropriately experienced independent consultants, agreed with Natural England.

Milestones

In order to assist the NE project manager to observe the progress please include sufficient milestones within the project/specification that will demonstrate the progress of the research. Recommended milestones are as follows:

- Interim report by end December 2023 (if applicable)
 - Submission of final report by 31st March 2024 (please note, payment will not be released until the report has been reviewed and deemed satisfactory by the project manager)
 - Dissemination activities e.g. workshop/presentation to NE/Defra by 30th June 2024

In addition, this project will be paid by achievement of milestones. However, not all milestones need to be associated with payment; and it may be appropriate to include additional milestones that are not related to payment but are used to indicate progress within the project. The frequency of milestone payments should be determined by the contractor; however, we request that they are appropriate and not at a frequency greater than monthly.

Should a workshop be included in this project proposal; the milestone payments need to take into account of any associated costs to ensure that the successful contractor has sufficient funds to pay for any workshops costs in advance of the workshop. Defra will not be able to pay any venue hire or refreshments costs on behalf of the contractor.

Surveys (Phase 2)

If a survey is to be undertaken as part of this study, approval will need to be gained from the Survey Control Liaison Unit (SCLU) in Defra. (It is anticipated that for field survey implemented in Phase 2, Natural England will liaise with SCLU and the successful bidder in advance to obtain any approvals required for field survey)

Any structured approach made by or on behalf of the Government in order to obtain aggregated data is classed as a statistical survey and should be referred to Defra's Survey Control Liaison Unit (SCLU). This also applies to customer satisfaction surveys.

Exceptions are:

- surveys addressed to respondents in central Government or its Agencies (e.g. staff surveys);
- surveys where the respondents select themselves without a direct approach from us, e.g. surveys carried out via a website;
- readership surveys where a questionnaire is sent out together with the material concerned;
- consultation exercises where there is an invitation to comment generally rather than a structured list of questions;
- surveys addressed to the general public (as opposed to ones which contact people in their business capacity). However, SCLU need to be advised so that the survey can be registered on the Department's record

- and included in the Annual Report to Ministers; and surveys to fewer than 25 respondents.

NE and Defra are strongly committed to minimising the burden they place upon businesses and local authorities. As a result proposals for new surveys must be assessed by the Survey Control Liaison Unit (SCLU). In order to undertake the survey of agreement holders, proposed as part of this project, approval will need to be gained from the SCLU. NE will make the initial application, but, following outline approval the successful contractor(s) will be required to provide a draft questionnaire to be agreed and approved. A period of at least 6 weeks should be built into the project plan to accommodate this survey approval process.

It is the responsibility of the successful bidder to ensure that the survey is provided in accordance with the time requirements of this project for SCLU approval.

Outputs

The successful Contractor will be required to provide the NE project manager with updates of progress on a monthly basis. The form of these updates will be agreed in the inception meeting.

A summary report at Phase 1 and Phase 2 stages will be required for the Steering Group Meeting, the format of which will be agreed at the Inception meeting.

A final report will be required to present the results obtained from the project;

The format of the presentation of this report will be agreed between the project manager and project leader. Natural England requires the opportunity to comment on draft Final Reports. Bidders should be aware that Natural England and Defra intend to publish final reports.

A 2-page summary and ppt (for Phase 1 and Phase 2 stages) presented by the successful bidder at a Webinar to be arranged by Natural England.

Natural England is happy to encourage widespread publication, and welcomes the use of appropriate trade press, peer-reviewed journals and sector-specific journals. The contractor will be responsible for ensuring both the quality of the work as well as the presentation of the material (e.g. proof reading, ensuring clear English). The contractor is also to be aware that Natural England requests that all publication (including oral presentations) of its funded research is notified to the project manager at least two weeks before publication.

Peer reviews

A comprehensive, externally peer-reviewed final written report suitable for publication as a Defra science report, covering all objectives and tasks of the project (on completion of Phase 2). The contractor will be responsible for arranging peer-review of the final report by 2 appropriate reviewers, to be agreed with the Project Steering Group.

For carrying out the peer review Natural England will provide:

- A form for peer reviewers to complete to guide them through key questions
 - A declaration for reviewers to sign regarding the use of confidential information and any conflicts of interest.

There should be a minimum of two peer reviewers and they must be independent of organisations working on the project. A cost for peer review should be itemised in the tender. This should take into account staff time to organise the peer review, staff time to edit reports in light of the reviews (subject to steering group agreement) and cover costs for reviewers if required.

Natural England and Defra require the opportunity to comment on draft final reports (allow approx. 4 weeks). The report must be finalised by 30th April 2024 therefore a first draft must be submitted by 25th February to allow time for review and revision.

3.2 The Supplier is deemed to accept the offer in the Order Form when the Authority receives a copy of the Order Form signed by the Supplier.

3.3 The Supplier warrants and represents that its Tender Submission and all statements made and documents submitted as part of the procurement of Deliverables are and remain true and accurate.

4. What needs to be delivered

4.1 All Deliverables

(a) The Supplier must provide Deliverables: (i) in accordance with the Specification and Tender Submission; (ii) to a professional standard; (iii) using all reasonable skill and care; (iv) using Good Industry Practice; (v) using its own policies, processes and internal quality control measures as long as they don't conflict with the Contract; (vi) in accordance with such policies and procedures of the Authority (as amended from time to time) that may be specified in the Contract (vii) on the dates agreed; and (viii) in compliance with all applicable Law.

(b) Without prejudice to the Specification the Supplier must provide Deliverables with a warranty of at least 90 days (or longer where the Supplier offers a longer warranty period to the Authority) from Delivery against all obvious damage or defects.

4.2 Goods clauses

- (a) All Goods Delivered must be capable of meeting the requirements set out in the Specification and be either (i) new and of recent origin, (ii) reused or (iii) recycled.
- (b) All manufacturer warranties covering the Goods will be assigned to the Authority on request and for free.

The Supplier must take back any primary packaging where it is possible to do so. Packaging must be 100% re-usable, recyclable or compostable, use recycled content where reasonably practicable and support the Government's commitment to eliminate single use plastic.
- (h) All Deliveries must have a delivery note attached that specifies the order number, type, quantity of Goods, contact and details of traceability through the supply chain.
- (i) The Supplier must provide all tools, information and instructions the Authority needs to make use of the Goods. This will include, where appropriate, any operation manuals which, unless specified otherwise, will be written in English and provided in electronic form.

If the Authority gives less than 14 calendar days' notice then it will pay the Supplier's reasonable and proven costs already incurred on the cancelled order as long as the Supplier takes all reasonable steps to minimise these costs.

(l) The Supplier must at its own cost repair, replace, refund or substitute (at the Authority's option and request) any Goods that the Authority rejects because they don't conform with clause 4.2. If the Supplier doesn't do this it will pay the Authority's costs including repair or re-supply by a third party.

(m) The Authority will not be liable for any actions, claims, costs and expenses incurred by the Supplier or any third party during Delivery of the Goods unless and to the extent that it is caused by negligence or other wrongful act of the Authority or its servant or agent. If the Authority suffers or incurs any damage or injury (whether fatal or otherwise) occurring in the course of Delivery or installation then the Supplier shall indemnify from all losses, damages, costs or expenses (including professional fees and fines) which arise as a result of or in connection with such damage or injury where it is attributable to any act or omission of the Supplier or, where related to the Contract, any of its subcontractors or suppliers.

The Supplier

shall not be entitled to assert any credit, set-off or counterclaim against the Authority in order to justify withholding payment of any such amount in whole or in part.
