## 1 Introduction

#### 1.1 Background

National Museums Liverpool (NML) is a group of museums covering a wide range of collections and displays, with a varied audience ranging from local groups to the growing international visitor market that Liverpool now attracts. NML is the only national museum group in England based outside London. Liverpool has grown as a visitor destination over the years to the point where it is currently ranked 6<sup>th</sup> in the UK for overnight overseas visits and in 2008 was European Capital of Culture. Hence, the audience profile across the varying NML venues comprises not just residents but also significant numbers of domestic and overseas tourists. Entry to all NML venues is free – making these prominent locations an openly accessible element of the visitor landscape.

For the last thirteen years, National Museums Liverpool has conducted research amongst visitors at the 8 venues, establishing both the nature of these visitors and their reasons for visiting. The primary research has been conducted via face-to-face surveys at each of the individual venues.

National Museums Liverpool commissioned North West Research & Strategy to conduct profiling information for the financial year 2016/17. This report represents the annual analysis, with individual venue reports also produced and available via NML.

#### 1.2 Aims

The aims of the study were to fulfil the following:

- To profile and deliver intelligence on the visitors to National Museums Liverpool;
- Provide regular updates and key findings throughout the year;
- Deliver responses to ad-hoc gueries from National Museums Liverpool;
- Provide the context for the research in terms of Liverpool City Region and its hinterland.

### 1.3 Methodology

A face-to-face survey using a semi-structured questionnaire (attached in appendix) was administered by field staff from North West Research & Strategy. This was conducted as an exit interview, with random sampling to ensure a cross-section of visitors were obtained. Interviewing took place from April 2016 to March 2017, with a total of 3,270 full valid interviews having taken place.

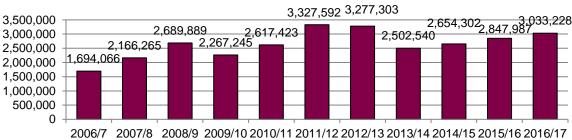

Interviews	Q1 (Apr-Jun)	Q2 (Jul-Sep)	Q3 (Oct-Dec)	Q4 (Jan-Mar)	Total
ISM	73	90	52	99	314
LLAG	90	58	52	82	282
MMM	141	229	117	154	641
SH	53	59	34	38	184
WAG	77	130	72	109	388

UKBF	56	111	47	76	290
Total	807	1083	579	801	3270

Interviews were scheduled to be representative of the overall visit patterns at each venue, in order to give us 95% confidence in the data within the annual report. Actual levels of visits at each venue are given in the next section.

#### 1.4 Visits to NML Venues

Visits to National Museums Liverpool venues over the last eleven years were as follows, with a total of 3.0m visits in the 2016/17 financial year, reinforcing the growth trend seen in overall footfall in the last 4 years.

## All visits to NML venues

The 'spikes' in visitor numbers can be associated with the Capital of Culture year in 2008 and the opening of the Museum of Liverpool in July 2011. Visit numbers dropped slightly in 2013/14 however a slight increase was experienced again in 2014/15 with subsequent annual growth up to and including the year 2016/17. A number of factors should be considered in interpreting these totals, including the changes to the visit counting system, the periodic closure of venues (MoL) and ongoing disruption to the local public transport network (including Lime Street and Wirral line closures to the long term cancellation of Mersey Ferries services and cruises in late 2016). However, despite these factors, and despite venue specific fluctuations, NML has seen overall growth in visits over the year.

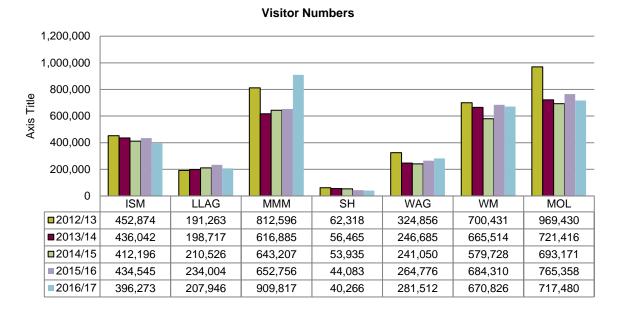

Below we show the number of visits this year to each venue.

Visits	Q1	Q2	Q3	Q4	Total
	(Apr-Jun)	(Jul-Sep)	(Oct-Dec)	(Jan-Mar)	
ISM	100,492	107,805	84,114	97,508	396,273
LLAG	55,893	70,422	41,044	40,587	207,946
MMM	210,115	304,438	185,864	209,400	909,817
SH	10,317	11,038	8,648	10,263	40,266
WAG	65,865	87,085	58,824	69,738	281,512
WM	156,898	206,971	133,369	173,588	670,826
MOL	200,583	281,313	163,032	72,552	717,480
Total	751.842	1.019.266	642.184	619,936	3.033.228

Please note the 2016/17 total figure from the graph above differs from the overall total of the individual venue rows as ISM and MMM visitor numbers are collected together due to their shared location. Thus, the NML total is never the same as the venues added up across the columns. NML don't include ISM in the NML total as ISM visitors are already counted as MMM visitors - they have to enter ISM via MMM so therefore would present double counting).

Please note that visitors to the Piermaster's House are counted within the overall visitor numbers in the table above. The PMH is not regarded as a standalone location, hence no interviews were undertaken on site and no reports are subsequently produced to reflect the venue's individual footfall and visitor profile.

The chart below summarises the changing visitor volumes at each venue in recent years:

Between 2015/16 and 2016/17, and based on the visitor numbers in the graph above, we can measure the percentage change in footfall at each NML venue:

	% change 2015/16 - 2016/17
ISM	-8.8%
LLAG	-11.1%
MMM	+39.4%
SH	-8.7%
WAG	+6.3%
WM	-2.0%
MOL	-6.3%

## 1.5 Reporting Notes

#### Note 1:

In order to minimise space requirements, the names of venues have been shortened, and these are as follows:

UKBF UKBF (Seized! The Border and Customs Uncovered)

ISM International Slavery Museum

LLAG Lady Lever Art Gallery

• MMM Merseyside Maritime Museum

MOL Museum of Liverpool
 PMH Pier Masters House
 SH Sudley House
 WAG Walker Art Gallery
 WM World Museum

#### Note 2:

In geographic description, we often reference the "Liverpool City Region"; (not to be confused with the Liverpool Local Authority area or the City Centre). Although there are a number of definitions of the Liverpool City Region, for our purposes this covers the six districts comprising 'Merseyside and Halton', the same area as covered by the tourist board for the area:

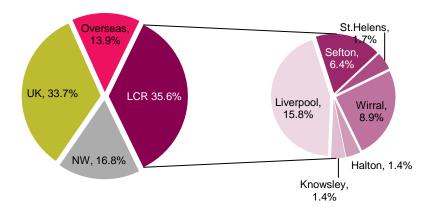

Note though that when interviewing people we would always mention 'Merseyside', as the term Liverpool City Region is not a common-used public description.

## 2. Respondent Classification

## 2.1 Visitor Origin

During the survey all respondents were asked for details of their home address; where they were not willing to supply a postcode, they were prompted for home town or county. This data was used to code up the origin of visitors to the venue.

This is shown below, whilst the map beneath illustrates the origin by regions.

Overall, 36% of those visiting National Museums Liverpool venues in 2016/17 came from within the city region and a further 17% from other locations in North West England. A high proportion of attendees also came from further afield – including Yorkshire, West Midlands and Wales.

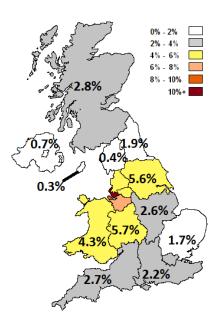

Although broadly comparable to 2015/16 (with less than 2% variance in each segment above) LCR based visitors are the most prevalent group, as opposed to those originating in the wider UK seen last year who still constitute a third of all visitors.

14% of all visitors were from overseas; this covered a wide selection of origins, including:

- 4% from elsewhere in W. Europe
- 3% from North America
- 2% from Ireland
- 1% from Australia / New Zealand

Breakdown of overseas countries can be found in Appendix 3.

Note that this is an <u>overall</u> figure for all NML, and we would expect this to vary significantly by each individual venue – specific details are provided on the next page.

#### Overview of visitor origin

- Venues with a high proportion of visitors who were local residents included Sudley House (53%) and Lady Lever Art Gallery (31%). Almost a quarter of visitors to World Museum were also residents (22%). UKBF, Mersey Maritime, Walker Art Gallery, Museum of Liverpool and International Slavery Museum had a lower proportion of residents and a high proportion of visitors from the UK, outside of the NW region notably ISM where nearly half of all visitors originated outside the region.
- The Albert Dock venues (International Slavery Museum, Maritime Museum and Museum of Liverpool) tended to show a much higher proportion of visitors from further afield –this may be down to the individual draw of these venues but in part it may be due to the nature of the Albert Dock as a key tourism location.

If we compare the broad origin of visits to all NML venues against that for the city region as a whole<sup>1</sup>, this can be useful; note that here we deliberately split the data between day and staying visitors and exclude residents of the location where interviewing took place.

## 2.2 Type of Visitor

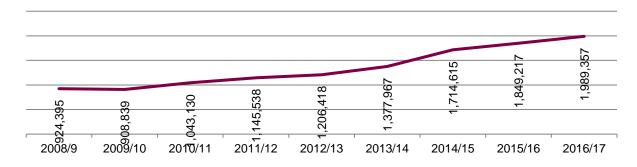

Respondents were asked what the nature of their trip was to the area. Note that to a large extent data within this section might reflect that illustrating visitor origins.

Over half of NML's visitors (56%) were on a day trip from their home. Some 37% were on a staying trip within the City Region, and 7% were on a staying visit from a location outside the area. (Popular locations in this latter category include Manchester, Wales and Chester and nearby national park zones whilst some visitors were making day trips whilst staying in London).

Proportions of day/staying visitors are very similar to last year which, when applied to total visitor numbers, suggesting that NML venues are attracting fewer staying visitors despite the number of city centre rooms sold increasing (up 7% on last year). This is also supported by an increase in regional and local audiences seen across most of the venues, visiting for the day and including museums in day sightseeing itineraries.

#### Estimated city centre rooms sold\*

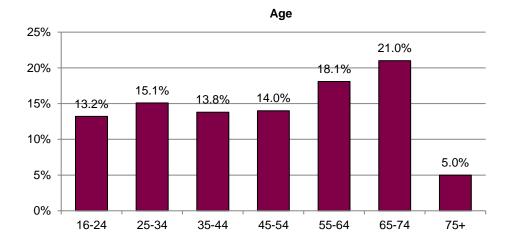

\*Source: Liverpool City Region Local Enterprise Partnership

	Total	ISM	LLAG	MMM	MOL	SH	WAG	UKBF	WM
Day trip from home	56.0%	42.7%	73.7%	44.4%	45.8%	84.2%	62.3%	47.1%	68.6%
Staying trip (within LCR)	37.3%	48.4%	16.7%	47.6%	45.8%	13.6%	32.8%	46.4%	27.5%
Staying trip (elsewhere)	6.7%	8.9%	9.6%	8.0%	8.3%	2.2%	4.9%	6.6%	3.9%

 Similar to findings in 2015/16, the Albert Dock venues had higher proportions of "staying visitors" than the average, potentially suggesting visits are made in relation to visitors with sightseeing "waterfront" based visit itineraries taking in a wider range of destinations as part of longer breaks.

## 2.3 Respondent Age

Respondent age is displayed here to show the detail of those responding to the questions. Note though that in order to view the demographic profile of <u>all</u> visitors to NML venues, the age/gender of all who were in the respondent's group should be analysed (section 3.2).

	Total	ISM	LLAG	MMM	MOL	SH	WAG	UKBF	WM
16-24	13.2%	18.5%	6.8%	13.7%	10.8%	6.0%	13.7%	13.5%	16.9%
25-34	15.1%	17.2%	8.9%	12.6%	14.3%	9.2%	11.3%	12.5%	26.1%
35-44	13.8%	14.3%	12.5%	12.1%	12.5%	13.6%	10.3%	15.2%	18.8%
45-54	14.0%	13.4%	14.2%	15.7%	15.1%	13.0%	12.4%	17.0%	10.9%
55-64	18.1%	16.9%	22.4%	20.6%	21.0%	21.2%	16.2%	19.4%	10.6%
65-74	21.0%	18.2%	27.8%	22.1%	22.3%	24.5%	27.9%	16.3%	13.5%
75+	5.0%	1.6%	7.5%	3.3%	4.0%	12.5%	8.2%	6.2%	3.2%

A wide variety of ages were present in the sample – 28% of respondents were aged under 35, 46% were aged between 35 and 64 and 26% were aged 65 or older. These are similar proportions to 2015/16, however there is a noticeable 5.3% increase in those aged 25-34 (accounting for 26% of all visitors to the World Museum).

Based purely on respondent age, there appears to be a tendency towards *younger* audiences at the World Museum and a general lean toward *older* audience at other venues.

## 2.4 Respondent Gender

As with respondent age (2.3), it should be noted that the respondent gender is not necessarily representative of <u>all</u> those attending venues, and for this section 3.2 should be used.

This does seem to suggest a female prominence amongst respondents. Previous years have also shown higher levels of female respondents than male, with less than 3% variation against gender results given in 2015/16.

It is also worthwhile to note that Sudley House, World Museum and Lady Lever Art Gallery have markedly higher proportions of female respondents.

	Base	ISM	LLAG	MMM	MOL	SH	WAG	UKBF	WM
Male	41.0%	40.1%	35.8%	45.0%	44.7%	25.5%	40.7%	44.8%	39.3%
Female	59.0%	59.9%	64.2%	55.0%	55.3%	74.5%	59.3%	55.2%	60.7%

#### 2.5 Economic Status

This section details the social grade of visitors to NML venues using NS-SEC classification.

#### 2.5.1 NS-SEC Classification

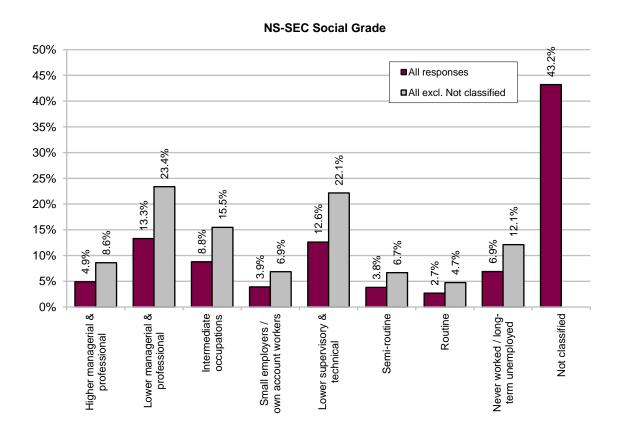

The social grade using the National Statistics Socio-Economic Classification (NS-SEC) is always calculated based upon the employment occupation of the respondent themselves.

Social grades in the NS-SEC are equivalent to the following employment categories;

- 1 Higher managerial and professional occupations
- 2 Lower managerial and professional occupations
- 3 Intermediate occupations
- 4 Small employers and own account workers
- 5 Lower supervisory and technical occupations
- 6 Semi-routine occupations
- 7 Routine occupations
- 8 Never worked and long-term unemployed

Typically, these classes better represent employment relations rather than skills levels. Full time students and retired individuals – except where detailed evidence of past employment can be established – are excluded.

Note that nearly half of the sample (43%) fell into the 'not classified' category.

<sup>\*</sup>Please see Appendix 2 for breakdown of unclassified

The "Not classified" groups should not be ignored within the analysis, as they include the significant proportions of respondents who were 'retired' or who were students (amongst others). This is included in the analysis within the tables below.

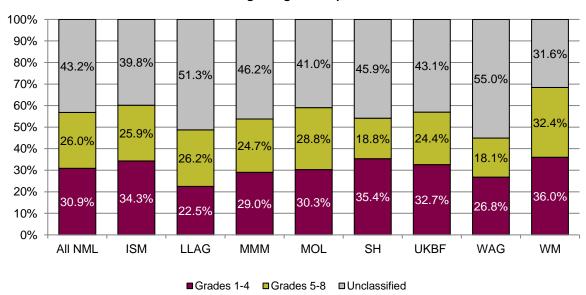

#### Overall:

- Approximately 5% of visitors at National Museums Liverpool venues were in the higher managerial or professional classes.
- Similar proportions fell at the other end of the grading scale, with 7% being in the routine or semi-routine categories and 7% in the 'inactive' group
- 31% were from grades 1-4, 26% from grades 5-8 (compared to 33% and 22% last year).

In the table below we show how this varies for each venue, <u>including</u> 'not classified'; we also summarise what this means in terms of the upper and lower tiers of the scale.

Sudley House again, shows higher proportions of Grades 1-4 for UK residents alone, however MoL shows the highest occurrence of grade 5-8, and where the highest levels of visitors originate within the Liverpool area.

## 2.5.3 Main Activity

The social grade in the NRS (2.5.1) is based upon the activity of the head of household. A slightly different mechanism therefore is to view details of the respondent's status.

In total, half of all visitors to NML's venues were in some form of employment (50%); a significant level were retired from work (32%) and 11% were students. It is estimated that some 5% of attendees would be classified as 'economically inactive2'. Proportions, again, are similar to last year.

	Total	ISM	LLAG	MMM	MOL	SH	WAG	UKBF	WM
Full time work	39.3%	43.8%	29.5%	39.1%	41.6%	32.6%	32.3%	44.6%	43.5%

Econ. Inactive	6.8%	5.2%	7.8%	7.3%	7.3%	5.4%	4.4%	4.1%	9.8%

- The venue showing the highest level of those who were 'economically inactive' was World Museum (10%).
- Compared to 2015/16, we see a 3% increase in FT working visitors, but a marginal decline in retirees and self-employed visitor types.
- Those venues with the highest proportions of retired visitors were Lady Lever Art Gallery (45%), Walker Art Gallery (43%), Sudley House (40%) and Maritime Museum (34%).
- Students formed 17% of visitors to the ISM and 12% of visitors to the UKBF and Maritime Museum respectively.

<sup>&</sup>lt;sup>2</sup> Economically inactive is here defined as being those unemployed, long-term sick or disabled and those who were looking after the home or family.

Other responses can be seen in Appendix 4.

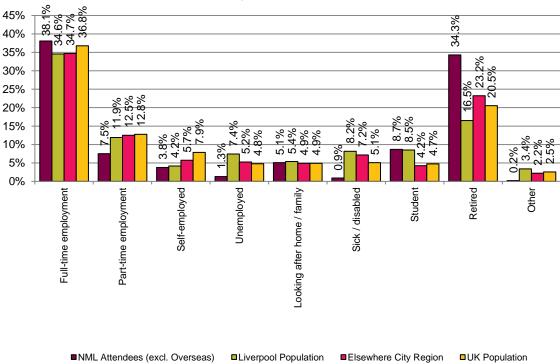

Below, we summarise this by the *origin* of those visiting the venues. Note that in order to see what this means in terms of the overall audience we present the figures as a proportion of all respondents – not just as a column percentage.

	Resident	Elsewhere LCR	Elsewhere NW	Elsewhere UK	Overseas
In employment	7%	9%	9%	19%	7%
Retired	5%	7%	6%	11%	3%
Student	3%	1%	2%	2%	3%
'Economically inactive'	2%	3%	1%	1%	1%

- The largest single grouping here is those from elsewhere in the UK who were in employment (19%), followed by 11% of attendees who were retired and originating elsewhere in the UK.
- 12% of all visitors were retirees including residents and those from somewhere within the city region. Compared to national population averages (below) NML over indexes by 13.8% in this regard.
- 5% of all visitors were those who were 'economically inactive' and resided within the city region.

In the chart below we compare the economic profile of all visitors to NML venues against that for local and national data<sup>3</sup>. As was the case last year, this shows that NML venues attract lower than population-average proportions for groups apart from students, retired people and those in full time employment.

## 2.6 Disability

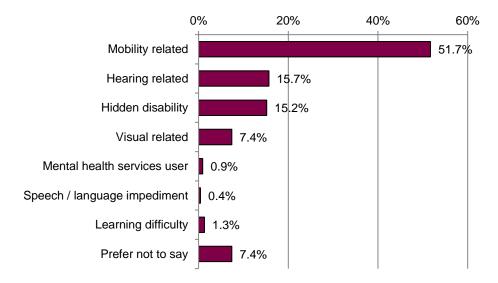

All respondents were asked if they considered themselves to be disabled; Nearly 8% of all visitors to NML in 2016/17 indicated that they had some form of disability.

	Total	ISM	LLAG	MMM	MOL	SH	WAG	UKBF	WM
Yes	7.6%	7.8%	8.6%	7.4%	8.4%	12.2%	7.1%	7.1%	5.6%
Vo	92.6%	92.2%	91.4%	92.6%	91.6%	87.8%	92.9%	92.9%	94.4%

Turning to the nature of the disability, respondents seemed to show that for the majority it was a 'mobility-related' disability (52%); in addition to this:

- 7% had a visual disability
- 15% had a 'hidden disability'
- 16% had a hearing disability
- 1% were a mental health services user
- 1% had a learning difficulty

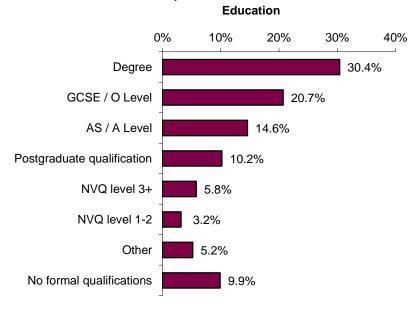

Note: percentages shown are as a percentage of all those with a disability

In summary, compared to 2015/16, there is no more than 1% variation in the totals in each category recorded around disability.

#### 2.7 Education Level

Respondents were asked what the *highest* educational level was they had attained. Refusals are excluded from the analysis.

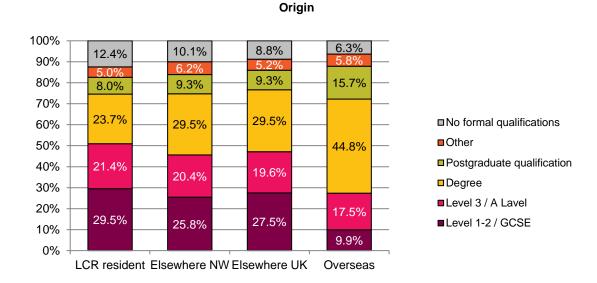

- Some 10% stated that they had 'no formal qualifications' (compared to 11% last year), whilst for 24% the highest level they had achieved was GCSE / NVQ1 or NVQ2 (compared to 24% last year)
- Nearly a third (30%) were qualified to at least degree level (comparable to 30% last year).
- Note the 5% mentioning 'other'; includes overseas visitors mentioning qualifications appropriate to their country and UK residents indicating work-based learning qualifications.

Other responses can be seen in Appendix 4.

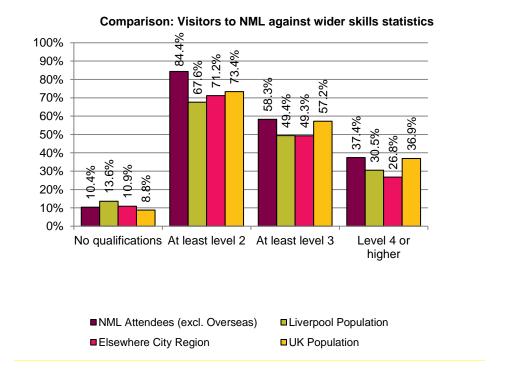

In the table below, we view qualification levels recorded at each individual venue.

	Total	ISM	LLAG	MMM	MOL	SH	WAG	UKBF	WM
GCSE / O Level	20.7%	19.0%	29.4%	21.4%	22.4%	16.2%	13.3%	18.7%	22.4%
AS / A Level	14.6%	18.0%	10.8%	13.8%	14.5%	12.3%	16.2%	15.5%	14.8%
Degree	30.4%	30.7%	27.6%	29.3%	27.3%	36.3%	40.7%	28.3%	28.5%
Postgraduate qualification	10.2%	9.3%	11.1%	10.0%	5.6%	16.8%	12.2%	9.9%	11.5%
NVQ level 1-2	3.2%	3.3%	2.5%	4.3%	4.4%	0.6%	1.1%	2.1%	3.8%
NVQ level 3+	5.8%	7.7%	5.7%	4.2%	6.3%	2.8%	4.0%	7.1%	7.6%
Other	5.2%	5.7%	5.0%	5.3%	6.3%	7.3%	4.0%	6.0%	3.6%
No formal qualifications	9.9%	6.3%	7.9%	11.7%	13.1%	7.8%	8.5%	12.4%	7.8%

Notice that overall those from further afield were more likely to have higher qualification levels than local residents. (For example, 24% of City Region residents attending NML venues were qualified to at least degree level, compared to 30% of those from elsewhere in the NW and wider UK, and 45% of those from overseas).

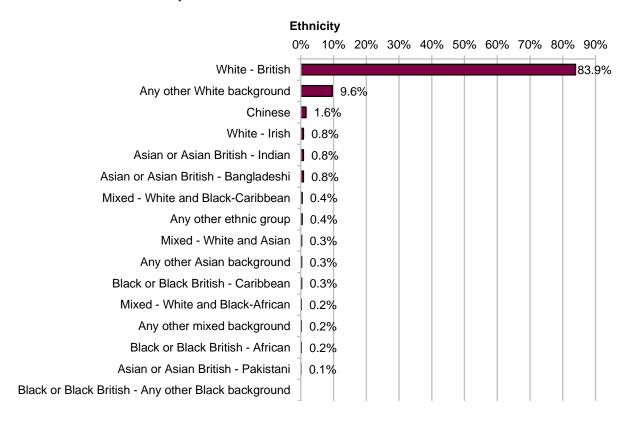

Again, we can use national data<sup>4</sup> to compare the profile of visitors to National Museums Liverpool against that of the local population; this suggests that on average visitors to National Museums Liverpool venues were likely to be more highly-educated / qualified than local, regional or UK residents.

## 2.8 Ethnicity

Respondents were shown a prompt card and asked to select their ethnicity. Comparable to 2015/16, just 2% of the sample refused to provide a response to this question, and these are excluded from the analysis below.

84% of the sample described themselves as being White British, with a proportion also indicating they were 'white other' (10%), – this includes visitors from overseas, as we can see in the table by origin below. 6% of the sample would include themselves in the 'Black and Minority Ethnicity' (compared to 5% recorded last year).

#### Summary:

	All respondents
White British	83.9%
White Irish	0.8%
White Other	9.6%
BME	5.6%

## Ethnicity by visitor origin:

We also see a year on year increase of 2.1% from BME visitors within the N/W, 1.4% from the wider UK and 2.1% increase in overseas visitors.

For reference, we have shown an analysis of ethnicity, excluding overseas respondents.

## 2.9 Languages

Likewise, respondents were shown a prompt card and asked to select what their first language was. Just 2% of the sample refused to provide a response to this question, and these are excluded from the analysis below.

Amongst the others (to name a few) are Polish and other Eastern European languages, all Scandinavian tongues, Indian, Japanese, Korean and Turkish. As with ethnicities though be careful, as just because a language isn't listed doesn't mean such speakers weren't present at NML venues. Although interviewers do not have the capacity to deal with all language speakers — meaning that some of the non-English figures may be higher — the error margin is likely to be relatively small. Other responses can be seen in Appendix 3.

## 3. Group Profile

## 3.1 Type of Group Visiting With

Although demographics provide one measure as to the nature of the visitors to each venue (as we see in section 3.2), the *type of group* can tell us as much. Accordingly, respondents were asked to detail the type of personal group they were visiting the venues with.

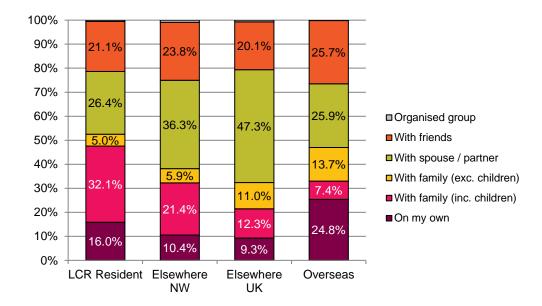

This shows that respondents were *most* likely to be visiting with their spouse or partner (35%). However, there were also very significant levels of those visiting with their friends (22%) and those visiting with their family (20%). Overall, proportions are consistent with 2015/16 with less than 2% variation in any of the group classifications.

Note: Respondents could select more than one answer for this question so totals do not add to 100%

- The Walker Art Gallery attracts a high proportion of 'sole visitors' (22%).
- Visitors with their children made up 46% of all visitors to the World Museum a higher proportion than that recorded elsewhere and a similar result to last year. Sudley House experienced a decrease in the proportion of visits with children (19% compared to 25% last year).
- There were high proportions of those visiting with their spouse / partner at the Maritime Museum (45%), the Lady Lever Art Gallery (41%), the UKBF (40%) and Museum of Liverpool (40%)
- 'Friendship groups' were most evident at Sudley House (30%).

As seen in previous years, the nature of visiting groups varies hugely between different venues (see above) it also shows significant levels of difference according to the visitor origin.

- City Region residents were most likely to be present with their children, the same as
  the year 2015/16. For those visiting from elsewhere in the North West, Overseas and
  particularly for those coming from elsewhere in the UK, visitors were most likely to be
  present with a spouse/partner. This could suggest the Museums are locally regarded
  as a family destination.
- A quarter of visitors from overseas were visit on their own (25%).

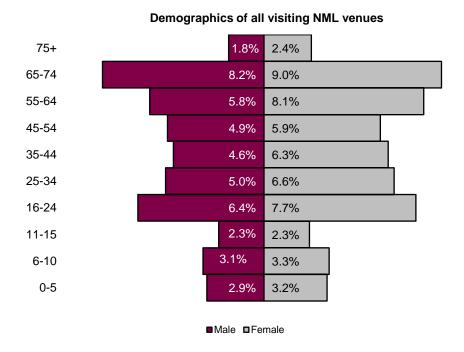

The table below shows how group type varies with NS-SEC social grade.

	On my own	With family (inc children)	With family (exc children)	With spouse / partner	With friends	Organised group

## 3.2 Group Composition

Respondents were queried for the age / gender of all in their party, and this is displayed in the chart below. This provides a much more accurate measure in terms of viewing the cross-section of visitors at a destination (rather than just the respondent details, as previously referred to).

Note that the percentages referred to are a percentage of all in the respondent's party, not a percentage of responses. Also note that we exclude any responses in the calculations for parties of 30 or above, as these can skew results excessively, especially at venue-level data.

Thus, for all visitors to NML venues in 2016/17:

- 17% of all visitors were children (compared to 16% last year),
- 22% were aged 65 (compared to 23% last year),
- The gender split was 45% male / 55% female (44% male, 56% female last year),
- The average group size was **2.49 people** (smaller than the 2.64 average size recorded for last year).

In the table below we see how this varies by each individual venue.

Although this detail may be useful on an individual venue basis, it is complex to look at; hence we summarise *some* of the key demographics below:

	Total	ISM	LLAG	MMM	MOL	SH	WAG	UKBF	WM
Males	45.0%	46.5%	42.1%	45.1%	47.5%	31.8%	46.6%	50.4%	44.1%

- As in previous years, there is a female bias to the audience as noted in the
  respondent profile. This is less the case at the UKBF, but is significantly more likely at
  Sudley House, the World Museum and Lady Lever Art Gallery.
- Primary age children and below were evident in higher proportions at World Museum (31%, compared to 27% last year).
- Those aged 11 to 16 were more in evidence at the International Slavery Museum (13%) and Maritime Museum (5%). This could be related to educational visits.
- Young adults those aged 16-24, which will include both 6<sup>th</sup> form students and university students – formed significant proportions of the audience at the Walker Art Gallery (22%), UKBF (21%), Maritime Museum (15%) and the International Slavery Museum (15%).
- We see particularly high levels of visitors aged 65+ at Sudley House (39%).
- Average group size was I highest at International Slavery Museum (3.00)

• It is important to place demographics into context, and here we place data from this year's profiling study against local area population statistics<sup>6</sup> and the profile of visitors to Liverpool<sup>7</sup>.

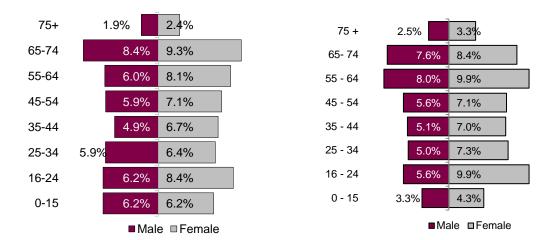

Looking at the local population –for Liverpool and elsewhere in the City Region – the data suggests a higher than population-average use by children aged 0-10 years and adults aged 65-74 years. This reiterates the notion that the museums could be locally regarded as family destinations.

#### Visitors\* at NML venues

#### **Overall Visitors**

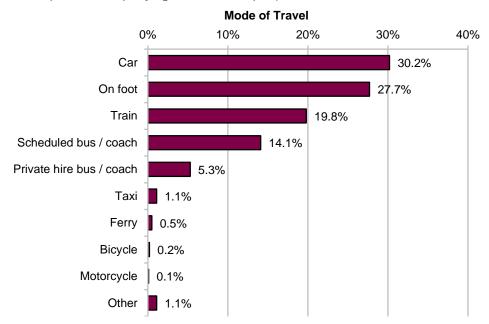

<sup>\*&#</sup>x27;Visitors' refers to people visiting from elsewhere in the North West, elsewhere in the UK and from overseas

Looking at the demographic profile of "visitors" at NML venues, this appears to be a closer 'match' to that of all visitors to the city; again, we notice a higher than average prevalence of those aged between 65-74 years.

## 4. Respondent Behaviour

#### 4.1 Mode of Travel

Respondents were asked to detail the *main* mode of transport they used to reach the venue on the day of their visit. We would note that this variable in particular is strongly influenced by both the venue location <u>and</u> visitor origin; hence, although we present the overview below, venue-specific data provides localised and detailed findings (captured in the venue specific reports accompanying this annual report).

Visitors were *most* likely to reach National Museums Liverpool venues by car (30%). The 28% arriving on foot does not necessarily just represent local residents, but is on the whole an indicator of visitors staying in city centre hotels. Proportions are very similar to last year's results with a 1.2% increase in bus use and a 1.3% decrease in rail use – potentially attributable to changes in the transport network and infrastructure in the last year, including long term line closures and cancellations.

Other responses can be seen in Appendix 4.

Below we see the pattern of transport use for visitors to each individual venue.

	Total	ISM	LLAG	MMM	MOL	SH	WAG	UKBF	WM

- Reflecting their non-city centre location and hence lower connectivity to public transport networks – car use was much higher at Lady Lever Art Gallery (72%) and Sudley House (57%).
- Visitors were more likely to be arriving "on foot" at the Albert Dock based venues again, a particular indicator of the staying visitor market within the city.

• Rail use was particularly prevalent amongst those visiting the Walker Art Gallery (37%) and the World Museum (26%) - partly to be expected given the proximity to Lime Street station.

- The biggest car users are those travelling from elsewhere in the North West 47% of this group arrived by car. This is an increase of 3.5% on the year 2015/16.
- Indicative of the staying visitor market, 59% of overseas visitors and 41% from 'elsewhere in the UK' arrived on foot.
- Rail use was heaviest for those living elsewhere in the Liverpool City Region (37% compared to 39% last year) and those from elsewhere in the North West (31% compared to 35% last year).
- Note that ferry use especially for those from further afield covers not just Mersey Ferries but also the 'mainline' routes from the city to Ireland and Isle of Man.
- Private hire coaches often an indicator of organised groups were more notable for those arriving from elsewhere in the UK, totalling 10%, and a 2.2% increase on the previous year reflecting wider growth in coach travel seen across the city in 2016/17).

## 4.2 Length of Stay

On average, visitors to National Museums Liverpool venues spent 1 hour and 30 minutes "on site" (compared to 1 hour 28 minutes last year). The longest visit duration can be seen at the Walker Art Gallery.

	Total	ISM	LLAG	MMM	MOL	SH	WAG	UKBF	WM
Mean length of stay	01:30	01:05	01:29	01:31	01:33	01:25	01:44	1:20	01:36

% staying > 2 hours	25%	8%	29%	31%	26%	16%	35%	17%	31%

Visitors have differing and diverse motivations and interests, which shape the dynamic and behaviours of their visiting group. The table below shows group composition against visit duration per venue:

	Total	ISM	LLAG	MMM	MOL	SH	WAG	UKBF	WM
Sole Visitors	1:28	0.56	1.08	1:24	1:36	1:28	1:40	1.33	1:32

With friends	1:31	1:10	1:51	1:42	1:31	1:29	1:41	1.21	1:34

- Longer visits tend to be associated with:
  - o Visitors at the Lady Lever Art Gallery, especially those with friends
  - Visitors with at the Walker Art Gallery with their family
  - o Visitors with their friends at Maritime Museum

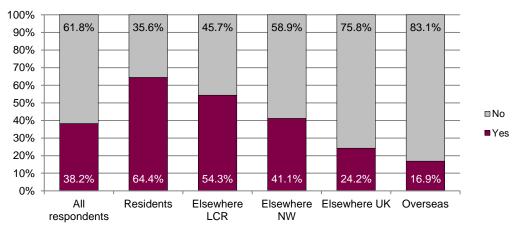

#### 4.3 Main Reason for Visit

To try and gauge how much of a 'draw' National Museums Liverpool has on visits to the area, respondents were asked if the museum / gallery was the <u>main</u> reason for their visit to the area on the day of the interview<sup>8</sup>. Overall, 38% of visitors to NML venues said that the venue had been the main reason for their visit.

	Total	ISM	LLAG	MMM	MOL	SH	WAG	UKBF	WM
Yes	38.2%	29.6%	69.3%	28.4%	28.1%	76.8%	41.6%	12.3%	46.5%
No	61.8%	70.4%	30.7%	71.6%	71.9%	23.2%	58.4%	87.7%	53.5%

This is not universally the case and some venues exerted a much stronger 'draw'. For example, visitors to Sudley House and Lady Lever Art Gallery were far more likely to indicate the venue was their main reason for visiting the area (77% and 69% respectively). We would note though that this is not a 'fair' comparison against the other venues, as being on the 'periphery' there is less in the vicinity which might thus attract visitors. Of more significance, 47% of visitors to the World Museum and 42% at the Walker Art Gallery indicated that the venue was their main reason for visiting the area – to a large extent this may reflect the local family market demand (with WM popular with families with children or alternatively WAG being popular with couples). Albert Dock venues were less likely to be the main reason for visiting the area (but potentially a destination within wider city visit itineraries).

#### Is visiting this venue the main reason for your visit to [the area] today?

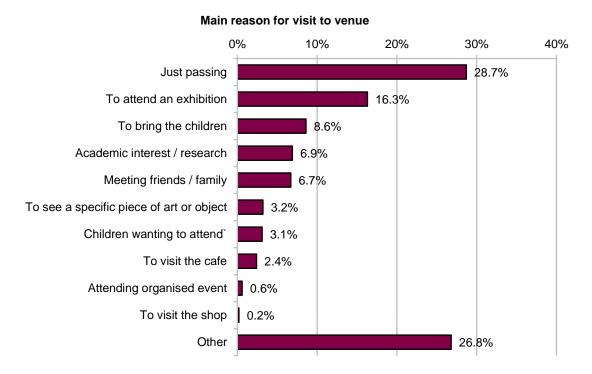

Geography plays a big role in the draw exerted by each venue – the further the distance, the lower the draw. For example, 64% of residents said that the venue was their main reason for the visit to the area compared to 24% of those from elsewhere in the UK and 17% of those from overseas. As a notional rule of thumb – the further away visitors originate, the broader the reasons for visiting.

<sup>&</sup>lt;sup>8</sup> In the case of those visiting the Lady Lever Art Gallery, this will have referred to visiting Port Sunlight & the Wirral; in the case of all other venues it refers to visiting Liverpool.

## 5. Influences and Motivation

#### 5.1 Motivations for Visit

Respondents were asked to detail what their *main* reason for visiting each venue was, and this is shown in the chart below.

Note: Respondents could select more than one answer for this question so totals do not add to 100%

Again, we should emphasise that this is an overview and that we would expect these results to vary significantly at each individual venue. Even so:

- The top two reasons for visiting were "just passing" (29% reflective at least in part of city sightseers and 2.1% higher than last year) and "to attend a specific exhibition" (16%). A decrease of 1.5% on last year.
- 9% of visitors said their main reason was 'to bring their children' (compared to 8% last year).
- 7% were there out of an academic interest or to do some research.
- 7% were using the venue as a place to meet friends and family. A 4% increase when compared to 2015/16.
- Note that the highest level of mentions went to 'other' factors (27%). The dominant factors here seem to be:
  - o Albert Dock
  - o Beatles Museum
  - o Been Before
  - Those visiting out of curiosity to 'look around'
  - Day out
  - Sightseeing
  - Word of Mouth
- These corroborate that proportions of visits are linked to planned (and sometimes spontaneous) itinerary building.

Other responses can be seen in Appendix 4.

In the table below we see how these motivations varied for each venue.

	Total	ISM	LLAG	MMM	MOL	SH	WAG	UKBF	WM
Just passing	28.7%	25.8%	17.8%	36.7%	36.5%	3.8%	26.4%	40.6%	24.8%

Children wanting to attend`	3.1%	1.3%	8.4%	1.9%	4.5%	1.1%	0.8%	0.3%	9.2%
To visit the cafe	2.4%	0.0%	7.0%	1.6%	0.5%	10.4%	3.1%	1.4%	1.7%
Attending organised event	0.6%	0.6%	1.5%	0.5%	0.5%	0.5%	0.5%	0.3%	0.5%
To visit the shop	0.2%	0.0%	0.4%	0.0%	0.3%	0.0%	0.3%	0.3%	0.0%
Other	26.8%	41.0%	30.7%	23.2%	30.3%	35.0%	25.4%	30.4%	16.4%

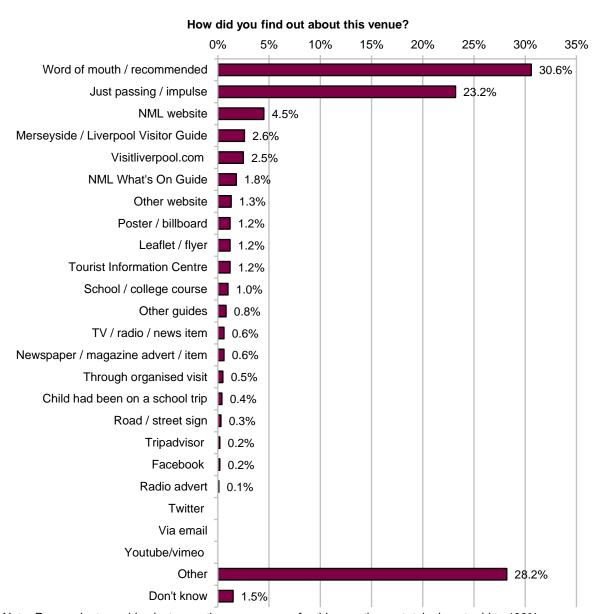

We can disaggregate the key motivations further:

- The Albert Dock venues attracted a higher share of visitors who were 'just passing' –
  representing 41% of visitors to the UKBF, 37% of visitors to the Maritime Museum and
  Museum of Liverpool.
- The Walker Art Gallery and Sudley House were the venues most likely to record visitors attending in order to attend an exhibition (25%), whilst visitors to the Museum of Liverpool were least likely to attend for this reason (11%).
- The World Museum had by far the highest proportion of visits "to bring the children" (26%) whilst International Slavery Museum had the lowest proportion of these visitors (3%).
- Seeing a specific piece of art / object was most important (compared to other venues) for visitors to Sudley House (7%) and Lady Lever Art Gallery (5%). This correlates with findings demonstrating high levels of interest seen for exhibitions in these venues.
- Sudley House had the highest proportion of visitors who were there in order to meet friends / family (9%), suggesting the venue is a local hub for friends and families to meet. A higher than average proportion of visitors to Sudley House were there to use the cafe (10%).

#### 5.2 Influences on Visit

#### 5.2.1 Influences overall

We now turn to look at influences – what spurred the individual to make the decision to visit. Whereas motivations (5.1) are essentially *internal* to an individual, influences are *external*, and can include factors such as marketing reaction. All visitors were asked how they had found out about each venue; items being listed on a show card.

Note: Respondents could select more than one answer for this question so totals do not add to 100%

The dominant influences came not from marketing but 'informal' means – 31% of respondents indicated a 'word of mouth' recommendation' (compared to 30% last year) and 23% said that they were 'just passing' (compared to 21% last year). This should not be viewed as a negative point, and these informal mechanisms often dominate influences at tourism venues and are consistent with a number of LCR visitor profiling results which show peer recommendation provides confidence and assurance to potential visitors.

Looking towards the more formal mechanisms, this is led by the NML website (mentioned by 5% of all respondents – compared to 4% last year) and Visitliverpool.com (3%).

Other responses can be seen in Appendix 4.

- Note that those who were 'just passing' mirrors the findings in section 5.1 with the Albert Dock venues scoring the higher results here.
- The NML website was an important influence at all venues, most notably for the Lady Lever Art Gallery (9%)
- Visitors to the International Slavery Museum, Museum of Liverpool and Maritime
   Museum were most likely (compared to other venues) to have used Visitliverpool.com.
- A school or college course was a much larger influence on visits to the UKBF (2%) than any other venue.
- Notice that 28% of all respondents mentioned an 'other' influence this tended to be those who had 'always known' about the venue or had been before.
- Visitors are usually influenced by a number of factors and may have found out about the venues through more than one method.

#### 5.2.2 Estimation of visits generated by marketing

In the case of the more 'formal' influences, it is possible to provide a crude estimation as to the number of visits generated by each channel (although we would advise that deeper questioning is necessary to provide a more scientific estimate as indicated in previous reports).

Figures below are rounded to the nearest 500.

	Total	ISM	LLAG	MMM	MOL	SH	WAG	UKBF9	WM

- Potentially, 136,000 visits were generated by NML's website, 54,500 by the "What's on" guide and 36,500 by leaflets or flyers.
- 75,500 visits were generated by Visitliverpool.com, 5,000 by Trip Advisor.
- Media coverage of NML venues was a very important factor, generating 36,000 visits
- The Merseyside and Liverpool Visitor Guide encouraged 78,500 visits.
- It is also noted that print collateral such as NML's What's On Guide is effective in generating over 54k visits.
- Conversely, Liverpool's Visitor Guide, posters and TIC are decreasing in effectiveness year on year when compared to 2015/16.

#### 5.2.3 Influences by origin

A further point to consider when analysing the impact of marketing is to see how it relates to *geography*; and this is displayed in the table below.

	Total	LCR Resident	Elsewhere NW	Elsewhere UK	Overseas
Word of mouth	30.6%	24.9%	31.4%	35.2%	35.7%

Word of mouth recommendation was a stronger influence for visitors living elsewhere in the UK and Overseas compared to City Region residents. (it could be argued that residents have a higher degree of familiarity, or existing levels of awareness).

The Visitor Guide, visitliverpool.com and NML website are more important as influences for overseas visitors than for other visitors – potentially for those seeking introductory or explanatory information and in planning visit itineraries that include museum options. It is also worth noting that the influence of Trip Advisor has also effectively doubled since 2015/16.

## 5.2.4 Exhibition leaflets

Respondents were shown a show card with a list of exhibition leaflets and asked whether they had seen any of the following before they had visited any of the venues.

	Total	Quarter 1 <sup>10</sup>	Quarter 2	Quarter 3	Quarter 4
Broken Lives Slavery in modern India - ISM	4.2%	-	32.6%	26.2%	14.5%

#### 5.3 Previous Visits to NML Venues

Respondents were asked to indicate which NML venues they had previously visited in the last 12 months. Note that these results do not include the venue the respondent was interviewed at. For example, for those interviewed at the International Slavery Museum, 89% had previously visited the Merseyside Maritime Museum. It does not report on previous visits to the International Slavery Museum itself. Frequency of visits at the interview venue are covered on the following pages.

We show the results on a venue-by-venue basis, as well as overall in the table below: Note that these results do not include the venue the respondent was interviewed at.

Venue visited	Total	ISM	LLAG	MMM	MOL	SH	WAG	UKBF	WM
MMM	58.8%	89.2%	33.3%	-	48.6%	50.8%	36.4%	81.2%	39.8%
ISM	37.9%	-	22.7%	60.4%	25.3%	26.8%	20.9%	40.4%	20.5%
WAG	35.0%	14.6%	40.3%	18.3%	21.4%	55.2%	-	17.1%	39.6%
WM	35.0%	13.7%	21.2%	22.7%	20.5%	44.8%	28.7%	16.5%	-
MOL	50.2%	39.2%	42.9%	39.2%	-	55.7%	40.8%	33.8%	47.0%
UKBF	21.3%	16.9%	8.4%	25.1%	10.6%	18.0%	11.1%	-	11.1%
LLAG	18.6%	3.2%	-	7.7%	9.9%	33.3%	20.9%	6.3%	11.8%
PMH	6.3%	4.8%	5.1%	6.5%	6.6%	14.8%	5.4%	7.0%	5.7%
SH	9.2%	1.0%	9.5%	3.8%	3.3%	-	7.5%	3.8%	5.9%

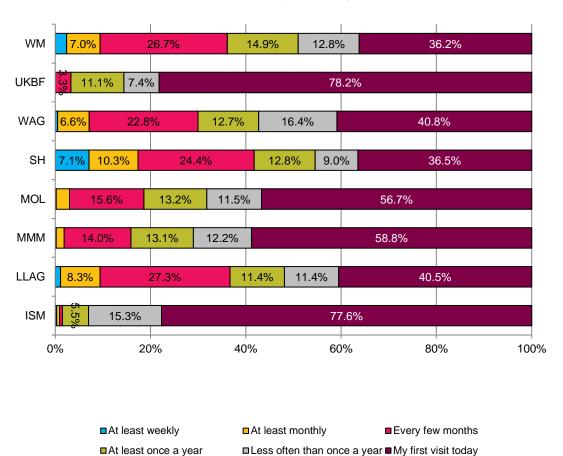

- The venue most likely to have seen a previous visit was the Merseyside Maritime Museum (58%), followed by the Museum of Liverpool (50%).
- Just 9% of all visitors had been to Sudley House and 6.3% to the PMH.

Although useful, in order to understand visit patterns it is perhaps more important to analyse the level of visits by the visitor origin, and the table below presents what this means for NML venues as a whole:

	Total	Resident	Elsewhere LCR	Elsewhere NW	Elsewhere UK	Overseas
MMM	58.8%	64.0%	60.1%	56.4%	60.7%	60.9%
ISM	37.9%	39.3%	34.8%	30.0%	42.1%	47.1%
WAG	35.0%	54.0%	48.8%	35.3%	22.9%	29.1%
WM	35.0%	63.6%	54.6%	30.9%	19.3%	22.7%
MOL	50.2%	70.6%	66.3%	41.6%	41.2%	45.3%
UKBF	21.3%	23.7%	20.3%	18.8%	23.0%	23.6%
LLAG	18.6%	23.3%	39.2%	19.7%	11.2%	3.9%
PMH	6.3%	12.5%	10.0%	3.4%	3.9%	3.9%
SH	9.2%	30.0%	10.8%	7.4%	3.0%	2.5%

Respondents were then asked how *often* they visited each venue. Note that in the results below, these are based on the responses received *at each venue* (i.e., the results for World Museum are based only on those from visitors interviewed at the World Museum) and are therefore only based on those who had in fact visited.

#### Frequency of visiting venue

- For a majority of visitors at the UKBF, International Slavery Museum, Maritime
  Museum and Museum of Liverpool, their visit was the first time they had been to the
  venue. Overall proportions of first time visits are comparable (against venues) in
  relation to last year.
- Venues where visitors seemed to indicate higher 'familiarity' included:
  - Sudley House 10% of all visitors came to the venue at least once a month, 7% visited at least weekly. It is the venue with the lowest proportion of first time visitors.
  - World Museum 7% of all visitors came to the venue at least once a month (and 'just' 36% were on their first ever visit). Over a quarter of all visitors attend the venue every few months.
  - Lady Lever Art Gallery Over 8% of all visitors came to the venue at least once a month, 41% being first time visitors.
- Over three quarters if visits to ISM were first time, again reiterating that the venue may be "discovered" as part of sightseeing visits.

Another way of looking at this data is to convert it to a mean score, and this is presented below to gauge the annual frequency of visits by all respondent categories.

The mean score is calculated using the following conversion levels:

On 1<sup>st</sup> visit = 0
At least weekly = 52
At least monthly = 12
Every few months = 6
At least once a year = 1
Less often = 0.5

Applying this to the data gives the following annual frequencies of visit to each venue by respondent origin:

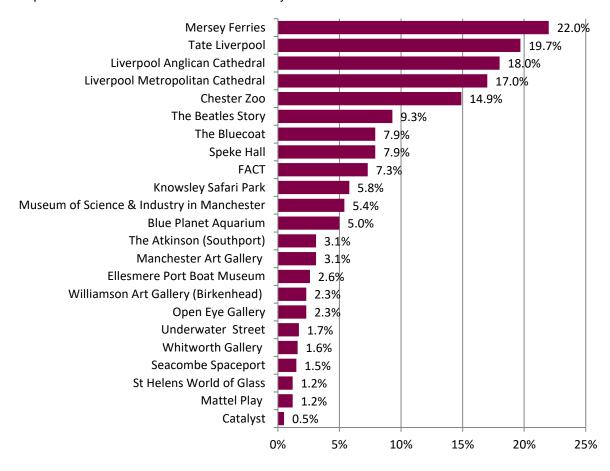

Mean frequency of visiting	Total	Resident	Elsewhere LCR	Elsewhere NW	Elsewhere UK	Overseas
SH	6.56	10.70	1.68	1.25	0.76	0.21
WM	3.90	8.96	5.23	1.73	0.62	0.11
LLAG	3.38	1.78	6.30	2.32	0.81	0.00
WAG	2.63	5.68	5.37	2.96	0.65	0.08
MMM	1.34	3.72	3.59	1.20	0.22	0.07
MOL	1.57	4.61	3.74	1.18	0.37	0.10
ISM	0.40	3.52	0.30	0.29	0.07	0.01
UKBF	0.35	1.08	0.69	0.38	0.15	0.08

• Highest overall frequency of visitation was calculated for Sudley House (6.6), with (in particular) residents making an average 10.7 visits per annum.

\_

#### 5.3.1 Previous Visits to Other Attractions

Respondents were asked what attractions they had visited in the last 12 months

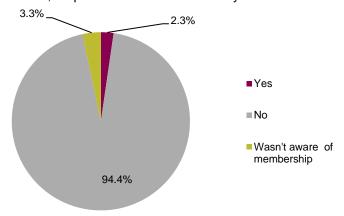

22% of visitors had previously been on the Mersey Ferry in the last 12 months, whereas 20% had previously visited the Tate Liverpool and 18% had visited the Liverpool Anglican Cathedral.

In comparison to 2015/16, these remain the most popular visit destinations, however in 16/17 the Met Cathedral superseded Chester Zoo suggesting a greater concentration of itineraries in the city (and reducing dispersal to other areas).

## 5.3.2 Membership of NML and Partnerships

For 2016/2017, respondents were asked if they were members of National Museums Liverpool.

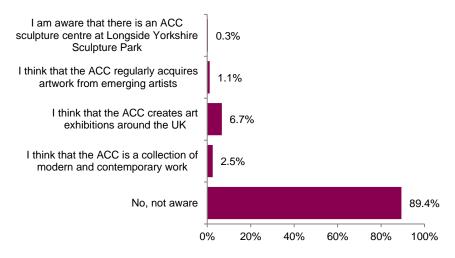

Only 2% of visitors were members of NML, whilst 3% of visitors weren't aware of NML membership. The table below shows the breakdown by venue.

	Total	ISM	LLAG	MMM	MOL	SH	WAG	UKBF	WM
Yes	2.3%	1.3%	2.2%	1.8%	2.3%	3.4%	4.0%	1.4%	2.4%
No	94.4%	95.8%	96.0%	95.3%	93.5%	94.4%	90.7%	94.8%	95.2%
Wasn't aware of membership	3.3%	2.9%	1.8%	2.9%	4.2%	2.2%	5.3%	3.8%	2.4%

#### 5.3.3 Partnerships

For 2016/2017, respondents were asked if they were aware of NML being part of a national partnership with the Arts Council Collection (ACC), and about their awareness of the ACC.

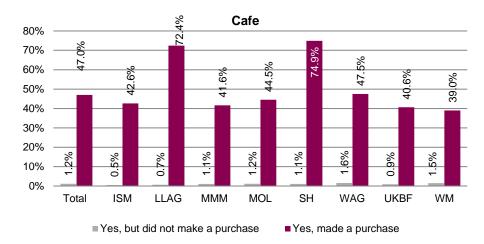

The majority of respondents were not aware that NML is in a partnership with the Arts Council Collection (89%), whilst awareness levels of the ACC, its role and activities, were consistently low.

# 6. Facility Usage and Satisfaction Ratings

## 6.1 Use of the Cafés and Shops

All respondents were asked if they had used the café or shop at the National Museums Liverpool venue they had been visiting.

#### **USE OF THE CAFE**

#### Overall, we note that:

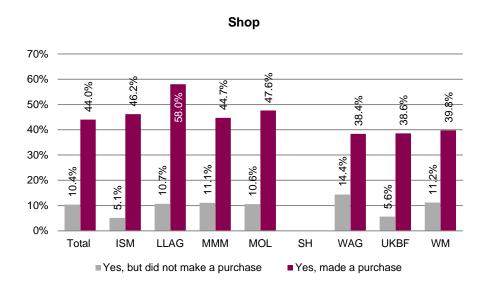

- Almost half of visitors (47%) indicated that they had bought something from the cafe; at least in part this may be connected with those visiting venues for social reasons (see section 5.1).
- Those venues where visitors were *most* likely to use the cafe and made a purchase were Sudley House (75%) and the Lady Lever Art Gallery (72%).

Please see Appendix 4 for comments on why people did not enter the cafe and why a purchase wasn't made.

Below, we present the data which shows how this varied geography.

	Resident	Elsewhere LCR	Elsewhere NW	Elsewhere UK	Overseas
Yes, made a purchase	42.2%	49.7%	53.1%	48.8%	37.5%
Yes, but did not make a purchase	1.0%	1.4%	1.1%	1.1%	1.1%

Note that Sudley House does not have a dedicated shop

- 44% indicated that they had bought something from the shop.
- Those venues where visitors were *most* likely to have used the shop and made a purchase were Lady Lever Art Gallery (58%) and the Museum of Liverpool (48%).

Please see Appendix 4 for comments on why people did not enter the shop and why a purchase wasn't made.

Below, we present the data which shows how this varied geographically.

	Resident	Elsewhere LCR	Elsewhere NW	Elsewhere UK	Overseas
Yes, made a purchase	29.7%	38.6%	44.1%	49.1%	53.6%
Yes, but did not make a purchase	7.9%	9.8%	10.2%	12.1%	9.9%

It is possible to analyse this particular question in a number of ways to reflect the propensity different segments may have towards using these facilities. Firstly, if we look to the type of visiting group:

#### **USE OF THE CAFE**

	On my own	With children	With family	With partner / spouse	With friends	Coach party	School / College group	Other group
Yes, made a purchase	39.3%	44.2%	58.6%	53.7%	40.1%	55.9%	16.7%	68.8%
Yes, but did not make a purchase	0.4%	1.6%	1.1%	1.1%	1.3%	0.0%	2.8%	0.0%

 As in 2015/16, coach parties, people visiting with family and people visiting with their partner/spouse and 'other groups', all had higher tendencies to buy something from the cafe.

#### **USE OF THE SHOP**

	On my own	With children	With family	With partner / spouse	With friends	Coach party	School / College group	Other group
Yes, made a purchase	31.6%	55.9%	49.4%	44.3%	39.8%	45.2%	50.0%	68.8%
Yes, but did not make a purchase	10.5%	7.0%	12.7%	11.1%	11.8%	9.7%	5.6%	6.3%

• Those visiting with children and School/College group were more likely to buy something from the shop.

Finally, in this section, as in last year's analysis, it is also interesting to see according to visit *motivations* what the use of the shop and cafe were in fact like: (Importance of main reason displayed from high to low).

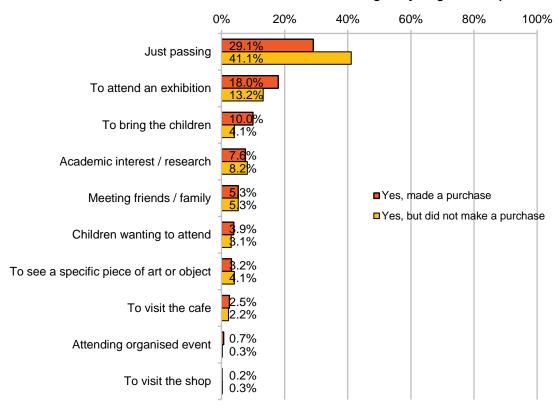

#### **USE OF THE CAFE**

#### **USE OF THE SHOP**

#### Main reason for visit to venue / whether bought anything from shop

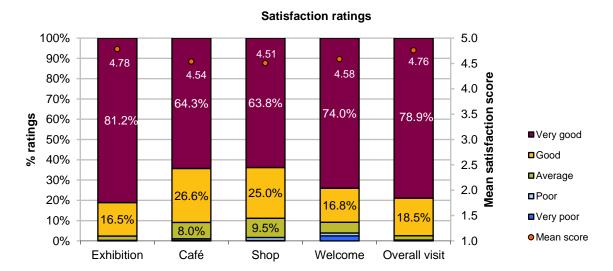

- Those just passing, attending an exhibition, visiting for Academic interest / research or were visiting to bringing their children were most likely to buy something from the café.
- Those just passing, attending an exhibition or visiting to bring their children were more likely to buy something from the shop – potentially a memento or similar item.

## 6.2 Satisfaction Levels

All respondents were then asked to rate their satisfaction with a number of different aspects of their visit to the venues.

As well as presenting absolute responses, this is also converted into a mean satisfaction score on the scale of 1 to 5 (where 1 is very poor and 5 is very good – sometimes called the *Likert scale*). Using this scale, any score *above* 3.0 indicates net *satisfaction*, whilst any score *below* 3.0 indicates net *dissatisfaction*. A satisfaction score is often a more effective way of drawing comparisons between data sets.

Note: only those indicating they had used the cafe or shop were asked to rate their satisfaction with these elements. Hence these ratings have lower sample sizes and hence lower statistical reliability.

Overall, there were very high levels of satisfaction recorded with all aspects of the visit, with little sign of dissatisfaction. 79% of visitors rated their overall visit as 'very good' (compared to 81% last year). Satisfaction scores are therefore very similar to last year. Scores for individual venues are as follows:

Mean score	Total	ISM	LLAG	MMM	MOL	SH	WAG	UKBF	WM
Exhibitions	4.78	4.75	4.93	4.83	4.76	4.91	4.85	4.65	4.70
Cafe	4.54	4.53	4.80	4.51	4.60	4.70	4.37	4.53	4.31
Shop	4.51	4.71	4.84	4.35	4.50	n.a.	4.29	4.52	4.47
Welcome	4.58	4.73	4.91	4.43	4.55	4.72	4.86	4.13	4.55
Overall visit	4.76	4.77	4.92	4.73	4.76	4.85	4.85	4.63	4.67

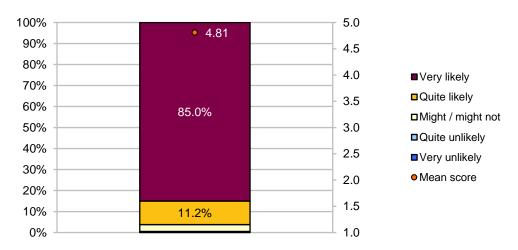

- In terms of overall satisfaction Lady Lever Art Gallery achieved the highest score (4.92). Welcome was also rated as one of the highest here at 4.91
- There was less than 0.3% variance in overall satisfaction for the year, compared to 2015/16 4.79 and 4.76 respectively.
- Sudley House scored highest for exhibitions (4.91) and the third highest for the welcome (4.72), whilst Lady Lever Art Gallery and International Slavery Museum both scored highest for the shop at 4.84 and 4.71 respectively.

#### 6.3 Recommendation

A particular measure of satisfaction is whether respondents were likely to recommend a visit to the venue to their friends and family.

Again, as well as providing the overall level of response we also show a mean score; in this case "Very Likely" equals 5 and "Very unlikely" equals 1.

#### Likelihood of recommending

85% of all visitors to NML venues in 2016/17 were "very likely" to recommend a visit (compared to 87% for last year), with a further 11% being "quite likely" (compared to 10% for last year).

Mean score	Total	ISM	LLAG	MMM	MOL	SH	WAG	UKBF	WM
Very likely	85.0%	81.4%	93.5%	80.9%	88.1%	95.3%	93.5%	74.6%	80.8%
Quite likely	11.2%	12.4%	5.8%	15.4%	10.5%	2.3%	5.1%	13.2%	15.0%
Might / might	3.3%	5.9%	0.7%	3.5%	1.4%	1.7%	0.5%	9.3%	4.0%
not									
Quite unlikely	0.4%	0.3%	0.0%	0.0%	0.0%	0.0%	0.8%	2.1%	0.2%
Very unlikely	0.1%	0.0%	0.0%	0.2%	0.0%	0.6%	0.0%	0.7%	0.0%
Mean score	4.81	4.75	4.93	4.77	4.87	4.92	4.91	4.59	4.76

- The venue achieving the highest mean score was the Lady Lever Art Gallery Art Gallery, where 94% of visitors were "very likely" to recommend a visit.
- For each venue, at least 95% of visitors were either "very likely" or "quite likely" to recommend a visit, apart from UKBF where 88% of visitors were either 'very likely' or 'quite likely' to recommend a visit.

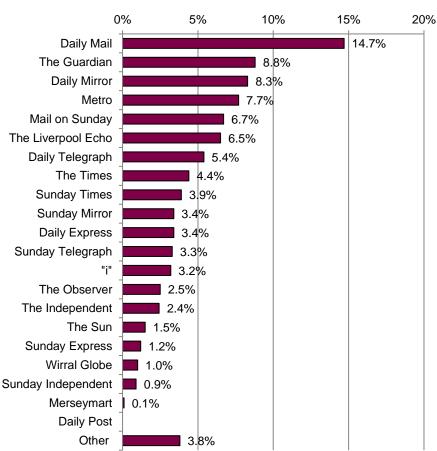

## 7. Lifestyle & Media

#### 7.1 Newspapers Read

Respondents were asked to indicate both the *main* newspaper they read and any *other* newspapers read; the chart below represents the cumulative results.

Note that this is only based on those who indicated reading a newspaper.

- The most commonly read tabloid newspaper was the Daily Mail (15%), followed by the Daily Mirror at 8%.
- The most commonly read broadsheet was The Guardian (9%), followed by the Daily Telegraph (5%) and The Times (4%).
- The Guardian surpassed the Mirror as the second most read paper by visitors in 2016/17.
- Sunday newspaper reading is led by the Mail on Sunday (7%), followed by the Sunday Times (4%) and Sunday Mirror (3%).
- 7% of all visitors to NML venues read the local 'Liverpool Echo' down 1.3% on 2015/16.
- Other responses can be seen in Appendix 4.

There are two important considerations here; firstly that of newspapers read by venue and secondly newspapers read by different visitor type.

As in last year's report we analyse this by venue, grouping readership into different publication categories: we also highlight in bold the top newspapers read at each venue (the "top 5").

- The Daily Mail was the most popular newspaper for all venues.
- Sudley House, Walker Art Gallery and International Slavery Museum tended to have a higher readership of broadsheets than is typical; especially high levels of readership of The Guardian being recorded at Sudley House (27%) and Walker Art Gallery (21%).
- Readership of the Liverpool Echo was highest at Sudley House (19%) World Museum (18%)

Below, we present by broad geographic area of the top newspapers read.

From a marketing and promotional perspective, and given the proportion of visitors originating in the North West, advertising and promotional content could explore regional activity with the Mail, and the Guardian supplements on a national basis.

#### 7.2 Radio Stations Listened To

Respondents were also asked to indicate both the *main* radio station they listened to and any *others*; the chart below represents the cumulative results.

Note that this is only based on those who indicated a radio station.

- The two radio stations most likely to be mentioned were Radio 2 (24%) and Radio 4 (22%). These are the same top two stations as last year although with lower proportions 26% and 23% last year respectively.
- Reflecting the strong local audience, there were also levels of mentions of local radio stations; 8% mentioned BBC Radio Merseyside and 7% mentioned Radio City. (Last year – 9% BBC Radio Merseyside, 8% Radio City.)
- 10% listened to Radio 1 (compared to 10% last year) and 7% listened to Classic FM (8% last year).
- Note that 9% of all respondents mentioned an "other" radio station; largely this reflects on stations local to where the respondent lives (or in the case of overseas visitors, their own 'national' broadcasters).
- It is notable that 56.9% of radio listenership centres on BBC channels non-commercial in nature.

Other responses can be seen in Appendix 4

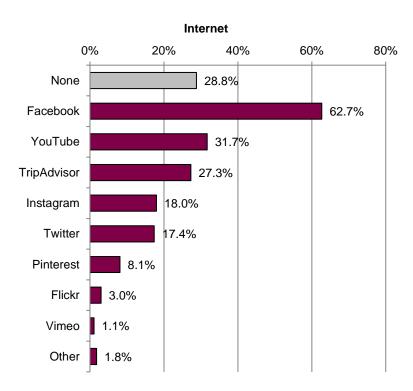

Below we see how radio stations listened to varied for each venue (top five for each highlighted in bold):

- The 'local' market is particularly evident at World Museum and Sudley House, with over 25% listening to either Radio City or Radio Merseyside.
- Radio 2 & Radio 4 are consistently the most prevalent channels chosen by visitors at each venue.

#### 7.3 Internet: Websites & Social Media

Respondents were then asked which websites and social media they regularly used:

- Some 71% of all visitors to NML claimed regular use of different websites (compared to 58% last year).
- The highest level of use was Facebook, being mentioned by 63% of respondents, up 3.4% on last year.

  - 0 1% 2008/9
- 27% of respondents used TripAdvisor. This is slightly less than in 15/16.
- Instagram has increased in usage by 4.6% to 18%.

To some extent the age of the respondent colours the results of each venue; though with the respondent age closely matching the profile of all those in their group (section 3.2) we do not believe this to be a distortion.

- Sudley House had the highest proportion of visitors who did not regularly use the internet (44%).
- The highest use of Facebook & YouTube was made by visitors to the International Slavery Museum (74% &v 43% respectively).
- Visitors to the World Museum and Museum of Liverpool had the highest levels of use of Twitter (22% and 18% respectively).
- Visitors to the Museum of Liverpool were the highest recorded users of TripAdvisor (33%).

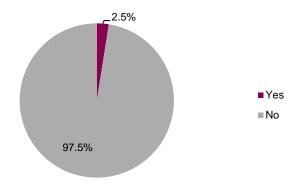

Earlier reports demonstrated the variance which can occur by age in terms of use of electronic media, and below we show the use of these websites against the age of the respondent. Thus, although just 4% of 16-24 year olds did not use any of these websites, this rose to 58% of those aged 65-74. 93% of those aged 16-24 used Facebook as opposed to just 36% of those aged 65-74. However, internet use and use of social media is increasing significantly in the older age groups.

TripAdvisor is used mostly by those aged 35-54 years.

#### 7.3.1 Followers of NML

Respondents were asked if they follow NML on social media.

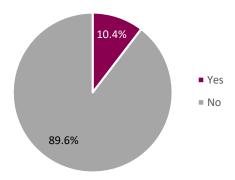

Only 3% of visitors indicated that they follow NML on social media. The table below shows a breakdown by venue.

	Total	ISM	LLAG	MMM	MOL	SH	WAG	UKBF	WM
Yes	2.5%	0.6%	4.4%	1.3%	3.0%	4.9%	4.3%	1.4%	1.9%

## 7.3.2 Website Usage

Finally, respondents were asked if they visited NML's website prior to their visit.

A tenth of visitors indicated that they had visited the NML's website prior to their visit (10%).

Of those visitors who indicated using NML's website prior to their visit, 58% used the website to look up general information, with 30% using the website to look what was on at venues – this might include exhibitions, events and educational activities. Searching for general information and event details suggest low awareness and enquiry from first time inbound visitors seeking to orientate and consider venues within their travel planning.
