

## **Q & A document**

The Council and Charity have received the queries/questions below, the response to which might be of general interest to bidders:-

### Questions and answers

**1. Is there any reason as to why an over deck is required?**

If a bidder wishes to “deviate” from the RFQ, it up to contractors to do so and indicate their reasoning.

**2. Previously it has been mentioned about the possibility of insulation, please could you confirm that there is no requirement for insulation at roof level**

The RFQ does not mention insulation, contractors should bid accordingly. If contractors feel this is inadequate, they have the option to recommend its inclusion together with their justification.

**3. Can bidders submit their own proposal/revised specification?**

Bidders can offer alternatives but must respond fully to the RFQ tabled.
