1. PURPOSE

- 1.1 The supplier is to provide digital design professionals for the alpha phase of the Commercial Policy Lifecycle Tool.

2. BACKGROUND TO THE CONTRACTING AUTHORITY

At its inception in April 2022, the Government Commercial and Grants (GCG) Digital team took on responsibility for a number of business as usual services. These include Find a Tender, Contracts Finder, Spotlight, CaSIE and GGIS.

In addition, there are a number of high profile, time-bound projects that revolve around cloud technologies that require additional support, specifically the Transparency Platform (supporting Government's *Transforming Public Procurement* reform programme) and Plutus (a digital and data transformation project to increase due diligence capabilities, knowledge and skills relating to threats to National Security)

Further to these projects, a number of smaller but high priority requirements have been identified within the Government Commercial Function and Government Grants Management Function. Some of these projects are currently failing and have short deadlines for delivery. Each requires various ongoing maintenance and development to ensure success. These include:

1. Commercial Continuous Improvement Framework (CCIAF)
2. Commercial Policy Lifecycle Toolkit (COPT)
3. Public Sector Wide Spend Data Analytics
4. Risk Identification Tool
5. GCG Database
6. GGIS enrichment
7. GCG Enterprise Architecture Design
8. GCG Replatforming legacy

Each of these projects are at various stages of maturity and require different specialist skills. The skills required to support this are not available within the GCG Digital Team.

3. Background to requirement/OVERVIEW of requirement

This request seeks to contract two-three suitable digital delivery partners to provide short-term specialist cloud support to scale up the GCG Digital Services offering within the Cabinet Office. This will enable delivery of the Rules Reform Transparency Platform, Plutus and wider GCF digital projects such as:

- Commercial Continuous Improvement Framework (CCIAF) - Cloud based reporting tool
- Commercial Policy Lifecycle Toolkit (COPT) - Cloud based reporting tool
- Risk Identification Tool (cross-gov) - To be confirmed
- GCG Database - Cloud based database, will require Cloud Hosting, potentially Cloud Software and Cloud Support
- GGIS enrichment - Cloud based digital service requires Cloud Support
- GCG Enterprise Architecture Design - Cloud Support
- GCG Replatforming legacy.- Cloud migration / support

It will also facilitate the establishment of the new Government Commercial and Grants Digital Team by allowing us to respond at pace to new digital needs within GCF and GGMF. The pipeline of these projects is currently unknown, but as well as the above listed projects we are already discussing the potential for digital supply chain analysis with MoD and DIT as well as Public Sector Wide Spend Data Analytics with Commercial Policy. If taken forward, these will aid delivery of greater transparency, effectiveness and efficiency across the Government Commercial Function and Government Grants Management Function, but will also require additional specialist resource to support their delivery.

Projects range from new cross government services to small improvements required to existing assets. The aim of this case is to reduce the need to procure multiple digital suppliers allowing for greater efficiencies of reduced contract management, ability to use a supplier for Cloud Support across multiple projects and reduce costs, a higher value contract should enable better rates for T&M alongside improved supplier flexibility and buy-in.

This is the model we intend to utilise on the wider portfolio of projects listed above so will require ongoing cloud support. It will also allow us to support any urgent and emergency requirements without having a detrimental impact on existing workloads.

At its inception in April 2022, the Government Commercial and Grants (GCG) Digital team took on responsibility for a number of business as usual services. These include Find a Tender, Contracts Finder, Spotlight, CaSIE and GGIS.

In addition, there are a number of high profile, time-bound projects that revolve around cloud technologies that require additional support, specifically the Transparency Platform (supporting Government's *Transforming Public Procurement* reform programme) and Plutus (a digital and data transformation project to increase due diligence capabilities, knowledge and skills relating to threats to National Security).

Further to these projects, a number of smaller but high priority requirements have been identified within the Government Commercial Function and Government Grants Management Function. Some of these projects are currently failing and have short deadlines for delivery. Each requires various ongoing maintenance and development to ensure success. These include:

- Commercial Continuous Improvement Framework (CCIAF)
- Commercial Policy Lifecycle Toolkit (COPT)
- Public Sector Wide Spend Data Analytics
- Risk Identification Tool
- GCG Database
- GGIS enrichment
- GCG Enterprise Architecture Design
- GCG Replatforming legacy

Each of these projects are at various stages of maturity and require different specialist skills.

5. Scope of requirement

- 5.1 To undertake discovery in relation to a proposal to automate the Grants Maturity Model, self-assessment and reporting process - related to the requirements of the Grants Functional Standard and associated Minimum Requirements - to bring the model into line with the process employed by the Commercial Function in commissioning, assessing and reporting against self-assessments in relation to commercial procurement, as part of their Continuous Improvement planning.¹
- 5.2 The discovery work is to commence ASAP
- 5.3 It should be noted that the Grants and Commercial self-assessment and reporting requirements are already fully aligned, in terms of process, with the Grants Model having been based on the Commercial Model. The key area of divergence is in the individual reporting metrics and the detailed assessment criteria. However, this divergence does not lead to a material difference in the process and, therefore, it is clear that in principle, subject to the outcome of discovery with the grants user group, that maintaining alignment between the two processes via a single platform, data capture and reporting process, should be entirely possible and is a key aim from the policy perspective.
- 5.4 The table below summarises the requirement, to the end of the 2022/23 financial year. The key staff will be appropriately skilled, so as to be able to deliver the following to government best practice:

Ref.	Objectives & Outcomes
1	OBJECTIVE: Deliver a discovery, which investigates how we might simplify and streamline the end-to-end process of maturity assessment self-assessment, rebaselining, data analysis and reporting for continuous improvement

¹ The Grats Functional Standard is published on gov.uk, here: <https://www.gov.uk/government/publications/grants-standards>

	of the grants function. OUTCOME: In the context of and building on the discovery already undertaken by the Commercial Function and the existing delivery of a digital platform: • learn who the users are and what they're trying to achieve; • learn what the system needs to look like; • research to inform the decision of whether to utilise existing platforms (commercial platform), build or buy; • timescales of different options; • understand what the MVP needs to be - in the context of the commercial solution - and the scale up options; • understand the constraints; • learn about integrations with other systems - in particular the existing commercial platform; and • work aligned to the Government Service Standard.
2	OBJECTIVE: Build engagement with users and stakeholders OUTCOME: Increase levels of engagement, helped by building particular assets: Stakeholder map.
