SoR**Statement of Requirement****STATEMENT OF REQUIREMENT:**

For the procurement of the Modification Kits required to embody the Non-Halon Fire Extinguishers across the Heavy Fleet.

BACKGROUND

1. The previous version of Hand Held Fire Extinguishers (HHFE) used across the Heavy Fleet (CR2, CRARRV, DTT, Titan and Trojan) were replaced due to a change in Montreal Protocol. This change in protocol meant the Halon filled fire extinguishers needed to be replaced with a non-halon alternative; this purchase was made, and the new version of fire extinguishers require a modification kit to make the fixture compatible.

OBJECTIVE

2. The objective of this task is to purchase and then embody the modification kits into the various vehicles within the Heavy Fleet. These Mod Kits are to be fitted in the same position as the previous brackets which is vital as the crew are trained to work with the FE's in these positions – doing so will maintain conformity which is key.

REQUIREMENT

3. There is a requirement to make a one-off purchase of x432 Fire Extinguisher Modification Kits to roll out the modification across the Heavy Fleet. These figures can be broken down to show:

TIMESCALES

5. Without the Mod Kits each of the platforms will be without FE capability which is a serious safety concern in case of the event of a fire; for this reason, the PT requires all deliverables by 31 August 2020.

GFX

6. GFX within this requirement relates directly to the Technical Drawing Packs (TDP). When the Invitation To Tender (ITT) is issued to the competing suppliers, DEFFORM 47 will be included, to instruct unsuccessful bidders on their method of disposal – this can be done by either: Asking the supplier in question, to personally dispose of the drawings/ tender pack or by; asking for the complete tender pack to be returned to the Authority so that the disposal of said information can be controlled internally.

SAFETY

7. The platform will not be determined ALARP without the appropriate means of extinguishing a fire within the turret. The new fire extinguishers cannot be fitted to the existing brackets and the old extinguishers are now obsolete due to a change in environmental legislation. Without the appropriate brackets being procured, the new extinguishers are unable to be fitted securely – this prevents the platform(s) from being ALARP for two reasons; the first being, the inability to extinguish a fire due to not being fitted correctly and; the second being if it is stored in an inappropriate way, it could become a secondary projectile and therefore potentially in-accessible in the event of a fire.

ASSUMPTIONS AND DEPENDENCIES

8. These items are new to service and due to the new (Non-Halon) Hand-Held Fire Extinguishers, being dependant on these modification kits, the items previously mentioned need to be procured. All technical drawings will be both up to date and provided to the supplier.
