

	Question	Response
1	Please clarify whether the 'Innovation Landscape Report' has already been produced and requires communication, or whether you're looking for a service provider to lead the development of the report (i.e.before communications stage)?	Within this ITT we are looking for a service provider to lead the development of the report.
2	Given that there is the opportunity to apply for one of the three parts of the project or all three parts I wanted to enquire whether this has an impact on the duration of the project, namely, if all three parts are applied for it is equal duration than when only one unit is applied for.	As noted in the tender document, we are open to proposals as to how these reports can be delivered and what contractors could deliver in the timescales outlined.
3	(Is) the only document we need to take in account the one that is attached to the link https://www.contractsfinder.service.gov.uk/Notice/c6d14ca8-8f30-48eb-9157-99354e74f261 ?	Yes, this is the only document to take into account – aside from our general T&Cs that can be made available.
