2. How to manage the insurance

- 2.1 Without limiting the other provisions of this Contract, the Supplier shall:

- 3.2 Where the Supplier has failed to purchase or maintain any of the Insurances in full force and effect, the Relevant Authority may elect (but shall not be obliged) following written notice to the Supplier to purchase the relevant Insurances and recover the reasonable premium and other reasonable costs incurred in connection therewith as a debt due from the Supplier.

4. Evidence of insurance you must provide

- 4.1 The Supplier shall upon the Start Date and within 15 Working Days after the renewal of each of the Insurances, provide evidence, in a form satisfactory to the Relevant Authority, that the Insurances are in force and effect and meet in full the requirements of this Schedule.

The Supplier shall use all reasonable endeavours to notify the Relevant Authority (subject to third party confidentiality obligations) as soon as practicable when it becomes aware of any relevant fact, circumstance or matter which has caused, or is reasonably likely to provide grounds to, the relevant insurer to give notice to cancel, rescind, suspend or void any insurance, or any cover or claim under any insurance in whole or in part.

PART C ANNEX 1: ADDITIONAL PERFORMANCE MONITORING REQUIREMENTS

Call-Off Schedule 20 (Call-Off Specification)

This Schedule sets out the characteristics of the Deliverables that the Supplier will be required to make to the Buyers under this Call-Off Contract

Background and Context

BOB ICB require the procurement of 269 Meraki MR36 access points and licenses to replace end-of-life Meraki MR18 wireless access points at Buckinghamshire GP practices. The existing Meraki access points no longer receive security updates, making them vulnerable to exploits and putting the network and data at risk. The newer access points will offer better performance and capacity, improving user experience and supporting more devices.

In addition to these access points BOB ICB require the procurement of 134 MS130-8P-I and 10 MS130-24P switches which are to replace MS220 switches that are soon to be end of life (EOL) in the Buckinghamshire and Berkshire West sites.

Installation of access points and switches are only required at Buckinghamshire GP practices.

SCW aim to deliver a standard templated design for GP practice network infrastructures. One of the templated design approaches is to standardise on hardware used to deliver the service. This allows SCW to concentrate its resources on one product line. Engineers can focus and skill-up on a single product rather than across a plethora of vendors. Security vulnerability tracking can be focussed on a small product set to ensure all elements of the solution receive the correct amount of attention. Product lifecycles can be more easily managed. Tracking and focussing on a small standard portfolio ultimately leads to improved product life tracking. The platform chosen by SCW for this is Cisco Meraki, which is already installed across the majority of the estate. At this time other vendor solutions will not be considered.

Delivery Address

Software: scwcsu.softwarelicensing@nhs.net

To note that SCW will licence 'per device'.

Software – invoices are to be submitted upon delivery of the licence keys.

Hardware: The Contracting Authority would like to consider 2 delivery options:

1. Delivery to ICB storage site [REDACTED]
[REDACTED] SCW would arrange asset tagging and onward delivery to site.
2. Deliver to supplier/installer storage facility; complete asset tagging*; allocate equipment to sites; confirm asset and allocation information for SCW to add to asset register a minimum of 2 weeks' notice prior to the installation date; (if applicable) deliver equipment to installers for them to take to site on day of installation.

*Labels to be provided by SCW

N.B. If option 2 is not feasible, please provide costs for delivery option 1 only. Costs for Option 2 will not be scored.

Hardware - Invoices are to be submitted upon delivery of hardware to one of the 'delivery addresses' as listed above.

Installation

SCW require a dedicated and experienced provider to support and work as part of a blended team. SCW will predominantly focus on customers based in 74 of the Buckinghamshire GP practices, but this does not preclude work outside of this geographical base with other regional teams if required. Delivery of the services will be managed by the SCW Project Team.

Invoices for the completed work are to be provided monthly in arrears based on the activity and time worked by assigned engineers within the preceding month.

The supplier is requested to provide a Network Engineer to deliver the requirements or multiple Network Engineers to deliver the requirements quicker - there is no preference although the same engineers to deliver the project throughout is desirable. A site implementation plan will be shared with the winning supplier following contract award.

IT Network Engineer(s) will need to undertake the following activities (which are subject to change) within the context of the functions set out above, including but not limited to:

1. Physical attendance at designated sites – access, security, and parking information will be provided. See Appendix A below for locations.
2. Following SCW processes (to be advised at contract award):
 - a. Remove 269 old physical Wireless Access Points (WAP) / fixed at height.
 - b. Install 269 physical WAPs pre-delivered by SCW (fixed at height).
 - c. Install 85 MS130 switches.
 - d. Complete preliminary on-site checks.
 - e. Test all equipment and obtain sign-off from end-user.
 - f. Provide asset detail to SCW Project manager for the inventory management process.
3. Attend checkpoint meetings and reporting to Project Manager and Programme Support Office or Team Lead.
4. Escalate any issues to the Team Lead Engineer assigned.
5. The service should also include working with landlords, where required, to gain permission for any installations.
6. In addition to the above, the supplier is required to provide the following:
 - Risk and Method Statements (RaMS) for each installation location.
 - A warranty for the installation work and any necessary remedial work.

The supplier is expected to ensure that all IT Network Engineer(s) comply with the following:

NHS Employment Standards

1. **NHS Employment Standards**
(<https://www.nhsemployers.org/recruitment/employment-standards-and-regulation>)
for onboarding including DBS checks and referencing process.
2. **Person Specification** - as part of the NHS family, SCW adheres to a strong set of values and behaviours which it expects both its staff and partners to always demonstrate. As such, IT Network Engineer(s) with previous experience of SCW projects within the proposed onsite delivery team would be desirable. The supplier is expected to ensure that all IT Network Engineer(s) meet the following expectations, unless otherwise stated

Framework Schedule 6 (Order Form Template and Call-Off Schedules)

as desirable:

a. Adherence to SCW Values and Behaviours:

- i. Patient first – Customer Excellence
- ii. Aspirational

- iv. Insightful
- v. Respectful

b. Education - educated to degree level in relevant subject or equivalent level of experience of working at a similar level in specialist area.

c. Knowledge and Experience

- i. Further training or significant experience in network management/installation.
- ii. Experienced in communications with customers.
- iii. A good understanding of the health and social care environment and responsibilities within it.

d. Skills and Capabilities

- i. Management of various types of networking infrastructure, including Wireless Access Points, routers, firewalls etc.
- ii. Clear understanding of the TCP / internet protocol and its implementation.
- iii. Understanding of dynamic routing protocols and Virtual Private Networks (VPN).
- iv. Ability to analyse, debug and enhance Local Area Network (LAN) and Wide Area Network (WAN) implementations.
- v. The configuration of network monitoring tools such as SolarWinds.
- vi. Thorough understanding of Microsoft Networking and how this interacts with a LAN/WAN.
- vii. Clear communicator with excellent writing, report writing and presentation skills; capable of constructing and delivering clear ideas and concepts concisely and accurately for diverse audiences.
- viii. Ability to engender trust and confidence and demonstrate integrity in the provision of advice and support.

- **Existing Infrastructure:** The current WAPs are Cisco MR18 (292) and MR33 (24) models. As these are currently operational, it is assumed that the existing cabling infrastructure is sufficient, and additional wiring will not be required. However, should this not be the case, the supplier will be expected to notify the SCW Contract Manager as soon as it has been identified.

Bidders should clarify within the 'Comments and Point of Clarity' section of the Financial template, if and what assumptions are being made of the existing cabling, and how any additional costs related to unforeseen cabling issues will be determined and managed. Where any additional costs are identified, these need to be agreed in writing with the SCW Contract Manager prior to commencement of any remedial work.

- It is important to note, that 'Comments and Point of Clarity' detailed within the Financial template are for information purposes only and not directly subject to any scoring undertaken as part of the formal evaluation process.

Outcomes

The primary outcome of this project is the successful upgrade of wireless infrastructure through the procurement and installation of Meraki MR36 Wireless Access Points (WAPs) and Meraki MS130 switches across NHS and GP practice locations. This will be achieved through several key objectives:

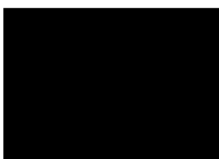

- Installation of a minimum of 269 and up to 296 Meraki MR36 WAPs at 74 GP practice sites in Buckinghamshire as detailed in Appendix A.
- Replacement of existing Meraki MR18 with Meraki MR36 models, with old Meraki WAPs either returned to SCW or disposed of by the supplier, with any costs or buy-back incentives clearly stated by the supplier.
- Installation of Meraki MS130-24p switches at practices as detailed in Appendix A. This will include patching of the devices, and the removal of existing switches as required.
- Installation of Meraki MS130-8P-i switches at practices as detailed in Appendix A. This will include patching of the devices, and the removal of existing switches as required.
- Delivery of Risk and Method Statements (RaMS) for each installation location, completed before work commences at each site.
- Provision of Meraki Order Number to enable SCW to bulk add devices to the Meraki portal.
- Completion of all installations in Buckinghamshire with a target date of 31st December 2025 and a lead time of 2-4 weeks from contract award to start of work.**
- Ensure all installed WAPs are tested and successfully connected to the network and are able to be used by a device accessing SSIDs. Proof of connection is to be recorded by the supplier and provided to the SCW representative.
- (only applicable for delivery option 2) Asset labels (provided by SCW) are to be attached to devices and the serial numbers/MAC addresses recorded along with the site name and detailed installation location. This information will need to be forwarded to the SCW project manager for asset management recording within 1 week of installation.
- Warranty of the WAP installation work provided for a minimum of 12 months, covering any installation remedial works required. Supplier to provide details of any guarantees/warranty on applicable equipment, cabling or installations.
- Weekly monitoring and reporting will be performed between the supplier and SCW's project manager to track progress and resolve issues.
- No boxes or packing materials of Meraki equipment should be left for disposal at the GP practice site.

The project also aims to support NHS sustainability goals by implementing a waste and disposal management process that is compliant with the WEEE directive, and that contributes towards a zero-landfill objective.

Appendix A – Buckinghamshire sites for Access Point and switch replacements

Project management

SCW will provide project management and work with the ICB, GP practice and the successful supplier to project manage the installation across the specified sites.

For sites that are found to require additional work, e.g. working with landlords for permissions, the supplier will liaise with SCW, and SCW will facilitate the discussion with NHS BOB ICB and the practices accordingly.

Monitoring and Reporting

For the Buckinghamshire project, the chosen supplier will be required to perform monitoring and reporting with the SCW project manager on at least a weekly basis. This regular communication is to ensure that practices have been scheduled and that the practices understand the work being carried out. Issues with access can be escalated to the SCW project manager, who will work with NHS BOB ICB and the practices to find solutions.

The supplier will also need to work with the practices to test the Wi-Fi coverage locally with staff. The supplier also has to provide proof that each WAP is connected and used by a device accessing SSIDs, and to provide this to the SCW project team.

In addition, the supplier must provide contact details for reporting issues during the warranty period.

The supplier will need to:

1. Create and share a weekly Monitoring and Reporting Plan (using SCW templates) to track project progress, identify issues, and ensure projects stay on course.
2. Create and share monthly a Resource Plan reporting utilisation and costs.
3. Attend review meetings on request to discuss reporting and management of projects.
4. SCW may also ask the supplier to contribute to any other reporting on the delivery to support monthly review meetings, scheduled checkpoint meetings or any other requirement as reasonably requested.

security standards. All organisations that have access to NHS patient data and systems must use this toolkit to provide assurance that they are practicing good data security, and that personal information is handled correctly. It is desirable that suppliers are compliant with the DSP Toolkit version 5 or later and desirable to have Cyber Essentials Plus accreditation.

Service Level Agreement (SLA)

Specific performance targets include achieving the agreed installation numbers within the specified timelines, maintaining high levels of safety throughout the process, and ensuring that all technical requirements related to cabling and network connectivity are met.

The Service Level Agreement (SLA) for this project requires the supplier to provide a contact for reporting installation issues within the warranty period, typically during working hours. It is expected that all installation work will need to be completed within the core practice working hours. The supplier must also detail any guarantees or warranties on equipment, cabling, or installations.

Additionally, the supplier is expected to work with the practice to test that the coverage of the installed WAPs is as expected and have appropriate GP staff sign off on the completed work. Proof of each WAP being connected and used by a device accessing SSIDs must be provided to the SCW representative. A sign off document will be agreed between the supplier and the SCW Project Manager.

The supplier will also be expected to maintain communication with the SCW Project Manager with a minimum of weekly intervals to ensure that the project is progressing and that issues are addressed quickly.

All work undertaken will be to a high standard with customer feedback being a key indicator of quality.

Industry Standards or Accreditations (equivalents)

Desirable – Cisco Gold Partner

This project is for the replacement of access points into the existing locations and therefore additional cabling should not be required. However, if in the location that installation of cables or outlets are required the supplier must adhere to the standards set out in the "SCW Network Cabling Specification for GP Practices v1.2".

Appendix B - SCW Network Cabling Specification for GP Practices:

Appendix B - SCW

Specifically, Cat6 cabling to user outlets and Cat6a (10Gb) to ensure Wi-Fi locations should be provided as a minimum. The cabling should be installed according to the manufacturer's guidelines and be sourced from a single manufacturer, including a 25-year manufacturer warranty from an approved installer.

Installation of any required cables or outlets must adhere to the British Industry Standards:

Regulations of the Electrical Installations 2018:

- **BS7671:2018 - 527.2:** sets out the requirements for the sealing of wiring system penetrations. Whilst BS 7671:2018 states that fire stopping is a requirement, it does not detail how it should be carried out or who should do it. For this, it is important to seek further guidance from specialist contractors and manufacturers.
- **BS7671:2018 - 527.1:** Where a wiring system passes through elements of building construction such as floors, walls, roofs, ceilings, partitions or cavity barriers, the openings remaining after passage of the wiring system shall be sealed according to the degree of fire-resistance (if any) prescribed for the respective element of building construction before penetration.

Regulations of the Telecommunication cabling and equipment installations 2004:

- **BS6701:2004:** Code of practice for the installation of apparatus intended for connection to
- certain telecommunications systems specifies requirements for the installation, operation and maintenance of telecommunications equipment and telecommunications cabling.

It is mandatory, the relevant British Industry Standard certification must be provided, e.g. ISO/IEC 11801 or BS/ISO/IEC 14763-3.

It is mandatory, that the cabling must meet the following standards:

- TIA/EIA 568-C.1
- EN50173-1
- ISO/IEC 11801

All cables should be Category 6/6a Unscreened LSOH cables of solid copper core and to specification. Furthermore, all cabling must adhere to BS7671 and BS6701 as stated above, and be a minimum of Euroclass CCA, retained on steel containment or with steel ties. Under no circumstances should UTP (or fibre) cabling be jointed between patch panel and outlet.

Relevant certification must be provided. The document also states that all cabling and associated termination components are to be sourced from a single manufacturer and

include a 25-year manufacturer warranty on completion, from an approved installer. It is implied that the contracting authority would expect that the supplier adheres to the set standards and provides evidence of this. The document specifically notes that a non-CPR compliant cable will not be accepted in any form. The level of evidence required is not explicitly stated, but it can be inferred that copies of certification or registration numbers would be needed to demonstrate compliance with the standards mentioned.

IR35

The contract will be to provide services and resources as provided for by the supplier, which under the contract will be deemed to be out of the scope of IR35 (as a fully outsourced service) and as such all requirements, key milestones and outputs detailed within the specification will be solely directed and managed by the supplier. The IR35 status determination of any workers used on the project will be the responsibility of the appointed supplier, and all PAYE/NIC/App Levy requirements will be the liability of the appointed supplier.

Contract Manager

The Contract Manager for this project is the SCW Project Manager.

The SCW Project Manager will be the point of contact for the supplier and will be responsible for monitoring and reporting on the project, at a minimum of weekly intervals. The SCW Project Manager will work with the supplier to ensure that practices have been scheduled and practices have appointments and understand the work to be carried out. They will also address issues with access, escalating them to BOB ICB and their practices as necessary. The SCW Project Manager will inform the supplier of any required changes as soon as possible.

The Contract manager will also be responsible for the performance management of the supplier.

Name of contract manager – to be revealed once we have awarded the contract.
