Schedule 2 Specification

1. Introduction

The Department for Transport (DfT) invites proposals for the provision of a **Maritime Data Subscription Service**. This contract will be subject to the DfT Short Form Contract Conditions (Schedule 1).

This contract has two distinct work packages:

- Work Package 1: Data Platform (£20,000)
- Work Package 2: World Fleet Dataset (£15,000)

The anticipated values are given in good faith as a guide to aid bidders planning for submitting their Tender. It should not be interpreted as an undertaking to purchase any goods or services to any value and does not form part of the Contract.

2. Background to the Requirement

Covid-19 has caused widespread disruption across the global shipping industry and subsequent supply chains. The DfT requires access to detailed information on shipping movements to monitor the maritime sector and respond to any business-critical disruption in sea transport, including the Covid-19 pandemic. DfT require a time series to enable better understanding of long-term trends to inform decision making.

DfT are looking for two aspects of maritime information and data; a platform that visually represents ship movements and minimum quarterly provision of world fleet data.

- WP1: This data from the platform will directly feed into the DfT's contingency planning and response, being used by analysts to get a retrospective and forward look of ship arrivals and be able to identify indicators of disruption. This specification is for a one-year subscription to this data provision with the possibility to extend for another year. The platform should enable unrestricted download of data snapshots, both forward looking (e.g. expected ship arrivals) and historical. The platform will need to be provided in a format that is easy to query and considering the option for direct Application Programming Interface (API) access to the data.
- WP2: The world fleet information will feed into an official [UK shipping fleet statistics](#) publication.

Contract End Date	31/03/2023

4. Scope

The supplier will be required to provide 5 user accounts for the exclusive use of the DfT and its agencies for uninterrupted access to shipping data for the period of 12 months, plus a further 12-month option of extension with a review on the number of user accounts. There must be provision to change the email addresses that the accounts are associated with if an individual changes role at any time during the contract term (and subsequent extension).

The DfT will incorporate insubstantial portions, extracts, abstracts or summaries of the data and/or data service provided into analyses or presentations which can be made available and shared to other government departments. This is to allow the DfT to appropriately share insights into shipping across the different Departments that may be involved in the management of sea freight.

The DfT will also incorporate insubstantial portions, extracts, abstracts or summaries of the data and/or data service provided into analyses, presentations and publications which could be made publicly available on the GOV.UK website should the need arise.

If there is a specific level of aggregation that the supplier would require to allow this, please specify in your bid. In such circumstances, all references to the data or manipulations of the data provided will be sourced as “DfT analysis of [supplier] data”.

5. Implementation and deliverables

The deliverables will be:

	Work package 1	Work package 2
Deliverable	<p>A data platform which the DfT will be able to access through 5 user accounts for a period of 12 months beginning on the proposed commencement date outlined in the Procurement Timetable.</p> <p>The deliverable should provide the ability to download the data in different formats.</p>	<p>At least 4 (once a quarter) provisions of a dataset providing a snapshot of the world fleet on the date of the snapshot.</p> <p>The deliverable should allow the DfT to access the required data (outlined in Section 6).</p>
Availability	The platform should be available on the commencement date of the contract.	The dataset should be available within 2 weeks of the contract commencement date.
API	<p>To aide with the facilitation of large-scale data analytics, the supplier must additionally, as part of Schedule 5 Pricing Schedule provide the cost of an optional module for the DfT to access ship events including expected ship arrivals through an Application Programming Interface (API). It is anticipated that this API would be called once a day, any restrictions in the number of ‘calls’ that can be made</p>	

	through the API service should be clearly specified in your response alongside additional costs if subscribed and any limitation in accessing the API. This will be included in a bidder's Total Price and evaluated as part of Contract Award. This will be requested throughout the Contract Term with 1 month's notice if required.
--	--

The DfT requires that the service is paid for through two invoices, one at service commencement for the initial 6 months equalling half the service value, and one 6 months after commencement equalling the remaining half of the service value.

The API may be requested throughout the Contract Term with 1 month's notice if required by the DfT. The cost will be calculated pro rata for the number of months of access requested using the supplier's submitted cost within Schedule 5 Pricing Schedule.

The DfT may choose to extend this contract another period of 12 months after the end of the initial contract period. As part of this extension the DFT will review how many user accounts are required and a review of data metrics required. The costs submitted as part of Schedule 5 Pricing Schedule must include a price breakdown per user account. This price per user account will be used to change the cost of the service if the number of user accounts change. If the DfT requests additional user accounts within any contract extension, there will be an expectation for a discounted rate on the submitted price per user account

6. Specifying goods and / or services

The two deliverables must fulfil the following criteria:

	WP 1: Platform	WP 2: World Fleet dataset
Access	5 user accounts	At least one download each quarter

Coverage	Worldwide	Worldwide, 100% coverage of merchant vessels over 100GT. Please specify coverage.
Time coverage	Back series starting January 2019 for the variables defined in annex B	Snapshot of world fleet as at day of download once a quarter.
Restrictions	The data service must provide the user accounts the unrestricted ability to download the data or any derived analysis of the data on the platform in a machine-readable format (e.g. Excel file). The online tool must also provide the ability to flexibly query parameters and save reports for later use.	
Format	<p>The data provided should use standardised coding where applicable, such as IMO numbers and country codes.</p> <p>Data must be available through a 'tidy data' format. In tidy data:</p> <ul style="list-style-type: none"> ○ Each variable forms a column. ○ Each observation forms a row. ○ Each type of observational unit forms a table. <p>The data provided should be at individual ship level and include the fields set out in Annex B.</p>	<p>The data provided should use standardised coding where applicable, such as IMO numbers and country codes.</p> <p>Data must be available through a 'tidy data' format. 8. Quality Assurance Requirements

The supplier will ensure data is accessible through the entire subscription period and ensure it is of a suitable standard to produce statistical analysis.

Sub-contracting to Small and Medium Enterprises (SMEs)

DfT is committed to removing barriers to SME participation in its contracts, and would like to also actively encourage its larger suppliers to make their sub-contacts accessible to smaller companies and implement SME-friendly policies in their supply-chains (see our [website](#) for further information).

To help us measure the volume of business we do with SMEs, our Form of Tender document asks about the size of your own organisation and those in your supply chain.

If you tell us you are likely to sub-contract to SMEs, and are awarded this contract, we will send you a short questionnaire asking for further information. This data will help

us contribute towards Government targets on the use of SMEs. We may also publish success stories and examples of good practice on our website.

Not applicable.

12. Data Protection

The supplier will be required to comply with all applicable requirements of the Data Protection Legislation (including the General Data Protection Regulation ((EU) 2016/679) ("GDPR"), the Law Enforcement Directive (Directive (EU) 2016/680), and all applicable Law about the processing of personal data and privacy).

16. Evaluation Criteria

All suppliers must respond to all of the quality factor questions within Schedule 6 Bidder Response.
