

The Coal
Authority

This notice is not a call for competition - The Coal Authority intends to issue the call for competition on or after 28 January 2019

The Coal Authority was established by Parliament to undertake specific statutory duties, set out in the Coal Industry Act 1994, associated with licensing coal mining operations; managing property and the historic legacy arising from the ownership of the coal reserves and underground workings; settling subsidence damage claims not falling on coal mine operators and providing access to coal mining information.

Deliverables from this requirement will be to construct a semi-working platform around the lift shaft at our site at Rookhope and the removal of the in-situ lift car and any unsafe components from the headworks.

The platform will be required to enable the erecting and operating of equipment to support a pump and lines (pump test not included in this contract).

The location of this site is as follows

DL13 2DG- known as Rookhope.

A design package will be provided detailing the works required to gain safe access to the shaft under the retained headworks, including any required ground and structure stabilisation works

Please note that any future procurement will be subject to a separate advertisement

We would like to invite enquiries from interested parties so as to enable them to better understand our requirements.

OFFICIAL – SENSITIVE: COMMERCIAL
