List of Applicable Standards for Site and all Building Typologies

Revision P04

List of Applicable Estates Directorate Technical Standards Guidance, Standards & Specifications and Department of Health and Social Care Health Building Notes & Health Technical Memoranda

List below are to be read in conjunction with all relevant British standards and guidance documents. Design to be compliant with the Estates Directorate Technical Standards Index Revision 32, dated 26th April 2019 (Viewpoint Short Code #2E6N9C) issued prior to signing of the Professional Services Contract (PSC), unless where superseded by the Schedule of Derogations.

Searching for documents on Viewpoint

This index previously included hyperlinks against each entry that would take the user directly to that document on Viewpoint. We have recently (end of 2018) found that due to Viewpoint migrating to a different `server' service provider those old links no longer work and new links cannot be created. Instead we are replacing the links with `Short-codes'. To use those you will need to log into Viewpoint and copy & paste the `short-code' into the search box in Viewpoint. Note that all of the documents listed within this index will be found in sub-containers within `Estates Directorate Core/07.Standards & Protocols/All Standards'.

P01 - Original Issue to reflect updates to Standards Document Index Rev.40 issued 10th July 2020 (Short code #2I1JEO). Changes highlighted in blue.

Changes being processed by MoJ in yellow. Changes made recently by MoJ in green.

P02 - Issued to reflect updates to Standards Document Index Rev.41 issued 14th August 2020 (Short code #1AGVOA). Changes highlighted in blue. Changes being processed by MoJ in yellow. Changes made recently by MoJ in green.

P03 - Issued to reflect updates to Standards Document Index Rev.42 issued 17th August 2020 (Short code #1AGVOA). Changes highlighted in blue. Changes being processed by MoJ in yellow. Changes made recently by MoJ in green.

P04 - 22.09.20 Item added to Other non-TS docs - Advice for Building Owners of Multi-storey, Multi-occupied Residential Buildings

Notes: All documents shown in *Grey* italic text have yet to be moved from their current location within '7.Standards & Protocols' or have not yet been uploaded. Documents shown in *Dark Blue* italics are available in 'All Standards' but currently have further work-in-hand to update or replace them. Documents in *Red* text are no longer published, but can be retrieved from archive if there is some relevant historical contractual issue - in which case please contact Estates Directorate Technical Standards.

Numbering System

All documents published by Estates Directorate Technical Standards (other than forms) start with STD/
The second section denotes the discipline:

- A = Architectural
- X = Civil or Structural
- E = Electrical
- M = Mechanical
- Z = multi-discipline
- PM = Project Management

The third section denotes the type of document:

- SPEC = Technical Specification
- DG = Design Guide
- MP = Management Procedure
- PT = Product Testing specification

The fourth and last section is a unique number. None of these numbers should be repeated or re-used on different documents

Note that the BIM (Building Information Modelling) suite of documents shown in the next workbook (tab) follow a slightly different numbering convention. 'Forms' and product listings shown in the following workbooks (tabs) do not follow the numbering convention.
