1 Overview

The contract objective is to produce and assemble the required information for the ALN Waterways Navigation 2021/22 programme of work and future programmed work.

This will include site visits, specialist supplier liaison, Contractor liaison, planning and programming advice, and assistance in identifying project and Contract risks for the works. This commission shall culminate in production of scope for the ALN Waterways Navigation 2021/22 programme having benefited from ESE input to aid the Environment Agency Central Estimating Team (CET) to provide a robust estimate.

1.1 Outputs and deliverables

The *Consultant* shall work with the *Client* to deliver Early Supplier Engagement (ESE) input to aid the completion of the 2021/22 programme of work.

The *Consultant* shall review all relevant Scope information, familiarise themselves with the Sites and any constraints. Input to individual projects, supporting EA technical lead, in providing a Information Delivery Plan, Pre-construction information (PCI) and Complete construction check list. Provide advice to "Buildability" of Design Options with final recommendations.

The *Consultant* shall update the programme and work with the *Client* to develop new ways of delivering the maintenance programme.

This contract will be the pre-cursor to the main NEC4 ECC Option C Build Contract of the scheme.

The *Consultant* shall provide advice and guidance on Safety, Health, Environment and Welfare information to the *Client* and design Consultant throughout the duration of the design process.

1.2 Consultant project management

The Consultant shall:

- Provide the following team structure:
 - ESE lead;
 - Detail of clear lines of authority, communication and escalation processes.
- Attend and input to ad-hoc meetings;
- Shall acknowledge that Project Board meetings will take place as required and organised by the *Client*. The *Consultant* shall provide a project progress update at Project Board meetings as required.
- Produce all required Client periodic (monthly /quarterly) project reporting in line with timescales in table 1. This is to include finances, progress, updated programme (with actual and forecast progress);
- Provide input to update the risks, assumptions, issues & dependencies register during monthly progress meetings and determine the appropriate action required to resolve.
- Provide input to the project risk management process including attending risk workshops as required.

Table of timescales for outputs:

Required notice or response period	Activity / Output
1st Friday or nearest working day of the month	Expenditure forecast (Contract commencement to 31Jul21)
1st Friday or nearest working day of the month	Programme (Contract commencement to 31Jul21)

2 In managing the *services*, the *Consultant* shall consider:

3 Services required

3.1 Buildability and SHEW

The Consultant shall:

- Ensure that the following documents are comprehensive and provide the best information available at this stage, inputting as required, to include suitable assurance for each of the following documents where applicable:
 - o Scope review and input of individual projects, supporting EA technical lead
 - o Information Delivery Plan lead appropriate section
 - o Pre-construction information (PCI)
 - o Complete construction check list.
- Ensure any proposed project solutions shall have appropriately considered the impact on known and unknown services. The *Consultant* shall provide input to and ensure feasibility to Site Investigation scoping including proposals for service location identification to PAS 128, UXO surveys or Asbestos demolition / refurbishment surveys as required where required.
- Champion Safety, Health, Environment and Wellbeing, wider sustainability matters and challenge assumptions where applicable.

3.2 Affordability and risk management

The Consultant shall:

- Identify and provide mitigation for opportunities and risks, the measures required to mitigate, quantification and the allocation of residual risk to the party best placed to manage the residual impacts as part of the integrated project risk register.
- Support in the identification of project efficiencies through active contribution to the Efficiency Target and the Efficiency Register.

3.3 Programme

The Consultant shall:

- Develop, maintain and report monthly upon ESE activities.
- Provide a monthly forecast and expenditure profile for ESE activities.

3.4 Contract documentation

The Consultant shall:

 Review the adequacy and clarity of all documents required for any contracts covering either construction or intrusive investigation works.

3.5 Site and service investigation

The Consultant shall:

 Review the relevant information provided and procure, supervise all site and services investigation deemed necessary. Any GI or other intrusive activities required will be subject to a separate ECC contract.

3.6 Construction scope of works

The Consultant shall:

- Review and help develop scopes that the EA team have for this year's programme
- Review draft Site Information. If gaps are identified, assessment made as to whether there is value in closing the gaps;
- Provide advice to "Buildability" of Design Options and final recommendations.
- Help with development of PCI and identify any missing items.
- Complete construction checklist.
- Assist Consultant where input is required on surveys and findings from surveys

4 Requirements of the programme

4.1 Programme

- The Consultant shall provide a project plan in Microsoft project format version that is compatible with the Client's software;
- Include appropriate project scope review and consultation periods for draft scopes and other relevant outputs;
- The following consultation periods should be incorporated into the programme, with adequate allowance for review and revision of documents by the project team where appropriate:
 - Client approvals as required working in watercourse approvals and all other approvals required to complete the works;
 - Submission for acceptance and time allowance for the *Client's* acceptance process.

4.2 Completion

The following are absolute requirement for completion to be certified:

- All scopes to have been reviewed for this year's programme
- PCI missing items listed identified to make complete
- Complete construction check list
- Evidence of input into "Buildability" of Design Consultant's Options and final recommendations.
- Evidence of potential efficiencies for the programme.

5 Services and other things provided by the Client

5.1 Data and information management and intellectual property rights

 All of the data listed as being supplied to the Consultant as part of this contract remains the Intellectual Property of the Client.

5.2 Data custodianship

 The data custodian for project deliverables from this commission will be ASITE WWAN000XXX-AREA-ANGLIAN WW or its successor.

5.3 Data security

 Further details regarding security measures will be discussed at the start-up meeting for this commission.

5.4 Client's Advisors

 The Client has a number of advisory departments. Instructions will only be deemed enacted from them when they are confirmed by an Instruction from the Client (Service Manager). These departments include Area, NEAS, etc.

5.5 Client Documents the Consultant contributes to;

- The Client maintains several project documents, the Consultant is required to contribute to these Client owned documents;
 - o Project Risk Register
 - o Project Efficiency register
