

Grantchester Recreation Ground - Refurbishment Phase 2

Specification of work

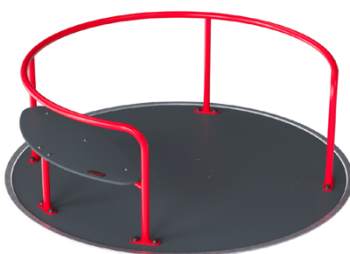

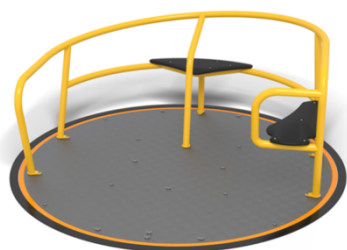

Following the Phase 1 significant upgrade to the Multiplay unit on the mound and the Tower unit, the Phase 2 specification is as follows:

Play & Exercise Equipment

- Two adjacent mini trampolines (see images below for examples), to be potentially located where the current 'B' frame is. The 'B' frame might be removed to create the space.

- Replace the existing roundabout with one which meets modern safety standards, and which offers disabled access, see images below for examples.

- Next to the new roundabout, install a small creative play area suitable for age 3 years and above to consist of a 'springy', a static boat, and a slide/playhouse combination or slide/small tower with creative play value. The slide incorporated should be accessible by steps.
- Install one double pull up exercise bar and one overhead ladder (see images below for an example of each) which would not need to be located the mandatory 25 metres from the children's play equipment and could be used for simple pull-up type exercise by teenagers and adults with children.

- Sort out problems with the Zipwire, including inability to check and maintain the zip wire trolley, possibly by replacing the both the wire and trolley – but subject to discussion.
- Replace the worn bushes where needed on the Wicksteed swings
- Replace the baby cradle seats (2 off)
- Clean, and check and replace, if necessary, any worn parts on the 'rope nest' swing
- Repaint all swings.
- Repaint the existing parallel bars
- Repaint the existing see-saw.
- Lay either 'wet-pour' or rubber mulch safety surfacing under all equipment, including play equipment not replaced.
- Clean (and repaint if necessary) the existing yellow ball-shoot.

Seating and tables

- Supply three circular/hexagonal picnic tables with at least two of these offering easy/disabled access and all with back rests. See image for example of disabled version with two double seats and two single seats (standard version to consist of four double seats).
- Recommend and install surfacing under the picnic tables to replace the existing grass, and to provide areas which therefore do not need the grass cutting.
- Supply one additional three-person bench seat (to be located near to the younger children's play equipment)
- Repair and repaint the existing bench seat.
