## A1 NB Txford to Apleyhead Pavement Pre-Construction Information

|   | Yes | No |
|---|-----|----|
| Is the Scheme notifiable under the CDM Regulations 2015?  |     | ✓  |
| 1. Last longer than 30 working days and have more than 20 workers simultaneously at any point in the project; |     | ~  |
| 2. Exceed 500 person days   |     | ~  |

 Project type as categorised by GG104 (if applicable to contract / delete in not required)
 A

 \* If applicable GG104 will determine the Kier Highways minimum Scheme Principal Designer (Scheme PD) level.
 Refer to SHEMS-FOR-HIG-S-055 for GG104 type categorisation and minimum Scheme PD level.

 Type A projects the Design Team Lead, Type B projects the Senior Manager, Type C projects the Service Director.
 A

This document has been produced in accordance with the recommendations and requirements of the Construction (Design and Management) Regulations 2015.

#### Materials and Substances with Health and/or Safety Hazards

#### Asbestos

If Asbestos Containing Materials are found during construction, all works shall stop immediately and the area is to be isolated from the workforce. The Contractor must inform the Principal Contractor, who will then implement the necessary emergency response procedures in line with the Company policy.

Under no circumstances will the Contractor attempt to remove any Asbestos Containing Materials without prior consent from the overseeing organisation.

#### Lead

Scope of Works are unlikely to encounter lead.

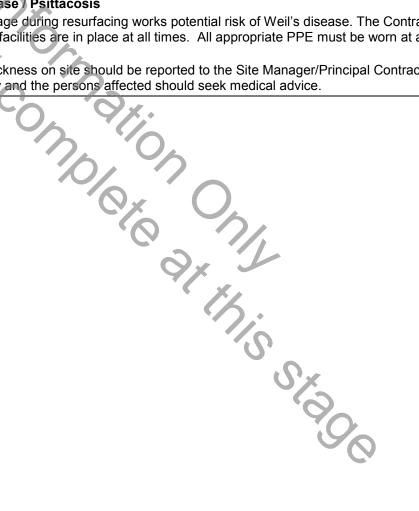

#### Tar based pavement/surfacing

Risk of Tar in lower pavement layers. Tar is unlikely to be encountered in surface course. Previously identified Tar has been identified and locations to be clearly marked on the schemes schedules/plans.

#### Leptospirosis/Weil's disease / Psittacosis

Contact with highway drainage during resurfacing works potential risk of Weil's disease. The Contractor is to ensure sufficient welfare facilities are in place at all times. All appropriate PPE must be worn at all times.

Any instances of illness / sickness on site should be reported to the Site Manager/Principal Contractor Representative immediately and the persons affected should seek medical advice.

#### 5. Health and Safety file requirements

All information will be produced in an electronic format. The format of the electronic data issued is to be as follows: All documents and product data sheets are to be in PDF format, drawings are to be in PDF and AutoCAD DWG format.

The Principal Contractor shall collate all appropriate information as it becomes available, and this shall subsequently be collated in the File. The Principal Contractor is to implement an early procedure that advises contractors and materials suppliers of the detailed requirements for this record information. The health and safety file will be created and/or updated in accordance with the requirements of the IAN105/08. to information only this stage
