- 11.1.1 in the case of any delay of which the Agency is not the cause, may grant the Contractor such extension of time as in his opinion is reasonable, having regard without limitation to any other delays or extensions of time that may have occurred or been granted under the Contract. The Contract Price shall not increase as a result of such an extension of time.
 - 11.1.2 in the case of any delay of which the Agency is the cause, shall grant the Contractor a reasonable extension of time to take account of the delay.
- 11.2 No extension of time shall be granted where in the opinion of the Agency the Contractor has failed to use all reasonable endeavours to avoid or reduce the cause and/or effects of the delay.

14.1 Without prejudice to any other rights or remedies under the Contract, the Agency reserves the right to determine the Contract at any time by giving not less than one month's Notice (or such shorter time period as may be appropriate).

14.2 The Agency shall pay the Contractor such amounts as may be necessary to cover its reasonable costs and outstanding and unavoidable commitments necessarily and solely incurred in properly performing the Contract prior to determination.

14.3 The Agency will not pay for any costs or commitments that the Contractor is able to mitigate and shall only pay those costs that the Agency has validated to its satisfaction. The Agency's total liability under this Condition shall not in any circumstances exceed the Contract Price that would have been payable for the Services under the Contract if the Contract had not been determined.

15.3 If any third party makes a claim, or notifies an intention to make a claim, against the Agency which may reasonably be considered likely to give rise to a liability under this indemnity (a **Claim**), the Agency shall:

(a) as soon as reasonably practicable, give written notice of the Claim to the Contractor,

- specifying the nature of the Claim in reasonable detail;
- (b) not make any admission of liability, agreement or compromise in relation to the Claim without the prior written consent of Contractor (such consent not to be unreasonably conditioned, withheld or delayed), provided that the Agency may settle the Claim (after giving prior written notice of the terms of settlement (to the extent legally possible) to the Contractor, but without obtaining the Contractor's consent) if the Agency reasonably believes that failure to settle the Claim would be prejudicial to it in any material respect; and
 - (c) give the Contractor access at reasonable times (on reasonable prior notice) to its premises and its officers, directors, employees, agents, representatives or advisers, and to any relevant assets, accounts, documents and records within the power or control of the Agency, so as to enable the Contractor and its professional advisers in strict confidence to examine them and to take copies (at the Contractor's expense) for the purpose of assessing the Claim.

Schedule B – Form of Confirmation of Instructions

A completed Form will be issued at Call off Stage

Schedule C – Health & Safety

Suppliers shall be responsible for making sure all required health and safety aspects including risk assessments are undertaken and required management measures are in place to protect worker exposure. This includes management of all employees, consortium members and supply partners

Schedule D – Sustainability**As detailed in the ITT:**

The Environment Agency is reducing its environmental impact both in its direct operations and through its supply chain in the goods, works and services that others provide on its behalf. e:Mission is our sustainability plan to 2020. It states our commitment to this, our culture, aims and objectives. It supports our work to create better places for people and wildlife.

We also have an environmental management system that is certified to ISO14001:2015 standards and take a lifecycle approach to the identification, assessment, management and reduction of our environmental impacts and realise the opportunities to improve and enhance the environment.

We recognise that our Suppliers play a vital role in helping us achieve our e:Mission outcomes. Therefore the Suppliers on this framework will understand and help us to achieve them in every aspect of work delivered under it.

Specifically the Suppliers will;

- Take a lifecycle approach to the identification, assessment and management of environmental risks associated with the work;
- Manage and reduce these risks over the lifecycle of the work to ensure these are effectively reduced and not passed along to another lifecycle stage. This includes impacts that may occur outside of your direct operations to those that may exist with other suppliers, or supply partners or at a different lifecycle stage for example, embodied carbon or waste disposal at end of life.
- Identify, assess and realise opportunities to protect and enhance the environment;
- Apply environmental best practice in the planning, delivery and outputs of this work;
- Maintain training and competence to deliver the required environmental approach and achieve the best outcome for the environment over the lifecycle;
- Implement low carbon design principles;
- Remain legally compliant with all relevant environmental legislation, this includes any amendments to existing legislation or any new relevant legislation that may come into force;
- Promote and communicate to us on environmental best practice.

The Supplier will be asked to provide evidence of how it has put into practice these requirements and achieved benefits to the environment as part of the framework management process.

The Supplier must have a robust process for choosing and monitoring the performance of supply partners and any testing and analysis facilities who will be used to deliver work under this framework. This process must include their approach to environmental management. The Supplier will ensure that any supply partners and testing and analysis facilities are made aware of and are compliant with our sustainability requirements. They must be trained and competent to deliver them. They must also always operate in compliance with environmental legislation at all times. They must achieve and abide by the same requirements. The Supplier will be responsible for ensuring on going monitoring and compliance with our requirements amongst its supply partners and testing and analysis facilities.

Any breaches of legislation that occur either by the Supplier, supply partners or any testing or analysis facility must be reported to the Environment Agency Framework Manager within 10 working days of the breach occurring.

The Supplier may be asked to provide environmental performance data to the Agency to help track our progress against our commitment to reduce the environmental impact of our

supply chain.

Implicit in the above is the consideration of the sustainable choice of materials, sustainable use in terms of volumes required and end of life disposal in line with the waste hierarchy. In support of Defra's 25 Environmental Plan and the Environment Agency's commitment to reduce single use plastics, the Supplier must achieve this in the work carried out under this framework. The hierarchy for this is as follows; elimination of its use; reduction in its use; ability to recycle it at end of life. The high volume of single use plastic that can only be landfilled should be avoided. This is to be achieved whilst ensuring the quality standards of sample collection and analysis is maintained.
