9 RIGHTS AND PROTECTION

9.1 The Supplier warrants and represents that:

- 9.1.1 it has full capacity and authority to enter into and to perform the Contract;
- 9.1.2 the Contract is entered into by its authorised representative;
- 9.1.3 it is a legally valid and existing organisation incorporated in the place it was formed;
- 9.1.4 there are no known legal or regulatory actions or investigations before any court, administrative body or arbitration tribunal pending or threatened against it or its affiliates that might affect its ability to perform the Contract;
- 9.1.5 all necessary rights, authorisations, licences and consents (including in relation to IPRs) are in place to enable the Supplier to perform its obligations under the Contract and the Buyer to receive the Deliverables;
- 9.1.6 it doesn't have any contractual obligations which are likely to have a material adverse effect on its ability to perform the Contract; and
- 9.1.7 it is not impacted by an Insolvency Event.

9.2 The warranties and representations in clause 3.3 and clause 9.1 are repeated each time the Supplier provides Deliverables under the Contract.

10.1 Each Party keeps ownership of its own Existing IPRs. The Supplier gives the Buyer a non-exclusive, perpetual, royalty-free, irrevocable, transferable, sub-licensable worldwide licence to use, copy and adapt the Supplier's Existing IPR to enable the Buyer and its sub-licensees to both:

[Subject to Contract]

10.1.2 use the New IPR.

The termination or expiry of the Contract does not terminate any licence granted under this clause 10.

- 10.2 Any New IPR created under the Contract is owned by the Buyer. The Buyer gives the Supplier a royalty-free, non-exclusive, non-transferable licence to use, copy, and adapt any Existing IPRs and the New IPR which the Supplier reasonably requires for the purpose of fulfilling its obligations during the Term and commercially exploiting the New IPR developed under the Contract. This licence is sub-licensable to a Subcontractor for the purpose of enabling the Supplier to fulfil its obligations under the Contract, and in that case the Subcontractor must enter into a confidentiality undertaking with the Supplier on the same terms as set out in clause 15 (What you must keep confidential).
- 10.3 Unless otherwise agreed in writing, the Supplier and the Buyer will record any New IPR and keep this record updated throughout the Term.
- 10.4 Where a Party acquires ownership of intellectual property rights incorrectly under this Contract, it must do everything reasonably necessary to complete a transfer assigning them in writing to the other Party on request and at its own cost.
- 10.5 Neither Party has the right to use the other Party's intellectual property rights, including any use of the other Party's names, logos or trademarks, except as provided in this clause 10 or otherwise agreed in writing.
- 10.6 If any claim is made against the Buyer for actual or alleged infringement of a third party's intellectual property arising out of, or in connection with, the supply or use of the Deliverables (an "**IPR Claim**"), then the Supplier indemnifies the Buyer against all losses, damages, costs or expenses (including professional fees and fines) incurred as a result of the IPR Claim.
- 10.7 If an IPR Claim is made or anticipated, the Supplier must at its own option and expense, either:
- 10.7.1 obtain for the Buyer the rights in clause 10.1 without infringing any third party intellectual property rights; and
 - 10.7.2 replace or modify the relevant item with substitutes that don't infringe intellectual property rights without adversely affecting the functionality or performance of the Deliverables.
 - 10.7.3 If the Supplier is not able to resolve the IPR Claim to the Buyer's reasonable satisfaction within a reasonable time, the Buyer may give written notice that it terminates the Contract from the date set out in the notice, or where no date is given in the notice, the date of the notice. On termination, the consequences of termination in clauses 11.5.1 shall apply.
- 10.8 The Supplier shall not use in the Delivery of the Deliverables any Third Party IPR unless:
- 10.8.1 the Buyer gives its approval to do so; and
 - 10.8.2 one of the following conditions applies:
 - 10.8.2.1 the owner or an authorised licensor of the relevant Third Party IPR has granted the Buyer a direct licence that provides the Buyer with the rights in clause 10.1; or

[Subject to Contract]

- 10.8.2.2 if the Supplier cannot, after commercially reasonable endeavours, obtain for the Buyer a direct licence to the Third Party IPR as set out in clause 10.8.2.1:
- (a) the Supplier provides the Buyer with details of the licence terms it can obtain and the identity of those licensors;
 - (b) the Buyer agrees to those licence terms; and
 - (c) the owner or authorised licensor of the Third Party IPR grants a direct licence to the Buyer on those terms; or
- 10.8.2.3 the Buyer approves in writing, with reference to the acts authorised and the specific intellectual property rights involved.

10.9 In spite of any other provisions of the Contract and for the avoidance of doubt, award of this Contract by the Buyer and the ordering of any Deliverable under it, does not constitute an authorisation by the Crown under Sections 55 and 56 of the Patents Act 1977, Section 12 of the Registered Designs Act 1949 or Sections 240 – 243 of the Copyright, Designs and Patents Act 1988.

11 ENDING THE CONTRACT

11.1 The Contract takes effect on the Start Date and ends on the earlier of the Expiry Date or termination of the Contract, or earlier if required by Law.

11.3 Ending the Contract without a reason

Schedule 2
SPECIFICATION

Specification Reference
FS900554
Specification Title
Safety of Nitrates and Nitrites as Food Additives
Contract Duration
3 months

This specification, which forms part of the Invitation to Tender (ITT), comprises of three individual sections:

- A. **SPECIFICATION:** An outline of the requirement
- B. **PROCUREMENT TIMETABLE:** An estimated timetable for the procurement of the proposed requirement
- C. **TENDER REQUIREMENTS AND EVALUATION CRITERIA:** Provides guidance to applicants on the information that should be included within tenders and on the evaluation criteria and weightings used by appraisers when assessing and scoring tenders

Tenders for FSA funded projects must be submitted through the health-family single e-Commercial System (Atamis), using the following link: <https://health-family.force.com/s/Welcome>. Failure to do so may result in the tender response not being processed by the system or the response being automatically disqualified during the evaluation stage of the tender process.

Schedule 2**SPECIFICATION**

**THE SPECIFICATION, INCLUDING PROJECT TIMETABLE
AND EVALUATION OF TENDERS****GENERAL INTRODUCTION**

The Food Standards Agency is an independent Government department working across England, Wales and Northern Ireland to protect public health and consumers wider interest in food. We make sure food is safe and what it says it is.

The Agency is committed to openness, transparency and equality of treatment to all suppliers. As well as these principles, for science projects the final project report will be published on the Food Standards Agency website (www.food.gov.uk). For science projects we will encourage contractors to publish their work in peer reviewed scientific publications wherever possible. Also, in line with the Government's Transparency Agenda which aims to encourage more open access to data held by government, the Agency is developing a policy on the release of underpinning data from all of its science- and evidence-gathering projects. Data should be made freely available in an accessible format, as fully and as promptly as possible. Consideration should be given to data management as new contracts are being negotiated. Resource implications for this should be taken into account. The mechanism for publishing underpinning data should allow the widest opportunity for to enable its re-use. Where possible, underpinning data should be included in the final project report. Where data are included in the final report in pdf format, they should also be published separately in a format that can be used for further analysis. Large data sets can be provided separately in an annex to the report, and published, where possible, alongside the final report online. Where it is more appropriate to publish underpinning data in an existing database, archive, repository or other community resource, or for data to be saved in a specialist proprietary format, information will be provided on how the data can be accessed. There will be some circumstances where release of data may need to be restricted or anonymised for reasons of commercial and/or personal sensitivities.

Schedule 2

SPECIFICATION

This literature review being tendered links into the FSA Strategy 2022 – 2027. This strategy states that the FSA's fundamental mission is food you can trust. The FSA will continue to protect consumers by ensuring that food is safe and is what it says it is. This proposed piece of work is part of a wider programme of work and will sit in the Chemical Hazards in Food and Feed research programme. This is one of the FSA's [Areas of research interest | Food Standards Agency](#) (ARI) and sits under 'Research priority one: Assuring food and feed safety and standards – What is the impact of chemical hazards (including nanomaterials and microplastics) in food and how can we reduce it?'. The main aim of the Chemical Hazards in Food and Feed research programme is to support and improve the FSA's evidence base to keep the consumer safe and ensure that food is what it says it is. Research under this ARI, including surveys and other research projects, will provide FSA scientists and policymakers with current and reliable information on chemicals in food and feed.

Nitrates and nitrites are commonly used as food additives (potassium nitrite E 249, sodium nitrite E 250, sodium nitrate E 251 and potassium nitrate E 252) to inhibit microbial growth and to improve organoleptic properties such as colour and flavour. Their safety was re-evaluated by the European Food Safety Authority (EFSA) in 2017. However, nitrates and nitrites presence in food can give rise to the formation of N-nitrosamines, some of which are carcinogenic. This led to a significant reduction of the ions' maximum permitted levels by the EU in October 2023. The new levels come into effect on 9th October 2025. On the other hand, recent research proposes the beneficial effects of nitrates and nitrites, particularly regarding cardiovascular health. The objective of this work is to collate the most up-to-date scientific evidence and data since the EFSA opinion in 2017 on the safety of nitrates and nitrites as the four food additives.

Once a literature review has been completed, the FSA and a scientific advisory committee (SAC), the Committee on Toxicology of Chemicals in Food, Consumer Products and the Environment (COT), will evaluate the data gathered and use it to inform future risk assessments and risk management and wider regulatory policy decisions and guidance.

Schedule 2**SPECIFICATION****A. THE SPECIFICATION****Background**

Potassium nitrite (E 249), sodium nitrite (E 250), sodium nitrate (E 251) and potassium nitrate (E 252) are salts commonly used as food additives to inhibit growth of foodborne pathogens in meat, fish and cheese products, and to maintain their characteristic aesthetic properties such as colour and flavour. Current maximum permitted levels of nitrates and nitrites as food additives permitted in GB are detailed in Annex II of assimilated legislation 1333/2008. Nitrate levels range from 10 to 500 mg/kg in 24 food categories and nitrite levels 50 to 180 mg/kg in 18 food categories, respectively. The safety of the additives themselves was last evaluated by EFSA in 2017.

Nitrates are reduced to nitrites in the oral cavity by anaerobic bacteria, as part of the entero-salivary circulation. Nitrites can then be converted to reactive-nitrogen species like N-nitroso compounds, including N-nitrosamines, by reacting with secondary amines and amides in acidic environments (e.g. the stomach) or at high temperatures (e.g. during cooking). Some of these N-nitrosamines are known potent carcinogens.

A recent risk assessment on N-nitrosamines in food published by EFSA in March 2023 concluded that the Margin of Exposure for carcinogenic N-nitrosamines occurring in food is highly likely to be less than 10,000 at the high exposure for all age groups, which may indicate a health concern, and that 'meat and meat products' is the main food category contributing to the exposure. Consequently, the EU has reduced the maximum permitted levels of nitrates and nitrites that can be added to certain foods to potentially lower the level of nitrosamines while still ensuring microbiological safety. New legislation will become effective in 2025 and it will signify a divergence between EU and GB. Moreover, due to the Windsor Framework, food products from NI/EU will be placed in the market alongside GB products with significantly different maximum permitted levels of nitrates and nitrites.

Schedule 2

SPECIFICATION

There are currently a number of knowledge gaps relating to the safety of nitrates and nitrites as food additives. Government agencies have highlighted the need to fully characterise the ADME for these ions and N-nitrosamines relevant to human exposure, the potential link between nitrates and nitrites intake and cancer, and the effect of the microbiome on nitrates and nitrites metabolism, among others.

The Specification

Tenders are invited to carry out a literature review on the safety of nitrates and nitrites as the food additives potassium nitrite (E 249), sodium nitrite (E 250), sodium nitrate (E 251) and potassium nitrate (E 252).

The specification must:

We would like to commission a review of the most up-to-date scientific literature of the four currently authorised nitrates and nitrites food additives and their safety to the consumer. In particular, it is important to understand the ADME and toxicological profile of these compounds and their metabolites and the level of their occurrence in all applicable food categories. This information will help to update our knowledge of these food additives and to inform future risk assessments and risk management and wider regulatory policy decisions and guidance. Ultimately, this information will contribute to the FSA's own mission to ensure food is safe for UK consumers.

Proposals submitted must include a comprehensive review of the following key elements:

- A summary of previous evaluations and current legislation regarding nitrates and nitrites as food additives across international government bodies.
- ADME relevant to human exposure of nitrates and nitrites as food additives and their metabolites, focusing on the conversion from nitrate to nitrite to methaemoglobin and N-nitroso compounds, including N-nitrosamines. It would be prudent to also consider the effect of an individual's microbiome on nitrates and nitrites ADME.

Schedule 2

SPECIFICATION

- Toxicological profile of nitrates and nitrites as food additives for all endpoints and mechanisms of action, especially the potential link between nitrates and nitrites intake from food sources and the development of cancer.
- Effects of different types of cooking and processing on the conversion from nitrates and nitrites to N-nitroso compounds in food, including N-nitrosamines.
- Occurrence data for nitrates and nitrites in all currently authorised food categories. It would be prudent to also consider reports of any of the four additives in unauthorised food commodities.
- Alternative food additives possessing nitrates and nitrites multifunctionality but presenting less risks.
- An expert assessment of the scientific needs and uncertainties still present. The focus here should document limitations of the evidence considered and the current knowledge gaps that need to be addressed.

The following should **not** be included as part of this literature review:

- Naturally occurring nitrates and nitrites from food sources such as vegetables or water sources.
- Studies evaluating the effects of preformed N-nitrosamines.

We anticipate this project starting on 20th December 2024 with the final report being submitted to the FSA on 20th March 2025.

- The review should consider literature up to as recent as the contract start date. However, some flexibility may be required to potentially extend the search end date to allow for the review to be as up to date as possible particularly if delivery or publication of the final report is delayed for any reason.
- A clear and organised strategy to the literature review process is expected. Applicants should discuss how they intend to define the scope of the review and indicate how search method and terms, databases selection, and inclusion-exclusion criteria will be chosen to ensure an unbiased search.

Schedule 2**SPECIFICATION**

- It is advisable to carry out a basic search of the existing literature to understand the quantity and sources of information available. It would be useful to provide estimates as to the number of papers and include this within the proposal. Applicants should also consider how grey literature and other sources of information will be identified and collected as part of the review.
- A key component of the work will require expertise in terms of interpreting the findings of the review and discussing the methodology of the studies considered (i.e. compliance with international guidelines, presence of confounding factors and uncertainties, etc.). Therefore, the applicant(s), either individually or collectively, should have demonstrable expertise in carrying out critical/systematic literature reviews of relevant scientific literature to standard guidelines (e.g., PRISMA).
- Whilst expertise in the nature of the review is not a pre-requisite for application, a key component of this work will require summarising the opinions and literature, and where available, the consensus of experts in the field. This is particularly important when weighing the risks and benefits of nitrate and nitrite consumption. Therefore, applicants should have demonstrable ability to understand expert opinion and be able to provide the basis, scientific or otherwise, upon which they formed their position.
- The FSA estimates that the cost for this work to be approximately £70,000 - 100,000 incl. VAT. The onus is on the applicant(s) to provide the costings they believe are reasonable to meet the evidence gap as outlined in the specification and provide the justification of this within their research proposal. The applicant(s) should be aware that one of the key criteria that all research proposals are evaluated against is 'value for money' which is delivering the research asked for in the research requirement (including the anticipated outputs and benefits) at a competitive price.

Schedule 2

SPECIFICATION

Outcomes

It is anticipated that the following will be delivered to the FSA as part of this work:

- A full technical report addressing the relevant areas of the literature review which is suitable for publication on the FSA/COT website. The report should include a lay summary, an executive summary, introduction (including the background and aims/objectives of the review), methodology, findings, discussions, conclusions, list of evidence gaps, recommendations for further work, references, and an appendices section. The final report will need to be structured and formatted in accordance with guidelines from the FSA [Web Content Accessibility Guidelines](#). Please note that the final report should be submitted to the FSA by **20th March 2025** and will undergo an external peer-review process before it can be accepted by the FSA. A draft report should be submitted at least 4 weeks before the final report is due to allow FSA officials sufficient time to comment.
- Successful applicants will be expected to submit regular updates, either in writing or through online meetings (they will be responsible for organising and chairing meetings). They must also meet key deliverables - including an interim report, dates of which will be agreed upon in advance. The FSA reserve the right on the basis of this report to determine if the project will continue to conclusion.
- The review should be both transparent and reproducible. A full database of all the relevant publications included in the review should be provided to the FSA. The database should be in a format suitable for publication on the FSA website e.g. in an accessible format (for example CSV or Excel). The database should adhere to the data standards in Annex 1 – Scientific Data Standards.
- Publication of findings from this study in the peer reviewed open access journals and presentations at scientific conferences are encouraged by the FSA. Such material will need to be approved by the FSA prior to being

Schedule 2**SPECIFICATION**

submitted to the journal or presented. It is important that the researcher(s) notify the FSA of the publication date for any papers arising from this study at the earliest opportunity especially if the findings are contentious and therefore likely to generate media interest.

Risk

Please outline in your tender how you will manage your resources and anticipate and mitigate potential slippage, e.g. delays or changes in time due to other work commitments alongside this commissioned work.

Please also outline in your tender how you will mitigate unforeseeable problems that may require modifications to the literature review and criteria applied.

Data protectionGeneral Data Protection Regulation (GDPR)

Tenderers should also note that the EU's General Data Protection Regulation (GDPR) was introduced in the UK from the 25th of May 2018. Tenderers are therefore asked to consider what additional measures may need to be taken in order to comply with the new regulatory regime for data protection. Tenderers are asked to include in their proposals details of the technical facilities and measures (including systems and processes) in place by contract award, to ensure compliance with the GDPR and to ensure the protection of the rights of data subjects.

In particular, the Processor (the lead contractor) must:

- ensure ongoing confidentiality, integrity, availability and resilience of processing systems and services;
- comply with the rights of data subjects in respect of receiving privacy information, and access, rectification, deletion and portability of personal data;
- process the personal data only on the documented instructions of the Controller (the FSA) and to maintain records of personal data processing activities;

Schedule 2**SPECIFICATION**

-
- comply with security obligations equivalent to those imposed on the Controller (implementing a level of security for the personal data appropriate to the risk) and to regularly test, assess and evaluate the effectiveness of the above obligations;
 - ensure that persons authorised to process the personal data have committed themselves to confidentiality or are under an appropriate statutory obligation of confidentiality;
 - ensure that any consent-based processing meets standards of active, informed consent, and that such consents are recorded and auditable;
 - only appoint Sub-processors (any sub-contractors) with the Controller's prior specific or general written authorisation, and impose the same minimum terms imposed on the Sub-processor. The original Processor will remain liable to the Controller for the Sub-processor's compliance. The Sub-processor must provide sufficient guarantees to implement appropriate technical and organisational measures to demonstrate compliance. In the case of general written authorisation, Processors must inform Controllers of intended changes in their Sub-processor arrangements. Processors must ensure legal safeguards are in place to legitimise transfers of personal data outside the EU (if such transfers will take place);
 - make available to the Controller all information necessary to demonstrate compliance with the obligations laid down in Article 28 GDPR and allow for and contribute to audits, including inspections, conducted by the Controller or another auditor mandated by the Controller - and the Processor shall immediately inform the controller if, in its opinion, an instruction infringes GDPR or other EU or member state data protection provisions;
 - assist the Controller in carrying out its obligations with regard to requests by data subjects to exercise their rights under chapter III of the GDPR, noting different rights may apply depending on the specific legal basis for the processing activity (and should be clarified by the Controller up-front);
 - assist the Controller in ensuring compliance with the obligations to implementing a level of security for the personal data appropriate to the risk,

Schedule 2**SPECIFICATION**

taking into account the nature of processing and the information available to the Processor;

- assist the Controller in ensuring compliance with the obligations to carry out Data Protection Impact Assessments, taking into account the nature of processing and the information available to the Processor; and
- notify the Controller without undue delay after becoming aware of a personal data breach.

At this moment in time, the FSA does not envisage the need to collect any personal data as part of this work.

Quality

Please outline in your tender that you (individually or collectively) have the required scientific background and toxicological knowledge to undertake the proposed work. In support of your qualification please submit the relevant CVs.

Please also outline in your tender any relevant previous experience with systematic literature reviews and collating scientific literature.

Open and transparent

FSA has values and specific policy on being open and transparent, which also applies to the COT and therefore any relevant information applied (including this literature review) in the risk assessment will be published. Both the lead contractor and their sub-contractors must agree to this openness policy. Any potential issues with this should be highlighted within the proposals.

VIII. [Annex 4 – Supplier Tender] (*Optional*)

[Annex 5 – Optional IPR Clauses]**Part A Buyer ownership with limited Supplier rights to exploit New IPR for the purposes of the current Contract****10 INTELLECTUAL PROPERTY RIGHTS (“IPRS”)**

37.2 Each Party keeps ownership of its own Existing IPRs. The Supplier gives the Buyer a non-exclusive, perpetual, royalty-free, irrevocable, transferable, sub-licensable worldwide licence to use, copy and adapt the Supplier's Existing IPR to enable the Buyer and its sub-licensees to both:

37.2.1 receive and use the Deliverables; and

37.2.2 use the New IPR.

The termination or expiry of the Contract does not terminate any licence granted under this clause 10.1.

37.3 Any New IPR created under the Contract is owned by the Buyer. The Buyer gives the Supplier a royalty-free, non-exclusive, non-transferable licence to use, copy and adapt any Existing IPRs and the New IPR for the purpose of fulfilling its obligations during the Term. This licence is sub-licensable to a Subcontractor for the purpose of enabling the Supplier to fulfil its obligations under the Contract, and in that case the Subcontractor must enter into a confidentiality undertaking with the Supplier on the same terms as set out in clause 15 (What you must keep confidential).

37.4 Unless otherwise agreed in writing, the Supplier and the Buyer will record any New IPR and keep this record updated throughout the Term.

37.5 Where a Party acquires ownership of intellectual property rights incorrectly under this Contract it must do everything reasonably necessary to complete a transfer assigning them in writing to the other Party on request and at its own cost.

37.6 Neither Party has the right to use the other Party's intellectual property rights, including any use of the other Party's names, logos or trademarks, except as provided in clause 10 or otherwise agreed in writing.

37.7 If any claim is made against the Buyer for actual or alleged infringement of a third party's intellectual property arising out of, or in connection with, the supply or use of the Deliverables (an “**IPR Claim**”), then the Supplier indemnifies the Buyer against all losses, damages, costs or expenses (including professional fees and fines) incurred as a result of the IPR Claim.

37.8 If an IPR Claim is made or anticipated the Supplier must at its own option and expense, either:

37.8.1 obtain for the Buyer the rights in clause 10.1 without infringing any third party intellectual property rights; and

37.8.2 replace or modify the relevant item with substitutes that don't infringe intellectual property rights without adversely affecting the functionality or performance of the Deliverables.

The Short Form Contract

Crown Copyright 2023

[Subject to Contract]

- 37.9 If the Supplier is not able to resolve the IPR Claim to the Buyer's reasonable satisfaction within a reasonable time, the Buyer may give written notice that it terminates the Contract from the date set out in the notice, or where no date is given in the notice, the date of the notice. On termination, the consequences of termination in clause 11.5.1 shall apply.
- 37.10 The Supplier shall not use in the Delivery of the Deliverables any Third Party IPR unless:
- 37.10.1 the Buyer gives its approval to do so; and
 - 37.10.2 one of the following conditions applies:
 - 37.10.2.1 the owner or an authorised licensor of the relevant Third Party IPR has granted the Buyer a direct licence that provides the Buyer with the rights in clause 10.1; or
 - 37.10.2.2 if the Supplier cannot, after commercially reasonable endeavours, obtain for the Buyer a direct licence to the Third Party IPR as set out in clause 10.9.2.1:
 - (a) the Supplier provides the Buyer with details of the licence terms it can obtain and the identity of those licensors;
 - (b) the Buyer agrees to those licence terms; and
 - (c) the owner or authorised licensor of the Third Party IPR grants a direct licence to the Buyer on those terms; or
 - 37.10.2.3 the Buyer approves in writing, with reference to the acts authorised and the specific intellectual property rights involved.
- 37.11 In spite of any other provisions of the Contract and for the avoidance of doubt, award of this Contract by the Buyer and the ordering of any Deliverable under it, does not constitute an authorisation by the Crown under Sections 55 and 56 of the Patents Act 1977, Section 12 of the Registered Designs Act 1949 or Sections 240 – 243 of the Copyright, Designs and Patents Act 1988.
- 37.12 Subject to clause 10.10, the Supplier agrees that the Buyer may at its sole discretion publish under Open Licence all or part of the New IPR Items and the Supplier warrants that the New IPR Items are suitable for release under Open Licence and that the publication of the New IPR Items under Open Licence will not infringe the rights of any third party and will not harm any Third Party or the Buyer.
- 37.13 The Supplier will supply any or all New IPR Items in a format suitable for publication under Open Licence ("**the Open Licence Publication Material**") within 30 days of written request from the Buyer ("**Buyer Open Licence Request**"). Where any Supplier Existing IPR is included in the Open Licence Publication Material, this will become Open Licence material.
- 37.14 The Supplier may within 15 days of a Buyer Open Licence Request under clause 10.12, request in writing that the Buyer excludes all or part of:
- 37.14.1 the New IPR; or
 - 37.14.2 Supplier Existing IPR or Third Party IPR that would otherwise be included in the Open Licence Publication Material supplied to the Buyer pursuant to clause 10.12

from Open Licence publication.

- 37.15 Any decision to approve any such request from the Supplier pursuant to clause 10.13 shall be at the Buyer's sole discretion, not to be unreasonably withheld, delayed or conditioned.
- 37.16 Subject to clause 12, the Buyer will not be liable in the event that any Supplier Existing IPR or Third Party IPR is included in the Open Licence Publication Material published by the Buyer.
