Buyer contractual details

This Order is for the G-Cloud Services outlined below. It is acknowledged by the Parties that the volume of the G-Cloud Services used by the Buyer may vary during this Call-Off Contract.

G-Cloud Lot	This Call-Off Contract is for the provision of Services Under: • Lot 2: Cloud software
G-Cloud Services required	The Services to be provided by the Supplier under the above Lot are listed in Framework Schedule 1 and outlined below: • Tricostar have specialised in Time Recording since 1988 and is the author of Timebase 247. Timebase 247 is a public-sector time recording, resource management and billing solution written in Microsoft Azure and hosted by Microsoft in its UK Data Centres. It is also available as an in-house option or externally hosted on a dedicated server (non-Azure). Timebase 247 is stand-alone time recording app, but also works as part of Tricostar Case Management. • Real-Time Time Recording Timebase provides a 'stop-watch' style time recording facility to allow users to record their time as they are working. Users can begin to record time immediately at the touch of a button, and then once they have finished their task fill in the matter and activity detail, with fully functional pause & interrupt facilities. Timebase also provides the user with a 'Recent List'. This shows the user the 10 most recent matters they have worked on and allows them to view or beginning timing against those matters at the click of a button. • Retrospective Time Recording Users may record historic time or time spent away from the office. For those users who prefer to record all their time at once, they can easily do so by filling in a timesheet entry against each of the matters they have worked on, be it chargeable, non-chargeable, an expense or income

	activity. This can be done across a range of matters, activities, and dates. • Full Client and Management Reporting Our 30+ years of time recording experience in the government legal market means that Timebase comes with a full set of predefined reports that allow all users to report on any aspect of the system, be it internal or external activities. Administrators can also create their own using the inbuilt simple to use wizard driven user interface. Should you be a user of Microsoft Power BI, we can integrate directly with the system. All reports can be exported to RTF, MS Word, PDF, or MS Excel. • A Working Shared Service, Departmental Time Recording & Security The highly granular security model allows separate departments to have their own time recording systems with “firewalls” between departmental data. This is ideal for organisations who would like to use the benefits of time recording, across multiple departments, but use only one shared service system to do so. • Multi-Client Time Recording Within the same system you can not only record an activity against a file for a client but also record time against a type of work and then link it to a client file – ideal when you are doing a lot of similar activities for many different clients. • Fixed Fee & Budget Options Timebase 247 allows you to record time against fixed fees and budgets while still being able to compare your costs. This enables for more accurate budgeting in the future. • Platforms Desktop, smartphone and mobile friendly. • Backup Restore and Disaster Recovery Disaster recovery backups of the customer materials stored on the Platform are made via a live synchronised backup on 3 clustered servers – resulting in an up to the minute
