STATEMENT OF SERVICE REQUIREMNT

Overview of Requirements

The Standards and Testing Agency (STA) is responsible for the development and delivery of national curriculum tests in English Reading, English Grammar, Punctuation and Spelling (GPS), Mathematics, and Phonics for use in schools at the end of Key Stage 1 (KS1) and Key Stage 2 (KS2). To support this work, STA engages Independent Educational Experts (IEEs) who contribute to the creation and review of test materials and mark schemes.

STA requires a new payroll and expense management system to support the accurate and timely payment of fees and reimbursements to IEEs. These individuals are not permanent employees, they are contracted on an ad hoc basis, with some using the system only once, and others submitting claims repeatedly throughout the year, depending on their role and level of involvement.

The system must be fully compliant with HMRC's Real-Time Information (RTI) requirements and align with STA's internal financial controls and processes.

The new system will be expected to:

- Process payments and expense claims efficiently and accurately.
- Ensure full compliance with relevant HMRC RTI requirements.
- Reduce administrative overhead and manual processing for claimants/STA.
- Support secure, auditable, and user-friendly workflows for both internal staff and external experts.

A reliable and effective payment mechanism is critical to maintaining STA's ability to recruit and retain the specialist expertise required for its statutory functions. This procurement seeks to identify a supplier capable of delivering a robust, scalable, and compliant solution that meets STA's operational and regulatory needs.

It is anticipated that the system will support up to 250 individual claimants per year. Claim volumes will vary throughout the year, with an estimated maximum of 25 users submitting claims in any given week. During quieter periods, weekly submissions may be as low as 3, increasing to a maximum of 25 during peak activity.

Annex A – Implementation and Mobilisation Plan

Must include completion dates Staffology HR

Provisioning of Staffology System

The customer will be contacted by the Professional Services team to complete the Provisioning questionnaire which will outline the Setup of the system. This will then be assigned to an Implementation Consultant who will create the system and provide log in details. They will also create support cloud access which will allow the customer to raise support tickets if required. Once the system is provisioned the Customer will be passed to the Project Coordinators who will book in the consultancy sessions

Webinars

The Project Coordinator team will be in contact to arrange session bookings, but will also provide links to the Getting Started and Forms Webinar

The Getting Started will provide high level details of how to get started in the system. The Forms webinar will provide a guide to the forms module.

Both of these are a recorded Webinar which can be accessed at later dates

Data Imports

This is an additional service which can be purchased. Each data template would require its own data import session to be purchased. Eg Employees and Absences would each be a data import session

Booking of Sessions

The Project Coordinator will then contact the customer to book in the consultation sessions. <u>HCMProjects@iris.co.uk</u> please email this address to book in any sessions you require after your initial setup sessions

Teams Invites

The Implementation consultant will send out Teams invites to the customer for each of the sessions at least 1 week in advance of them occurring. They will provide a course outline with each of these invites detailing what is to be covered.

Training sessions

The training sessions will be online and in a one to one capacity with the customer and the consultant. During the session they will access the customers system and share their screen to show sections and explain what is required. At other times the customer may be asked to share their screen and drive the system to show their knowledge and understanding.

Ultimate Package Training Sessions

The sessions are below. Please note that these sessions will be spread out at a pace which suits the customer and with advice from the consultant depending on the size and make up of your organisation. Where there are modules which are not needed then the time can be repurposed, or you can save them and implement the modules in phases over the course of a year

Adhoc Consultancy / Consultancy support	2 sessions
Adhoc Consultancy / Consultancy support	4 sessions
Adhoc Consultancy / Consultancy support	6 sessions
Payroll Integration	1 session

Potential Project Plan

We advise that each session has at least a week between them as there will be additional work which the customer requires to complete between sessions. This should allow enough time for that to happen.

The sessions can be replanned to suit the customer, but Setup must happen first. If a module is not required, the consultancy time can be banked for a year from the start of implementation and can be repurposed for refresher training on other modules.

Implementation Complete

Once the implementation is complete the customer will be fully handed over to our support team. Should they have any problems with their system they can log a ticket and a support consultant will contact the customer to resolve.

Training after Implementation or Changes to Account

If the customer wants to make changes to their Licence numbers or account level they can contact their account manager. If they wish to purchase additional training for after implementation, perhaps they have new employees who need training, again they should contact their Account Manager to purchase this time.

Payroll

Refer To document, we can work towards a go live date 6-8 weeks from start to finish
