F. CONTROL OF THE CONTRACT

F1 Failure to meet Requirements

F1.1 If the Authority informs the Contractor in writing that the Authority reasonably believes that any part of the Services do not meet the requirements of the Contract or differs in any way from those requirements, and this is not as a result of a default by the Authority, the Contractor shall at its own expense re-schedule and carry out the Services in accordance with the requirements of the Contract within such reasonable time as may be specified by the Authority.

F2 Monitoring of Contract Performance

F2.1 The Contractor shall immediately inform the Authority if any of the Services are not being or are unable to be performed, the reasons for non-performance, any corrective action and the date by which that action will be completed.

F2.2 At or around 6 Months from the Commencement Date and each anniversary of the Commencement Date thereafter (each being a "Review Date"), the Authority shall carry out a review of the performance of the Contractor ("Checkpoint Review"). Without prejudice to the generality of the foregoing, the Authority may in respect of the period under review consider such items as (but not limited to): the Contractor's delivery of the Services; the Contractor's contribution to innovation in the Authority; whether the Services provide the Authority with best value for money; consideration of any changes which may need to be made to the Services; a review of future requirements in relation to the Services and progress against key milestones.

F2.3 The Contractor shall provide at its own cost any assistance reasonably required by the Authority to perform such Checkpoint Review including the provision of data and information.

F2.4 The Authority may produce a report (a "Checkpoint Review Report") of the results of each Checkpoint Review stating any areas of exceptional performance and areas for improvement in the provision of the Services and where there is any shortfall in any aspect of performance reviewed as against the Authority's expectations and the Contractor's obligations under this Contract.

F2.5 The Authority shall give the Contractor a copy of the Checkpoint Review Report (if applicable). The Authority shall consider any Contractor comments and may produce a revised Checkpoint Review Report.

F2.6 The Contractor shall, within 10 Working Days of receipt of the Checkpoint Review Report (revised as appropriate) provide the Authority with a plan to address resolution of any shortcomings and implementation of improvements identified by the Checkpoint Review Report.

F2.7 Actions required to resolve shortcomings and implement improvements (either as a consequence of the Contractor's failure to meet its obligations under this Contract identified by the Checkpoint Review Report, or those which result from the Contractor's failure to meet the Authority's expectations notified to the Contractor or of which the Contractor ought reasonably to have been aware) shall be implemented at no extra charge to the Authority.

F3 Remedies for inadequate performance

F3.1 If the Authority reasonably believes the Contractor has committed a Material Breach it may, without prejudice to its rights under clause H2 (Termination on Default), do any of the following:

- (a) without terminating the Contract, itself supply or procure the supply of all or part of the Services until such time as the Contractor has demonstrated to the Authority's reasonable satisfaction that the Contractor will be able to supply the Services in accordance with the Specification;
- (b) without terminating the whole of the Contract, terminate the Contract in respect of part of the Services only (whereupon a corresponding reduction in the Price shall be made) and thereafter itself supply or procure a third party to supply such part of the Services;
- (c) withhold or reduce payments to the Contractor in such amount as the Authority reasonably deems appropriate in each particular case; and/or
- (d) terminate the Contract in accordance with clause H2.

F3.2 Without prejudice to its right under clause C3 (Recovery of Sums Due), the Authority may charge the Contractor for any costs reasonably incurred and any reasonable administration costs in respect of the supply of any part of the Services by the Authority or a third party to the extent that such costs exceed the payment which would otherwise have been payable to the Contractor for such part of the Services.

F3.3 If the Authority reasonably believes the Contractor has failed to supply all or any part of the Services in accordance with the Contract, professional or industry practice which could reasonably be expected of a competent and suitably qualified person, or any legislative or regulatory requirement, the Authority may give the Contractor notice specifying the way in which its performance falls short of the requirements of the Contract or is otherwise unsatisfactory.

F3.4 If the Contractor has been notified of a failure in accordance with clause F3.3 the Authority may:

- (a) direct the Contractor to identify and remedy the failure within such time as may be specified by the Authority and to apply all such additional resources as are necessary to remedy that failure at no additional charge to the Authority within the specified timescale; and/or

(b) withhold or reduce payments to the Contractor in such amount as the Authority deems appropriate in each particular case until such failure has been remedied to the satisfaction of the Authority.

F3.5 If the Contractor has been notified of a failure in accordance with clause F3.3, it shall:

(a) use all reasonable endeavours to immediately minimise the impact of such failure to the Authority and to prevent such failure from recurring; and

(b) immediately give the Authority such information as the Authority may request regarding what measures are being taken to comply with the obligations in this clause F3.5 and the progress of those measures until resolved to the satisfaction of the Authority.

F3.6 If, having been notified of any failure, the Contractor fails to remedy it in accordance with clause F3.5 within the time specified by the Authority, the Authority may treat the continuing failure as a Material Breach and may terminate the Contract immediately on notice to the Contractor.

F4 Transfer and Sub-Contracting

F4.1 Except where clauses F4.6 and F4.7 both apply, the Contractor shall not transfer, charge, assign, sub-contract or in any other way dispose of the Contract or any part of it without Approval. All such documents shall be evidenced in writing and shown to the Authority on request. Sub-contracting any part of the Contract shall not relieve the Contractor of any of its obligations or duties under the Contract.

F4.2 The Contractor shall be responsible for the acts and/or omissions of its Sub-Contractors as though they are its own. If it is appropriate, the Contractor shall provide each Sub-Contractor with a copy of the Contract and obtain written confirmation from them that they will provide the Services fully in accordance with the Contract.

F4.3 The Contractor shall ensure that its Sub-Contractors and suppliers retain all records relating to the Services for at least 6 years from the date of their creation and make them available to the Authority on request in accordance with the provisions of clause E9 (Audit). If any Sub-Contractor or supplier does not allow the Authority access to the records then the Authority shall have no obligation to pay any claim or invoice made by the Contractor on the basis of such documents or work carried out by the Sub-Contractor or supplier.

F4.4 If the Authority has consented to the award of a Sub-Contract, the Contractor shall ensure that:

(a) the Sub-Contract contains a right for the Contractor to terminate the Sub-Contract if the relevant Sub-Contractor does not comply in the performance of its contract with legal obligations in environmental, social or labour law;

(b) the Sub-Contractor includes a provision having the same effect as set out in clause F4.4 (a) in any Sub-Contract which it awards; and

(c) copies of each Sub-Contract shall, at the request of the Authority, be sent by the Contractor to the Authority immediately.

F4.5 If the Authority believes there are:

- (a) compulsory grounds for excluding a Sub-Contractor pursuant to regulation 57 of the Regulations, the Contractor shall replace or not appoint the Sub-Contractor; or
- (b) non-compulsory grounds for excluding a Sub-Contractor pursuant to regulation 57 of the Regulations, the Authority may require the Contractor to replace or not appoint the Sub-Contractor and the Contractor shall comply with such requirement.

F4.6 Notwithstanding clause F4.1, the Contractor may assign to a third party (the "Assignee") the right to receive payment of the Price or any part thereof due to the Contractor (including any interest which the Authority incurs under clause C2 (Payment and VAT)). Any assignment under this clause F4.6 shall be subject to:

- (a) reduction of any sums in respect of which the Authority exercises its right of recovery under clause C3 (Recovery of Sums Due);
- (b) all related rights of the Authority under the Contract in relation to the recovery of sums due but unpaid; and
- (c) the Authority receiving notification under both clauses F4.7 and F4.8.

F4.7 If the Contractor assigns the right to receive the Price under clause F4.6, the Contractor or the Assignee shall notify the Authority in writing of the assignment and the date upon which the assignment becomes effective.

F4.8 The Contractor shall ensure that the Assignee notifies the Authority of the Assignee's contact information and bank account details to which the Authority shall make payment.

F4.9 The provisions of clause C2 shall continue to apply in all other respects after the assignment and shall not be amended without Approval.

F4.10 Subject to clause F4.11, the Authority may assign, novate or otherwise dispose of its rights and obligations under the Contract or any part thereof to:

- (a) any Contracting Authority;
- (b) any other body established or authorised by the Crown or under statute in order substantially to perform any of the functions that had previously been performed by the Authority; or
- (c) any private sector body which substantially performs the functions of the Authority

provided that any such assignment, novation or other disposal shall not increase the burden of the Contractor's obligations under the Contract.

F4.11 Any change in the legal status of the Authority such that it ceases to be a Contracting Authority shall not, subject to clause F4.12, affect the validity of the Contract and the Contract shall bind and inure to the benefit of any successor body to the Authority.

F4.12 If the rights and obligations under the Contract are assigned, novated or otherwise disposed of pursuant to clause F4.10 to a body which is not a Contracting Authority or if there is a change in the legal status of the Authority such that it ceases to be a Contracting Authority (in the remainder of this clause both such bodies being referred to as the "Transferee"):

- (a) the rights of termination of the Authority in clauses H1 and H2 shall be available to the Contractor in respect of the Transferee; and
- (b) the Transferee shall only be able to assign, novate or otherwise dispose of its rights and obligations under the Contract or any part thereof with the prior consent in writing of the Contractor.

F4.13 The Authority may disclose to any Transferee any Confidential Information of the Contractor which relates to the performance of the Contractor's obligations under the Contract. In such circumstances the Authority shall authorise the Transferee to use such Confidential Information only for purposes relating to the performance of the Contractor's obligations under the Contract and for no other purpose and shall take all reasonable steps to ensure that the Transferee gives a confidentiality undertaking in relation to such Confidential Information.

F4.14 Each Party shall at its own cost and expense carry out, or use all reasonable endeavours to ensure the carrying out of, whatever further actions (including the execution of further documents) the other Party reasonably requires from time to time for the purpose of giving that other Party the full benefit of the provisions of the Contract.

F5 Waiver

F5.1 The failure of either Party to insist upon strict performance of any provision of the Contract, or the failure of either Party to exercise, or any delay in exercising, any right or remedy shall not constitute a waiver of that right or remedy and shall not cause a diminution of the obligations established by the Contract.

F5.2 No waiver shall be effective unless it is expressly stated to be a waiver and communicated to the other Party in writing in accordance with clause A4 (Notices and Communications).

F5.3 A waiver of any right or remedy arising from a breach of the Contract shall not constitute a waiver of any right or remedy arising from any other or subsequent breach of the Contract.

F6 Variation

F6.1 If, after the Commencement Date, the Authority's requirements change, the Authority may request a Variation subject to the terms of this clause 6.

F6.2 The Authority may request a Variation by notifying the Contractor in writing of the Variation and giving the Contractor sufficient information to assess the extent of the Variation and consider whether any change to the Price is required in order to implement the Variation within a reasonable time limit specified by the Authority. If the Contractor accepts the Variation it shall confirm it in writing.

F6.3 If the Contractor is unable to accept the Variation or where the Parties are unable to agree a change to the Price, the Authority may:

(a) allow the Contractor to fulfil its obligations under the Contract without the Variation to the Specification; or

(b) terminate the Contract immediately except where the Contractor has already delivered all or part of the Services or where the Contractor can show evidence of substantial work being carried out to fulfil the requirements of the Specification; and in such case the Parties shall attempt to agree upon a resolution to the matter. If a resolution cannot be reached, the matter shall be dealt with under the Dispute Resolution procedure detailed in clause I2 (Dispute Resolution).

F6.4 No Variation will take effect unless and until it is recorded in a validly executed CCN. Execution of a CCN is made via electronic signature as described in clause 1.2 of Section 1 of the Contract.

F6.5 A CCN takes effect on the date on which both Parties communicate acceptance of the CCN via Bravo. On the date it communicates acceptance of the CCN in this way the Contractor is deemed to warrant and represent that the CCN has been executed by a duly authorised representative of the Contractor in addition to the warranties and representations set out in clause G2.

F6.6 The provisions of clauses F6.4 and F6.5 may be varied in an emergency if it is not practicable to obtain the Authorised Representative's approval within the time necessary to make the Variation in order to address the emergency. In an emergency, Variations may be approved by a different representative of the Authority. However, the Authorised Representative shall have the right to review such a Variation and require a CCN to be entered into on a retrospective basis which may itself vary the emergency Variation.

F7 Severability

F7.1 If any provision of the Contract which is not of a fundamental nature is held invalid, illegal or unenforceable for any reason by any court of competent jurisdiction, such provision shall be severed and the remainder of the provisions of the Contract shall continue in full force and effect as if the Contract had been executed with the invalid, illegal or unenforceable provision eliminated.

F8 Remedies Cumulative

F8.1 Except as expressly provided in the Contract all remedies available to either Party for breach of the Contract are cumulative and may be exercised concurrently or separately, and the exercise of any one remedy shall not be deemed an election of such remedy to the exclusion of other remedies.

F9 Entire Agreement

F9.1 The Contract constitutes the entire agreement between the Parties in respect of the matters dealt with therein. The Contract supersedes all prior negotiations between the Parties and all representations and undertakings made by one Party to the other, whether written or oral, except that this clause shall not exclude liability in respect of any fraudulent misrepresentation.

F10 Counterparts

F10.1 The Contract may be executed in counterparts, each of which when executed and delivered shall constitute an original but all counterparts together shall constitute one and the same instrument.

G LIABILITIES

G1 Liability, Indemnity and Insurance

G1.1 Neither Party limits its liability for:

G1.3 Subject to clause G1.1 the Contractor's aggregate liability in respect of the Contract shall not exceed £5,000,000.00.

G1.4 The Contractor shall not be responsible for any injury, loss, damage, cost or expense if and to the extent that it is caused by the negligence or wilful misconduct of the Authority or by breach by the Authority of its obligations under the Contract.

G1.5 The Authority may recover from the Contractor the following losses incurred by the Authority to the extent they arise as a result of a Default by the Contractor:

- (a) any additional operational and/or administrative costs and expenses incurred by the Authority, including costs relating to time spent by or on behalf of the Authority in dealing with the consequences of the Default;
- (b) any wasted expenditure or charges;

I2 Dispute Resolution

I2.1 The Parties shall attempt in good faith to negotiate a settlement to any dispute between them arising out of or in connection with the Contract within 20 Working Days of either Party notifying the other of the dispute and such efforts shall involve the escalation of the dispute to the finance director of the Contractor and the commercial director of the Authority.

I2.2 Nothing in this dispute resolution procedure shall prevent the Parties from seeking from any court of competent jurisdiction an interim order restraining the other Party from doing any act or compelling the other Party to do any act.

12.3 If the dispute cannot be resolved by the Parties pursuant to clause 12.1 either Party may refer it to mediation pursuant to the procedure set out in clause 12.5.

If appropriate, the Parties may at any stage seek assistance from the Centre for Effective Dispute Resolution to provide guidance on a suitable procedure;

(c) unless otherwise agreed, all negotiations connected with the dispute and any settlement agreement relating to it shall be conducted in confidence and without prejudice to the rights of the Parties in any future proceedings;

(d) if the Parties reach agreement on the resolution of the dispute, the agreement shall be recorded in writing and shall be binding on the Parties once it is signed by their duly authorised representatives;

(e) failing agreement, either of the Parties may invite the Mediator to provide a non-binding but informative written opinion. Such an opinion shall be provided on a without prejudice basis and shall not be used in evidence in any proceedings relating to the Contract without the prior written consent of both Parties; and

(f) if the Parties fail to reach agreement within 60 Working Days of the Mediator being appointed, or such longer period as may be agreed by the Parties, then any dispute or difference between them may be referred to the Courts unless the dispute is referred to arbitration pursuant to the procedures set out in clause 12.6.

12.6 Subject to clause 12.2, the Parties shall not institute court proceedings until the procedures set out in clauses 12.1 and 12.3 have been completed save that:

(c) the Contractor may request by notice to the Authority that any dispute be referred and resolved by arbitration in accordance with clause I2.7, to which the Authority may consent as it sees fit.

I2.7 If any arbitration proceedings are commenced pursuant to clause I2.6,

(i) that the dispute is referred to arbitration; and

(ii) providing details of the issues to be resolved;

(b) the London Court of International Arbitration ("LCIA") procedural rules in force at the date that the dispute was referred to arbitration in accordance with I2.7(b) shall be applied and are deemed to be incorporated by reference to the Contract and the decision of the arbitrator shall be binding on the Parties in the absence of any material failure to comply with such rules;

(c) the tribunal shall consist of a sole arbitrator to be agreed by the Parties;

(d) if the Parties fail to agree the appointment of the arbitrator within 10 days of the Arbitration Notice being issued by the Authority under clause I2.7(a) or if the person appointed is unable or unwilling to act, the arbitrator shall be appointed by the LCIA;

(e) the arbitration proceedings shall take place in London and in the English language; and

SCHEDULE 1 - SPECIFICATION

SPECIFICATION OF REQUIREMENTS

This Section sets out the Authority's requirements. This is inserted from the Defra ITT.

1. Scope of the requirement

SECTION 3: SPECIFICATION OF REQUIREMENTS

This section sets out Defra's requirements

Background

1 The Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment (EEE) RoHS) Directive restricts the use of 10 hazardous substances, (Lead, Mercury, Cadmium, Hexavalent chromium, Poly-brominated biphenyls (PBB), Poly-brominated diphenyl ethers (PBDE), Bis(2-ethylhexyl) phthalate (DEHP), Butyl benzyl phthalate (BBP), Dibutyl phthalate (DBP) and Diisobutyl phthalate (DIBP)) in new electrical and electronic equipment (EEE) under set maximum concentration values. In the UK the RoHS Directive is implemented by the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment Regulations 2012 (The RoHS Regulations).

1.1 Because of the sweeping and broad nature of the scope of the RoHS Directive and the large number of products it affects it may not be technically possible to manufacture some products and equipment without the limited use of some of the restricted substances. As a consequence, the RoHS Directive has provisions that allow the Commission to grant specific exemptions for use of the restricted substances in clearly defined applications (Article 5, Directive 2011/65/EU). These exemptions are given legal force by delegated directives that amend the RoHS Directive.

1.2 Up to the end of transition period, the UK does not have to undertake any formal legislative action to transpose these amendments/exemptions as there are ambulatory references in in 3(1) and 3(4) of the RoHS Regulations that mean all changes to the exemptions automatically apply. These ambulatory references will cease to work from the end of the transition period. From this time the UK will therefore operate independent capacity to receive and assess applications for exemptions to the RoHS Regulations.

1.3 The process by which exemptions will be assessed in the UK will bear resemblance to the EU commission process with amendments made to reflect the single country setting and improve overall process efficiency. Applications from industry for exemptions under the RoHS Regulations will be submitted to the Department for Environment, Food and Rural Affairs (Defra). There will follow a peer review and evaluation by technical consultants appointed through this tender process. The request will then be subject to a public consultation. For a new application there is no set timetable or deadline for this process; for renewal of existing exemptions there is a 6 month decision deadline. After an exemption has been granted it will either have a specified expiry or 'end' date or it will have a default 'sunset' date of either five- or seven-years dependent upon the category of product concerned.

Aim

Defra wishes to secure expert scientific and technical advice to undertake the evaluation of applications for exemptions to the RoHS Regulations.

Timetable

The contract will be in place from 01/01/2021 and will run until 01/01/2022 with an option for renewal. A clear timetable and schedule of work, detailing all proposed project outputs and how these outputs will meet the project objectives within the envisaged timeframe, should be produced for each exemption. The programme of work should include

- A Gantt chart (or similar) where necessary to illustrate the programme of work. Where appropriate, this should include all key tasks, deliverables, and occasions where meetings with Defra are envisaged.
- A more detailed table that identifies the number of person days allocated to each key task.

Project management

Defra will nominate a project manager from the RoHS Policy Team who will be responsible for the day-to-day management of the contract and liaison with the tenderer. The successful bidder will be expected to appoint a Project Manager who will act as the principal point of contact for Defra and who will be responsible for the day-to-day management of the project.

Objective and Deliverables:

The tenderer must be a highly skilled and qualified technical consultancy willing to operate a call-off contract for the assessment of application for exemptions under the RoHS Regulations received by Defra. This will include:

- i) A technical and scientific check of the application (comprehension of request, validity of provided argumentation and information, identification of missing information).
- ii) A compilation of questions to the applicant if necessary.
- iii) Preparation of an online stakeholder consultation (compilation of the application and additional information, references to former evaluations if applicable, and questions to stakeholders). This will be shared with Defra and the consultation will be run by Defra.
- iv) An evaluation of consultation responses and results of additional rounds of questions to the applicant and other stakeholders should be written and submitted to Defra.
- v) A high quality and robust technical report detailing their appraisal of the application; including stakeholder evaluation results and a justification on whether the request should be accepted or not should be made in writing to Defra.

In compiling the report the tenderer must take into consideration the ability of Defra to produce an impact assessment on the implementation of the exemption. The Green Book: appraisal and evaluation in central government can be used to support this process. The report consideration should be given to the ability Crucial to the success of the tender will be the experience and technical expertise brought to bear alongside the effectiveness of the methodology including pace of delivery. The evaluation criteria are detailed below.

Organisational Experience, Capability and Resources

1. Background and Context

Anthesis (UK) Ltd was established to provide the deep sustainability knowledge with the global reach and connectivity of larger and more generalist providers of professional services. Since establishing in 2013 Anthesis Group has grown to more 500 experts, through organic growth and thirteen strategic acquisitions. One of these acquisitions was Caleb Management Services Limited, an organisation that had been working on technology and economic assessment under the Montreal Protocol since the company's formation in 1994. This work had involved the analysis of alternatives to ozone depleting substances throughout. The company's Managing Director, Paul Ashford was a member of the UNEP Technology and Economics Assessment Panel (TEAP) from 1998 to 2015 partially sponsored by DEFRA and its predecessors during that period.

In response to the requirements of this task, Anthesis will draw on extensive technical and scientific expertise and experience from a range of sectors. Anthesis has the unique ability to draw on additional teams within the company, including LCA and waste experts, for relevant analyses of total product lifecycles.

2. Experience and Case Studies

Our sustainable chemistry team has been established for over 25 years, with experts from across the chemicals sector managing various projects. Anthesis has an excellent track record of guiding companies through consortium management and other advisory activities in the REACH process and related restricted substance assessments. This includes the Analysis of Alternatives during strategy development.

2.1. Technology

Understanding RoHS involves understanding the technology industry, across the entire lifecycle of a product and from the perspective of multiple stakeholders. Anthesis is trusted by many of the world's leading technology businesses in supporting the achievement of their sustainability goals. We have a strong understanding of technology sector supply chains, product sustainability, compliance, life cycle impacts and end of life concerns, which makes us ideal delivery partners for this work. We count market leaders in B2C and B2 IT, datacentre-based service providers, medical technology, mobile phones, white goods and contract manufacturing, amongst our client base drawn from the Americas, Asia Pacific and across Europe. We provide several service lines into this sector, often with multiple project types in parallel, with our largest clients:

- Sustainable strategy & reporting – Articulating sustainability performance, setting targets and communicating with a range of stakeholders. This includes for specific standards like CDP, also understanding the Environmental Social Governance requirements in supply chains, through reporting and auditing.

2. Experience and Case Studies

Our sustainable chemistry team has been established for over 25 years, with experts from across the chemicals sector managing various projects. Anthesis has an excellent track record of guiding companies through consortium management and other advisory activities in the REACH process and related restricted substance assessments. This includes the Analysis of Alternatives during strategy development.

Testimonial: "Anthesis have been excellent partners with their concentration on technical excellence and offering top client value." - Darrell Sticker, Global Environment / Sustainability Lead, Cisco

2.2 Regulatory Management and Sustainable Chemistry

The fundamental components of this work involve a strong understanding of sustainable chemistry. We have an extensive track record in this area and a global team dedicated to this practice.

Anthesis provides direct consulting services to support companies in chemical, and related, supply chains, as an Only Representative, consortia manager and technical consultant to clients requiring compliance with REACH. In addition, the company provides input to regulators on a number of policy-related issues drawing from its original experience on the Montreal Protocol. Areas of current input include the hazard profiling of polymers ahead of any introduction of polymer registration under REACH, the on-going management of specific Substance Evaluations involving engagement with Member State Competent Authorities including the HSE and Environment Agency in the UK.

Through its consortium management activities, the sustainable chemistry team plays a key role in simplifying and clarifying the regulatory requirements that need to be met and ensuring consistency across companies to fulfil their individual REACH obligations. This involves ensuring appropriate frameworks are in place within the consortia to ensure legal compliance with competition law and calculating financial information for cost-sharing purposes. An additional element of this work is scenario planning where the potential outcomes from various regulatory paths can be mapped. This often involves knowing whether alternative options exist as potential substitutes for the incumbent technology. An example is the project set out in the case study below:

Case Study: Clarification of Supply-Chain intentions regarding the support of Target Substances that may require authorisation in future under the REACH Regulation

International Aerospace Environmental Group (IAEG) Working Group 5 had identified a list of Target Substances on which the aerospace industry depends, that they believed would be under threat of being included in Annex XIV of REACH in the near future. This list included Refractory Ceramic Fibres, Borates, Cadmium and its compounds, HHPA/MHHPA and Bisphenol-A.

Anthesis worked as part of a consortium of consultants to deliver the following project elements:

- Supply-chain mapping of products using the Target Substances
- Analysis of Alternatives
- Impact Assessment to inform socio-economic impacts
- Consideration of pre-consortia arrangements based on declared interests

Anthesis led on the supply-chain mapping and pre-consortium arrangements and provided expertise in various aspects of the Analysis of Alternatives, particularly in respect of metals and polymers.

The consortium of consultants was able to deliver clear guidance to IAEG WG5 on those Target Substances that would need to progress to an Application for Authorisation (AfA) in the event that any were listed on Annex XIV of REACH. This included information on whom within the supply-chain would be willing to support such an AfA should it need to be triggered. Recognising that the aerospace industry needs to protect a 70-year time window (10 years in design; 30 years in production; 30 years in the use/maintenance phase), clear and early visibility of available

alternatives was a key aspect of the deliverables, which would inform decision-making for the industry.

The experienced technical team prepares the joint submission dossier for the relevant substance, a chemical safety report, exposure scenarios and guidance on safe use and submitting to the European Chemicals Agency (ECHA) of all relevant registration data.

Anthesis is experienced in identifying and managing hazards, as well as characterising risks within supply chains. Following such analyses, a key aspect of Anthesis' work is to assess alternative chemistries, especially in the polymer and metals sectors and technologies over their life cycles.

As a consortium manager in the REACH process, our expert team maintains a watching brief on regulatory developments such as draft decisions issued by ECHA, Risk Management Options Analyses, potential listing on the Candidate list of SVHC, restrictions authorisations and the Community Rolling Action Plan.

Beyond this regulatory compliance agenda, the Anthesis team has developed a strong reputation as thought-leaders in the chemical policy space with experience of over 25 years of practice to draw upon. This has led to a number of presentations at Stakeholder Conferences (e.g. Chemical Watch) on issues including the current state of best practice in the field of Alternative Assessment – reviewing the various methodologies available and comparing their strengths and weaknesses. In addition, Anthesis has published regular blogs on current issues which led directly to the project set out in the following case study.

Case Study: Analysis of the interplay between effective chemicals management and the circular economy

Anthesis was identified by the Government of Canada as a highly credible thought-leader between chemical management and the circular economy, based on a series of blogs including an international item on RoHS and REACH implementation. This project involved working for the Environment and Climate Change Canada (ECCC) and Health Canada (HC), who had amassed a small library of relevant references on the policy interplay between chemicals management and the implementation of the circular economy but had not been able to fully review them. Anthesis was asked to review this collection and identify key missing references before writing up an analysis of current best practices in the field and future trends.

The key deliverable was an 80-page report which was a successfully peer reviewed internally within ECCC/HC and accepted with only minor edits. The report highlighted a number of key learnings which will assist the Canadian Government in enhancing its Chemical Management Plan through the next phase of its development.

2.3 Socio-economic analysis

Understanding the socioeconomic impact of a potential decision is a key factor in alternative assessment and is critical to RoHS assessments. We have a strong track record in analysing the social and environmental impact of policy decisions, since the economic dimension has been a key component of all decision-making processes when evaluating alternatives throughout our history. This involves the use of various tools including literature reviews, socio-economic analysis and impact analysis to conduct a thorough assessment.

Case Study: Literature review and report for the Institute of Energy Economics in Japan

An example of this was the creation a report for the Institute of Energy Economics in Japan (IEEJ) on the Swedish carbon dioxide tax, its emission reductions, consequences for the industry, cost

effectiveness, public acceptance of the tax, and how it relates to other policy instruments aimed at climate change.

In the process, the team carried out a comprehensive socio-economic analysis of possible demand-side and supply-side policy instruments for enhancing the recycling rate of plastics. Further to this, an EU level literature review and policy instrument analysis were carried out, focusing on the eco-design criteria for laundry machines, as an instrument to reduce microplastics leaking from textiles into the environment.

2.4 Managing Agile Processes

The delivery of this project will involve responsive, proactive management of requests and a dynamic process for exchanging information between multiple stakeholders, with a high level of accountability. Anthesis are responsive and dynamic, using our expertise in technology to respond to the needs of our clients.

Anthesis has been managing PBS allocation system, for unwanted WEEE collection contracts, since 2016. This involves responding to transitional requests to a service level agreement, managed in hours, managing probity of data in line with competition law, allocating contracts through structured bidding, dividing fees and recharging in line with market shares and vendor billing. Activation over a one-month period, managed through a web portal and structured emails.

Anthesis is responsible for EPR reporting for WEEE, Packaging and Batteries for several technology companies, in multiple EU Member States, Canadian Provinces and India.

Managing supply chain chemical declarations for multiple technology sector clients, for REACH, RoHS and Conflict Mineral compliance via in house software solutions.

2.5 Carbon Expertise

There is a requirement to review LCA type analyses within applications and at Anthesis we have a market leading sustainability analytics practice. Case studies are as follows:

- Micromobility firm: Anthesis recently undertook a comparative cradle to grave life cycle assessment for an e-bike/scooter manufacturer. In addition, we set circularity metrics for the organization.
- IKEA: Anthesis were appointed to provide a Life Cycle Assessment of IKEA's annual catalogue – a task that Anthesis has completed five years running. We undertook scenario analysis driving reductions across the supply chain. Our work was delivered using Alteryx and Tableau.
- PepsiCo: Anthesis has created a streamlined sustainability impact calculator for PepsiCo that allows product designers to enter the details of their products and get live feedback on whether it is better than the previous iteration of their product.

3. Analysis Methods

Anthesis is experienced in carrying out a number of types of analysis across a variety of sectors, including life cycle assessments, hazardous material assessments and analysis of alternative chemicals. The wide-ranging expertise of the Anthesis group and connections will be key for the project.

The project team has followed specific methodologies to complete various tasks including the following:

- Member of the Montreal Protocol Technology & Economic Assessment Panel in assessing alternatives to ozone depleting substances based on a number of variables.
- REACH alternative assessment peer review on the use of hexabromocyclododecane (HBCD) use in expanded polystyrene in support of an Application for Authorisation, following REACH Alternative Assessment Guidance.
- Formative participant in the establishment of the Association for the Advancement of Alternative Assessment (A4) in the US.
- Coordinator of the Substitution Threats and Opportunities Group within the European Phenolic Resins Association (EPRA) since 2012.
- Member of NeRSAP (Network of REACH SEA and Alternative Assessment Practitioners)
- Comparative assessment of various alternative assessment methodologies (sequential, parallel and hybrid) at stakeholder conferences

4. Relevant Resources

The team that has been assembled for this project has extensive experience working in various aspects of the alternative assessment field with industry and governments, both nationally and internationally. This has also involved the development of a strong network of relevant experts around the world which can be called upon for input on specific issues. For example, we have previously partnered with an alternative assessment team within Jensen Hughes, in the US, which has been an advisor to the US military for over 20 years on a number of chemical substitution strategies. They have confirmed their availability to assist on this project on an 'as needed' basis.

In each of these roles, the team has continually expanded on knowledge using many resources built up through years of experience. This includes the use of publicised data and information available online and assisting in the development and research surrounding alternative assessments. Participation in networks such as NerSAP also allows for the testing of assumptions and the identification of precedents which can be critical when honing alternative assessment methodologies and tracking the on-going evaluation of best practice. The ECHA website will continue to be a key source of knowledge during this project.

We have a strong understanding of the UK Regulations and the overarching EU Directive. Furthermore, our breadth of technical knowledge also covers the latest RoHS like systems worldwide and where required we have the support of our global team of Anthesis experts, as witnessed by the blog written by Wolfgang Wick on REACH and RoHS in 2018.

- Member of the Montreal Protocol Technology & Economic Assessment Panel in assessing alternatives to ozone depleting substances based on a number of variables.
- REACH alternative assessment peer review on the use of hexabromocyclododecane (HBCD) use in expanded polystyrene in support of an Application for Authorisation, following REACH Alternative Assessment Guidance.
- Formative participant in the establishment of the Association for the Advancement of Alternative Assessment (A4) in the US.
- Coordinator of the Substitution Threats and Opportunities Group within the European Phenolic Resins Association (EPRA) since 2012.
- Member of NeRSAP (Network of REACH SEA and Alternative Assessment Practitioners)
- Comparative assessment of various alternative assessment methodologies (sequential, parallel and hybrid) at stakeholder conferences

Approach and Methodology

1.1 Understanding of the requirements

The Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Regulations 2012 (as amended) (The RoHS Regulations) underpin the EU RoHS2 Directive in the UK.

RoHS restricts the use of specific hazardous substances in electronics, but the European Commission currently grants exemptions to these restrictions for defined applications, according to technical and socio-economic criteria. These exemptions are subject to renewal and can be extended at the discretion of the Commission and until 31st December 2020 are automatically transposed into UK law.

From the 1st January 2021, when the UK's departure from the European Union formally ends, the UK must undertake its own assessments to grant exemptions to The RoHS Regulations¹. This will give the UK an opportunity to consider whether the impacts of granting or rejecting an application would benefit the UK specifically and to make the process more efficient.

¹ <https://www.legislation.gov.uk/uksi/2012/3032/contents>

² Tender Reference: itt_7358

³ It is understood that the UK will operate an equivalent regulation to REACH (EC) No 1907/2006, therefore the provisions are equivalent.

It is understood that the UK wishes to follow a similar approach to reviewing and assessing such exemption applications yet introduce efficiencies to the process. The Invitation to Tender does not prescribe a decision deadline for new applications but a 6-month decision deadline for renewals².

1.2 Exemption requirements

An exemption may be granted where the inclusion of a restricted substance does not weaken the provisions set out within UK REACH³ and where any substitute is scientifically or technically impracticable, the reliability of the substitute is in question and whether the impacts of substitution are negative compared to the use of the restricted substance.

The maximum validity of an exemption is dictated within the RoHS Directive (2011/65/EU) and from the Invitation to Tender it is understood these periods will be adopted in the UK. A period of up to 5 or 7 years is granted depending on the EEE category, but exemptions can be granted on a case-by-case basis considering the availability of substitutes and any socio-economic impacts and life-cycle thinking.

1.3 Proposed approach

Two processes are foreseen being required after 1st January 2021. The first being a so-called light-touch which is a review of an exemption granted by the Commission. The second would be a more in-depth review where a new exemption was requested, either in parallel to that received by the Commission for EU-27/EEA, or independently to the UK.

Each process is discussed in more detail below. ²

1.3.1 Review of existing exemptions and/or extensions to existing exemptions

On 1st January 2021 a number of exemptions will still be valid within the EEA. These exemptions are for uses where either the expiry date is still in the future or an application to extend the exemption beyond its expiry date has been received and acknowledged by The Commission. It is assumed that the UK will want to continue with those exemptions to minimise disruption to trade. Thus, this light-touch review is proposed and is illustrated schematically together with some narrative for each stage.

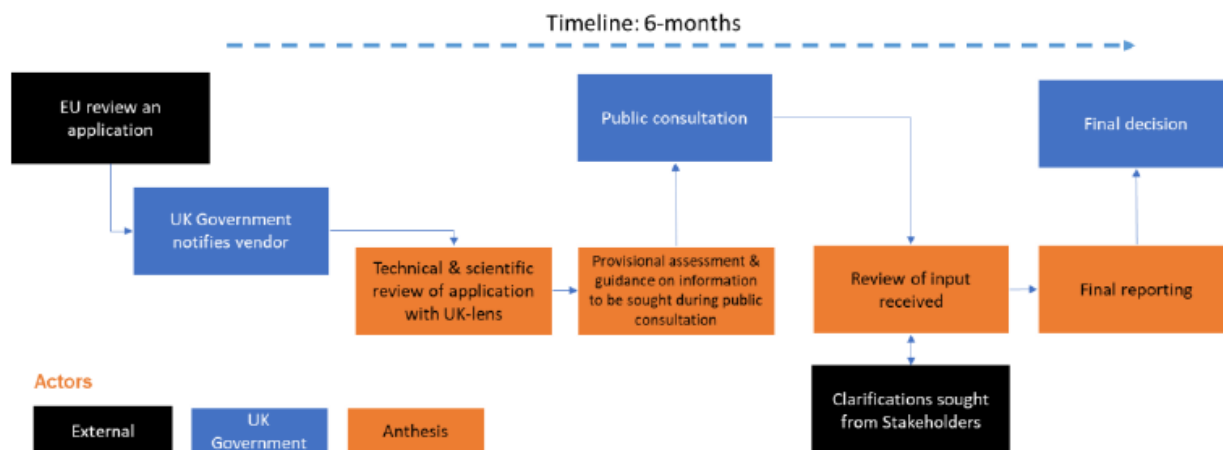

Figure 1: Process flow from review of EU exemption to final decision.

1.3.1.1 The Commission publishes its review of the new or renewal application

When The Commission publishes an exemption assessment report, and the conclusion is that the applied for exemption(s) should be granted, Defra will notify Anthesis and a timeline for the various stages of the UK's own review will be agreed. Where the UK intends to adopt an EU decision this would be considered as a renewal and it is noted that the UK wishes to make such a decision within 6 months.

1.3.1.2 Review of The Commission report

Anthesis will review The Commission's report considering *inter alia*: alignment with UK-REACH; risk characterisation of the requested use; feasibility of alternatives paying specific attention to their availability in the UK market; and consideration of the socio-economic implications from a UK perspective.

Anthesis will provide to Defra its initial assessment for the UK and guide where additional information could be sought from the public consultation to inform the UK perspective.

1.3.1.3 Public consultation

This will be organised and managed by Defra.

1.3.1.4 Providing final recommendation

Anthesis will review any input received from the public consultation and modify its initial recommendation where necessary.

1.3.1.5 Final Decision

Defra will publish its final decision. 3

1.3.2 UK-only applications

The following schematic shows the process flow and a proposed timeline for decision-making where the UK receives a direct application for an exemption. The timeline assumes that any additional information requests from either the Applicant or other stakeholders is provided within given timeframe for it to be considered and assumes an 8-week public consultation. The precise timeline can be discussed in general terms should Anthesis be awarded the contract, but as is proposed in Section 1.3.2.1 that the precise timeframe would be agreed upon receipt of an application.

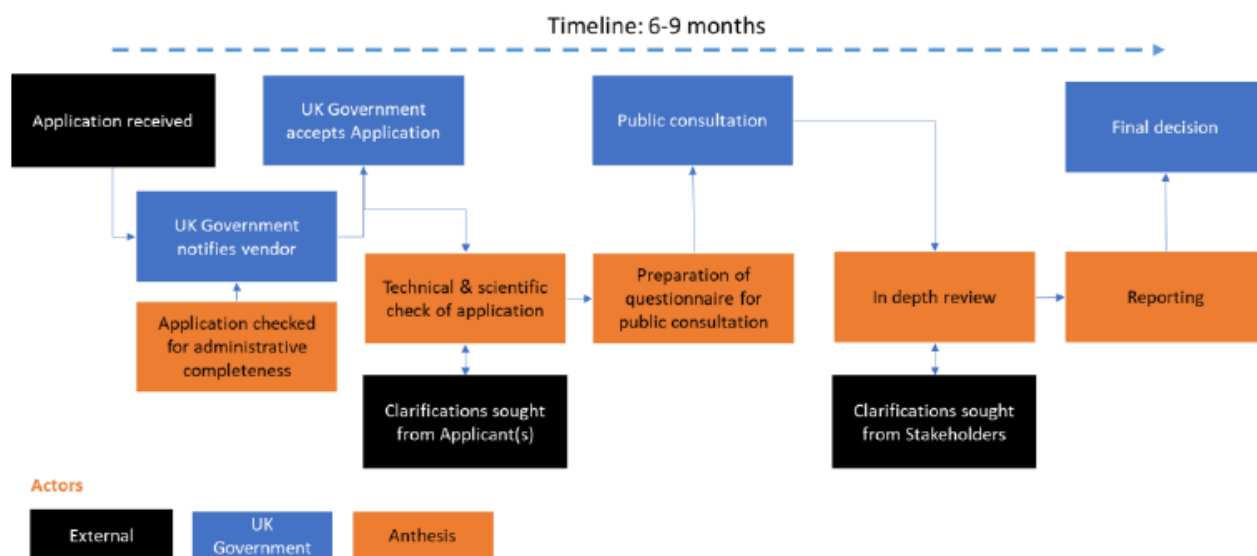

Figure 2: Process flow from receipt of a new application to final decision.

1.3.2.1 Application received

The application from Industry will be submitted to Defra and Anthesis will be informed and the timeline for the subsequent stages will be agreed. Defra would then inform the Applicant that the application has been received and the review process would begin.

1.3.2.2 Technical and scientific completeness check

The application will be reviewed against the equivalent criteria set out in Annex V of Directive 2011/65/EU, to ensure that all elements have been addressed. Where Anthesis identifies that information is missing this will be communicated to Defra and the Applicant will be required to submit the missing information. When the information is deemed complete Anthesis will then review the information for its technical and scientific completeness. Again, where necessary clarifying information may be sought from the Applicant via Defra.

1.3.2.3 Preparation for public consultation

The purpose of the public consultation is to seek further information from stakeholders including, but not limited to economic operators, recyclers, treatment operators, environmental organisations and employee and consumer associations concerning the applied for exemption whether that be in support or to challenge the application. 4

A specific questionnaire will be developed by Anthesis to help inform the final recommendation to accept or reject the application. The questionnaire will include a summary of the exemption request together with questions for stakeholders to provide additional information concerning the wording of the exemption, the availability of possibly substitutes and ongoing research and the collection of information about socio-economic impacts including waste streams, employment and other unintended consequences.

1.3.2.4 Public consultation

This will be organised and managed by Defra.

1.3.2.5 Evaluation

This step will consider all information received from the applicant as well as the public consultation. The evaluation will encompass a risk characterisation of the requested use, a sense check on the availability and feasibility of the alternatives and a socio-economic review from a UK perspective. Should any prior evaluation exist within the EU this will also be considered.

Further exchange with stakeholders will be held after the consultation has ended for those issues where further need for information and / or need for (technical) discussion have been identified. These interactions will be channelled through Defra.

1.3.2.6 Reporting

Anthesis will provide to Defra its assessment of the application. The assessment will contain a clear technical and scientific assessment on whether the new exemption(s) is (are) in line with the criteria given in Article 5(1)(a) of Directive 2011/65/EU. In addition, the structure of the report will be such that Defra can produce an impact assessment on the implementation of the exemption in line with the Government's The Green Book⁴.

⁵ https://ec.europa.eu/environment/waste/rohs_eee/adaptation_en.htm

1.4 Assumptions and Barriers to success

As noted in Section 1.3 of this document it has been assumed that two review processes may be required: a light-touch review of existing EU exemptions and a more detailed standalone review of a new exemption specific to the UK or in parallel to a EU application.

1.4.1 Review of existing exemptions and/or extensions to existing exemptions

According to the latest status tracker available from DG Environment's website⁵ as of 17th April 2020 there are currently 81 exemption requests under review. The website also states that, "Considering the very large amount of renewal applications received, the expected timeframe for the Commission to take a decision on a RoHS exemption application is currently approximately 24 months from the application date. Priority will be given to older applications." ⁵

Working on this basis it has been assumed that the following number of decisions will be published between now and 2022 by The Commission and in the first year of the contract 7 will require a light-touch review. This number has been used for budgeting purposes.

Year	Estimated Number of Decisions	Estimated Number of Reviews
2020	7	n/a
2021	18	7
2022	42	18

Table 1: Number of Decisions expected to be published by The Commission and those to be reviewed by the UK.

In this first scenario, limited risk is foreseen as the role of Anthesis will be to identify those exemptions by exception which should not be granted by the UK Government. The most likely areas for deviation from the EU opinion will be due to UK market availability of the alternative(s) or the socio-economics when considered only from the UK perspective.

It is not clear what level of response to the public consultation might be anticipated, therefore there is a risk that the light-touch review would require more detailed analysis in the areas of socio-economics, availability and waste by Anthesis in order to provide a rounded opinion to Defra.

1.4.2 UK-only applications

There are 169 valid applications according to latest status tracker available from DG Environment's website⁶. The earliest expiry date is July 2023. The Invitation to Tender does not mention any timeline for exemption renewals to be received, however, if the UK is to adopt the timeframe given in Directive 2011/65/EU then an extension must be received no later than 18 months of the expiry date. Therefore, based on these numbers, 63 of these valid applications would need to be applied for no later than January 2022, which falls outside of the initial Tender period. However, it is not inconceivable that applications are received earlier than this. Of those currently under review 19% were received between 22 and 19 months before the expiry date. Thus, applications could be anticipated within the contract period.

Historically, around 2 new exemption requests are received annually, although all these new requests can be attributed to the inclusion of 4 phthalates (DEHP, BBP, DBP and DIBP) to Annex II via the Delegated Directive (EU) 2015/863 which set a restriction deadline of July 2021. For the purposes of this response to the Tender, 5 new exemption requests are assumed, but it is not inconceivable for this number to be double.

As the Invitation to Tender suggests a want to reach decisions more efficiently, it is feasible that the UK could reach a decision ahead of the EU. The risk here is that a different decision will be reached and Defra/the UK Government may be open to scrutiny by Industry and/or NGOs.

Risk Management and Mitigation

Planning for Risks and Mitigation

Anthesis has a great deal of experience managing and mitigating for risks, during large and important projects like this.

Our risk management strategy is based around a Risk Register, developed at the start of each project. This tracks the development of any risks, and allows for appropriate mitigation responses, as the project develops. There are two stages to our risk management:

- Identifying and profiling project risks, known at the beginning of the contract; and
- On-going risk management as they arise.

The register ranks risks and requires mitigation methods for each risk to be developed. Mitigations are then taken into account during the project delivery. The register is regularly reviewed as the project progresses and will be used by the Project Manager to keep Defra up to date on issues and to jointly agree strategies for risk management during the regular project management calls/catch-ups.

New risks and mitigations will be tracked in the Risk and Issues Log. As the majority of the work will be desk based, the risk to the environment is low. We will proactively seek to minimise environmental impact by prioritising the use of public transport for all travel, reducing the use of printed material and other standard business practices in Anthesis, in line with our own Policies which seek to reduce the environmental impact of our business.

Risks and Issues log

As well as the identified risks documented here, the project will hold a Risk and issues Log throughout the delivery of the project. It will be accessible through the project delivery team and overseen by the Project Director, who will review in detail during meeting with the Project Manager, to understand the resolutions to the obstacles arising mid-project. The entry of risks and mitigating actions will be captured at team meetings and entered by the Project Manager.

Project risks

We recognise there are a number of challenges in carrying out this work. The following section outlines the main project challenges as we see them, and the way we plan to manage and mitigate them.

Communication and Working Arrangements

Anthesis has many years of experience working with large organisations on similar projects, ensuring that communication between clients is effective and appropriate. An adaptive approach to working arrangements is taken to ensure that key information, issues and reports are communicated regularly.

1.1 Approach to liaising with Defra

We recognise the value of excellent communication, therefore, throughout the RoHS project we will take a transparent approach to communicating project deliverables. To ensure this, we have identified a Project Director who would be Anthesis' main contact point for the project and recommend an equivalent person is identified by Defra.

Anthesis has a robust project management process. This ensures that we follow best practice in project management, client management, stakeholder engagement, quality management and knowledge management. When actively reviewing an exemption request, light-touch or in depth,

Anthesis proposes to provide fortnightly project progress reports and regular review meetings in line with the Defra project management requirements.

The following project meetings, reviews and project progress updates are included in the project budget:

- Project kick off meeting / project inception meeting (PIM). This meeting will be attended by Anthesis' Project Director as well as relevant project team members and Defra's counterparts.
- Fortnightly update telephone meetings with the Defra (or at an alternative frequency as agreed) between our Project Director and relevant delivery team with Defra's project lead at a convenient time. A general agenda will be followed for all these meetings that will cover project progress, risks & mitigations; including flagging any issues or early findings, any new risks identified, current and planned tasks as well as any new input from the Defra.
- Internal project team meetings – Our Project Director will facilitate regular internal project team meetings to discuss progress, findings to date, current and planned tasks and any issues faced by the team and to identify solutions. The risk register and project plan will be reviewed in these meetings.
- Project Plan Review – any changes in requirements, new findings and any newly identified risks will be accommodated in a changed project plan and risk register. Any significant changes will be circulated to the Defra project lead for approval before implementation.
- Project review meetings with the client where appropriate. Our Project Director and the relevant team members will be available to attend such meetings and we will ensure that other members of the team are available if appropriate. We will agree an agenda with the Defra project lead in advance of each meeting, and circulate a summary note within two weeks of each meeting.

1.2 Approach to liaising with the Applicant/Stakeholder

All communication with the exemption Applicant will be channelled through Defra where appropriate and necessary. This will involve an initial communication when the application is received and a timeline of the application process has been agreed upon by Anthesis and Defra. During the process of reviewing an exemption application, if further scientific or technical information is required from the Applicant, this information request will also be channelled through Defra.

Following the public consultation, Anthesis may consider further discussion with the stakeholder providing the additional information is warranted. Again, it is proposed that Defra will be the interface between the stakeholder and Anthesis.

1.3 Provision of Final Report and Dissemination of Findings

Prior to providing the final report, a public consultation will be held to gain input and opinion from various stakeholders concerning an exemption request.

A specific questionnaire will be developed by Anthesis to help inform the final recommendation to accept or reject the application. The questionnaire will include a summary of the exemption request together with questions for stakeholders to provide additional information concerning the wording of the exemption, the availability of possibly substitutes and ongoing research and the collection of information about socio-economic impacts including waste streams, employment and other unintended consequences.

Following public consultation, the findings will be evaluated and considered when writing the final report and exemption recommendation. Any need for further information at this stage will be communicated through Defra. The evaluation will encompass a risk characterisation of the requested use, a sense check on the availability and feasibility of the alternatives and a socio-economic review from a UK perspective.

Anthesis will provide to Defra its assessment of the application. The assessment will contain a clear technical and scientific assessment on whether the new exemption(s) are in line with the criteria given in Article 5(1)(a) of Directive 2011/65/EU. In addition, the structure of the report will be such that Defra can produce an impact assessment on the implementation of the exemption.

As it is proposed that Defra manages the public consultations and liaison with the Applicant and stakeholders all received information will be available, but for completeness Anthesis will provide all source information used in its assessment to Defra together with its final report.
