2. How to manage the insurance

- 2.1 Without limiting the other provisions of this Contract, the Supplier shall:

4. Evidence of insurance you must provide

The Supplier shall use all reasonable endeavours to notify the Relevant Authority (subject to third party confidentiality obligations) as soon as practicable when it becomes aware of any relevant fact, circumstance or matter which has caused, or is reasonably likely to provide grounds to, the relevant insurer to give notice to cancel, rescind, suspend or void any insurance, or any cover or claim under any insurance in whole or in part.

- The browser on the device which is used to access the Buyer's tooling must be configured to use TLS 1.2 as a minimum.
- USB storage device access should be appropriately managed. Where possible this should be locked down so as to become unusable but, where this is not feasible, the Supplier shall confirm to the Buyer that all users of the Buyer's services have agreed to procedures acknowledging the prohibition of using USB storage devices to transfer data to or from these services. If local working practices specifically require this type of working then the Supplier shall demonstrate the process being used to the Buyer and seek a waiver which may be approved on a case-by-case basis.
- The Supplier, in agreement with the Buyer, shall be responsible for arranging the penetration testing prior to the Buyer allowing connectivity. Once this has been done the Buyer shall need to see the output and sign off the connectivity.
- The Supplier shall be responsible for the cost of this assurance exercise and for carrying out any remedial activities as identified by and in agreement with the ESRM Security Risk Lead.
- The scope of the test shall be against the NCSC End User Devices Security Guidance for the Supplier's corporate build(s) – image load(s) as updated from time to time. Latest Version available at: https://www.ncsc.gov.uk/collection/end-user-devicesecurity.
- The purpose of the audit shall be to ensure that the device is secured correctly (regular patching, has no known vulnerabilities, has up-to-date anti-virus, malware, etc).
- The Buyer reserves the right to carry out future checks for compliance. Typically the penetration test shall need to be carried out on an annual basis or if there are any major build – image load – changes to the end device. It is the Supplier's responsibility to inform the Buyer if there are any major changes to their corporate build – image load, e.g. new OS or security component and for arranging the required penetration test.
- Supplier Staff are not allowed to use a personal device at any time to access TechNow.

Departmental Tooling

The Supplier shall use the Buyer's elected tooling set for activities associated with this Call-Off Contract.

Where direct connectivity from the Supplier environment is not possible the Buyer will consider provision of Buyer devices to enable access. This will be dependent on meeting Buyer security requirements

4.3. Repair Service

Where an extended warranty service is not in place and the initial twelve (12) Months warranty period has expired the Buyer may require the Supplier to provide an optional repair service.

The Supplier will assess if repair is possible and provide the cost of that repair. If acceptable the Buyer may then request the device to be repaired.

In these circumstances the Buyer may require the Supplier to provide a disposal service aligned to the standards and process described above.

4.5. Recycling and Remarketing of redundant devices
