Annex 1 – Specification

This Annex sets out the Authority's requirements.

Background

This project is a key component within Defra's and Natural England's wider programme of work including supporting the creation of resilient landscapes. The outputs and evidence from this project will directly inform a range of strategic work included within Natural England's statutory remit for the conservation and enhancement of England's landscapes, and how and why they are changing. Key policy areas are:

- the **Defra 25 Year Environment Plan Indicator G1**: Changes in landscape and waterscape character.
- Conserving and enhancing all landscapes (including obligations under the European Landscape Convention for monitoring landscape change)
- Statutory duties for the designation and advice relating to protected landscapes, including responding to proposals within the Glover Landscapes Review for enhanced monitoring of landscape change.

This project builds on previously completed Phase 2 work:

- a) the new digital National Character Area (NCA) profile platform and the development of a NCA framework Landscape Change Database and Landscape Change Atlas and Dashboard.
- b) preparation of an evaluation framework/methodology and baseline analysis of change theme data for NCAs, Agricultural Landscape Types and protected landscapes, which includes (for most themes and indicators) two data points at 2015 and 2019 (or closest approximations to those dates: e.g. for agri-environment related data analysis the data points are for 2013 and 2018).
- c) development of an experiential/visual indicator of landscape change at NCA scale using spatial data layers for natural and cultural factors assessed as having a positive or negative influence on people's perceptions of the landscape (also using data points at 2015 and 2019).
- d) development (in progress) of a high-level indicator of people's perceptions of the physical changes to landscape and waterscape character and quality at NCA scale, through data captured in the People and Nature Survey, and exploring more targeted means of data gathering.

This Phase 3 commission for the project includes a particular focus on reviewing and collating information from the Phase 2 work outlined above to further enhance the digital NCA Profiles, shape, and contribute to, the initial reporting of evidence and findings for the Defra 25 Year Environment Plan Indicator G1: 'Changes to landscape and waterscape character', to be published in 2023. The Defra G1 Indicator is currently marked as 'under development' in the Defra Outcome Indicator Framework:

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/992970/Outcome_Indicator_Framework_for_the_25_Year_Environment_Plan_2021_Update.pdf

In outline the scope of the Phase 3 project includes the following strands of work:

Landscape Change database / Indicator work

1. Examining the complementarity between the NCA Landscape Change indicator (database) and the NCA experiential/visual indicator and undertake a comparative analysis to understand what each strand of analysis tells us about change in the same NCAs, to inform the content of landscape and waterscape character change reporting.
2. Setting up a data management user interface for the NCA landscape change database and NCA experiential/visual indicator which will allow for semi-automatic updating of the indicators at future intervals, and for both to be accommodated within the architecture of the existing NCA landscape change database as a 'hub' for user access to landscape change evidence. To include liaison with NE data services, to provide recommendations on the transferral of both indicator systems into Natural England.
3. Shaping the details of the content of the Defra Outcome Indicator Framework indicator G1 through distilling findings into a package of baseline landscape and waterscape character change reporting that explores:
 - opportunities to show more detailed spatial and quantitative information where that is available
 - drawing on findings from the Monitoring Environmental Outcomes in Protected Landscapes (MEOPL) programme;
 - preparing a matrix of individual 'NCA monitoring objectives' across landscape change themes aligned with Statements of Environmental Opportunity
4. Preparing and implement with Natural England a targeted stakeholder presentation on the approach, method and findings to date for the indicator G1: Changes to landscape and waterscape character.
5. Providing a contextual summary report on changes to landscape and waterscape character identified in the baseline evaluation whilst also linking back to previous evidence such as Countryside Quality Counts (1992 – 2003) and the 2010 narrative and 2018 update for England's Changing Landscapes. The prime purpose of this work is to provide deeper context for the G1 indicator reporting, and for this to be an accessible and engaging document for a range of audiences.

The commission aims to bring together a wide range of evidence, and to package it into robustly evidenced reporting of changes to landscape and waterscape character, that is:

- in accordance with the Defra Outcome Indicator Framework publishing requirements,
- able to quantify indicators and change in them over multiple time points
- engaging and accessible to a range of audiences
- capable of accommodating future additional elements of reporting as they become available.

NCA Profile Platform

6. Continue to improve on the work delivered at Phase 2 to produce an interactive, accessible digital NCA profile platform. This will help achieve NE's aim to provide a "first stop shop" portal for local partners and partnerships to access a wide range of relevant information and advice on their landscapes. This will, for example, include Local Nature Recovery Strategies and Plans or designated landscape Management Plans.

The successful Contractor will be expected to engage closely with the NE project team, including data services staff. The project will commence with an inception meeting at which the full scope of the project will be discussed to confirm the detailed approach and timescales for each work strand. Fortnightly meetings will be expected to report on progress.

Suppliers are required to use their relevant expertise and innovative approaches to progress the following inter-related tasks which will need to be appropriately sequenced:

Tasks and required outputs for the Landscape Change database/indicator work

Task 1: Comparative analysis and assessment of synergies and opportunities between the NCA landscape change indicator (developed with LUC) and NCA experiential/visual indicator (developed with UK CEH).

In broad terms, the *NCA landscape change database indicator* includes all the datasets that inform the analysis and evaluation of subset indicators of change associated with landscape change themes per NCA. The *NCA experiential/visual indicator* includes spatial data (for elements that positively or negatively influence physical or cultural factors of landscape character, to show/model changes within NCAs).

This task will involve a collaborative approach to deciding how to combine and represent this indicator, potentially in different ways. It will have a wider aim to explore how to best capture and represent the strengths of each sub-component of the indicator, as well as the final high-level indicator.

- a) This task will examine the complementarity between the NCA Landscape Change indicator (database) and the NCA experiential/visual indicator, identify the opportunities for the results to be related to each other, and undertake the analysis as appropriate to inform the content of the landscape and waterscape character change reporting.
- b) The successful contractor will be required to consult the respective developers of each indicator to fully understand the methods and approaches, and any caveats or limits relevant to investigating how the indicators might be efficiently used alongside each other (rather than necessarily being aligned).

Task 2: Create the user-interface for managing/updating the NCA landscape change indicator and the NCA Experiential Visual Indicator

An NCA Landscape change database and dashboard has been created (using ESRI/webapp capabilities), including an Atlas of landscape change to allow access to data and results within four geographies (NCA, Agricultural Landscape Type, Protected Landscapes, and County). The dashboard is also intended to be a landscape change 'hub' to either accommodate or provide links to relevant interactive spatial indicators or environmental change reporting.

This task includes:

- a) a concise review of other landscape/environmental change reporting materials that are potentially relevant to being accommodated within or linked to Landscape Change Dashboard, followed by appropriate action to implement agreed priority proposals.
- b) A concise review of existing guidance and recommendations followed by preparation of a data management user-interface (e.g. for semi-automatic updating at intervals) for: 1) the NCA Landscape Change Database indicator/atlas and 2) the NCA Experiential/Visual indicator.

These tasks will require close working with the NE project officer and with NE data services. Clarifications of guidance and methods will be required to support recommendations and preparations for smooth transferral of the systems and requirements into Natural England. Timescales for actual transfer of the systems to Natural England will depend on a number of factors so that the systems may need to be temporarily hosted and maintained by the contracted developers until transfer dates are confirmed.

Task 3: Prepare the baseline package of themed reporting on changes to landscape and waterscape character, supported by detailed evidence.

An existing evaluation framework has informed a baseline analysis of current landscape change indicators associated with each of the landscape change themes. The evaluation uses data for 2015 and 2019 (or close as possible to these dates depending on best availability of data), and it includes the package of agri-environment landscape monitoring for 2013 and 2018. The evaluation has been applied to PLs, ALTs, and NCAs. For NCAs (where current data allows) an analysis has been made of the extent to which changes detected are neutral or positively aligned with the aspirations in the NCA Statements of Environmental Opportunity.

This task includes making refinements to the existing evaluations to shape the published baseline G1 indicator, and to help focus future NCA change reporting:

- a) Building on the existing evaluation, aligned with the statements of environmental opportunity, work with Natural England to:
 - I. define clear expectations (or monitoring objectives) for each NCA that can be paired with data to clarify expectations/objectives and be easily measurable in the data – e.g. NCA 1: Increase broadleaved woodland by x % - then the statements are able to report on whether this has been achieved (or is moving towards achieving it)
 - II. provide recommendations for ensuring monitoring objectives are capable of underpinning an outcomes framework (being developed by others)
- b) Distil findings into a baseline package of reporting on changes to landscape and waterscape character in accordance with the requirements of the Defra 25 YEP Outcome Indicator Framework (including data and statistical standards) and to prepare change reporting for overall change at ALT scale and for individual change themes; to include appropriate statistical presentation and accompanying narrative to be presented on the Defra OIF dashboard, and made accessible on the NCA Landscape Change Dashboard, supported by existing detailed reports. The change reporting is required to include data on short and longer- term trends and trajectories in relation to aspirations (or objectives) for landscape change as expressed in the NCA profiles.
- c) Drawing on findings from the Monitoring Environmental Outcomes in Protected Landscapes (MEOPL) programme and any evidence available from a separate piece of work that is reviewing existing literature on indicators and methods for reporting people's (changing) perceptions of landscape character, quality and change. (Annex).

Task 4: Support to NE for a landscape change monitoring stakeholder presentation

Natural England has broad support from partners and stakeholders for its approach to landscape change monitoring; however, the range of key drivers, policy initiatives and related tools have recently emerged. This task will include working with Natural England to:

- a) Provide supporting material for Natural England to run a webinar update to stakeholders (contacts to be identified by Natural England) in November 2022 on progress made on the G1 indicator, and its relevance to other initiatives such as the All-England Assessment and the Protected Landscapes Outcomes Framework., as well as contributing to nature recovery. The successful contractor will be asked to contribute a presentation related to methods and findings as part of the event.
- b) Collate feedback from the webinar that can potentially inform work strands in this baseline commission and build into future versions of the indicator.

Task 5: Prepare a short contextual report on the story of landscape change in England

The outputs from Task 3 above require contextual information telling the story of landscape change in England, linking where appropriate to previous evidence such as Countryside Quality Counts (1992 – 2003) and the 2010 narrative and 2018 update for England's Changing Landscapes as well as agri-environment landscape monitoring. The prime purpose of this work is to provide deeper context for the G1 indicator reporting, and for this to be an accessible and engaging document for a range of audiences.

This task will include:

- a) A concise review of the headline findings from previous landscape monitoring in England and Europe-scale landscape monitoring since 1990. To summarise key contextual changes.
- b) A high-level assessment as to whether the drivers identified as influencing change in the Countryside Quality Counts assessments remain the same or new drivers have emerged since. For example, whether for those NCAs identified as overall 'neglected' are now showing more positive change. The contract is invited to make suggestions for this output, and it may be necessary to use a sample of NCAs per ALT as well as relate findings to the England's Changing Landscapes narrative which uses broad landscape typologies.

Tasks and required outputs for the NCA Profile Platform

The supplier is required to deliver the tasks outlined below in relation to the NCA profiles / profile platform.

1. **Task 1: User testing.** Design a questionnaire to gather feedback from a range of audiences (to be agreed with NE) – both internal and external (including non-professional audiences) on the design, structure and functionality of the new NCA Profile Platform as it currently stands. This should be undertaken at the outset of the contract to help inform the enhancements to the Platform to be considered under this Phase 3 contract. NE will be happy to help co-ordinate internal NE feedback.
2. **Task 2: Enhanced NCA Profile Platform structure and content:** Many of these tasks stem from recommendations from Chapter 5 of the Phase 2 report, and discussions undertaken with LUC at the end of Phase 2. Contractors are asked to clearly set out what will be possible to deliver in the context of available budget, and highlight likely priorities if it is likely that not all tasks could be achieved within this contract. Contractors would also need to ring-fence some time to address any feedback deemed a priority from the User Testing (uncertain at this point in time).

Maps and data

- Include alternate text for all maps and create custom basemaps using ESRI Basemap Designer – ensuring symbology and colours used are in line with accessibility requirements.
- Enhance the Key Facts & Data section with more datasets that could be used to create more data visualisations (maps, charts, tables). This would require liaison with the data holders, as only definitive, maintained datasets should be used. The contractor should discuss options with NE at project inception and set out how many additional datasets are likely to be able to be explored within their quote. This should include:
 - Historic England-British Geological Survey Building Stones Database for England
 - Improved access to NE's [Green & Blue Infrastructure Mapping Database](#) so that it inter-relates more closely to the NCA profiles

- Introduce historic mapping to support the Landscape Change section. This could include 'swipe' tools to show change over time in the same location.
- Enhance information on climate change within the Landscape Change section, potentially pointing the user to sources of further published information/data on the topic (rather than re-writing existing text).
- Include information in the Landscape Change section showing how an individual NCA ranks in comparison to the wider region/country, flagging any particular trends to 'watch out for'.

Structure and operation

Chapter 5 of the Phase 2 report also recommends updates relating to structure and the operation of the platform. Under this phase, we'd like to consider completing the following tasks:

- Include NCA numbers in the search box function on the home page.
- For NCAs with a coastline, include clearer reference to relevant Marine Character Areas (MMO), potentially on the NCA home page or key characteristics section – these references are currently in the Key Facts and Data section only.
- Ensure that the editing environment is as simple and user friendly as possible based on the finalised structure.
- Undertake a thorough check to ensure compatibility with all browsers and devices.
- Update the 'Accessibility Statement' accessed from the Home Page to explain any further enhancements made to the site to assist users with accessibility needs.

Written content

We would welcome ideas from the contractor in terms of how sections may be re-written to bring them up-to-date, enhance their useability and make them accessible wherever possible. Tasks we would like considered under this contract are to:

- Re-write the headline SEOs for all 159 profiles, clearly identifying the priority opportunities that the SEO aims to deliver in each NCA and ensure these directly relate through to the Landscape Change Database. Ensure they are written in such a way (SMART) as to enable them to guide local monitoring activity too. Wherever possible, accessible language should be used.
- Re-design and re-write the Landscape Change section of the NCA Profiles to include direct linkages to the Landscape Change Atlas with an aim to create a seamless operating experience for the user by linking the two strands of the project commission. Include information on landscape change post-2015, with reference to the information held in the Atlas (this could be data-led with arrows showing direction of travel).
- Review and refresh the content for the Ecosystem Services section, updating data where required and including new accessible text relating to the natural capital assets that the ecosystem services flow from. This should where possible provide strong links to available NE natural capital and ecosystem services data and other relevant external sources of data and information.
- Rework the Analysis section to be shorter and more user friendly. This could involve

splitting it into several different sections, instead of just the one as it currently stands. Include a different graphic to replace the current table at the top of this section.

- Update textual content that references data from a fixed point in time. Ideally these would be reworked or removed so that this information would only be presented on the maps/dashboards making it easier to maintain the content.

3. Task 3: Liaison with NE's data services team

In liaison with NE data services team, identify the requirements to allow for semi-automatic updating of the key facts and data at future intervals, accommodated within the web platform architecture. This functionality should enhance links through to the NCA database as a 'hub' for user access to landscape evidence that can help inform local and strategic environmental decision making. Also work with data services to understand how and when the platform could be transferred to NE's ownership/management at a future date. NE will aim to include a member of data services on the project steering group, or attend specific meetings as appropriate.

4. Task 4: Reporting

The following reporting outputs are required (building on similar Phase 2 outputs):

- A summary of the results of User Testing.
- Further development of a stand-alone user guide to accompany the NCA profiles to illustrate the full potential of the revised product to help inform local and national decision making.
- The further development of in-house operating guidance to assist with the updating and maintenance of the NCA profile on-line platform, including how to manage additional content added during this phase of the project.
- A Phase 3 report (building on Phase 2) that explores and sets out the next steps recommendations (report format MS Word and PDF), for further enhancement of the NCA product through potential future phases.

5. Meetings

In addition to fortnightly progress meetings, contractors should factor in time to present the results of the User Testing and subsequent changes made to the platform to our Digital & Technology Standards Assurance team – likely at end of March/early April 2023.

In responding to this specification, contractors are required to set out the following:

- A detailed breakdown of key tasks indicating milestone deliverables
- A payment and invoicing schedule (costs inclusive of VAT).

3. How the Contract works

3.1 The Order Form is an offer by the Authority to purchase the Deliverables subject to and in accordance with the terms and conditions of the Contract.

3.2 The Supplier is deemed to accept the offer in the Order Form when the Authority receives a copy of the Order Form signed by the Supplier.

3.3 The Supplier warrants and represents that its Tender Submission and all statements made and documents submitted as part of the procurement of Deliverables are and remain true and accurate.

4. What needs to be delivered

4.1 All Deliverables

(a) The Supplier must provide Deliverables: (i) in accordance with the Specification and Tender Submission; (ii) to a professional standard; (iii) using all reasonable skill and care; (iv) using Good Industry Practice; (v) using its own policies, processes and internal quality control measures as long as they don't conflict with the Contract; (vi) in accordance with such policies and procedures of the Authority (as amended from time to time) that may be specified in the Contract (vii) on the dates agreed; and (viii) in compliance with all applicable Law.

(b) Without prejudice to the Specification the Supplier must provide Deliverables with a warranty of at least 90 days (or longer where the Supplier offers a longer warranty period to the Authority) from Delivery against all obvious damage or defects.

4.2 Goods clauses

(a) All Goods Delivered must be capable of meeting the requirements set out in the Specification and be either (i) new and of recent origin, (ii) reused or (iii) recycled.

(b) All manufacturer warranties covering the Goods will be assigned to the Authority on request and for free.

(c) The Supplier transfers ownership of the Goods on completion of Delivery (including off-loading and stacking) or payment for those Goods, whichever is earlier.

(d) Risk in the Goods transfers to the Authority on Delivery but remains with the Supplier if the Authority notices any damage or defect following Delivery and lets the Supplier know within three Working Days of Delivery.

(e) The Supplier must have full and unrestricted ownership of the Goods at the time of transfer of ownership.

(f) The Supplier must Deliver the Goods on the date and to the specified location during the Authority's working hours.

(g) The Supplier, its subcontractor(s) and supply chain must minimise packaging used whilst providing sufficient packaging for the Goods to reach the point of Delivery safely and undamaged. The Supplier must take back any primary packaging where it is possible to do so. Packaging must be 100% re-usable, recyclable or compostable, use recycled content where reasonably practicable and support the Government's commitment to eliminate single use plastic.

(h) All Deliveries must have a delivery note attached that specifies the order number, type, quantity of Goods, contact and details of traceability through the supply chain.

(i) The Supplier must provide all tools, information and instructions the Authority needs to make use of the Goods. This will include, where appropriate, any operation manuals which, unless specified otherwise, will be written in English and provided in electronic form.

(j) The Supplier will notify the Authority of any request that Goods are returned to it or the manufacturer after the discovery of safety issues or defects that might endanger health or hinder performance and shall indemnify the Authority against the costs arising as a result of any such request. Goods must be disposed of in line with the waste management hierarchy as set out in Law. The Supplier will provide evidence and transparency of the items and routes used for disposal to the Authority on request.

(k) The Authority can cancel any order or part order of Goods which have not been Delivered. If the Authority gives less than 14 calendar days' notice then it will pay the Supplier's reasonable and proven costs already incurred on the cancelled order as long as the Supplier takes all reasonable steps to minimise these costs.

(l) The Supplier must at its own cost repair, replace, refund or substitute (at the Authority's option and request) any Goods that the Authority rejects because they don't conform with clause 4.2. If the Supplier doesn't do this it will pay the Authority's costs including repair or re-supply by a third party.

(m) The Authority will not be liable for any actions, claims, costs and expenses incurred by the Supplier or any third party during Delivery of the Goods unless and to the extent that it is

caused by negligence or other wrongful act of the Authority or its servant or agent. If the Authority suffers or incurs any damage or injury (whether fatal or otherwise) occurring in the course of Delivery or installation then the Supplier shall indemnify from all losses, damages, costs or expenses (including professional fees and fines) which arise as a result of or in connection with such damage or injury where it is attributable to any act or omission of the Supplier or, where related to the Contract, any of its subcontractors or suppliers.

4.3 Services clauses

- (c) The Authority must provide the Supplier Staff with reasonable access to its premises at such reasonable times agreed with the Authority for the purpose of supplying the Services.

- (f) The Supplier must take all reasonable care to ensure performance does not disrupt the Authority's operations, employees or other contractors.
- (g) On completion of the Services, the Supplier is responsible for leaving the Authority's premises in a clean, safe and tidy condition and making good any damage that it has caused to the Authority's premises or property, other than fair wear and tear and any pre-existing cleanliness, safety or tidiness issue at the Authority's premises that existed before the commencement of the Term.
- (h) The Supplier must ensure all Services, and anything used to deliver the Services, are of the required quality and free from damage or defects.
- (i) The Authority is entitled to withhold payment for partially or undelivered Services or for Services which are not delivered in accordance with the Contract but doing so does not stop it from using its other rights under the Contract.

5. Pricing and payments

Details of the Authority's requirements for a valid invoice at the Start Date are set out in Annex 2.

5.5 If there is a dispute between the Parties as to the amount invoiced, the Authority shall pay the undisputed amount. The Supplier shall not suspend the provision of the Deliverables unless the Supplier is entitled to terminate the Contract for a failure to pay undisputed sums in accordance with clause 11.6. Any disputed amounts shall be resolved through the dispute resolution procedure detailed in clause 35.

5.6 If any sum of money is recoverable from or payable by the Supplier under the Contract (including any sum which the Supplier is liable to pay to the Authority in respect of any breach of the Contract), that sum may be deducted unilaterally by the Authority from any sum then due, or which may become due, to the Supplier under the Contract or under any other agreement or contract with the Authority. The Supplier shall not be entitled to assert any credit, set-off or counterclaim against the Authority in order to justify withholding payment of any such amount in whole or in part.

5.7 The Supplier must ensure that its subcontractors and supply chain are paid, in full, within 30 days of receipt of a valid, undisputed invoice. If this doesn't happen, the Authority can publish the details of the late payment or non-payment.

6. The Authority's obligations to the Supplier

6.1 If the Supplier fails to comply with the Contract as a result of an Authority Cause:

- (b) as to the sustainability or health and safety conduct of the Supplier, subcontractors and supply chain in the performance of the Contract;

then the Authority may:

(i) require that the Supplier provide to the Authority (for its approval) a plan setting out how the Supplier will ensure continued performance of the Contract (in the case of (a)) or improve its sustainability conduct or performance (in the case of (b)) and the Supplier will make changes to such plan as reasonably required by the Authority and once it is agreed then the Supplier shall act in accordance with such plan and report to the Authority on demand
