

Annex 1 – Conference Room and Auditorium Details

Conference Room 1GD

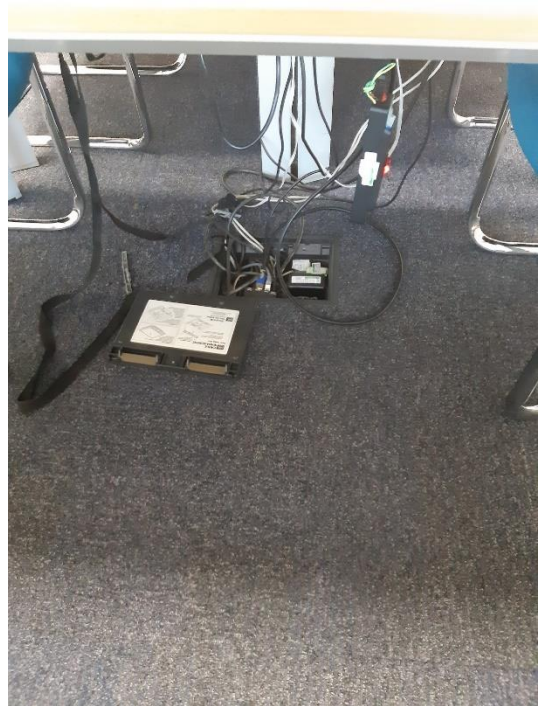

Floor port is positioned within 1 metre of the screen

Walls are brick and plaster; cables will be concealed in surface trunking, under the floor and in the void in the suspended ceiling

This room is equipped with a ceiling mounted projector, speakers and retractable screen (see photos)

Teams Touch Panel will be sited on the table cluster above the floor box and the MCore Mini-PC will be fixed to the underside of the tables using self-adhesive hook and loop tape

The Auditorium

Commissioned in 2016, this impressive, state-of-the-art, partially-raked events auditorium is perfect for film screenings, lectures and theatre-style meetings. This first floor space features the latest integrated AV equipment: a five-metre screen and ceiling projector, wireless mics, audio recording capability, free-standing lectern and induction loop.

Clever design enables the room to open out (see below) and connect to the adjacent room, the Learning Room, allowing for larger groups up to 250.
