## Joint Schedule 3 (Insurance Requirements)

### 1. The insurance you need to have

1.1 The Supplier shall take out and maintain or procure the taking out and maintenance of the insurances as set out in the Annex to this Schedule, any additional insurances required under an Order Contract (specified in the applicable Order Form) ("**Additional Insurances**") and any other insurances as may be required by applicable Law (together the "**Insurances**"). The Supplier shall ensure that each of the Insurances is effective no later than:

- 1.1.1 the DPS Start Date in respect of those Insurances set out in the Annex to this Schedule and those required by applicable Law; and
- 1.1.2 the Order Contract Effective Date in respect of the Additional Insurances.

1.2 The Insurances shall be:

- 1.2.1 maintained in accordance with Good Industry Practice;
- 1.2.2 (so far as is reasonably practicable) on terms no less favourable than those generally available to a prudent contractor in respect of risks insured in the international insurance market from time to time;
- 1.2.3 taken out and maintained with insurers of good financial standing and good repute in the international insurance market; and
- 1.2.4 maintained for at least six (6) years after the End Date.

1.3 The Supplier shall ensure that the public and products liability policy contain an indemnity to principals clause under which the Relevant Authority shall be indemnified in respect of claims made against the Relevant Authority in respect of death or bodily injury or third party property damage arising out of or in connection with the Deliverables and for which the Supplier is legally liable.

### 2. How to manage the insurance

2.1 Without limiting the other provisions of this Contract, the Supplier shall:

- 2.1.1 take or procure the taking of all reasonable risk management and risk control measures in relation to Deliverables as it would be reasonable to expect of a prudent contractor acting in accordance with Good Industry Practice, including the investigation and reports of relevant claims to insurers;
- 2.1.2 promptly notify the insurers in writing of any relevant material fact under any Insurances of which the Supplier is or becomes aware; and
- 2.1.3 hold all policies in respect of the Insurances and cause any insurance broker effecting the Insurances to hold any insurance slips and other

evidence of placing cover representing any of the Insurances to which it is a party.

### **3. What happens if you aren't insured**

- 3.1 The Supplier shall not take any action or fail to take any action or (insofar as is reasonably within its power) permit anything to occur in relation to it which would entitle any insurer to refuse to pay any claim under any of the Insurances.
- 3.2 Where the Supplier has failed to purchase or maintain any of the Insurances in full force and effect, the Relevant Authority may elect (but shall not be obliged) following written notice to the Supplier to purchase the relevant Insurances and recover the reasonable premium and other reasonable costs incurred in connection therewith as a debt due from the Supplier.

### **4. Evidence of insurance you must provide**

- 4.1 The Supplier shall upon the Start Date and within 15 Working Days after the renewal of each of the Insurances, provide evidence, in a form satisfactory to the Relevant Authority, that the Insurances are in force and effect and meet in full the requirements of this Schedule.

### **5. Making sure you are insured to the required amount**

- 5.1 The Supplier shall ensure that any Insurances which are stated to have a minimum limit "in the aggregate" are maintained at all times for the minimum limit of indemnity specified in this Contract and if any claims are made which do not relate to this Contract then the Supplier shall notify the Relevant Authority and provide details of its proposed solution for maintaining the minimum limit of indemnity.

### **6. Cancelled Insurance**

- 6.1 The Supplier shall notify the Relevant Authority in writing at least five (5) Working Days prior to the cancellation, suspension, termination or nonrenewal of any of the Insurances.
- 6.2 The Supplier shall ensure that nothing is done which would entitle the relevant insurer to cancel, rescind or suspend any insurance or cover, or to treat any insurance, cover or claim as voided in whole or part. The Supplier shall use all reasonable endeavours to notify the Relevant Authority (subject to third party confidentiality obligations) as soon as practicable when it becomes aware of any relevant fact, circumstance or matter which has caused, or is reasonably likely to provide grounds to, the relevant insurer to give notice to cancel, rescind, suspend or void any insurance, or any cover or claim under any insurance in whole or in part.

### **7. Insurance claims**

- 7.1 The Supplier shall promptly notify to insurers any matter arising from, or in relation to, the Deliverables, or each Contract for which it may be entitled to

claim under any of the Insurances. In the event that the Relevant Authority receives a claim relating to or arising out of a Contract or the Deliverables, the Supplier shall co-operate with the Relevant Authority and assist it in dealing with such claims including without limitation providing information and documentation in a timely manner.

- 7.2 Except where the Relevant Authority is the claimant party, the Supplier shall give the Relevant Authority notice within twenty (20) Working Days after any insurance claim in excess of 10% of the sum required to be insured pursuant to Paragraph 5.1 relating to or arising out of the provision of the Deliverables or this Contract on any of the Insurances or which, but for the application of the applicable policy excess, would be made on any of the Insurances and (if required by the Relevant Authority) full details of the incident giving rise to the claim.
- 7.3 Where any Insurance requires payment of a premium, the Supplier shall be liable for and shall promptly pay such premium.
- 7.4 Where any Insurance is subject to an excess or deductible below which the indemnity from insurers is excluded, the Supplier shall be liable for such excess or deductible. The Supplier shall not be entitled to recover from the Relevant Authority any sum paid by way of excess or deductible under the Insurances whether under the terms of this Contract or otherwise.

## **ANNEX: REQUIRED INSURANCES**

- (a) all employer's and NHSPS Fair Deal Employees' contributions intended to go to the NHSPS are kept in a separate bank account; and
  - (b) the Pension Benefits and Premature Retirement Rights of NHSPS Fair Deal Employees are not adversely affected.
- 2.3 The Supplier must supply to the Buyer a complete copy of each Direction Letter/Determination within 5 Working Days of receipt of the Direction Letter/Determination.

- 2.5 The Supplier will (and will procure that its Subcontractors (if any) will) comply with the terms of the Direction Letter/Determination, the NHS Pension Scheme Regulations (including any terms which change as a result of changes in Law) and any relevant policy issued by the Department of Health and Social Care in respect of the NHSPS Fair Deal Employees for so long as it remains bound by the terms of any such Direction Letter/Determination.

### **5. What the buyer can do if the Supplier breaches its pension obligations**

- 5.1 The Supplier agrees that the Buyer is entitled to make arrangements with NHS Pensions for the Buyer to be notified if the Supplier (or its Subcontractor) breaches the terms of its Direction Letter/Determination. ## Annex D3:

### Local Government Pension Schemes (LGPS)

Note the LGPS unlike the CSPA & NHSPS is a funded scheme which has associated cost implications as follows:

There is not 1 LGPS but approx. 90 different Funds, each with their own separate Scheme Employer and Administering Buyer, it is important to identify the correct one(s) and amend the definition of "Fund" accordingly.

It is important to check whether CCS and or the Buyer can actually participate in the LGPS. Where a government department is taking on services which were formerly the responsibility of a Local Authority it may be necessary to obtain secretary of state approval for participation in the LGPS, this is because the services are being provided to Gov. Dept. and not to a Local Authority.

Unlike New Fair Deal the 2007 Best Value pension direction does not provide a right to bulk transfer past service. Whilst typically before the 2007 direction LA did provide such a right, it is a significant additional cost and therefore bulk transfer wording has been excluded. If required take legal advice due to the exceptionally high costs which can result from a requirement to provide bulk transfers.]

4.6 A version of an Exit Plan agreed between the parties shall not be superseded by any draft submitted by the Supplier.

## 5. Termination Assistance

5.1 The Buyer shall be entitled to require the provision of Termination Assistance at any time during the Contract Period by giving written notice to the Supplier (a "**Termination Assistance Notice**") at least four (4) Months prior to the Expiry Date or as soon as reasonably practicable (but in any event, not later than one (1) Month) following the service by either Party of a Termination Notice. - 6.3 If the Supplier demonstrates to the Buyer's reasonable satisfaction that the provision of the Termination Assistance will have a material, unavoidable adverse effect on the Supplier's ability to meet one or more particular Service Levels, the Parties shall vary the relevant Service Levels and/or the applicable Service Credits accordingly.

## **7. Obligations when the contract is terminated**

- 7.1 The Supplier shall comply with all of its obligations contained in the Exit Plan.

### **2. About the Office for Health Improvement and Disparities (OHID)**

2.1 OHID was established on 1 October 2021 as part of the Department of Health and Social Care (DHSC), bringing together expert advice, analysis and evidence with policy development and implementation to shape and drive health improvement and equalities priorities for government. OHID’s focus is to improve the nation’s health so that everyone can expect to live more of life in good health and on levelling up health disparities to break the link between background and prospects for a healthy life. OHID works across DHSC, the rest of government, the healthcare system, local government, industry, and wider society to shift our focus towards preventing ill health, in particular in the places and communities where there are the most significant disparities.

2.2 OHID focuses on the following priorities:

- identify and address health disparities, focusing on those groups and areas where health inequalities have greatest effect;
- take action on the biggest preventable risk factors for ill health and premature death including tobacco, obesity and harmful use of alcohol and drugs;
- work with the NHS and local government to improve access to the services which detect and act on health risks and conditions, as early as possible;
- develop strong partnerships across government, communities, industry and employers, to act on the wider factors that contribute to people's health, such as work, housing and education;
- drive innovation in health improvement, harnessing the best of technology, analytics, and innovations in policy and delivery, to help deliver change where it is needed most.

### **3. Diet and Nutrition Policy Background/Context**

- 3.1 Responsibility for the National Diet and Nutrition Survey rolling programme (NDNS RP) transferred from Public Health England into the Diet, Obesity and Healthy Behaviours (DOHB) Directorate in OHID on 1 October 2021. The mission of the DOHB Directorate is to increase healthy life expectancy by improving diets, reducing excess calorie consumption and promoting physical activity for everyone, but particularly for those groups and individuals most at risk of diet and weight-related ill health, and those with the highest levels of inactivity. This supports the delivery of DHSC Strategic Priority 4: "to improve, protect and level up the nation's health, including through reducing health disparities."
- 3.2 The DOHB Directorate is responsible for building the evidence base around healthy weight and healthy diet. NDNS is a key part of this, providing essential evidence on food consumption, nutrient intakes and nutritional status of the UK population which is required to identify and address nutritional issues in the population, to support the development of interventions and contribute to an assessment of progress.
- 3.3 The Scottish Government (Food Standards Scotland), the Welsh Government and Food Standards Agency (FSA) in Northern Ireland are responsible for nutrition policy in Scotland, Wales and Northern Ireland, respectively.
- 3.4 Information for consumers on diet and nutrition is published on the NHS website: <http://www.nhs.uk/livewell/healthy-eating/Pages/Healthyeating.aspx>

### **4. NDNS Background/Context**

- 4.1 The NDNS programme was originally set up in the early 1990s, by the Ministry of Agriculture, Fisheries and Food (MAFF) and the Department of Health, following the 1986/87 Dietary and Nutritional Survey of British Adults<sup>1</sup> the first survey of this type in Britain. In its original form in the 1990s, the NDNS was a series of stand-alone, cross-

sectional surveys, split into four separate age groups: pre-school children<sup>2</sup>, school-aged children and young people<sup>3</sup>; adults aged 19-64 years<sup>4,5,6,7,8</sup>; and older adults aged 65 years and over<sup>9</sup>. Responsibility for the programme passed from MAFF to the FSA in 2000.

- 4.2 The NDNS moved to a rolling programme (RP) format in 2007 in order to strengthen the ability to track changes in diet and nutrition over time and provide flexibility to respond more rapidly to changing policy needs. Fieldwork for year 1 of the RP began in April 2008. The first contract ran for four years of fieldwork (years 1-4 – 2008/09-2011/12) and was extended to include year 5 (2012/13). The second contract was commissioned in 2012 by the Department of Health and covered a further four years of fieldwork from year 6 (2013/14) to year 9 (2016/17) and was extended to include year 10 (2017/18). The current contract was commissioned by Public Health England in 2017 and covered a further four years of fieldwork from year 11 (2018/19) to year 14 (2021/22) and has been extended to include year 15 (2022/23).
- 4.3 Results from years 1-4 (combined) of the UK NDNS RP (2008/09-2011/12) were published in May 2014<sup>10</sup>. This was followed by reports of UK results for fieldwork years 5&6 (2012/13-2013/14) in September 2016<sup>11</sup>, years 7&8 (2014/15-2015/16) in March 2018<sup>12</sup> and years 9-11 (2016/17-2018/19) in December 2020<sup>13</sup>. A supplementary report on blood folate levels for the UK and devolved countries was first published in March 2015 and republished in 2017<sup>14</sup>. A full report covering years 5-9 with an assessment of time trends since the start of the RP and an analysis of income differences was published in January 2019<sup>15</sup>.
- 4.4 Additional sample has been collected in Scotland, Wales and Northern Ireland to allow separate reporting of results. As part of the first contract, sample boosts were included and reported for Scotland<sup>16</sup>, Northern Ireland<sup>17</sup> and Wales<sup>18</sup>. For the second contract sample boosts were included and reported for Northern Ireland<sup>19</sup> and Wales<sup>20</sup>. For the current contract a sample boost has been included for Northern Ireland only.
- 4.5 Under the second contract, reports of salt intakes based on urinary sodium in adults in England and Scotland were published in March 2016<sup>21, 22</sup>, and in Northern Ireland published in July 2016<sup>23</sup>. The latest report of salt intakes based on urinary sodium in adults in England was published in March 2020 under the current contract<sup>24</sup>. Previous reports were published for the UK<sup>25</sup>, England<sup>26, 27</sup>, Scotland<sup>28, 29</sup> and Wales<sup>30</sup>.
- 4.6 In year 12 (2019/20) a major change was made to the dietary data collection methodology used in NDNS, moving from a four-day paper diary to an automated 24-hour recall using a self-completion web-based tool, collected on 4 non-consecutive days. A first stage evaluation report has been published<sup>31</sup>. See paragraph 14.5 for more details. The stage 2 evaluation report, including an assessment of misreporting, is due to be published in the next couple of months.

- 4.7 Fieldwork in the current contract has been disrupted by the COVID-19 pandemic. Year 12 fieldwork began in October 2019 but was suspended in March 2020 after about 50% of the data had been collected and was not restarted. The start of Year 13 fieldwork (2020/21) was delayed by 9 months and resumed with restrictions on face to face contact with participants. Following a catch-up period, Year 15 fieldwork is due to complete on schedule in 2023.
- 4.8 A follow up study of previous NDNS participants was carried out in August to October 2020, when regular fieldwork was suspended. The report of this study, 'Diet and Physical Activity, a follow-up study during Covid-19', was published in September 2021<sup>32</sup>.
- 4.9 The evidence base provided by NDNS enables OHID to deliver key priorities including commitments in the Childhood Obesity Plan and the 2019 prevention Green Paper to tackle obesity, reduce sugar intakes, deliver diet and healthy lifestyle improvements, and enable national, local and cross Government initiatives on diet and healthy eating. NDNS is the only UK survey to provide detailed, quantitative and nationally representative information on food consumption, nutrient intakes and biochemical measures of nutritional status allowing breakdown by age and sex and analysis of the distribution of intakes and status in the population and contributors to nutrient intake. The survey provides the evidence needed to:
- support nutritional risk assessments by the independent Scientific Advisory Committee on Nutrition;
  - support modelling of different strategies by policy developers and risk managers;
  - monitor and evaluate the impact of policy initiatives on obesity and food safety.
- 4.10 NDNS data are essential to the FSA for carrying out food chemical exposure assessments to help protect consumer safety. Data on the level of a chemical in a food is combined with data on the consumption pattern of the food (from NDNS) in order to estimate the amount of the chemical ingested by different population groups. Consumption estimates for specific food types are also used to assess risk from microbiological pathogens and other hazards. NDNS data enable the FSA to protect consumers by making appropriate and proportionate risk assessments and responding rapidly to emergencies.

## THE REQUIREMENTS

### 5. Introduction

- 5.1 The DHSC is seeking to appoint a suitably skilled, qualified and experienced Supplier to deliver the NDNS Rolling Programme for a further five years (fieldwork years 16 to

20 - 2024-2028). The Supplier will be required to design the survey, undertake fieldwork, analyse results and report on the findings. The requirement includes preparatory work, five years of fieldwork, data collection, analysis and reporting. The Commissioning Authority is the Department of Health and Social Care (DHSC), with project oversight and delivery from the Office for Health Improvement and Disparities (OHID) in DHSC and the Food Standards Agency (FSA) who co-fund the RP.

- 5.2 Dietary data collection in the current contract is due to finish in March 2023. It had been intended that data collection for this contract would run consecutively, starting in April 2023. However due to delays in launching this procurement there will be a gap in data collection. Provided that a contract is signed in summer 2023, the Buyer would like to start fieldwork in January 2024 and move the annual survey cycle from financial to calendar year, at least for the duration of this contract.

## **6. Data Generated Under this Contract**

- 6.1 The purpose of the NDNS RP is to provide data to enable monitoring of the diet and nutritional status of the UK population and to provide the evidence base for developing government policy. Specifically, the NDNS dataset must allow OHID and the FSA to:
- Identify nutritional issues and assess dietary characteristics in the population as a whole and in population sub-groups;
  - Measure progress towards achieving dietary recommendations;
  - Monitor trends in food consumption, nutrient intake and nutritional status in different population age groups;
  - Describe the characteristics of those with intakes and/or status of specific nutrients that are above or below the national average;
  - Assess the extent to which the diet of the population as a whole, and of sub-groups, deviates from UK dietary recommendations;
  - Assess the sources of food in the diet including on the contribution of the out of home sector;
  - Calculate likely exposure to natural toxicants, contaminants, additives and other food chemicals for risk assessment.
- 6.2 In order to meet these requirements, the following data are required in a representative sample of the UK population.
- Detailed, quantitative information on food consumption, nutrient intakes, foods contributing to nutrient intakes and the contribution of the retail and out of home sectors to the diet
  - Measurements of blood and urine indices that give evidence of nutritional status, or that are dietary biomarkers;
  - Height, weight and other measurements of body size;
  - Socio-demographic characteristics and other contextual information such as lifestyle factors and oral health impacting on diet to aid interpretation of the data

- 6.3 The NDNS RP will have completed fifteen years fieldwork (2008/09-2022/23) when the new contract begins. The Buyer expects the data generated in the new contract to be, as far as possible, comparable with data generated in the current contract so that trends over time can be monitored. However, the Buyer recognises the importance of innovation and method improvement and that in some areas this may override the desire for continuity. The Buyer requires that the dietary assessment tool used in the current contract (Intake 24) should be used in the new contract.
- 6.4 The successful supplier will have access to dataset formats, specifications for variables and other supporting documentation to facilitate comparability.
- 6.5 Requirements for this contract are split into core and non-core components. Non-core components should be costed separately.

## **7. Core components and supporting activities**

- 7.1 In order to collect the data required, the survey will need to include the following core components:
- Background interview on dietary habits and other characteristics including socio-demographic status, lifestyle, and physical activity (section 13);
  - Dietary assessment for four non-consecutive days using the web-based self-completion 24-hour recall tool Intake 24, to provide a detailed, quantitative estimate of food consumption and nutrient intake; (section 14);
  - Assessment of misreporting (section 17);
  - Physical measurements: height (including infant length and demispan where indicated) weight, waist circumference; (section 18);
  - Single (spot) urine sample for analysis of iodine (section 19);
  - Blood sample for analysis of multiple measures of nutritional status (section 20).
- 7.2 Core supporting activities
- Maintenance and updating of Intake 24 and underlying databases (section 14-15);
  - Replacement of nutrient databank software (paragraph 15.7);
  - Nutrient analysis to update composition values for key commodities (section 16);
  - Laboratory analysis of blood and urine samples (section 21)
  - Data analysis and reporting (section 22);
  - Data delivery and archiving (section 24).

## **8. Non-core components and supporting activities**

- 8.1 The following supporting activities may be required and should be costed separately:
- Assessment of salt intakes in adults in England based on 24-hour urinary sodium (section 28)
  - Quarterly reporting of key diet and nutrition variables (section 29)

## **9. Population coverage required**

- 9.1 The NDNS programme will include adults and children of all ages from 1 year (12 months) upwards living in private households in the UK. For the current and previous contract the lower age limit has been 18 months. For this contract the Buyer wishes to include children from the age of 1 year (12 months) in the programme.
- 9.2 In addition, the Buyer would like the Supplier to appraise the inclusion of pregnant and lactating women in the sample. Pregnant and lactating women have been excluded from NDNS RP until now but the Buyer wishes to consider including this group in the sample for this contract with separate analysis and reporting. There is no requirement for a separate sampling strategy to identify and recruit this group and the Buyer recognises that numbers identified and recruited will be small.
- 9.3 The following population groups are excluded from the programme:
- Infants and children aged under 12 months
  - People living in institutions such as children's homes, prisons, residential homes for older people, hospitals
  - Homeless people and others with no fixed address

## **10. Sample design and sample size requirements**

- 10.1 The sample for the NDNS must be selected by a random probability method and designed to achieve a sample that is representative of and generalisable to the UK population living in private households including (for example): age distribution, sex, National Statistics Socio-Economic Classification (NS-SEC) and urban / rural distribution. UK population includes England, Scotland (including the Highlands and Islands), Wales and Northern Ireland.
- 10.2 The target sample size for the current and previous contracts was 1000 individuals (500 adults and 500 children) per year completing a dietary assessment. However, the move from a paper diary to an automated online 24-hour recall for dietary assessment provides opportunities for scaling up the sample size to benefit from the cost savings brought by an automated tool. Therefore, for this contract we are looking for a UK sample size of 5000 per year for the dietary assessment or as near to that sample size as the available budget allows. The benefits of increasing the sample size to this level are that it will allow a move to annual reporting of dietary data (see section 22), more detailed analysis of population sub-groups and an ability to detect changes over time with more confidence. We would like the increased overall sample size to impact across all age groups to give better confidence in the data.
- 10.3 Sufficient blood samples and spot urine samples are required to allow for biennial reporting of blood and urine analytes in all age/sex groups.

- 10.4 It is important that the survey design takes account of any seasonal differences in dietary habits and/or physiological or biochemical measures. In the current and previous contracts data has been collected all year round. We anticipate that this would continue but could consider alternative designs if these would be more efficient and would not cause any comparability issues

## **11. Additional Requirements**

### **Devolved country boosts.**

- 11.1 The sample design must allow for sample boosts to collect data from additional participants in the devolved countries if required. A sample boost in Northern Ireland is being funded in the current contract.
- 11.2 No sample boosts are confirmed at this point and there is no estimated value. If required they will be subject to a separate request for costing, internal approval and contract variation.

### **Other**

- 11.3 In addition, supplementary sample boosts may be requested to include the collection of data from other population groups and/or additional components not detailed in this specification to provide in depth focus on particular issues. There is no estimated value for any such boosts at present and if inclusion is required, they will be subject to a separate request for costing and contract variation.

## **CURRENT DATA COLLECTION METHODS AND ISSUES TO CONSIDER**

### **12. Face to face versus remote methods of recruitment and data collection**

- 12.1 For the first 11 years of the rolling programme all data was collected face to face by the fieldworker in the participant's home. From year 12 the dietary assessment moved online with only the first recall completed with the fieldworker present. In 2020/21 the COVID-19 pandemic necessitated a temporary move to remote data collection. When fieldwork resumed in late 2020 interviewers recruited participants on the doorstep and made an appointment to conduct the CAPI interview by phone. All recalls were completed online by the participant. Face to face interviewing resumed in early 2022 after COVID restrictions eased with an option for remote interviewing for participants who did not wish for the interviewer to enter their home.
- 12.2 The Buyer recognises that moving to remote recruitment and reducing or even eliminating face to face fieldworker visits for collection of interview and dietary data would bring significant cost savings which could be used to increase the sample size. However, there is also a concern about poorer response to remote recruitment methods compared with face to face methods, lower engagement by participants and potentially poorer data quality. In particular there is a concern that lower socio-economic groups

who may already be underrepresented in the sample may be even more poorly represented if remote recruitment methods are relied on. Suppliers are asked to consider these issues in proposing recruitment and data collection methods.

### **13. Background interview**

13.1 Background information is required on dietary habits, socio-demographic characteristics and lifestyle factors, including physical activity, that could affect or interact with participants' diet. In the current and previous contracts this information was collected using face to face Computer Assisted Personal Interviewing (CAPI) with the participant and additionally with the main food provider in the household (if this is not the participant). As noted above, interviews were conducted face to face before 2020, moved to telephone during the COVID period and are now largely face to face. Self completion questionnaires have also been used for sensitive topics such as smoking and alcohol use in young people.

13.2 The detailed content of the questionnaires will be developed by the Supplier in consultation with OHID and FSA. Comparability with questions asked in previous survey years will be important to maintain the time series but it may be necessary to change questions to meet evolving policy needs and/or to introduce new question topics. Examples of topics likely to be required are:

- Basic socio-demographic information on the participant and their household in order to assign the socio-economic classification to the household and describe the characteristics of the sample.
- Background information on the participant's usual eating habits to describe the characteristics of the sample and to help interpret the dietary assessment (such as vegetarian/vegan, dieting to lose weight, use of salt). Frequency information on foods not consumed every day such as red meat, oily fish to help estimate habitual intakes
- Social and domestic circumstances that may influence participant's food consumption and nutritional status, such as use of school meals, use of early years provision such as nurseries, child minders
- Household food security; impact of cost of living pressures
- Frequency of consumption of food and drink from the out of home sector and use of food delivery services
- Details of specific eating habits and food preparation practices that might affect exposure to food chemicals. Current questions include frequency of consumption of rarely consumed foods that are unlikely to feature in a four day dietary assessment.
- Long term physical or mental health conditions and the extent to which they affect day to day activities

- Details of dietary supplements consumed, with a particular focus on folic acid and vitamin D supplements
- Details of current medication, prescribed and self-prescribed
- Details of alcohol consumption
- Smoking habits
- Oral health
- Wellbeing
- Gender and sexual orientation.
- Physical activity
- Specific questions for pregnant and lactating women (see paragraph 9.2)
- Recontact question (see paragraph 13.3)

13.3 The Buyer, as Data Controller, may wish to re-contact NDNS participants to ask them to take part in follow-up studies. In order to allow for this the Supplier must include a re-contact question in the questionnaire to seek the participant's permission to be re-contacted by OHID or FSA or a third party nominated by OHID for any follow-up studies. The Supplier should also collect contact details from participants (phone number, email address) to facilitate re-contact. The Supplier is expected to provide OHID or a nominated third party with timely access to individual data to facilitate any follow-up work (subject to any necessary considerations of confidentiality).

13.4 All data collected in questionnaires must be coded and included in the publicly available datasets.

## **14. Dietary assessment**

14.1 The dietary assessment is the core of the NDNS requirement. OHID and FSA require detailed, robust, quantitative data on all food and drink consumed by individuals, both in home and out of home, for four non-consecutive days. Weekdays and weekend days must be appropriately represented across the dataset. Food and drink obtained from out of home sources must be distinguishable from food and drink from the retail sector.

14.2 For the first 11 years of the RP (2008-2019) consumption data was collected in a paper diary kept by the participant, reviewed by the interviewer and coded centrally. From fieldwork year 12 (October 2019 onwards) the dietary assessment changed to a web-based, self-administered 24-hour recall tool – [Intake 24](#)<sup>1</sup>. The first stage of the evaluation of this method change has been published<sup>31</sup> and stage 2 is in preparation.

<sup>1</sup> Intake 24 is a web-based, automated, self administered 24-hour dietary recall tool based on the multiple pass method. It was originally developed by Newcastle University and Food Standards Scotland.

- 14.3 The Supplier will be expected to use Intake24 as the dietary assessment tool in the new contract. The latest version is open source and will be made available to the successful Supplier.
- 14.4 The NDNS version of Intake 24 was adapted and customised to meet the survey requirements prior to launching year 12 fieldwork and there has been an ongoing programme of improvements, informed by the findings of the stage 1 evaluation<sup>31</sup> and experience of using the tool in the field. It is expected that further improvements will be required throughout the life of the new contract and responsibility for this lies with the Supplier. Priorities for improvements to be agreed between the Supplier and OHID.
- 14.5 The stage 1 evaluation found that the move to Intake 24 for dietary assessment was compatible with NDNS requirements. While overall comparability with the previous method appeared to be good, a number of issues were identified that required action. Progress made on addressing these will be reported in the stage 2 report, due for publication in the next couple of months.
- 14.6 The Supplier will be required to maintain and update Intake 24 on an ongoing basis as the food supply and eating habits change and OHID/FSA priorities evolve:
- To maintain and update the food list to reflect changes in products available and trends (for example new plant-based products) and reformulation to reduce sugar, calories and salt in line with government programmes.
  - To maintain and update portion size information to reflect changes in standard portion sizes for products (which may also result from reduction and reformulation programmes)
  - To ensure that food from the out of home sector can be identified separately from the retail sector as far as possible and to ensure that the tool captures changing habits such as the increase in food deliveries from the out of home sector
  - To review the suitability of the tool to capture consumption by children under 11 years, particularly those under 5 years, and including the 12-18 months age group where we are proposing to collect dietary data for the first time, and make any changes required.
  - To monitor data collected for quality and make any changes to the tool required to promote accurate reporting

## **15. Maintaining the underlying nutrient composition data to derive nutrient intakes**

- 15.1 The Intake 24 food list is linked to a nutrient databank based on data from nutrient analysis and manufacturers data, which enables the calculation of nutrient intakes from the food consumption data. The nutrient databank used up to fieldwork year 11 included over 5500 food codes but this has now been rationalised down to 2481 food codes as part of the move to Intake 24, in order to make the food lists more manageable for participants. Each food code, including unprocessed foods,

manufactured products, generic recipes and dietary supplements, has values assigned for energy and 54 nutrients. The current version also includes a recipe calculation function and an audit function. The values in the databank are based on the UK food composition tables<sup>33</sup> (which in turn are based on data from nutrient analysis of foods) supplemented by manufacturer's information.

- 15.2 Data collected over the course of the current contract has been used to monitor the impact of government's reduction and reformulation programmes on intakes, and this will continue. It is vital that the nutrient databank is kept up to date to reflect the changes in the energy and nutrient content of the food supply and that sufficient detail is collected on foods and drinks consumed to assess the impact in different age groups. Priorities for updates will be agreed between OHID and the Supplier.
- 15.3 Mandatory fortification of non-wholemeal wheat flour with folic acid is expected to come into force during this contract<sup>34</sup> and the NDNS will be one of the main tools to monitor the impact on folate intakes and status. It will be important to ensure that the coding frame distinguishes sufficiently between breads and other products made with fortified flour and those which are not, in order to assess the impact of fortification on folate intakes. Keeping the nutrient databank up to date with the folic acid content of products which are voluntarily fortified will also be important, especially as the implementation of mandatory fortification may lead to a change in industry practices regarding voluntary addition of folic acid.
- 15.4 The Supplier will be required to:
- manage the addition of new foods to the Intake 24 food list and nutrient databank as they occur in the survey, ensuring that each new code can be justified
  - assign nutrient or recipe data for new codes and add to the databank and amend existing codes for manufactured products as and when reformulation changes are identified during fieldwork
  - establish a programme of regular reviews for the nutrient databank in collaboration with OHID to ensure that it remains up to date and fit for purpose.
- 15.5 OHID is interested in data on foods at more than one level. For example in the case of a beefburger in a bun from a fast food outlet we need to be able to identify the consumption of the product as a whole, the meat consumed from the product and the nutrient intake from the product. Similarly for a sugar-sweetened fruit yogurt we are interested in the yogurt itself, the fruit component (to contribute to the estimate of fruit consumption), and the contribution of the product as a whole to the intake of nutrients such as sugar and calcium. Therefore, coding should be done in such a way that all these levels are captured.

15.6 For the current and previous contracts, food consumption data has been collected and coded so that it can be reported in two ways:

- traditional method of reporting consumption of foods and composite dishes as consumed with the mixed dishes generally allocated according to main component. Each food code is allocated to a food group for this level of reporting
- disaggregation of specified food groups (meat, fish, fruit and vegetables). All food codes containing these components have been disaggregated to allow consumption estimates of meat, fish, fruit and vegetables. The Supplier would need to apply disaggregation to new codes containing these ingredients. There are no plans to disaggregate for other components.

15.7 The nutrient databank software was commissioned by FSA and written in MS Access in the early 2000s. The source code is no longer available. The nutrient databank is no longer compatible with the Windows 10 operating system. Without the source code it is not possible to make the updates needed to make the system compatible with Windows 10. The current Supplier is managing to keep the software running using an earlier version of Windows but this is not stable or sustainable in the medium or long term. A summary of the features of the nutrient databank is at Annex 3. Suppliers are asked to include costs for replacing the nutrient databank software.

## **16. Nutrient analysis work to update the nutrient databank**

16.1 Assessment of nutrient intake relies on having accurate, up to date data on the nutrient content of foods. While values for energy and macronutrients for manufactured products are readily available from product labels, this is not the case for unprocessed foods. Nutrient composition values for meat and dairy foods in particular are now more than 25 years old and there is a need to update these values in the light of changes to animal feeding practices etc. The Buyer wishes to include nutrient analysis work in this contract to provide data to update the nutrient databank so providing more robust nutrient intake estimates.

16.2 Current thinking on the food groups for analysis are:

- Beef
- Lamb
- Chicken and turkey
- Milk
- Cheese
- Plant based alternatives

16.3 The Buyer expects in the range of 20 to 50 composite samples to be analysed per food group for a range of nutrients. Details of the composite samples and nutrients for analysis will be agreed between the Buyer and the Supplier. The Buyer welcomes views

from Suppliers as to the priority food groups. The timetable for analysis should be planned with a view to having data available as early in the contract as possible to feed into data analysis and reporting

## **17. Assessment of misreporting**

- 17.1 Misreporting of food consumption, generally underreporting, is known to be a problem in NDNS as in all dietary surveys (see also section 30). Each contract to date has included an assessment of misreporting using the doubly labelled water (DLW) method on a sub-sample of participants carried out over one or two fieldwork years in each contract. The last published assessment carried out in years 6 and 7 found that in adults aged 16-64 years reported energy intake was 33% lower than total energy expenditure (TEE) measured by DLW<sup>15</sup>. This was consistent with the findings from the first assessment in years 1 and 3<sup>10</sup>. In the current contract, an assessment of misreporting in years 12-13 of the survey using Intake 24, also based on DLW will be published as part of the Stage 2 evaluation report in the next couple of months. The expectation is that the DLW study will show levels of underreporting similar to earlier studies.
- 17.2 Use of wrist worn accelerometry to measure energy expenditure from physical activity to help assess misreporting is being trialled in the current contract.
- 17.3 The Buyer wishes to continue to monitor the level of misreporting in the survey and also to better understand and characterise it. Suppliers should set out how they propose to assess misreporting, with justification and make proposals for the timing and coverage of the assessment including whether it can or should be carried out concurrently with the dietary assessment.
- 17.4 The impact of misreporting on NDNS results and their interpretation is significant. The Buyer is not aware of any established methods for adjusting dietary survey results to take account of misreporting and there is no requirement or expectation to undertake this at present. However the Buyer would welcome any proposals from Suppliers as to how this might be done.

## **18. Physical measurements**

- 18.1 The following measurements are required:
- Standing height (supine length for young children)
  - Demi-span as a proxy for height in people aged 65 and over
  - Weight
  - Waist circumference (11 years and over only)
- 18.2 With the exception of height and weight, the physical measurements listed above can only be made by trained fieldworkers. While it would be optimal to collect these

measurements in all participants, we recognise that it may not be cost effective to collect them from participants who would not otherwise have face to face contact with a fieldworker. Collection of self-reported heights and weights (preferably based on recent self-measurements) is acceptable in place of fieldworker measurements if there is no opportunity for a fieldworker measurement. Measurement protocols should be based on those used in the current contract and/or the Health Survey for England to enable comparisons with previous data.

## **19. Spot urine sample collection**

- 19.1 Assessment of iodine status with urinary iodine based on a single (spot) urine sample in adults and children from 4 years upwards is required. The requirement is to collect sufficient spot urine samples to allow for biennial reporting of urinary iodine in all age groups.

## **20. Blood sample collection and processing**

- 20.1 The requirement is for collection, processing and analysis of blood samples for a range of nutritionally relevant analytes, including labile vitamins, from participants of all ages by suitably qualified and experienced professional health workers. In the current and previous contracts, all participants who completed the dietary assessment were invited to agree to a nurse visit which included a blood sample. The Buyer wishes to collect sufficient blood samples to enable biennial reporting of blood analytes in all age groups (although it accepts that this may not be possible in young children see paragraph 20.2). In designing proposals for collecting and processing blood samples, Suppliers should consider the following issues:

- The need for fasting samples. For the current and previous contracts there has been a requirement for fasting samples as some analytes are affected by recent food intake. It is anticipated that this requirement will continue but the Buyer is willing to consider alternative proposals based on the evidence for the need for fasting samples.
- The need for rapid processing and transport of samples, once obtained, in order to preserve the activity of labile vitamins. Under previous contracts samples were taken to local processing laboratories immediately after collection for rapid processing storage before onward transportation to the analytical laboratory. In the current contract samples are posted to the analytical laboratory under chilled conditions. Details of processing in the current and previous contracts is in Annex 1.
- Maximising response to the blood sample, especially for children. Based on the current and previous contracts, we know that response rates for this component are substantially lower than for the dietary assessment, in all age groups but

particularly in younger children. Low response rates give rise to concerns about the representativeness of the data.

- 20.2 Collection of blood samples in children generally and in young children under 10 years in particular has been an ongoing challenge in NDNS with low response rates. In the last report (years 9-11) cell sizes were not large enough to report any blood analytes for the 1.5 to 3 year age group (children under 4 years) and the same was generally true for the previous two reports. Data has however been added to the time trend plots and these have been reported. Some of the main problems encountered include parental objections to collecting blood from children, issues around dislike of needles and availability of paediatric phlebotomists. The requirement for a fasting sample (in children over 4 years) also constrains the timing around taking a sample.
- 20.3 In the light of the issues described above, the Buyer has considered removing the requirement to take blood samples from the youngest age group in NDNS, but has decided to retain it, at least for this contract, due to the importance of monitoring nutritional status in this age group, for iron and vitamin D in particular. However the Buyer recognises that the current approach is not working well for this age group and although the overall sample size will be larger in the new contract than in previous years, it may not yield sufficient blood samples in this age group to meet the requirement for biennial reporting. The Buyer therefore welcomes proposals for alternative approaches to collect blood samples in this age group and would be content for a review to be undertaken as part of the contract with a view to moving to a more viable model during the contract. Any review should include, but is not limited to, alternatives to venous sampling such as capillary or blood spot and alternative fieldwork models. In the 2011 diet and nutrition survey of infants and young children<sup>35</sup> blood samples for children aged 4-18 months were collected during a clinic visit. The Buyer would like to explore the potential for using this approach in NDNS.

## **21. Blood analysis**

- 21.1 Annex 1 lists the blood and urine analytes the Buyer wishes to include in this contract. Suppliers should provide cost estimates for the analysis of each analyte and should clearly set out the assumptions made in providing these costs (for example analysis costs per sample; proposed analytical method, and use of sub-contractors, if any). The majority of analytes are included in the current contract and the expectation is that analytical methods should be chosen so results are comparable over time. Current analytical methods are listed in Annex 1. The following analytes are new to NDNS or are not included in the current contract: serum thyroglobulin, homocysteine.
- 21.2 The Supplier is responsible for assessing and reporting on quality control for the blood and urine analysis. In the current and previous contracts the Supplier has appointed an independent expert to advise on this aspect.

- 21.3 The Supplier is required to establish procedures for notifying results of clinically significant blood analyses to each participant and their GP (if consent is given) and flagging any abnormal results for the GP's attention. The Supplier will need to establish a timetable for analysis of these analytes so that results can be fed back to participants and their GPs within a reasonable timeframe.
- 21.4 The Buyer recognises that the blood samples remaining after the contracted analyses have been carried out represent a valuable resource for analysis and is keen for these samples to be used to benefit nutrition and wider public health research. The current and previous contracts have required samples to be stored for ten years to enable such use. However actual use of samples by third parties has been extremely low, at least partly because of the costs involved in extracting, sub-aliquoting and transporting the samples, which are borne by third parties, coupled with low awareness of the resource in the research community. The requirement to store samples for ten years remains for this contract but the samples must be stored in such a way as to facilitate their future use. This may mean storing multiple aliquots of the repository sample for different purposes, such as method development/testing within the survey, high priority analysis on behalf of government, and use by third party researchers. It is not necessarily expected that all samples should be retained. For example, it may not be necessary or cost effective to retain residual samples from contracted analyses. After ten years storage the future of the samples would be reviewed with the Buyer on a rolling annual basis with the default position being to destroy the remaining samples unless a new arrangement for continued storage is agreed.
- 21.5 Access to samples by third party researchers is by an application process which is administered by OHID. The Supplier would be expected to provide advice to support access to the samples and provide samples and data to researchers whose applications are approved. Costs for this will be charged directly to applicants and should not be included in this bid.

## **22. Data Analysis and Reporting**

- 22.1 The Supplier will be responsible for the primary analysis of the data collected in the survey and the preparation and drafting of reports in online publication-ready format. The format and content of the published reports must comply with the UK Statistics Buyer Code of Practice for Official Statistics<sup>36</sup> and OHID requirements. Data need to be weighted using an appropriate methodology to compensate for distortions in the sample based on gender, age, region and to account for non-response.
- 22.2 The current RP sample size, at 1000 per year, is too small to allow meaningful reporting of results from a single year. Reporting requirements have evolved over the previous and current contracts. The most recent report combined data from three years (years 9-11)<sup>13</sup> in order to align reporting with the dietary method change. The next report will combine 3.5 years of data (years 12-15) (as year 12 fieldwork was an

incomplete fieldwork year due to COVID) and to align reporting with the contract fieldwork years. For the new contract the expectation is to have a much larger annual sample size for dietary data and the requirement is for annual reporting of dietary data if the sample size permits, with comparisons to the previous reporting period as well as the longer term trend. Other measures such as blood and urine analytes should be published biennially. The Buyer expects that an end of contract report will be needed in addition to annual reports to accommodate analyses that cannot be reported annually. We welcome views of Suppliers on which analyses could be reported annually and which left to an end of contract report.

#### 22.3 Reports should include

- descriptive statistics for foods consumed, energy and nutrient intakes, blood and urine analytes including comparison with dietary reference values for nutrients, food-based dietary recommendations and thresholds for blood and urine analytes as applicable.
- Contribution of food groups to intake of energy and nutrients
- Analysis of trends over time in food consumption, nutrient intakes and blood and urine analytes based on data collected over the whole RP, including comparisons with results for the previous reporting period and assessment of differences for statistical significance as appropriate, analysis of differences in food consumption, nutrient intakes and blood and urine analytes by household income, index of multiple deprivation and food security.
- Participant characteristics including physical measurements, indicators of socioeconomic status, ethnicity, physical activity
- Appendices covering methodology and survey documents
- An assessment of data quality over the reporting period

22.4 The detailed specifications for reports will be agreed between the Supplier and the Buyer.

22.5 It is expected that the reports will be mainly tables of descriptive statistics and statistical analysis of time trends for food consumption, nutrient intakes and blood and urine analytes with limited commentary focusing on a few variables of particular public health interest, to be agreed between the Supplier and the Buyer.

22.6 The following age/sex groupings for analysis have been used to date:

- Children: 1½-3 years; 4-10 years; 11-18 years
- Adults: 19-64 years; 65- 74 years; 75 years and over

22.7 These are based on the need for comparisons with the age groups used in the UK Dietary Reference Values (DRVs). The Buyer's preference is to continue with these groupings for ease of comparability with previous results. Children aged 12-18 months are to be included in this contract for the first time. The expectation is that this age

group would be combined with the 1½-3 year age group for reporting purposes but we welcome views from Suppliers.

22.8 The specific requirements for data analyses will be agreed with the Buyer and the Supplier is expected to work closely with the OHID technical team to produce a detailed specification for each report. The expectation is that reports of dietary data will be ready for publication 6-9 months after completion of fieldwork

22.9 A separate report is required for the urinary sodium survey (see paragraph 28).

22.10 If sample boosts are required by the devolved countries, separate reports will be required.

### **23. Publication as a Official Statistic**

23.1 NDNS RP findings are published as Official Statistics, reflecting the quality and importance of the data. Suppliers should be aware of the requirement for compliance with the Code of Practice for Official Statistics<sup>36</sup> maintaining trustworthiness, quality and value in the statistics produced. and the implications of this for access to and use of the data pre-publication. Access to data and drafts pre-publication is restricted to named individuals with an input into the report production / quality assurance process; data cannot be released until report publication. The Code of Practice also includes guidance on the statistical commentary to be included in reports and accessibility requirements.

### **24. Data Delivery and Archiving**

24.1 The Supplier is required to deliver pseudonymised datasets to the Buyer and FSA, in line with reporting arrangements.

24.2 Datasets from the previous NDNS and the NDNS RP thus far are held at the UK Data Archive. Pseudonymised data, along with complete documentation, should be deposited at the UK Data Archive by the Supplier as soon as practical (and no longer than two months) after publication of reports/ data tables. The data deposited in the Data Archive will include: the raw data on dietary intake (food and nutrients), physical measurements and blood analytes; the nutrient databank and relevant classification information together with user-friendly documentation.

24.3 Data structure and formats should be compatible with those used in the current contract.

24.4 The Supplier is required to hold securely the non-anonymised dataset on behalf of the Buyer.

**25. Flagging of subjects on the NHS Central and Cancer registers**

- 25.1 There is a requirement for flagging of all subjects on the NHS Central and Cancer registers in order to facilitate follow up studies. Ethics approval and written consent is required for this.

**26. Access to participants for follow up studies**

- 26.1 Applications from third party researchers for access to participants for follow up studies can be made through an application process administered by OHID. The costs of facilitating access to participants and associated data will be dealt with separately and should not be included in this bid.

**NON-CORE COMPONENTS AND SUPPORTING ACTIVITIES TO BE COSTED SEPARATELY**

27. The following components and supporting activities are yet to be confirmed as part of the programme and should be costed separately.

**28. Assessment of salt intake by 24-hour urine**

- 28.1 A 24-hour urine collection is required for adults aged 19 to 64 years in England, primarily for the assessment of sodium (salt) intakes, which cannot be assessed accurately by dietary assessment. This has not been collected as part of the core RP since the year 1-5 contract. In the current and previous contracts a single stand alone study was carried out over a 4-6 month period to collect 24 hour urines for adults aged 19 to 64 years in England for sodium analysis. Previous studies have been based on an achieved sample of 600 adults. As a substantial increase to the annual dietary sample is expected (see paragraph 10.2), it may be possible to conduct the urinary sodium study as an add-on to core fieldwork for a limited period rather than a separate study. The Buyer would like to consider this approach and would accept a longer data collection period than for previous studies if this was more cost effective. Previous studies have included the use of para-amino benzoic acid (PABA) to assess the completeness of 24 hour urine collections. Given the additional cost and participant burden of this methodology, the Buyer wishes to review the benefits of its continued inclusion as part of the contract.
- 28.2 The Buyer's provisional timescale is for data collection to start during the 2024 fieldwork year (year 16). The sample should be designed so that an absolute minimum of 600 complete urine collections are achieved (based on the sample size required to detect a change in salt intake of 0.5g/day when compared with previous surveys). It is critical that the salt intake estimates are comparable with those from previous surveys in order to assess the trend so any proposals to deviate from the sampling and analytical methods used in previous surveys need to be fully justified.

28.3 A separate report is required for the urinary sodium survey. This will also be published as an Official Statistic.

## **29. Quarterly reporting of key diet and nutrition variables**

29.1 In addition to annual reporting, the Buyer wishes to explore the possibility of quarterly reporting for a few key dietary variables for one or two combined age groups (that is adults and children). Suppliers are asked to comment on the feasibility of this and make proposals. This is a non-core supporting activity and should be costed separately.

## **DELIVERY QUALITY**

### **30. Response and Representativeness of the sample**

30.1 It is vital that data quality is maintained to a high standard, particularly as NDNS results are under increasing scrutiny. There are several aspects to this:

- Achieving the required annual sample size and maintaining an acceptable response rate (see para 30.2)
- Understanding the nature and degree of misreporting and minimising it (para 31)
- Quality assurance in data collection, data analysis and reporting results

30.2 The achievement of a high response rate is important as low response rates lead to concerns about the representativeness of the data and non-response bias. For previous contracts a target response rate was set at 55% of the eligible sample to complete the dietary assessment. However, no target response rate was set for the current contract as the general trend towards falling response rates was recognised. Response rates fell substantially when fieldwork resumed during COVID and have not so far returned to pre-pandemic levels. The Buyer also recognises that a simple response rate is not the only or necessarily the best measure of data quality and it is recognised that the additional resource required to make small gains in response (for example by re-issuing non-responding addresses to different fieldworkers) may not result in a sample that is more representative. However, the Buyer expects that NDNS response will at least reach similar levels to other national social surveys.

30.3 The survey uses tokens of appreciation in the form of high street vouchers as a means of increasing response to different components. Details of the amounts offered at each stage are provided in Annex 2. Proposals for incentives should take account of the likely views of ethical committees and be informed by consideration of public health advice.

30.4 Regardless of the response rate achieved, the Supplier must ensure that the issued sample is large enough to achieve the number of participants specified in the contract on an annual basis and is expected to increase the issued sample if numbers are

below requirements due to lower than expected response rates or any other reason. A payment by results element will be included in the contract (see section 45).

- 30.5 The Supplier is required to monitor response rates, data quality and achieved numbers and report to the Buyer on at least a monthly basis when the survey is in the field. If response rates fall below an agreed threshold the Supplier should agree remedial action with the Buyer.

## **31. Minimising misreporting**

- 31.1 Misreporting of food consumption has long been recognised in NDNS as in dietary surveys around the world. The doubly labelled water study of energy expenditure published as part of the year 1-9 report<sup>15</sup>, indicated that energy intakes in adults were underreported by 33% on average, although this average figure hides a wide inter-individual range. Data from doubly labelled water studies associated with earlier NDNS suggest that the degree of underreporting may have increased over time, although it is not possible to establish this definitively. This level of underreporting was based on the paper diary method. Results from the DLW study for years 12-14 based on Intake 24 are due to be published in the next couple of months. Based on other studies the expectation is that the degree of underreporting is likely to be similar to the paper diary.
- 31.2 Misreporting, generally underreporting, may result from a number or combination of behaviours, for example omitting to record foods or drinks consumed, whether intentionally or otherwise, underestimating quantities consumed, or changing usual consumption as a result of being asked to record diet. Recent scrutiny of reported energy intakes in NDNS alongside the results of DLW studies have highlighted the level and impact of underreporting and have called into question the validity of the results. The evidence indicates that misreporting is inherent in any self reported dietary assessment rather than being a function of assessment method used. Whilst the Buyer recognises that it is not possible to eliminate underreporting from NDNS, it is critical to minimise it as far as possible in order to develop the most accurate picture of diet. Suppliers are asked to propose strategies for minimising misreporting in the survey and are encouraged to consider novel methods where appropriate.

## **32. Quality Assurance in Data Collection, Analysis and Reporting**

- 32.1 The maintenance of a high level of data quality in all aspects of the survey is a critical requirement for the Buyer. The Supplier must be able to demonstrate effective quality assurance procedures throughout all stages of the survey, including data collection, data handling, analysis and reporting. This should include Standard Operating Protocols or equivalent procedures for all aspects of the survey. The Supplier must ensure that protocols for data analysis to derive key reportable estimates (for example fruit and vegetable portions consumed based on 5-a-day) are clearly documented,

agreed with the Buyer and followed in report production. Whilst the Buyer recognises that it is not possible to eliminate errors from a complex survey, the Supplier must provide assurance that procedures for data collection and especially for data coding, analysis and reporting are set up so as to minimise the risk of errors occurring. The Buyer reserves the right to commission an independent audit of any aspect of the Supplier's processes at any time.

### **33. Participant feedback**

- 33.1 Individual results from some components are made available to participants as part of the current contract. Feedback includes intakes of key nutrients compared to recommendations (generated automatically by Intake 24), results of physical measurements (provided by the interviewer), and results of clinically significant blood analyses (sent by letter). This feature of the survey has been considered important in increasing response rates and compliance with the dietary assessment. Suppliers are asked for their proposals for participant feedback with justification.

### **34. Ethics Approval and Consent**

- 34.1 The Supplier will need to obtain ethics approval for the survey from the relevant ethics committee(s). The Supplier is expected to make all reasonable efforts to secure agreement from the MREC. Ethics approval for the current contract was obtained from the Cambridge South NRES committee. The Supplier may wish to apply to the same Committee to ensure continuity of approach.
- 34.2 Suitable documentation will be required for obtaining consent for all the components for which this is necessary. The Supplier will also need to develop participant information leaflets to cover all aspects of the survey, including the purpose of the survey and the procedures involved for participants. This should include consideration of accessible formats. All participant-facing documents to be used in the field, including consent and participant information documents, must be approved by the Buyer before use. This should include consent for data linkage for future research.
- 34.3 The Buyer, and ethics committees which have considered NDNS for ethics approval in the past, stress that participation in the survey should be with fully informed consent. The Supplier will need to produce appropriate written material to explain the purpose of the survey and the procedures involved to participants, bearing in mind that separate material may be required for adults and children of different ages.

### **35. Equipment**

- 35.1 Suppliers should include the cost of providing equipment in their bids. Equipment in use in the current NDNS (including body weight scales, stadiometers, measuring

tapes) can be made available if required. Any maintenance required to existing equipment will be the responsibility of the Supplier.

### **36. Personnel**

- 36.1 The Supplier will be expected to field the appropriate personnel accordingly.
- 36.2 The Supplier shall ensure that all Supplier Staff are suitably vetted, experienced, skilled and/or qualified to deliver the Services for which they are employed.

### **37. Knowledge transfer**

- 37.1 Information on the format of datasets, specifications for variables and supporting documentation must be made available to any subsequent Supplier.

### **38. Data Protection and Privacy**

- 38.1 Data must be collected, stored, shared and used in compliance with all applicable law regarding the processing of personal data, privacy and security standards, including but not limited to UK GDPR and the Data Protection Act 2018.
- 38.2 The Supplier is expected to act as a Data Processor, to process data for the purposes of the survey on behalf of the Buyer, the Data Controller. The Supplier must process data collected during the survey, for the purposes, and in line with the requirements, set out by the Buyer which will be finalised post contract award in line with the Supplier's proposed approach.
- 38.3 The Supplier will be required to work with the Buyer to put in place any data sharing agreements with partners, as necessary, and to work with the Buyer, who, as Data Controller will complete a Data Protection Impact Assessment and a Privacy Notice during the initial scoping period.
- 38.4 The Supplier must always ensure that the undertaking of confidentiality given to survey subjects is adhered to and that no data are released that could be related to an identifiable individual, without that individual's permission. The Supplier must ensure that systems are in place to minimise the risk of loss of personal data on survey participants. This must cover all stages of the survey including sampling and transfer of information as well as handling data within the survey organisation. The Supplier must be able to provide evidence of the managerial, procedural and technical controls it has in place to protect confidentiality and ensure data security.
- 38.5 The Buyer, as data controller, for the data generated by the survey, requires the Supplier to notify it of any breaches of confidentiality.

## 39. Security

90% of target sample- 3,600	90% of the fieldwork costing: £9,000
10% of the target sample – 400	PbR element - £1,000
Increment sample - $400 \div 10 = 40$	$£1,000 \div 10 = £100$  £100 paid for every 40 samples achieved above the 90% target sample.

Details of methods and protocols for year 12 onwards, where these differ from year 11, are described below.

### **Fieldwork model**

Dietary data collected from up to three participants per household, either up to two adults and one child, or up to two children, each from a different NDNS age group

Most households receive one interviewer visit with all participants interviewed during the same visit as far as possible. The visit covers the background interview (CAPI), introduction to Intake24 (first recall completed online during the visit facilitated by the interviewer as needed), height and weight measurements, spot urine sample, consent for data linkage, introducing nurse visit, introducing DLW if required, collection of contact details

Interviewer assesses whether participants require assistance with subsequent recalls. If so further face to face visits arranged.

Nurse visit can take place any time after the first recall has been completed if agreement is given.

### **Background interview**

Background information on socio-demographic characteristics, dietary habits and lifestyle is collected through computer-assisted personal interviews (CAPI), self-completion questionnaires and interviews with the main food Supplier, if not the participant. Topics covered:

- Basic background information and demographic details (i.e. age; sex; date of birth; national identity, ethnic group); household composition; present occupation of Household Reference Person (to derive socio-economic group) and of respondent; education including educational standard achieved; income; receipt of benefits; employment status; tenure
- Background information on the respondent's normal eating pattern to help interpret the dietary assessment; use of salt at the table and in cooking; use of artificial sweeteners, vegetarianism/ veganism; dieting to lose or gain weight; dietary restrictions;
- Information on social and domestic circumstances and lifestyle that may influence respondent's food consumption and nutritional status including: meal arrangements at work or higher education, food provision and meal arrangements by school including use of free school meals and other free food provision, frequency of consuming food and

drinks from out of home sources; use of food delivery services, household food security (from year 15)

- Information on eating habits, food avoidance and food preparation practices that might affect exposure to food chemicals. This might include: washing and peeling habits for fruit and vegetables; usual cooking methods (e.g. grilling, boiling, frying); Consumption of peel of fruits
- Questions on frequency of consumption of a list of specific foods that may not be consumed in the four-day study period (rarely consumed foods) and other foods for triangulation with recall data.
- Self assessed general health; Presence of long term illnesses or conditions and impact on day to day activities. also conditions which might preclude respondents taking part in some components (e.g. haemophilia).
- Oral health: number of natural teeth; self assessed oral health; use of denture and type; impact of oral health problems on diet
- Harmonised standard questions on disability;
- Gender and sexual orientation
- Wellbeing
- Use of Healthy Start vitamins for women and childrens' vitamin drops
- Frequency of use of dietary supplements containing vitamin D or folic acid in the last 12 months.
- Details of current medication (self and prescribed), and compliance, including the name, brand, strength and product licence number (if any). Information is collected specifically on use of cholesterol lowering drugs
- Information on alcohol consumption (frequency of alcohol consumption in last 12 months)
- Information on smoking habits (current and previous practice and how many). Asked by CASI

## **Dietary assessment**

Diet is assessed using Intake 24, a web-based automated, self-administered 24-hour dietary recall tool based on the multiple pass method. Participants are asked to record everything they ate and drank the previous day (midnight to midnight). Details of how Intake24 is used can be found in the Stage 1 evaluation report. Participants are asked to complete 4 recalls on non-consecutive days over 2-3 weeks. The day of week allocation system is designed to achieve an appropriate spread of days of the week.

## **Blood sampling and processing**

A venous blood sample is collected at a nurse visit, 2-3 months after the interviewer visit, from all age groups, with written consent from the participant (or their parent/guardian in the case of children). Fasting blood samples are collected from all participants except those under 4 years and those with diabetes. Blood samples were collected by a qualified nurse (or paediatric phlebotomist for young children) using a vacutainer tube system. Children

were offered anaesthetic gel prior to venepuncture. From year 13 local processing laboratories were no longer used. Instead samples were sent by Royal Mail guaranteed next day delivery with frozen cold packs direct to the central analytical laboratory for processing.

### **Participant incentives**

Unconditional incentive: £10 with advance letter (basic addresses)

Main food provider interview £10 (child boost addresses)

Completion of dietary recall 1: £5

Spot urine sample: £5

Completion of dietary recalls 2-4: £20

Blood sample £15 (increased to £25 in year 15)

Doubly labelled water sub-study: £30

### **Annex 3: Summary of features of the current nutrient databank software**

The Nutrient Databank contains information on the nutrient content of foods and recipe dishes which enables calculation of nutrient intakes from food consumption data.

The databank holds values for energy and 55 nutrients in around 3000 food codes. Each food code is attached to either a set of energy and nutrient values (basic food code) or to a set of ingredients (composite/ recipe code). Each food code is assigned to a main food group and a subsidiary food group.

Features of the nutrient databank software:

#### **Basic food codes**

- Holds energy and nutrient values. Allows editing of values
- Values mainly held per 100g food but can be held (for example) per tablet, per teaspoon
- Allows new codes to be created and nutrient values entered
- Allows calculation of some nutrient values from other values (e.g. energy calculated from protein, fat, carbohydrate, alcohol)
- 'Edit checks' to flag errors (calculation errors or range errors)
- Dilution factor assigned to each food code to apply to foods/drinks consumed made up with water (e.g. orange squash concentrate)
- Data source text field for each nutrient and each code

#### **Recipe/composite codes**

- Holds ingredient information and quantities for each recipe code (e.g. a code for custard may have ingredients custard powder, milk, sugar).
- Recipe calculation function incorporating calculations for water loss and micronutrient losses on cooking.
- Allows editing of recipes and creation of new recipe codes
- Allow for calculation of multilevel recipes starting from the lowest level.
- Data source text field for each code

Facility to change a basic food code to a recipe code and vice versa

Facility to show an audit trail of user changes to nutrient and other values

Facility to add/amend nutrients, food groups and subsidiary food groups

Facility to export data

Facility to report edit check and range check errors and to override

# Core Terms - DPS

## 1. Definitions used in the contract

Interpret this Contract using Joint Schedule 1 (Definitions).

## 2. How the contract works

2.1 The Supplier is eligible for the award of Order Contracts during the DPS Contract Period.

2.2 CCS does not guarantee the Supplier any exclusivity, quantity or value of work under the DPS Contract.

2.3 CCS has paid one penny to the Supplier legally to form the DPS Contract. The Supplier acknowledges this payment.

2.4 If the Buyer decides to buy Deliverables under the DPS Contract it must use DPS Schedule 7 (Order Procedure) and must state its requirements using DPS Schedule 6 (Order Form Template and Order Schedules). If allowed by the Regulations, the Buyer can:

- (a) make changes to DPS Schedule 6 (Order Form Template and Order Schedules);
- (b) create new Order Schedules;
- (c) exclude optional template Order Schedules; and/or
- (d) use Special Terms in the Order Form to add or change terms.

2.5 Each Order Contract:

- (a) is a separate Contract from the DPS Contract;
- (b) is between a Supplier and a Buyer;
- (c) includes Core Terms, Schedules and any other changes or items in the completed Order Form; and (d) survives the termination of the DPS Contract.

2.6 Where the Supplier is approached by any Other Contracting Authority requesting Deliverables or substantially similar goods or services, the Supplier must tell them about this DPS Contract before accepting their order.

2.7 The Supplier acknowledges it has all the information required to perform its obligations under each Contract before entering into a Contract. When information is provided by a Relevant Authority no warranty of its accuracy is given to the Supplier.

2.8 The Supplier will not be excused from any obligation, or be entitled to additional Costs or Charges because it failed to either:

(a) verify the accuracy of the Due Diligence Information; or (b) properly perform its own adequate checks.

2.9 CCS and the Buyer will not be liable for errors, omissions or misrepresentation of any information.

2.10 The Supplier warrants and represents that all statements made and documents submitted as part of the procurement of Deliverables are and remain true and accurate.

2.11 An Order Contract can only be created using the electronic procedures described in the FTS Notice as required by the Regulations.

2.12 A Supplier can only receive Orders under the DPS Contract while it meets the basic access requirements for the DPS stated in the FTS Notice. CCS can audit whether a Supplier meets the basic access requirements at any point during the DPS Contract Period.

### **3. What needs to be delivered**

#### **3.1 All deliverables**

3.1.1 The Supplier must provide Deliverables:

- (a) that comply with the Specification, the DPS Application and, in relation to an Order Contract, the Order Tender (if there is one);
- (b) to a professional standard;
- (c) using reasonable skill and care; (d) using Good Industry Practice;
- (e) using its own policies, processes and internal quality control measures as long as they do not conflict with the Contract; (f) on the dates agreed; and (g) that comply with Law.

3.1.2 The Supplier must provide Deliverables with a warranty of at least 90 days from Delivery against all obvious defects.

#### **3.2 Goods clauses**

3.2.1 All Goods delivered must be new, or as new if recycled, unused and of recent origin.

3.2.2 All manufacturer warranties covering the Goods must be assignable to the Buyer on request and for free.

3.2.3 The Supplier transfers ownership of the Goods on Delivery or payment for those Goods, whichever is earlier.

- 3.2.4 Risk in the Goods transfers to the Buyer on Delivery of the Goods, but remains with the Supplier if the Buyer notices damage following Delivery and lets the Supplier know within 3 Working Days of Delivery.
- 3.2.5 The Supplier warrants that it has full and unrestricted ownership of the Goods at the time of transfer of ownership.
- 3.2.6 The Supplier must deliver the Goods on the date and to the specified location during the Buyer's working hours.
- 3.2.7 The Supplier must provide sufficient packaging for the Goods to reach the point of Delivery safely and undamaged.
- 3.2.8 All deliveries must have a delivery note attached that specifies the order number, type and quantity of Goods.
- 3.2.9 The Supplier must provide all tools, information and instructions the Buyer needs to make use of the Goods.
- 3.2.10 The Supplier must indemnify the Buyer against the costs of any Recall of the Goods and give notice of actual or anticipated action about the Recall of the Goods.
- 3.2.11 The Buyer can cancel any order or part order of Goods which has not been Delivered. If the Buyer gives less than 14 days notice then it will pay the Supplier's reasonable and proven costs already incurred on the cancelled order as long as the Supplier takes all reasonable steps to minimise these costs.
- 3.2.12 The Supplier must at its own cost repair, replace, refund or substitute (at the Buyer's option and request) any Goods that the Buyer rejects because they do not conform with Clause 3. If the Supplier does not do this it will pay the Buyer's costs including repair or re-supply by a third party.

### **3.3 Services clauses**

- 3.3.1 Late Delivery of the Services will be a Default of an Order Contract.
- 3.3.2 The Supplier must co-operate with the Buyer and third party suppliers on all aspects connected with the Delivery of the Services and ensure that Supplier Staff comply with any reasonable instructions.
- 3.3.3 The Supplier must at its own risk and expense provide all Supplier Equipment required to Deliver the Services.

- 3.3.4 The Supplier must allocate sufficient resources and appropriate expertise to each Contract.
- 3.3.5 The Supplier must take all reasonable care to ensure performance does not disrupt the Buyer's operations, employees or other contractors.
- 3.3.6 The Supplier must ensure all Services, and anything used to Deliver the Services, are of good quality and free from defects.
- 3.3.7 The Buyer is entitled to withhold payment for partially or undelivered Services, but doing so does not stop it from using its other rights under the Contract.

## **4. Pricing and payments**

- 4.1 In exchange for the Deliverables, the Supplier must invoice the Buyer for the Charges in the Order Form.
- 4.2 CCS must invoice the Supplier for the Management Levy and the Supplier must pay it using the process in DPS Schedule 5 (Management Levy and Information).
- 4.3 All Charges and the Management Levy:
  - (a) exclude VAT, which is payable on provision of a valid VAT invoice;
  - and (b) include all costs connected with the Supply of Deliverables.
- 4.4 The Buyer must pay the Supplier the Charges within 30 days of receipt by the Buyer of a valid, undisputed invoice, in cleared funds using the payment method and details stated in the Order Form.
- 4.5 A Supplier invoice is only valid if it:
  - (a) includes all appropriate references including the Contract reference number and other details reasonably requested by the Buyer;
  - (b) includes a detailed breakdown of Delivered Deliverables and Milestone(s) (if any); and
  - (c) does not include any Management Levy (the Supplier must not charge the Buyer in any way for the Management Levy).
- 4.6 The Buyer must accept and process for payment an undisputed Electronic Invoice received from the Supplier.
- 4.7 The Buyer may retain or set-off payment of any amount owed to it by the Supplier if notice and reasons are provided.

- 4.8 The Supplier must ensure that all Subcontractors are paid, in full, within 30 days of receipt of a valid, undisputed invoice. If this does not happen, CCS or the Buyer can publish the details of the late payment or non-payment.
- 4.9 If CCS or the Buyer can get more favourable commercial terms for the supply at cost of any materials, goods or services used by the Supplier to provide the Deliverables, then CCS or the Buyer may require the Supplier to replace its existing commercial terms with the more favourable terms offered for the relevant items.
- 4.10 If CCS or the Buyer uses Clause 4.9 then the DPS Pricing (and where applicable, the Charges) must be reduced by an agreed amount by using the Variation Procedure.
- 4.11 The Supplier has no right of set-off, counterclaim, discount or abatement unless they are ordered to do so by a court.

## **5. The buyer's obligations to the supplier**

5.1 If Supplier Non-Performance arises from an Authority Cause:

- (a) neither CCS or the Buyer can terminate a Contract under Clause 10.4.1;
- (b) the Supplier is entitled to reasonable and proven additional expenses and to relief from liability and Deduction under this Contract;
- (c) the Supplier is entitled to additional time needed to make the Delivery; and (d) the Supplier cannot suspend the ongoing supply of Deliverables.

5.2 Clause 5.1 only applies if the Supplier:

- (a) gives notice to the Party responsible for the Authority Cause within 10 Working Days of becoming aware;
- (b) demonstrates that the Supplier Non-Performance would not have occurred but for the Authority Cause; and
- (c) mitigated the impact of the Authority Cause.

## **6. Record keeping and reporting**

6.1 The Supplier must attend Progress Meetings with the Buyer and provide Progress Reports when specified in the Order Form.

6.2 The Supplier must keep and maintain full and accurate records and accounts on everything to do with the Contract:

- (a) during the Contract Period;
- (b) for 7 years after the End Date; and (c) in accordance with UK GDPR, including but not limited to the records and accounts stated in the definition of Audit in Joint Schedule 1.

6.3 The Relevant Authority or an Auditor can Audit the Supplier.

6.4 During an Audit, the Supplier must:

- (a) allow the Relevant Authority or any Auditor access to their premises to verify all contract accounts and records of everything to do with the Contract and provide copies for an Audit; and
- (b) provide information to the Relevant Authority or to the Auditor and reasonable co-operation at their request.

6.5 Where the Audit of the Supplier is carried out by an Auditor, the Auditor shall be entitled to share any information obtained during the Audit with the Relevant Authority.

6.6 If the Supplier is not providing any of the Deliverables, or is unable to provide them, it must immediately:

- (a) tell the Relevant Authority and give reasons;
- (b) propose corrective action; and
- (c) provide a deadline for completing the corrective action.

6.7 The Supplier must provide CCS with a Self Audit Certificate supported by an audit report at the end of each Contract Year. The report must contain:

- (a) the methodology of the review;
- (b) the sampling techniques applied; (c) details of any issues; and (d) any remedial action taken.

6.8 The Self Audit Certificate must be completed and signed by an auditor or senior member of the Supplier's management team that is qualified in either a relevant audit or financial discipline.

## **7. Supplier staff**

7.1 The Supplier Staff involved in the performance of each Contract must:

- (a) be appropriately trained and qualified;
- (b) be vetted using Good Industry Practice and the Security Policy; and
- (c) comply with all conduct requirements when on the Buyer's Premises.

- 7.2 Where a Buyer decides one of the Supplier's Staff is not suitable to work on a contract, the Supplier must replace them with a suitably qualified alternative.
- 7.3 If requested, the Supplier must replace any person whose acts or omissions have caused the Supplier to breach Clause 27.
- 7.4 The Supplier must provide a list of Supplier Staff needing to access the Buyer's Premises and say why access is required.
- 7.5 The Supplier indemnifies CCS and the Buyer against all claims brought by any person employed by the Supplier caused by an act or omission of the Supplier or any Supplier Staff.

## **8. Rights and protection**

8.1 The Supplier warrants and represents that:

- (a) it has full capacity and authority to enter into and to perform each Contract;
- (b) each Contract is executed by its authorised representative;
- (c) it is a legally valid and existing organisation incorporated in the place it was formed;
- (d) there are no known legal or regulatory actions or investigations before any court, administrative body or arbitration tribunal pending or threatened against it or its Affiliates that might affect its ability to perform each Contract;
- (e) it maintains all necessary rights, authorisations, licences and consents to perform its obligations under each Contract;
- (f) it does not have any contractual obligations which are likely to have a material adverse effect on its ability to perform each Contract;
- (g) it is not impacted by an Insolvency Event; and (h) it will comply with each Order Contract.

8.2 The warranties and representations in Clauses 2.10 and 8.1 are repeated each time the Supplier provides Deliverables under the Contract.

8.3 The Supplier indemnifies both CCS and every Buyer against each of the following:

- (a) wilful misconduct of the Supplier, Subcontractor and Supplier Staff that impacts the Contract;
- and (b) non-payment by the Supplier of any Tax or National Insurance.

8.4 All claims indemnified under this Contract must use Clause 26.

8.5 The description of any provision of this Contract as a warranty does not prevent CCS or a Buyer from exercising any termination right that it may have for breach of that clause by the Supplier.

8.6 If the Supplier becomes aware of a representation or warranty that becomes untrue or misleading, it must immediately notify CCS and every Buyer.

8.7 All third party warranties and indemnities covering the Deliverables must be assigned for the Buyer's benefit by the Supplier.

## **9. Intellectual Property Rights (IPRs)**

9.1 Each Party keeps ownership of its own Existing IPRs. The Supplier gives the Buyer a non-exclusive, perpetual, royalty-free, irrevocable, transferable worldwide licence to use, change and sub-license the Supplier's Existing IPR to enable it to both:

- (a) receive and use the Deliverables; and
- (b) make use of the deliverables provided by a Replacement Supplier.

9.2 Any New IPR created under a Contract is owned by the Buyer. The Buyer gives the Supplier a licence to use any Existing IPRs and New IPRs for the purpose of fulfilling its obligations during the Contract Period.

9.3 Where a Party acquires ownership of IPRs incorrectly under this Contract it must do everything reasonably necessary to complete a transfer assigning them in writing to the other Party on request and at its own cost.

9.4 Neither Party has the right to use the other Party's IPRs, including any use of the other Party's names, logos or trademarks, except as provided in Clause 9 or otherwise agreed in writing.

9.5 If there is an IPR Claim, the Supplier indemnifies CCS and each Buyer against all losses, damages, costs or expenses (including professional fees and fines) incurred as a result.

9.6 If an IPR Claim is made or anticipated the Supplier must at its own expense and the Buyer's sole option, either:

- (a) obtain for CCS and the Buyer the rights in Clause 9.1 and 9.2 without infringing any third party IPR; or
- (b) replace or modify the relevant item with substitutes that do not infringe IPR without adversely affecting the functionality or performance of the Deliverables.

9.7 In spite of any other provisions of a Contract and for the avoidance of doubt, award of a Contract by the Buyer and placement of any contract task under it does not constitute an authorisation by the Crown under Sections 55 and 56 of the Patents Act 1977 or Section 12 of the Registered Designs Act 1949. The Supplier acknowledges that any authorisation by the Buyer under its

statutory powers must be expressly provided in writing, with reference to the acts authorised and the specific IPR involved.

## **10. Ending the contract or any subcontract**

### **10.1 Contract Period**

10.1.1 The Contract takes effect on the Start Date and ends on the End Date or earlier if required by Law.

10.1.2 The Relevant Authority can extend the Contract for the Extension Period by giving the Supplier no less than 3 Months' written notice before the Contract expires.

### **10.2 Ending the contract without a reason**

10.2.1 CCS has the right to terminate the DPS Contract at any time without reason by giving the Supplier at least 30 days' notice.

10.2.2 Each Buyer has the right to terminate their Order Contract at any time without reason by giving the Supplier not less than 90 days' written notice.

### **10.3 Rectification plan process**

10.3.1 If there is a Default, the Relevant Authority may, without limiting its other rights, request that the Supplier provide a Rectification Plan.

10.3.2 When the Relevant Authority receives a requested Rectification Plan it can either:

- (a) reject the Rectification Plan or revised Rectification Plan, giving reasons; or
- (b) accept the Rectification Plan or revised Rectification Plan (without limiting its rights) and the Supplier must immediately start work on the actions in the Rectification Plan at its own cost, unless agreed otherwise by the Parties.

10.3.3 Where the Rectification Plan or revised Rectification Plan is rejected, the Relevant Authority:

- (a) must give reasonable grounds for its decision; and
- (b) may request that the Supplier provides a revised Rectification Plan within 5 Working Days.

10.3.4 If the Relevant Authority rejects any Rectification Plan, including any revised Rectification Plan, the Relevant Authority does not have to request a revised Rectification Plan before exercising its right to terminate its Contract under Clause 10.4.3(a).

## **10.4 When CCS or the buyer can end a contract**

10.4.1 If any of the following events happen, the Relevant Authority has the right to immediately terminate its Contract by issuing a Termination Notice to the Supplier:

- (a) there is a Supplier Insolvency Event;
- (b) there is a Default that is not corrected in line with an accepted Rectification Plan;
- (c) the Supplier does not provide a Rectification Plan within 10 days of the request;
- (d) there is any material Default of the Contract;
- (e) there is any material Default of any Joint Controller Agreement relating to any Contract;
- (f) there is a Default of Clauses 2.10, 9, 14, 15, 27, 32 or DPS Schedule 9 (Cyber Essentials) (where applicable) relating to any Contract;
- (g) there is a consistent repeated failure to meet the Performance Indicators in DPS Schedule 4 (DPS Management);
- (h) there is a Change of Control of the Supplier which is not pre-approved by the Relevant Authority in writing;
- (i) if the Relevant Authority discovers that the Supplier was in one of the situations in 57 (1) or 57(2) of the Regulations at the time the Contract was awarded; or
- (j) the Supplier or its Affiliates embarrass or bring CCS or the Buyer into disrepute or diminish the public trust in them.

10.4.2 CCS may terminate the DPS Contract if a Buyer terminates an Order Contract for any of the reasons listed in Clause 10.4.1.

10.4.3 If any of the following non-fault based events happen, the Relevant Authority has the right to immediately terminate its Contract by issuing a Termination Notice to the Supplier:

- (a) the Relevant Authority rejects a Rectification Plan;
- (b) there is a Variation which cannot be agreed using Clause 24 (Changing the contract) or resolved using Clause 34 (Resolving disputes);
- (c) if there is a declaration of ineffectiveness in respect of any Variation; or (d) any of the events in 73 (1) (a) or (c) of the Regulations happen.

## **10.5 When the supplier can end the contract**

The Supplier can issue a Reminder Notice if the Buyer does not pay an undisputed invoice on time. The Supplier can terminate an Order Contract if the Buyer fails to pay an undisputed invoiced sum due and worth over 10% of the annual Contract Value within 30 days of the date of the Reminder Notice.

## **10.6 What happens if the contract ends**

10.6.1 Where a Party terminates a Contract under any of Clauses 10.2.1, 10.2.2, 10.4.1, 10.4.2, 10.4.3, 10.5 or

20.2 or a Contract expires all of the following apply:

- (a) The Buyer's payment obligations under the terminated Contract stop immediately.
- (b) Accumulated rights of the Parties are not affected.
- (c) The Supplier must promptly repay to the Buyer any and all Charges the Buyer has paid in advance in respect of Deliverables not provided by the Supplier as at the End Date.
- (d) The Supplier must promptly delete or return the Government Data except where required to retain copies by Law.
- (e) The Supplier must promptly return any of CCS or the Buyer's property provided under the terminated Contract.
- (f) The Supplier must, at no cost to CCS or the Buyer, co-operate fully in the handover and reprocurement (including to a Replacement Supplier).

10.6.2 In addition to the consequences of termination listed in Clause 10.6.1, where the Relevant Authority terminates a Contract under Clause 10.4.1 the Supplier is also responsible for the Relevant Authority's reasonable costs of procuring Replacement Deliverables for the rest of the Contract Period.

10.6.3 In addition to the consequences of termination listed in Clause 10.6.1, if either the Relevant Authority terminates a Contract under Clause 10.2.1 or 10.2.2 or a Supplier terminates an Order Contract under Clause 10.5:

- (a) the Buyer must promptly pay all outstanding Charges incurred to the Supplier; and
- (b) the Buyer must pay the Supplier reasonable committed and unavoidable Losses as long as the Supplier provides a fully itemised and costed schedule with evidence - the maximum value of this payment is limited to the total sum payable to the Supplier if the Contract had not been terminated.

10.6.4 In addition to the consequences of termination listed in Clause 10.6.1, where a Party terminates under Clause 20.2 each Party must cover its own Losses.

10.6.5 The following Clauses survive the termination or expiry of each Contract: 3.2.10, 4.2, 6, 7.5, 9, 11, 12.2, 14, 15, 16, 17, 18, 31.3, 34, 35 and any Clauses and Schedules which are expressly or by implication intended to continue.

## **10.7 Partially ending and suspending the contract**

10.7.1 Where CCS has the right to terminate the DPS Contract it can suspend the Supplier's ability to accept Orders (for any period) and the Supplier cannot enter into any new Order Contracts

during this period. If this happens, the Supplier must still meet its obligations under any existing Order Contracts that have already been signed.

10.7.2 Where CCS has the right to terminate a DPS Contract it is entitled to terminate all or part of it.

10.7.3 Where the Buyer has the right to terminate an Order Contract it can terminate or suspend (for any period), all or part of it. If the Buyer suspends a Contract it can provide the Deliverables itself or buy them from a third party.

10.7.4 The Relevant Authority can only partially terminate or suspend a Contract if the remaining parts of that Contract can still be used to effectively deliver the intended purpose.

10.7.5 The Parties must agree any necessary Variation required by Clause 10.7 using the Variation Procedure, but the Supplier may not either:

- (a) reject the Variation; or
- (b) increase the Charges, except where the right to partial termination is under Clause 10.2.

11.6 In spite of Clauses 11.1, 11.2 but subject to Clauses 11.3 and 11.4, the Supplier's aggregate liability in each and any Contract Year under each Contract under Clause 14.8 shall in no event exceed the Data Protection Liability Cap.

11.7 Each Party must use all reasonable endeavours to mitigate any Loss or damage which it suffers under or in connection with each Contract, including any indemnities.

11.8 When calculating the Supplier's liability under Clause 11.1 or 11.2 the following items will not be taken into consideration:

- (a) Deductions; and

14.5 If at any time the Supplier suspects or has reason to believe that the Government Data provided under a Contract is corrupted, lost or sufficiently degraded, then the Supplier must notify the Relevant Authority and immediately suggest remedial action.

14.6 If the Government Data is corrupted, lost or sufficiently degraded so as to be unusable the Relevant Authority may either or both:

- (a) tell the Supplier to restore or get restored Government Data as soon as practical but no later than 5 Working Days from the date that the Relevant Authority receives notice, or the Supplier finds out about the issue, whichever is earlier; and/or
- (b) restore the Government Data itself or using a third party.

14.7 The Supplier must pay each Party's reasonable costs of complying with Clause 14.6 unless CCS or the Buyer is at fault.

14.8 The Supplier:

- (a) must provide the Relevant Authority with all Government Data in an agreed open format within 10 Working Days of a written request;

- 15.3 In spite of Clause 15.1, the Supplier may disclose Confidential Information on a confidential basis to Supplier Staff on a need-to-know basis to allow the Supplier to meet its obligations under the Contract. The Supplier Staff must enter into a direct confidentiality agreement with the Relevant Authority at its request.

## **17. Invalid parts of the contract**

If any part of a Contract is prohibited by Law or judged by a court to be unlawful, void or unenforceable, it must be read as if it was removed from that Contract as much as required and rendered ineffective as far as possible without affecting the rest of the Contract, whether it is valid or enforceable.

## **18. No other terms apply**

The provisions incorporated into each Contract are the entire agreement between the Parties. The Contract replaces all previous statements, agreements and any course of dealings made between the Parties, whether written or oral, in relation to its subject matter. No other provisions apply.

## **19. Other people's rights in a contract**

No third parties may use the Contracts (Rights of Third Parties) Act 1999 (CRTPA) to enforce any term of the Contract unless stated (referring to CRTPA) in the Contract. This does not affect third party rights and remedies that exist independently from CRTPA.

## **20. Circumstances beyond your control**

20.1 Any Party affected by a Force Majeure Event is excused from performing its obligations under a Contract while the inability to perform continues, if it both:

- (a) provides a Force Majeure Notice to the other Party; and
- (b) uses all reasonable measures practical to reduce the impact of the Force Majeure Event.

- 24.4 CCS and the Buyer are not required to accept a Variation request made by the Supplier.
- 24.5 If there is a General Change in Law, the Supplier must bear the risk of the change and is not entitled to ask for an increase to the DPS Pricing or the Charges.
- 24.6 If there is a Specific Change in Law or one is likely to happen during the Contract Period the Supplier must give CCS and the Buyer notice of the likely effects of the changes as soon as reasonably practical. They must also say if they think any Variation is needed either to the Deliverables, DPS Pricing or a Contract and provide evidence:
- (a) that the Supplier has kept costs as low as possible, including in Subcontractor costs; and
  - (b) of how it has affected the Supplier's costs.
- 24.7 Any change in the DPS Pricing or relief from the Supplier's obligations because of a Specific Change in Law must be implemented using Clauses 24.1 to 24.4.
- 24.8 For 101(5) of the Regulations, if the Court declares any Variation ineffective, the Parties agree that their mutual rights and obligations will be regulated by the terms of the Contract as they existed immediately prior to that Variation and as if the Parties had never entered into that Variation.

26.3 The Beneficiary must not make admissions about the Claim without the prior written consent of the Indemnifier which can not be unreasonably withheld or delayed.

26.4 The Indemnifier must consider and defend the Claim diligently using competent legal advisors and in a way that does not damage the Beneficiary's reputation.

26.5 The Indemnifier must not settle or compromise any Claim without the Beneficiary's prior written consent which it must not unreasonably withhold or delay.

26.6 Each Beneficiary must take all reasonable steps to minimise and mitigate any losses that it suffers because of the Claim.

26.7 If the Indemnifier pays the Beneficiary money under an indemnity and the Beneficiary later recovers money which is directly related to the Claim, the Beneficiary must immediately repay the Indemnifier the lesser of either:
