The first two studies were conducted by researchers at the University of Illinois at Chicago. In the first study, 100 students completed a questionnaire about their attitudes toward gay, lesbian, and transgender people. The results showed that students who had more contact with LGBTQ+ individuals had more positive attitudes. This finding was replicated in a second study involving 200 students. Both studies also found that students who had taken LGBTQ+ related courses or participated in campus organizations had more positive attitudes. These findings suggest that exposure to LGBTQ+ individuals and education can lead to more positive attitudes.

- F4.12 If the rights and obligations under the Contract are assigned, novated or otherwise disposed of pursuant to clause F4.10 to a body which is not a Contracting Authority or if there is a change in the legal status of the Authority such that it ceases to be a Contracting Authority (in the remainder of this clause both such bodies being referred to as the “**Transferee**”):
- (a) the rights of termination of the Authority in clauses H1 and H2 shall be available to the Contractor in respect of the Transferee; and
 - (b) the Transferee shall only be able to assign, novate or otherwise dispose of its rights and obligations under the Contract or any part thereof with the prior consent in writing of the Contractor.

F5 Waiver

- F5.1 The failure of either Party to insist upon strict performance of any provision of the Contract, or the failure of either Party to exercise, or any delay in exercising, any right or remedy shall not constitute a waiver of that right or remedy and shall not cause a diminution of the obligations established by the Contract.
- F5.2 No waiver shall be effective unless it is expressly stated to be a waiver and communicated to the other Party in writing in accordance with clause A4 (Notices and Communications).
- F5.3 A waiver of any right or remedy arising from a breach of the Contract shall not constitute a waiver of any right or remedy arising from any other or subsequent breach of the Contract.

- F6.1 If, after the Commencement Date, the Authority's requirements change, the Authority may request a Variation subject to the terms of this clause 6.
- F6.2 The Authority may request a Variation by notifying the Contractor in writing of the Variation and giving the Contractor sufficient information to assess the extent of the Variation and consider whether any change to the Price is required in order to implement the Variation within a reasonable time limit specified by the Authority. If the Contractor accepts the Variation it shall confirm it in writing.
- F6.3 If the Contractor is unable to accept the Variation or where the Parties are unable to agree a change to the Price, the Authority may:

by a duly authorised representative of the Contractor in addition to the warranties and representations set out in clause G2.

- F6.6 The provisions of clauses F6.4 and F6.5 may be varied in an emergency if it is not practicable to obtain the Authorised Representative's approval within the time necessary to make the Variation in order to address the emergency. In an emergency, Variations may be approved by a different representative of the Authority. However, the Authorised Representative shall have the right to review such a Variation and require a CCN to be entered into on a retrospective basis which may itself vary the emergency Variation.

F7 Severability

- F7.1 If any provision of the Contract which is not of a fundamental nature is held invalid, illegal or unenforceable for any reason by any court of competent jurisdiction, such provision shall be severed and the remainder of the provisions of the Contract shall continue in full force and effect as if the Contract had been executed with the invalid, illegal or unenforceable provision eliminated.

F8 Remedies Cumulative

- F8.1 Except as expressly provided in the Contract all remedies available to either Party for breach of the Contract are cumulative and may be exercised concurrently or separately, and the exercise of any one remedy shall not be deemed an election of such remedy to the exclusion of other remedies.

- H8.2 The Authority shall take all necessary precautions to ensure that the information referred to in clause H8.1 is given only to potential providers who have qualified to tender for the future provision of the Services.

- H8.3 The Authority shall require that all potential providers treat the information in confidence; that they do not communicate it except to such persons within their organisation and to such extent as may be necessary for the purpose of preparing a response to an invitation to tender issued by the Authority; and that they shall not use it for any other purpose.
- H8.4 The Contractor indemnifies the Authority against any claim made against the Authority at any time by any person in respect of any liability incurred by the Authority arising from any deficiency or inaccuracy in information which the Contractor is required to provide under clause H8.1.
- H8.5 The Contractor shall allow access to the Premises in the presence of the Authorised Representative, to any person representing any potential provider whom the Authority has selected to tender for the future provision of the Services.
- H8.6 If access is required to the Contractor's Premises for the purposes of clause H8.5, the Authority shall give the Contractor 7 days' notice of a proposed visit together with a list showing the names of all persons who will be visiting. Their attendance shall be subject to compliance with the Contractor's security procedures, subject to such compliance not being in conflict with the objectives of the visit.
- H8.7 The Contractor shall co-operate fully with the Authority during any handover at the end of the Contract. This co-operation shall include allowing full access to, and providing copies of, all documents, reports, summaries and any other information necessary in order to achieve an effective transition without disruption to routine operational requirements.
- H8.8 Within 10 Working Days of being requested by the Authority, the Contractor shall transfer to the Authority, or any person designated by the Authority, free of charge, all computerised filing, recording, documentation, planning and drawing held on software and utilised in the provision of the Services. The transfer shall be made in a fully indexed and catalogued disk format, to operate on a proprietary software package identical to that used by the Authority.

To facilitate this transfer, the Contractor shall provide the Authority free of charge with full access to its Staff, and in addition, copies of all documents, reports, summaries and any other information requested by the Authority. The Contractor shall comply with the Authority's request for information no later than 15 Working Days from the date that that request was made.

I DISPUTES AND LAW

I1 Governing Law and Jurisdiction

- I1.1 Subject to the provisions of clause I2 the Contract, including any matters arising out of or in connection with it, shall be governed by and interpreted in accordance with English Law and shall be subject to the jurisdiction of the Courts of England and Wales. The submission to such jurisdiction shall not limit the right of the Authority to take proceedings against the Contractor in any other court of competent jurisdiction, and the taking of proceedings in any other court of competent jurisdiction shall not preclude the taking of proceedings in any other jurisdiction whether concurrently or not.

I2 Dispute Resolution

- I2.1 The Parties shall attempt in good faith to negotiate a settlement to any dispute between them arising out of or in connection with the Contract within 20 Working Days of either Party notifying the other of the dispute and such efforts shall involve the escalation of the dispute to the finance director of the Contractor and the commercial director of the Authority.
- I2.2 Nothing in this dispute resolution procedure shall prevent the Parties from seeking from any court of competent jurisdiction an interim order restraining the other Party from doing any act or compelling the other Party to do any act.
- I2.3 If the dispute cannot be resolved by the Parties pursuant to clause I2.1 either Party may refer it to mediation pursuant to the procedure set out in clause I2.5.
- I2.4 The obligations of the Parties under the Contract shall not cease, or be suspended or delayed by the reference of a dispute to mediation (or arbitration) and the Contractor and the Staff shall comply fully with the requirements of the Contract at all times.
- I2.5 The procedure for mediation and consequential provisions relating to mediation are as follows:
- (a) a neutral adviser or mediator (the “**Mediator**”) shall be chosen by agreement between the Parties or, if they are unable to agree upon a Mediator within 10 Working Days after a request by one Party to the other or if the Mediator agreed upon is unable or

unwilling to act, either Party shall within 10 Working Days from the date of the proposal to appoint a Mediator or within 10 Working Days of notice to either Party that he is unable or unwilling to act, apply to the Centre for Effective Dispute Resolution to appoint a Mediator;

- (b) the Parties shall within 10 Working Days of the appointment of the Mediator meet with him in order to agree a programme for the exchange of all relevant information and the structure to be adopted for negotiations. If appropriate, the Parties may at any stage seek assistance from the Centre for Effective Dispute Resolution to provide guidance on a suitable procedure;
- (c) unless otherwise agreed, all negotiations connected with the dispute and any settlement agreement relating to it shall be conducted in confidence and without prejudice to the rights of the Parties in any future proceedings;
- (d) if the Parties reach agreement on the resolution of the dispute, the agreement shall be recorded in writing and shall be binding on the Parties once it is signed by their duly authorised representatives;
- (e) failing agreement, either of the Parties may invite the Mediator to provide a non-binding but informative written opinion. Such an opinion shall be provided on a without prejudice basis and shall not be used in evidence in any proceedings relating to the Contract without the prior written consent of both Parties; and
- (f) if the Parties fail to reach agreement within 60 Working Days of the Mediator being appointed, or such longer period as may be agreed by the Parties, then any dispute or difference between them may be referred to the Courts unless the dispute is referred to arbitration pursuant to the procedures set out in clause 12.6.

12.6 Subject to clause 12.2, the Parties shall not institute court proceedings until the procedures set out in clauses 12.1 and 12.3 have been completed save that:

- (a) The Authority may at any time before court proceedings are commenced, serve a notice on the Contractor requiring the dispute to be referred to and resolved by arbitration in accordance with clause 12.7;
- (b) if the Contractor intends to commence court proceedings, it shall serve notice on the Authority of its intentions and the Authority shall have 21 days following receipt of such notice to serve a reply on the Contractor requiring the dispute to be referred to and resolved by arbitration in accordance with clause 12.7; and
- (c) the Contractor may request by notice to the Authority that any dispute be referred and resolved by arbitration in accordance with clause 12.7, to which the Authority may consent as it sees fit.

12.7 If any arbitration proceedings are commenced pursuant to clause 12.6:

- (a) the arbitration shall be governed by the provisions of the Arbitration Act 1996 and the Authority shall give a notice of arbitration to the Contractor (the “**Arbitration Notice**”) stating:
 - (i) that the dispute is referred to arbitration; and
 - (ii) providing details of the issues to be resolved;

- (b) the London Court of International Arbitration (“**LCIA**”) procedural rules in force at the date that the dispute was referred to arbitration in accordance with 12.7(b) shall be applied and are deemed to be incorporated by reference to the Contract and the decision of the arbitrator shall be binding on the Parties in the absence of any material failure to comply with such rules;
- (c) the tribunal shall consist of a sole arbitrator to be agreed by the Parties;
- (d) if the Parties fail to agree the appointment of the arbitrator within 10 days of the Arbitration Notice being issued by the Authority under clause 12.7(a) or if the person appointed is unable or unwilling to act, the arbitrator shall be appointed by the LCIA;
- (e) the arbitration proceedings shall take place in London and in the English language; and
- (f) the arbitration proceedings shall be governed by, and interpreted in accordance with, English Law.

SCHEDULE 1 - SPECIFICATION

1. Background

There is a growing concern about the widespread occurrence and abundance of microplastics (particles below 5 mm in size) and their unknown environmental effects. To date, there are no widely accepted protocols for the extraction and detection of microplastics in environmental compartments (sediment, biota and water). Cefas has developed a fast screening method for microplastics in environmental compartments in Sri Lanka but is currently lacking the capability for particle characterisation for the smaller sized items (below 300 um in size). This capability is required for the accurate investigation in microplastic concentrations and composition that is essential to assess their behaviour in the environment and the risks for biota and human health related to exposure.

Tight deadlines to deliver national and international projects is creating an urgent necessity to process samples quickly to cope with the high volume. However, gains in time-efficiency in the data acquisition have usually resulted in a reducing spatial resolution. Therefore, the ability to rapidly process whilst maintaining accuracy and spatial resolution is a critical requirement for this application.

As a result, the marine litter team at Cefas Lowestoft Laboratory currently require one fully motorised micro-FTIR in order to carry out analysis on microplastics particles. The unit will be housed at the Wayamba University of Sri Lanka and therefore require delivery and installation in Sri Lanka. The main objective is the quantification and characterisation of particles on filters (extracted from sediment, biota and water samples) quickly, efficiently and accurately.

Cefas may require further micro-FTIR units for other locations under this programme of work and this Contract will cover provision of additional units up to a total Contract value of £500,000. **Please note that any purchase beyond the current requirement of one unit is not guaranteed.**

2. Scope of Requirements

2.1. Technical Requirement

- 1 x Standalone micro-FT-IR with microscope
- All hardware should be motorised and software controlled
- Small footprint
- TE-MCT detector for high sensitivity without the need for liquid nitrogen

2.2. Environmental Considerations

- Unit should have a low power consumption
- Unit should be designed for reuse/recycle and of regenerative nature to eliminate waste where possible
- Consideration of how packaging will be recycled at point of delivery
- Consideration of whole life costing for use of the unit

2.3. Software and libraries

- All hardware should be complementary motorised, and software controlled
- Software should be user-friendly
- A list of libraries should be included, with an extended library for polymers.
- Options should be available for the creation of custom-made libraries

2.4. PC and software licences

- A PC is also required and must have an up to date operation system, preferable windows 11, as well as a single user licence for the operating software.

2.5. On-site installation and training

- It is Cefas' preference that the Tenderer provides face to face onsite training and full installation for the instrument to nominated staff at Wayamba University in Sri Lanka. All costs including any T&S for the delivery of this requirement should be included in your bid.
 - The Tenderer is required to confirm what other methods can deliver this requirement effectively, in the event face to face is not possible.
- A full training manual on the operating and troubleshooting of the equipment should be included in the bid as well as the set-up of a routine method for the analysis of microplastics.

2.6. Ease of maintenance

- The setup should require very little in the way of routine maintenance.
- All the necessary maintenance steps should be covered in the familiarisation training.

2.7. Warranties/Guarantees/Servicing and spare parts

The tenderer is required to describe additional warranties and service plans. As a minimum Cefas require:

- Initial warranties which will start from the point of acceptance of delivery – describe what is covered and included.
- Extended warranties on the central spectrometer components (interferometer, laser, source) – describe what is covered and included.
- Spare parts should be readily accessible and should be held in stock for at least 10 years – please confirm/describe availability.
- Onsite servicing required as dictated by the indicated service plans available

3. Delivery Date

Cefas require delivery of the unit as soon as possible – delivery lead times should be included in your bid response as per Technical Questionnaire.

Tender Submission

5.1.1 Delivery Lead Time (5)

Please confirm your estimated dispatch/lead time for the current required single unit for Sri Lanka, upon Contract finalisation (estimated 7 November 2023).

Higher marks will be awarded for shorter lead times.

RESPONSE.

Current lead time for LUMOS FT-IR Microscope is 15 weeks upon acceptance of PO and export clearance.

Once an order is placed and accepted at the factory, an order confirmation will be issued, detailing the scheduled week of shipment of the instrument to site. An update as the build progresses can be requested so that preparations and expectations of receipt are kept accurate.

5.1.2 Shipping Capability (not scored, for information only)

Please provide details of your capability and recent experience of shipping internationally to INCOTERM DDP, including any experience shipping to Sri Lanka and the South Asia region, and to remote or small island nations

RESPONSE.

Bruker is a worldwide corporation with local offices all over the globe along with TPA's in certain areas. As such we are well versed in shipping internationally to INCOTERM DDP. We have a major office in India and have had direct experience with CEFAS shipping to Belize, but more relevantly here, to Sri Lanka and small island nations such as the Maldives and Vanuatu. This was met with some challenges during the COVID pandemic, but was still effectively managed on the whole, with lessons learned for shipping in the future to similar locations.

5.1.3 Compliance to Requirement (30)

Please describe the specification and capability of the fully motorised micro-FTIR, ensuring that all points listed in the Technical Requirements, in the Scope of Requirements in APPENDIX 4 are met. Please also provide a full training manual on the operating and troubleshooting of the equipment.

RESPONSE

Scope of requirements and Bruker response is set out as follows:

Technical Requirement

- 1 x Standalone micro-FT-IR with microscope
- All hardware should be motorised and software controlled
- Small footprint
- TE-MCT detector for high sensitivity without the need for liquid nitrogen

- **SCOPE** – 1 x Standalone micro-FT-IR with microscope
 - **RESPONSE** - Bruker offers 1 LUMOS II FTIR Microscope with Transmission, Reflection and ATR measurement modes.

- **SCOPE** - All hardware should be motorised, and software controlled
 - **RESPONSE** – LUMOS II is the most completely motorised FTIR Microscope available on the market. All aspects of operation of the LUMOS II are fully automated, software controlled and motorised:
 - ATR crystal
 - Apertures
 - Condenser
 - Polariser
 - Analyzer
 - X,Y,Z-sample stage
 - Change into IR mode
 - Change into Vis mode
 - Change of numerical aperture
 - Electronic recognition of stage plates

All components of the FTIR microscope like source, laser, detectors, electronics and interferometer as well as the system humidity are also permanently monitored for correct operation.

- **SCOPE** - Small footprint
 - **RESPONSE** – LUMOS II is very compact with the following dimensions:

- Width x height x depth: 300 x 640 x 520 mm

The LumosII needs no additional services, like dry air and sits on the Lab bench in a highly compact and convenient fashion whilst still retained the easiest access to the sample stage.

- **SCOPE** - TE-MCT detector for high sensitivity without the need for liquid nitrogen
 - **RESPONSE** – The LUMOS II FTIR Microscope in this tender bid is quoted with a TE-MCT detector – offering much higher sensitivity than a RT-DTGS (offered by other vendors) without the need for Liquid Nitrogen. Sub 50µm particles are able to be detected and analysed with this detector type in a short time frame, and can be suitable for the analysis of samples down to 15 x 15 µm, which is not possible with RT detectors.

A full operator manual will be supplied with the LUMOS II FTIR Microscope.

5.1.4 Environmental Considerations (10)

Please describe how the proposed unit meets the requirements listed in the Environmental Considerations, in the Scope of Requirements in APPENDIX 4.

Scope of requirements and Bruker response is set out as follows:

- Unit should have a low power consumption
- Unit should be designed for reuse/recycle and of regenerative nature to eliminate waste where possible
- Consideration of how packaging will be recycled at point of delivery
- Consideration of whole life costing for use of the unit

RESPONSE

- **SCOPE** - Low power consumption
 - **RESPONSE** – Power consumption 100 - 240 VAC, 50 - 60 Hz, typically 50 W , max. 90 W
- **SCOPE** - designed for reuse/recycle and of regenerative nature to eliminate waste where possible
 - **RESPONSE** – Like all Bruker Instrumentation, the LumosII has been designed to be long lasting with minimal consumable components. Long lasting components for over 10 years use are fundamental to its design. As with many Bruker legacy instruments, when that time comes in the future, many of the parts can be reused and redistributed by the factory to similar instruments in the field if applicable.
- **SCOPE** - Consideration of how packaging will be recycled at point of delivery
 - **RESPONSE** – As the LumosII is a highly precise scientific instrument it is packaged sufficiently robustly to withstand the shipping by air and land freight. Often the packaging is wooden crating and recycled protection materials which can in turn be recycled at the point of delivery once the instrument has been successfully installed.
- **SCOPE** - Consideration of whole life costing for use of the unit

RESPONSE – The LumosII FTIR microscope is indeed characterised by its low cost of ownership. For components with limited lifetime such as the laser and IR source, a lifetime of 10 years and 5 years respectively, is guaranteed without extra costs. No consumables or services are required, due to the high sensitivity TE-MCT detector-option without the need of liquid-nitrogen cooling being available. This reduces consumable costs and also improves up-time of the instrument on a day by day basis. The FTIR microscope is inert to water vapor and unaffected by humidity, as the IR-transparent window material and the beam splitter itself are made from ZnSe. KBr optics (often used in IR microscopes) is not a good option in areas of possible high humidity as it is too hygroscopic a material and needs careful and constant purging to avoid irrevocable damage. This is NOT the case with LumosII and will sit happily on a lab bench without the need for active purging. For 10 years use aside from power and sample preparation materials, consumable costs can be kept to just the cost of an IR source, that of a few hundred pounds.

1.5 PC and Operating System (10)

Please describe the PC package provided, including the operating system.

RESPONSE

Details of the PC/Operating System offered are:

CS81/29+ Data System, High-Performance

PCIe 16x
- *1x PCIe 4x*
- *1x PCIe 1x*
- *Operating System: Windows 10 Enterprise*

The specification of this data station is carefully chosen to integrate with the software and FTIR Microscope hardware to ensure all aspects perform flawlessly.

5.1.6 Software and Libraries (10)

Please describe software provided and the included libraries ensuring that the specification in APPENDIX 4 is met, and include information on how the library for polymers has been or can be extended.

Scope of Software and Libraries and Bruker response is set out as follows:

- All hardware should be complementary motorised, and software controlled.
- Software should be user-friendly.
- A list of libraries should be included, with an extended library for polymers.
- Options should be available for the creation of custom-made libraries.

RESPONSE

- **SCOPE** - All hardware should be complementary motorised, and software controlled
 - **RESPONSE** – LUMOS II is the most completely motorised FTIR Microscope available on the market. All aspects of operation of the LUMOS II are fully automated, software controlled and motorised by Bruker's "All-in-one" Opus Software:
 - ATR crystal
 - Apertures
 - Condenser
 - Polarizer
 - Analyzer
 - X,Y,Z-sample stage
 - Change into IR mode
 - Change into Vis mode
 - Change of numerical aperture
 - Electronic recognition of stage plates

All components of the FTIR microscope like source, laser, detectors, electronics and interferometer as well as the system humidity are permanently monitored for correct operation. Any failure is indicated instantly to the user via the software.

The FTIR microscope is equipped with fully automated instrument performance tests (OQ, PQ), run within the Opus Instrument Software. These automated test series determine if the microscope is operating within specification. This includes tests for the accuracy of the motorized stage. Whenever a component of the FTIR microscope may be out of specification or a test for OQ or PQ has expired, the user is notified immediately by the software.

- **SCOPE** - Software should be user-friendly
 - **RESPONSE** - Bruker is working hard to make advanced techniques more accessible to users of any skill level. The LUMOS II FTIR microscope keeps

following that philosophy. The motivation behind this is obvious: in order to benefit from its universal applicability, the user must first be empowered to take advantage of FTIR microscopy. This is the philosophy of the LUMOS and as a result Bruker made micro FTIR faster, better, and most importantly even simpler.

LUMOS II hardware, software and user interface were built around the idea, that even beginners should obtain exceptional results in a minimum amount of time. The full process of data acquisition, data processing, data evaluation and data visualization/reporting is managed all within the Opus Software. The operator uses intuitive wizard routines that guides very smoothly, step by step through the data acquisition. This assistant always provides the perfectly adapted workflow and functions for the chosen measurement procedure (measurement mode, selected detector) so after the physical positioning of the sample on the stage, everything is handled within the experiment method using the mouse, keyboard and microscope joystick.

- **SCOPE** - A list of libraries should be included, with an extended library for polymers.
 - **RESPONSE** – 1025048 ATR-FTIR-Library COMPLETE (ATR-LIB-COMPLETE+) is included in the tender bid.
 - 1025048 complete ATR library is a comprehensive spectral library and includes extended ATR spectra from polymers, monomers, additives, plasticizer and fillers, in addition to other spectral classes such as building materials, cosmetics, excipients, organic and inorganic chemicals, biochemicals, fibres, proteins, fatty acids, lipids, ingredients, natural products, silicon containing compounds, solvents, pesticides, pollutants, semiconductors, dyes, paints, coatings, food, food additives, minerals, lubricants, surfactants, kidney stones, pharmaceuticals and drugs.
 - In total > 26,000 ATR-FTIR-Spectra.
- **SCOPE** - Options should be available for the creation of custom-made libraries
 - **RESPONSE** – OPUS/SEARCH software is included in the tender bid. OPUS/SEARCH software allows the end user to create, maintain and search unlimited spectral library databases. This means that in the event of a substance not being matched to the comprehensive library already available, the user can add materials to their on bespoke library and link it to the library search routine.
 - As well as conventional identification of pure substances, OPUS/SEARCH has powerful functionality to perform mixture analysis on samples of mixed composition.

5.1.7 Onsite Installation and Training (15)

Please describe how onsite installation and face to face training will be provided to meet the need specified in APPENDIX 4.

If onsite face to face is not possible please provide details of why this cannot be delivered and provide an alternative method which can deliver this requirement effectively.

Scope of Onsite Installation and Training and Bruker response is set out as follows:

- It is Cefas' preference that the Tenderer provides face to face onsite training and full installation for the instrument to nominated staff at Wayamba University in Sri Lanka. All costs including any T&S for the delivery of this requirement should be included in your bid.
 - The Tenderer is required to confirm what other methods can deliver this requirement effectively, in the event face to face is not possible.
- A full training manual on the operating and troubleshooting of the equipment should be included in the bid as well as the set-up of a routine method for the analysis of microplastics.

RESPONSE

- **SCOPE** - It is Cefas' preference that the Tenderer provides face to face onsite training and full installation for the instrument to nominated staff at Wayamba University in Sri Lanka. All costs including any T&S for the delivery of this requirement should be included in your bid.
 - The Tenderer is required to confirm what other methods can deliver this requirement effectively, in the event face to face is not possible

RESPONSE –

- On site installation and face-to-face training are included in the tender bid. These services will be provided from the Bruker office by experienced Service and Applications personnel.
 - In the event that face-to face interactions are not possible, effective user training can be provided via MS Teams or similar WebEx on-line resource. Due to our experiences with the pandemic, this is something that we have been able to offer and become experienced in effectively delivering.
-
- **SCOPE** - A full training manual on the operating and troubleshooting of the equipment should be included in the bid as well as the set-up of a routine method for the analysis of microplastics

RESPONSE –

- A full operation manual for LUMOS II is supplied with the system.

- A routine method for analysis of microplastics on a filter will be provided during the on-site training session.

5.1.8 Ease of Maintenance (10)

Please describe how the equipment is to be maintained by the user on a regular basis.

RESPONSE

The only maintenance steps are:

Running Performance Qualification (PQ) on a periodic (typically monthly) basis. The PQ test is fully automated and requires no input from the end user other than to start the test.

Occasional replacement /regeneration of the desiccant. Typically, desiccant needs to be replaced every 6 – 12 months, the software will indicate when desiccant needs to be replaced. The desiccant is there for the stabilisation of water vapour in the system, rather than to protect the optics from damage. The FTIR microscope is inert to water vapor and unaffected by humidity, as the IR-transparent window material and the beam splitter itself are made from ZnSe. KBr optics (often used in IR microscopes) is not a good option in areas of possible high humidity as it is too hygroscopic a material and needs careful and constant purging to avoid irrevocable damage. This is NOT the case with LumosII and will sit happily on a lab bench without the need for active purging. Actual replacement of desiccant is very easy, taking 30 seconds or so for the end user, i.e. this does not require a service engineer.

All the necessary maintenance steps are covered in the familiarisation training.

5.1.9 Warranties/Guarantees/Servicing/Parts and Reliability (10)

Please describe what is included in the initial warranty period, as well as providing information on additional warranties and service plans. As a minimum Cefas require:

- Extended warranties on the central spectrometer components (interferometer, laser, source)
- Spare parts should be readily available and in stock for the next 10 years please describe availability
- Details on ongoing onsite servicing and maintenance

Scope of Warranties/Guarantees/Servicing/Parts and Reliability and Bruker response is set out as follows:

The tenderer is required to describe additional warranties and service plans. As a minimum Cefas require:

- Initial warranties which will start from the point of acceptance of delivery – describe what is covered and included.
- Extended warranties on the central spectrometer components (interferometer, laser, source) – describe what is covered and included.
- Spare parts should be readily accessible and should be held in stock for at least 10 years – please confirm/describe availability.
- Onsite servicing required as dictated by the indicated service plans available

RESPONSE

Scope of Warranties/Guarantees/Servicing/Spare parts and Bruker response is set out as follows:

The tenderer is required to describe additional warranties and service plans. As a minimum Cefas require:

- **SCOPE** - Initial warranties which will start from the point of acceptance of delivery – describe what is covered and included

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995. The public sector has also become an important employer of women, with 5.5 million women employed in the public sector in 1995, compared with 4.5 million in 1980.

There are a number of reasons why the public sector has become an important employer of women. One reason is that the public sector has a high proportion of women in its workforce. In 1995, 88% of the public sector workforce were women, compared with 78% in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are traditionally held by women, such as teaching, nursing, and social work.

Another reason why the public sector has become an important employer of women is that it has a high proportion of jobs that are full-time and permanent. In 1995, 68% of the public sector workforce were employed on full-time contracts, compared with 58% in 1980. This is due to the fact that the public sector has a high proportion of jobs that are essential to the functioning of the state, such as those in the health service and the education system.

A third reason why the public sector has become an important employer of women is that it has a high proportion of jobs that are well-paid. In 1995, the average salary of a public sector employee was £18,000, compared with £15,000 in 1980. This is due to the fact that the public sector has a high proportion of jobs that are in the higher grades of the public sector pay scale, such as those in the senior management and professional grades.

There are a number of other factors that have contributed to the growth of the public sector as an employer of women. These include the fact that the public sector has a high proportion of jobs that are in the public sector, and the fact that the public sector has a high proportion of jobs that are in the public sector. These factors have all contributed to the growth of the public sector as an employer of women.

The public sector has also become an important employer of women because it has a high proportion of jobs that are in the public sector.
