

ITT Clarifications

Tender Reference: 3205-SRB-310124

Issued 07/02/2024

Q1	Can [the project] be subcontracted to an UK registered company whose resources are working remotely from India?
A1	Yes
Q2	I'm seeking a clarification around the "video/voice messaging for users pitches", would this be a video messaging feature like zoom or simply a series of videos/audio files aligned vertically that someone deciding upon pitches would expect to be able to play?
A3	We would like to have the ability for users to augment their pitches with either video or audio clips. We would take advice on how best to achieve this from the successful bidder.
Q4	I'd like a clarification around the functionality of news/content "summaries" and "suggested" contacts because in my mind these would both suggest some kind of ChatGPT-like functionality.
A4	News/ content "summaries" are seen to be dynamic content based on user activity both on and off site. "Suggested contacts" is seen to be a function whereby a user is recommended to another users based on shared interests. It should be designed with the overarching objective of bringing complementary companies around industrial opportunities in mind.
Q5	Can I apply for this tender as a sole trader?
A5	Yes, subject to meeting the corporate requirements set out in the ITT.
