One of the overall aims of ResilienceDirect is to share protectively marked documents up to and including OFFICIAL – SENSITIVE. The ResilienceDirect platform is hosted and managed by UKFast, within secure Data Centres that have been designed for HM Government use. The system and all of the data held within it is hosted entirely within the UK, and it administered by vetted staff holding SC Clearance. The UKFast data Centres have been assessed by a number of Public Sector organisations for security and compliance; the facilities from which the ResilienceDirect platform is hosted is registered with the Home Office as a Police Assured Server Facility (PASF). • The UKFast Data Centres also hold the following certifications: • ISO 27001:2013 - information security of our business operations and the data that is entrusted to UKFast. • ISO 27017 provides information security controls that must be implemented, specifically relating to cloud services. • ISO 27018:2019 complements much of the data processing responsibilities set out by the GDPR in its aims to protect personal data in addition to EU requirements. • ISO 22301:2012 provides a framework for the continual maintenance and improvement of a business continuity management system. • Cyber Essentials + government endorsed standard that demonstrates UKFast have

Email Security Guidance All public sector organisations must follow guidance on how to set up email services securely. Transport Layer Security (TLS) is an encryption protocol that protects data when it moves between computers. The ResilienceDirect email relay is configured to allow outbound email only. The email relay will

	also send TLS (encrypted) and non-TLS mail. Please click here for more information. 3. 2 Factor Authentication (2FA) On a small number of occasions, we have been asked why we do not use 2 factor authentication when accessing ResilienceDirect. The reason for this is that ResilienceDirect is provided to the emergency planning community to deal with emergency incidents and is provided so that shared situational awareness is easily accessible in times of emergency. ResilienceDirect users may access ResilienceDirect via their mobile devices, laptops, work computers to name a few, so registering a 2 authenticated device to a ResilienceDirect account would cause major issues for access during these emergency times. The ResilienceDirect National Cyber Security Centre liaison officer is fully supportive of this approach.
