

The D&I (Diagnostic & Integration) Specialists

If you'd like to know us a little better ...

iSeer Consulting is a niche consultancy specialising in **Clinical and Life Sciences**. We are one of the only consultancies in the UK dedicating our expertise and resources to help you achieve the **best of breed in complex Diagnostic and Integration programmes**.

With our Partners, we have supported clients through some of the largest and most iconic innovations in Healthcare and Life Sciences of the last 20 years, we write blogs and articles, we lecture at events, sit on management boards and we train executives. **We really know the technology driving innovation.**

Our team all come from 'Top Tier' consultancies, but we're certainly very different in touch, feel and the way we work with you in small, highly experienced teams, **listening** to what you want from us, we tailor our approach to suit you.

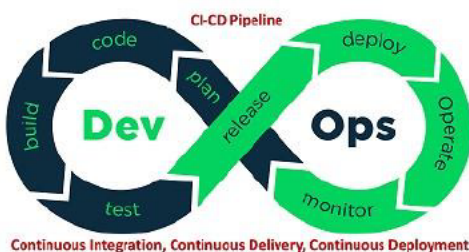

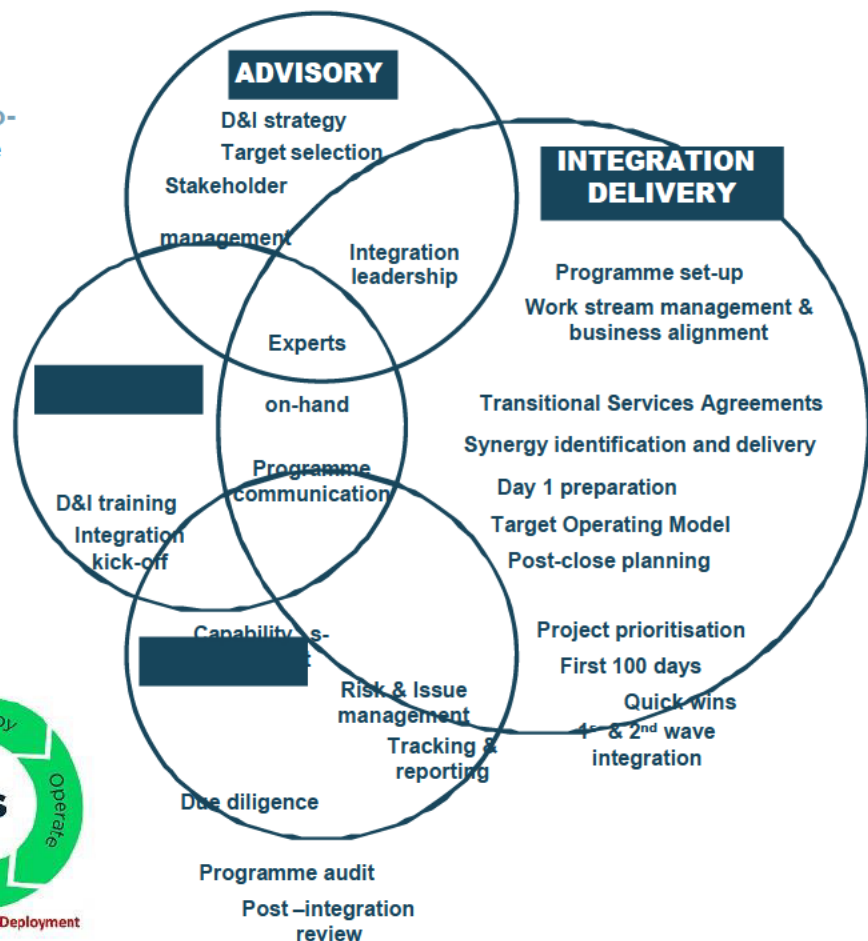

We're passionate about working with our clients throughout and between their implementation, so we strive to build and maintain genuine relationships. As part of this, we place great value on **transferring our skills and knowledge over to you**, though capability improvement and training.

Diagnostic and Integration Pipeline

Because the benefits of successful deployment must be delivered through **structured integration programmes**, our services are centred around our extens-

ive experience of D&I programme delivery.

This diagram illustrates what we do, but it's how we do it that makes us easy to work with.

Proposal of works
